British possessions, covers an area of 151,790 sq. m., and has a population of about 200,000 It is administered as a part of the Dutch East Indies, by a Resident at Ternate, who is responsible to the Governor-General. See COLONIES, LTC, OF EUROPEAN POWERS.

New Hebrides. A long chain of volcanic Islands in western Polynesia, lying W. of Figure and N.E. of New Caledonia. Area about 3000 sq. m.

New Jerusalem Church The New Church, whose members are commonly called "Swedenborgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b 1688, d 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondenceswhich constitutes the key by which that sense may be unlocked-are set forth in Swedenborg's theological writings. The fundamental doctrines taught are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and then operation together, and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him Swedenborg's writings were first extensively made known in this country by a clergyman of the Church of England, the Rev. John Clowes, rector of St John's, Manchester, who translated 'a great number of them, including his greatest work, the "Areana Colestia" (13 vols.) Another clergyman, the Rev. William Hill, translated the work second only in importance to it, the "Apocalypse Explained" (6 vols.) The Rev. Thomas Hartley, ector of Winwick, translated "Heaven and Hell" Very early, some drawn from the ranks of the Methodist preachers and other students evils therein forbidden, as sins against Him of the Methodist preachers and other students of Swedenborg, formed a separate organisa-tion for worship (1788), which has continued and increased. There are existing 85 societies, with 4868 registered members. They have Sunday-schools with 6413 children, and day-schools with 7713 scholars. There are twelve societies in London and its neighbourhood. Their statistics, however, fail to tell the number of their receivers, who have always consisted of separatists and non-separatists the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Jerusalem Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a Conference, which meets annually, and consists of all the ministers of the conference of the conferenc ters and of from one to three representatives from each society, according to the number of its members. The Swedenborg Society, 1, Bloomsbury St., was founded 1810 for translating, printing, and circulating Swedenborg's works, which may be had in fifteen languages. The Church also possesses its own orphanage, its college for training candidates for the ministry, its National Missionary Institution, and other associations formed to forward its propaganda.

NEW SOUTH WALES.

New South Wales is the oldest of the British colonies in Australia. It was founded as a penal settlement in 1888, and originally embraced half the continent. It has Queensland on the north, and Victoria on the south. From the sea upon the cast it stretches to about the sea upon the cast it stretches to about he long 140 E., which meridian divides it from South Australia Total area 310,700 sq. m; pop in 98, 1,335,800. The capital is **Sydney**, on Port Jackson, pop 410,000 Ruled by a Governor (Viscount Hampden, see under PEERS) and responsible Ministry. Legislative power is vested in a Parliament of two houses. The upper, or Legislative Council, consists at present of 65 members (the number is unlimited. but is not to be less than 21) appointed by the Governor for life. The lower house, or Legislative Assembly, is composed of 125 members, elected triennially by 125 constituencies on a basis of manhood suffrage Every male subject above twenty-one, having resided for one year in the colony and for three months in his electional district, possesses a vote. The elections take place all on the same day. Members are paid the sum of £300 a year. for local government purposes the colony recognises 75 botoughs and 107 municipal districts, besides Sydney. There is also a division into 141 counties Education under Government control, compulsory for all children between the ages of six and fourteen years, and free to the poor. The Church of England has by far the most adherents, next coming the Roman Catholics, the Presbyterians, the Wesleyans and the Congregationalists, in the order named There is no state aid to religion For defence there is a permanent force of about 6500 men and about 5500 volunteers, while there is a naval station at Port Jackson and a naval force of nearly 600 men There are 2651 miles of railway open, and 37,000 miles of telegraph line Much grain is grown, and there are nearly 50,000,000 sheep in the colony There are large forests, and gold and silver are mined Staple export is wool, to the amount of £10,000,000 per annum Silver and gold are also exported Revenue, 97-8, £9,482,134, expenditure, £9,301,012, imports, 97, £21,744, 350; exports, £23,751,072 Public debt, £64,565,540. See Australia, British Empire (table), and DIPLOMATIC

Mistory. Ds.—After a keen struggle the voting on the Federation question took place (June 2nd), and showed 70,999 for the Bill and 65,019 against it. The statutory minimum of 80,000 was therefore not reached, and this was equivalent to the rejection of the measure. The Governor, in opening Parliament, however (21st), stated that the Government were preparing proposals for the modification of the rederation Convention Bill so as to make it acceptable to the electors. As to the general condition of the colony, agriculture and dairy farming had progressed wonderfully, while the mining and manufacturing industries had also improved considerably. The revenue was in a most satisfactory condition. A general election took place in July. The main issue was the course to be adopted with the Federation question, the Premier leading the Ministerial party and Mr. Barton the Opposition. Mr. Barton

and his supporters contended that the Premier was not a sincere supporter of Federation, but was pressing amendments to the Constitution Bill which he knew would not be accepted by the other colonies, while the Ministerialists retorted that Mr. Barton and his party would agree to terms which would be much to the disadvantage of New South Wales. The Labour members supported the Premier, while the Protectionists joined the Federal party under Mr. Barton The election was most keenly fought, and scenes of disorder were common. The Premier defeated Mr. Barton in the King division of Sydney, but the result of the poll showed that 63 Ministerialists, 57 returned (20th). The Government majority Three of the members of the Cabinet were defeated, and the Labour party were included in the 63 Ministerialists. In opening Pailiament the Governor said that the Government proposed to introduce, as the first business, a series of resolutions specifying the amend-ments in the Constitution Bill which were deemed of urgent importance, since the Government felt their paramount duty was to endeavour to bring about Federation on fair and just lines (Aug 17th). The resolutions were moved, and an amendment proposed by the Opposition was only defeated by 58 to 54 votes (Sept. 15th). Mr. Reid later on estimated the revenue for the current year at £9,433,000, and the expenditure at £9,681,000 The deficiency the expenditure at £9,681,000 The deficiency he proposed to meet by new duties on tea. coffee, biscuits, confectionery and jams, thus departing from his Free Irade policy. The Assembly agreed to the amendments in the Constitution Bill suggested by the Government (Oct. 20th)

Newspapers and Magazines from the '98 edition of the "Newspaper Press Directory" that he number of newspapers now being published in the United Kingdom is 2418 In England there are 1878, 475 in London and 1408 in the provinces, in Wales there are 103, in Scotland 216, in Ireland 179, and in the various isles round the cast 22. Of these there or scotland 216, in Irleand 179, and in the various isles round the coast 22 Of these there are 186 daily papers in England, 6 in Wales, 19 in Scotland, 20 in Iteland, and 4 in the isles In 36 there were only 551 papers published in the United Kingdom, and only 14 dailies Of magazines, including the quarterly reviews, there are now 2225, 194 of which are religious In '46 there were only 200 magazines in existence.

NEW ZEALAND.

New Zealand is a colony of the British Empire, consisting of a group of islands in the South Pacific, about 1200 miles E. by S. from Australia. There are two large islands: North Island, 500 m. by 250, area 44,467 sq. m; South Island, sometimes also called Middle Island, 500 m. by 200, area \$8,525 sq m; also Stewart Island, area 665 sq m.; Chatham and Auckland Islands at some distance E. and S, area 377 Islands at some distance E. and S, area 377 sq. m. Area of entire colony, 104,409 sq m, population 759,146, exclusive of the Maorits, who number 39,854 Capital, Wellington, pop. (including suburbs) 44,791; chief cities, Dunedin, 48,672; Auckland, 58,344; Christchurch, 56,330 Volcanoes and volcanic belt across the centre of North Island

Island, between Taupo and the Bay of Plenty. Island, between Taupo and the Bay of Fienty. Government is carried on by a Governor, who is advised by a responsible Ministry. Of the two houses of parliament, the Legislative Council consists of 48 members nominated by the Governor for life (except those nominated subsequently to Sept. 17th, '91, after which date all appointments are for seven years only), the House of Representatives of 74 (including 4 Maoris) members elected triennially on an adult suffrage. The qualifications for electors are residence in the colony for a year, and in the electoral district for 3 months. Members of the Lower House receive £240, and of the Upper House £150 a year For local government the country is divided into counties and boroughs, the 83 counties being further divided boroughs, the 8 counties being further divided into town districts and road districts. About 40 per cent of the inhabitants belong to the Church of England, 22 per cent, are Presbyterians, and ropei cent Methodists. Education is compulsory, free, and secular. Ports defended by heavy batteries, mines, and torpedobats. The majority of the population are engaged in agricultural and pastoral pursuits, and the properties of the control of the population are engaged. and a big frozen meat industry is being fostered, There are 2222 miles of railway, as well as numerous roads and water communication. There are over 200 daily, weekly, and monthly periodicals. The ohief exports are wood, frozen meat, gold, gum, and grain Revenue, '97-8, \$5,079,230, expenditure, \$4,9012,372, imports, 97, \$8,055,223; exports, \$10,001,993. Public debt, \$44,081,521 See British Empire (table) and £44,081,521 DIPLOMATIC

History, '94, - The Premier, Mr. Seddon, announced that the result of the financial year's working was a surplus of over £500,000 (April 18th) All branches of the revenue had returned more than was estimated, thus showing the continued prosperity of the country exact amount of the surplus was given in the Budget statement (Aug. 9th) as £521,000, and the Government proposed to take advantage of it by remitting 5 per cent. in the duties on British manufactured goods, and by asking Parliament again to sanction the old age pensions scheme. The Old Age Pensions Bill, providing that every person of 65 years and upwards, of good character, having resided for 25 years in the Colony, and possessing an in-25 years in the Colony, and possessing an income of not more than £44 per annum, should be entitled to a pension of £18 per annum, passed its third reading in the House of Reprepassed its third reading in the Friedrick repetitions of the Legislative Council (ooth), and duly became law. Other measures which passed during the Session ending in November were a Mining (Consolidation) Act, a Divorce Amendment Act, and a Municipal branchise Reform Act.

and a Municipal Fr inchise Retorm Act.

Nicholas I., the reigning Prince or Hospodar of Montenegro, was b. Oct. 7th, 1841. After an educational course at Trieste and Paris, he succeeded his uncle, who had been assassinated, Aug. to. He married, in the same year, Princess Milona, the daughter of the Vice-President of the Council of State. During 90 the thriteth anniversary of his accession was celebrated, and during '96 the bicentenary of the foundation of his dynasty Queen Victoria gave him the Grand Cross of the Royal Victorian Order in March '97. His daughter Princess Helen is married to the Prince of Naples, the heir to the throne of Italy; and another daughter, Princess

Inrone of Italy; and another daugnter, Plines's Ann., to Prince Francis Joseph of Battenburg Micholas II., who on Nov 1st, '94, succeeded his father, Alexander III, as "Emperor of all the Russias," was born at St. Petersburg on May 18th, '68, his mother being the Princess Dagmar, a daughter of the King of Denmark, and sisterto the Princess of Wales, the Duchess of Cumberland, and the King of Greece. The Course of his studies was by the wish of the late course of his studies was, by the wish of the late Czar, chiefly directed to modern history and languages, constitutional history, political and social economy, and the law and administration of his own country. He is gitted with the linguistic facility of most of his countrymen, and fluently speaks French, German, Italian, and especially English, of whose literature he has a thorough knowledge During the famine of 'or he was, at his own request, made President of the Committee of Succour, and worked hard in the organisation of relicf. As Czarevitch he held several military commands in his own country—in the famous Preobrajensky regiment among others-and in England he had confeired upon him in '93 the Order of the Gatter. He married the Princess Alax of Hesse-Daimstadt in Nov. '94 A daughter, Princess Olga, was born to them in Nov '95, and another daughter in June '97. His coronation took place with impressive and elaborate ceremonial at Moscow in May '96, and in August of the same year he commenced a tour which included visits to the Emperor of Austria and Germany, to the King of Denmark, to Queen Victoria, and to the President of France. The visit to Paris was taken advantage of to accentuate the friendly understanding or alliance, as it may now be called, between France and Russia. now be called, between Fiance and Russia. This alliance was definitely announced on the occasion of the visit of President Faure to St Petersburg in '97 The famous peace proposals which he made to the Powers during '98 are set out under Russia, History, '98.

Nicoll, W. Robertson, IL D., was born Oct. 10th, 1851, at the Free Church manse, Auchindoir, Aberideenshire. He studied first at the University of Aberdeen, graduating at the University of Aberdeen, graduating

at the University of Aberdeen, graduating M.A. in 70; next at the Free Church College, Aberdeen, until 74, when he was ordained minister of the Free Church, Dufftown, from which in 77 he was transferred to the Free Church, Kelso. In succession to Dr. S. Cox, he became editor of the Expositor in 84. In the following year ill-health compelled him to give up public speaking. In Nov. 86 he came to London, and started the British Weekly, which has been instrumental, to a remarkable extent, in introducing new writers to the reading world. The degree of LL.D. was con-

ferred upon him by Aberdeen University in '90. ferred upon him by Aberdeen University in '90. He was married (his second marriage) to Miss Katherine Pollard in '97. Dr. Nicoll is the author of many theological works, in addition to a "Life of James Macdonell, of the Times" ('89), a "Memoir of Professor Elmslie" ('90), and has been engaged for a long time on "The Victorian Era of English Literature: a Biographical and Critical History," He has projected and edited "The Expositor's Greek Testament," "The Expositor's Bible," "The Theological Educator," "The Clerical Library," "The Clousehold Library of Exposition," etc. Theological Educator," "The Clerical Library,"
"The flousehold Library of Exposition," etc.
He is also joint editor of "Literary Aneedotes
of the Nincteenth Century," of which two volumes appeared in '95 and '96 In Oct. '91 he
commenced the Bookman, a monthly literary
journal, which was quickly recognised to be
of high literary merit, in '93 the Woman at
Home, which he had a large share in founding,
began its career, and in '98 he undertook the
editorship of the Christian Budget.

Niger Coast Protectorate. A British protectorate was formed in 1844 along the west coast
of Africa, from the boundaries of Lagos (q v.), at

of Africa, from the boundaries of Lagos (q v.), at the mouth of the Benin river, to the mouth of the Rio del Rey, including the mouths of what are called "the Oil rivers," but excluding that portion of the coastline which lies between the Forcados and Brassrivers, and which belongs to the Niger Ierritories. Until '93 it was called the Oil Rivers Protectorate. Inland it includes Oil Rivers Protectorate. Inland it includes the whole Benin region, the Niger delta, and the Old Calabar or Cross river from the rapids to the sea Benin lies on the western limits of the Protectorate, and owing to the attitude of the king and the savage fctish customs pre-vailing, trade was very difficult to carry on, so an expedition was sent in '97 and the king was deposed, a Resident being appointed in his place the country is rich in rubber, gums, mahogany, etc. It is bounded on the north-west by Lagos and Yoruba. The territory is administered by an Imperial Commissioner and Consul-General, with six vice-consuls, and is now divided into three divisions, each under a consular officer. Government posts have been established at Ediba on the Cross river and Ngwa, behind Opobo. Old Calabai is the headquarters The trade is chiefly carried on by a Liverpool Company, called the African Association, Ld. The chief products are palm

oil and kernels, rubber, ivoi y, camwood, gums, etc. See DIPLOMATIC, FRENCH WEST AFRICA NIGERIA.

(map), and NIGERIA

The Royal Niger Company are the chief representatives of British power and influence in Western Africa. The Niger Territories, now called Nigeria, which they administer under a royal charter dated July 10th, 1886, cover about 500,000 sq. miles, and contain a population variously estimated at from 20,000,000 to 40,000,000. The Anglo-German and Anglo-French agreements of 85, 26, 790, and '03 settled the frontiers of the territory. The eastern frontier, settled by previous agreements made in '85 and '93, runs from a point on the Old Calabar or Cross river on the coast in a north-easterly direction to a point on the river Benue. Yola and its mmediate neighbourhood were made the pro-perty of Great Britain, while Germany secured the Upper Benue and the confluence of the Faro river, together with the south shore of Lake Chad, as far as the 14° E. long. This frontier

separates the Company's territory from the German sphere of influence in the Cameroons. The northern frontier, separating the British and French spheres of influence, stretches from Baiua, on Lake Chad, westwards to lo, on the west bank of the Middle Niger, I ut drawn so as to leave within the British sphere all the territory belonging to Sokoto. The frontiers on the west were settled by the agreement made in '98 (see History '98 below) On the Gulf of Guinea the Company have access on the Guir of Guinea the Company have access to the sea by means of a coastline of about 120 miles in length, extending from the Forcados to the Brass river. The capital of Sokoto is Wurno, and other large towns are Gando, Sokoto, Kano, Bida, Yola, Yakubu, Zaria, and Illorin. The capital of the Territories is at Asaba; and the troops—Hausas principally, with English officers—are chiefly centred at Lokoja, the junction of the Niger and Benuerivers The naval headquarters are at Akassa, at the mouth of the Niger, which possesses the only "slip" on the West coast of Africa on which vessels can be repaired. Niger delta has a bad climate, but the inland ortions of the territory are much healther. The chief products are rubber, gum, hides, ivery, palm oil, and palm ketnels. The Governor of the Company is Sir George Taubman-Goldie, and the Deputy Governor is Loid Scarbrough The Offices are at Surrey House, Victoria Embankment, W.C. See British Empire (table) and DIPLOMATIC

History, '98 .- In January an understanding was arrived at by the Company with the Sultan of Sokoto, who, since the subjugation of Nupe in '97, had shown symptoms of rebellion against the Company's authority

He, however, finally declared his intention to adhere to his alliance with the Company, and in proof thereof accepted the annual subsidy which he had pieviously refused. The Ibouza tribe agreed (Feb. 17th) to abolish human sacrifices, to open their roads to all tribes, to admit missionaries into three of their towns, and to appoint a responsible chief and a Council of twelve under the Company instead of the numerous petty chiefs then ruling. In this month and later on the French policy of pushing forward into British territory armed expeditions, even while negotiations were going on at Paris, led to serious complications, and a French force was actually reported to be approaching Sokoto, though this was denied Colonel Lugard left England (March 5th) to take command of the British West African Frontier Force, with his headquarters at Lokoja The Anglo-French Commission was all this time sitting at Paris, and an agreement was finally reached and a Convention signed (June 15th) so far as Nigeria is concerned the result was as follows. The French claim was for the whole of the right bank of the Niger from Say to a point just below Busa, the capital of the kingdom of that name. The boundary agreed upon gave them the kingdom of Gurma, and a triangular district on the east of the river, lying between Say, Mauri, and a point ten miles north of Ilo, with both banks of the river from Say to the point ten miles north of Ilo. From that point the boundary passed in a north-easterly direction along the watershed between the Niger and the river Sokoto, and

intersection of the arc with the 14th parallel the boundary line ran along that parallel for 70 miles, then south and east again for 250 miles, and then north again to the 14th parallel and along the parallel to a point a little to the east of the longitude of Kuka, and thence southward to the southern shore of Lake Chad. Southwards, from the point ten miles north of Ilo, the boundary was traced so as to include Borgu, but leaving Nikki to France, the line eventually joining the boundary between Dahomey and Lagos on the 9th parallel. This necessitated the withdrawal of the French from llo, Busa, Kishi, and Bona, leaving them Nikki, however Two pieces of land (to be mutually agreed upon by the two Governments) on the Niger between Leaba and the junction of the Mossi and the Niger, and on one of the mouths of the Niger, were leased for 30 years to the of the right, were reacted for 30 years to the French Government for trade purposes, and in teturn France conceded equal terms for French and British trade in all French colonies from the Liberian frontier to the Niger Borgu was completely evacuated by the French (Sept. 1st) and re-garrisoned by British troops In October it was reported that the Imperial Government had taken over Akassa from the Company, and the terms upon which the administration of the territories is to be transferred to the Imperial (rovernment were made the subject of many rumours However, nothing definite had transpired up to the time of going to press (Nov. 19th).

Nile, Valley of the Upper. The events of the last few years, and more especially of '98, have combined to lend especial interest to this region The distance from Khartoum to Lak Victoria, at the point where the Nile leaves it, is about rico miles, and Great Britain, Egypt, the Congo State, France, and Abyssinia are all interested more or less in the territory lying on both sides of the river along this part of its course. The events connected with the overthrow of the Khalifa and Dervish rule will be found set out under FGYP1, with maps to illustrate the position of affairs. There also, as well as under France and Frinch Congo, Major Marchand's expedition to Fashoda, and the events which ended in his withdrawal, are described. Fashoda is about 370 miles from Khartoum The Congo State have captured and now hold Rejaf, Wadelai has been occupied by a British force from Uganda, whence another expedition is now advancing northwards, and the Sudar has established ports at Fashoda and Sobat.

NOMS DE PLUME

The word nom-de plume is not known in French, the proper phrase being nom-de-guerre. The following list of pseudonyins deals chiefly with modern English or American writers. It is by no means exhaustive, but it will be found to include practically all writers of note who use a pen-name -

Norfolk Island. Discovered by Capt Cook, Oct. 9th, 1774, 600 miles from New Zealand, 920 miles east from Australia; length 5 miles breadth 3 miles. Pop. 750. Occupied as a penal settlement till '55, and then given to the Pitcairn Islanders. In Nov. '96 the island was transferred to the Government of New South Wales, and a resident magistrate was appointed to administer it, assisted by an elected council of twelve members. The chief village is Kingston.

Norman, Henry, born in Leicester, journalist, author, and traveller. Educated in France, at Harvard, USA, and at Leipzig For several years on the staff of the Pall Mall Gazette From '88 travelled in China, Siberia, Korea, Japan, Tonquin, and Malava, visiting the Franco-Chinese frontier, crossing Korea on horseback, and exploring a hitherto unknown part of the Malay Peninsula, which he also clossed, being the first European to pass through the upper part of the closed native. State of Kelantan Author of "An Account of the Harvard Greek Play" (81), "The Real Japan" (70), "The Peoples and Politics of the Far East" (704), and a later work upon the Balkan Peninsula based upon a series of letters. Balkan Peninsula, based upon a series of letters in the Daily Chronicle, in the autumn of '95, called "Round the Near East" Since '92 he has been a member of the editorial staff of the Daily Chronule, and was appointed assistanteditor March '95

Norris, William Edward, was b Nov 18th, 1847, and is the son of the late Sir W. Norris, formerly Chief Justice of Ceylon Ed. at Eton. formerly Chief Justice of Ceylon Ed. at Eton. Married Frances Isobel, daughter of the late J Ballenden, Esq., in '71, and was left a widower in '81. His first novel, "Heaps of Money," was published in '77, and there have since followed "Mademoiselle de Mersac," "Matrimony," "No New Thing," "His Grace," "A Deplorable Affair," "The Countess Radna" (93), "St. Ann's," "Matthew Austin," "A

Victim of Good Luck" ('94), "Billy Bellew" ('95), "A Dancer in Yellow" ('96), "Clarissa Furiosa," "Marietta's Marriage" ('97), "The Widower" ('98), and several other books, and serials in the various leading magazines. His novels are noticeable for their excellence of dialogue, and are generally descriptive of aristocratic society. Address Underbank, Torquay.

North-West Territories, The, comprise three organised districts: Assimboia, area 89,535 sq m; Alberta, area 106,100 sq. m.; and Saskatchewan, area 107,002 sq. m. The unorganised territories, comprising Athabasca, area 104,500 sq. m.; Yukon, Mackenzie, Franklin, and Ungava, the combined area of which is 906,000 sq m, are strictly under Federal jurisooo, ooo sq m, are strictly under rederal jurisdiction, represented by the Lieut Governor Pop. 99,722 Capital, Regina Great lakes and large navigable rivers—the Mackenzie, Slave, Peace, Saskatchewan, among the chief—are found in the Territories. The resources are enormous, agricultural, pastoral, and mining. Vast coal fields of fauly good quality exist, and are being profitably worked. The Canadian Vast coal fields of fauly good quality exist, and are being profitably worked. The Canadian Pacific Railway traverses Assimboia and Alberta. The Government of the Territories, consisting of a Leut-Governor, a Responsible Ministry, and a Legislative Assembly of 26 members, was made representative in 91. The Territories have two seats in the Dominion Senate, and four in the House of Commons. The new gold fields at Klondike lie in the Territories Klondike is only a small section of Yukon, one of the provisional districts above named. All those who know the districts senamed. of rikoli, one of the provisional district second named All those who know the district seem to agree with Mr. W Ogilvie, the Dominion Surveyor on the Yukon, and recently ap-pointed Commissioner for the district, that it promises to be one of the largest and richest mining areas in the whole world. The goldbearing area extends south-castwards from the 141st meridian into British Columbia Indica tions show that it is at least 500 miles long, and in places upwards of 100 miles wide. The arctic climate and the shortness of the summer season appear to be the great hindrances to mining operations, together with the scarcity of supplies caused by the remoteness of the district, and the great difficulty of the transit thither The Times sent a special commissioner to the district in '98, and from the articles published in its columns it appears that Dawson City, which has sprung up at the junction of the Klondike and Yukon rivers, has a population of 20,000, that of the whole district being about 27,000. There are about 5000 miners actually at work, and the output of the '97-8 season has been estimated at from £2,000,000 to £5,000,000, primitive and un-economical as the modes of working the gold are The administration of the district has been bitterly complained of, more particularly the Dominion regulations that a 10-per-cent to alty must be paid on the gross output, and that alternate claims in every new district must be reserved for the Government A Commission directing Mr Ogilvie to hold an immediate inquiry under oath into the charges of official corruption and maladministration in the Yukon district was issued (Oct. 9th, '98) See British Empire (table), Canada, and DIPLOMATIC.

NOTWAY. See SWEDEN AND NORWAY. Norwich, Bishop of. See under PERAGE.

Nossi Bé. A small island on N.W. coast of Madagascar, held by France since 1843; and a

flourishing trade-port.

Nova Scotia. A province of the Dominion of Canada. It is a peninsula connected by a narrow isthmus with New Brunswick. Incorporated with it is Cape Breton Island, formerly a distinct colony. Area 20,907 sq. m.; pop. 450,396 Capital, Halifax; pop. 38,556 A fine city and harbour, also an Imperial military and naval station. Divided into 18 counties. The coal mines near Halifax and Cape Breton turn out about 2,000,000 tons of coal per annum, and the whole of the Dominion Government railways are worked with coal from these mines Administered by a Lieut -Governor and Executive. ministered by a Lieut -tovernot and Executive. The people elect a Legislative Council of 21 members, and a House of Assembly of 38 members. The Province has 10 seats in the Dominion Senate and 20 in the House of

Commons. Education receives some Government support, and is free and to some extent compulsory. The colony was originally a French one, and then called Acadia; ceded to England 1714; entered Dominion 1867. See BRITISH EMPIRE (table), CANADA, and DIPLO-

Nurses, Royal British Association of. 18 a professional organisation of trained nurses, with a membership of nearly 3000. Its objects are to improve the status of the nursing profession, to establish a Register of Trained Nurses, and to carry out benevolent schemes for the advantage of members. Over 2500 nurses have already been registered, and a copy of the register (3s 6d) can be obtained of the Secretary, 17, Old Cavendish Street, Oxford Street, W.

OBITUARY (Dec. '97-Nov. '98.)

The following classified list of persons deceased during the year will explain itself, though it may be mentioned that, wherever it has been possible to obtain them, the date of decease is given in parentheses at the end of each paragraph, and the age in italic figures Following our usual practice, the lengthy biographical details given in previous editions with rigard to the two great statesmen, Bismarck and Gladstone, who died during the year, are omitted from this Obitiany. Some details as to the simple obsequies of Bismarck are, however, given under GIRMANY, and a full account of the splendid Parliamentary tribute paid to Gladstone will be found in the article

ROYALTY AND RULERS.

Austria - Hungary, The Empress - Queen of, Princess Elizabeth Amelia Eugenie, daughter of Duke Maximilian of Bayaria; married to the Emperor Francis Joseph in Aug. '54; assassinated by an Italian anarchist named

OLD AGE PENSIONS.

This subject, which has been much and seriously discussed during the last ten years. has greatly increased in public importance, and it will probably be one of the leading questions upon which legislation will be required by a large number of voters, on both sides, at the next general election. As much controversy has always existed and now prevails respecting has atways existed and now prevaints respecting an equitable and practical scheme for granting State pensions to the subjects of the United Kingdom on ittining old age, a select committee was appointed on July 21st, '06, to take exidence and report on this question. In the conduct of their inquiry the Committee availed the market of the exidence Ludy before the themselves of the evidence laid before the Royal Commission on the Aged Poor, and well considered the report of that Commission, as well as the reports laid before it of individual members. Much of the testimony taken by the Commission related to the condition and treatment of the iged und i the existing Poor Law system, to the means that exist for meeting the needs of the aged prespective of that system, and to certain schemes for State and which had been suggested, but none of which were recommended by the Commission The Committee at the commencement of their proceedings had to consider more than a hundred schemes, which for the most part may, they state, be classified in the following groups-

viz.

Schemes involving compulsory contribution towards a pension fund, either according to the German method of deduction by employers from wages paid by them, and aided by a contribution levied from the employers, or by way of a vearly or lump payment made by all young persons previous to a certain age and accumulated at compound interest until the proprior pound. 2. Schemes to provide a universal grant of pensions to all individuals on reaching a certain age, without requiring from them any direct contribution or examining their merits and their needs. Different modifications were suggested, mainly with the object of fixing the income above which there should be no grant of pension.

3 Schemes providing special facilities and encouragement to voluntary insurance against old age, with substantial assistance from the

State.

4. Schemes which provide State assistance towards old age pensions for members of Friendly Societies only Some of these proposed that such members should, on attaining a certain age, receive pensions from the public funds, while others proposed that pensioners should receive part of their pension from their Society and the remainder from the State

The Committee reported that, after examining all the schemes worthy of attention, there was not one "which would not ultimately injure rather than serve the best interests of the industrial population." The Committee considered, with the view to making it their own, a scheme originally suggested by Sir Spencer Walpole, a member of the committee, and afterwards developed and modified in discussion. The Committee stated that within the limits marked out by their reference they had not received and were unable to construct any scheme less open to objection than Sn Spencer Walpole's scheme, which they designate **Scheme A.** After long and careful discussion in the Committee it stood as follows — (1) Any person who, on attaining 65, has an assured income of not less than 28 6d, and not more than 55 a week, may apply for a pension to the pensioning authority (2) It shall be the duty of this authority, unless it has reason to believe that the assured income of the applicant is either less than the smaller of more than the larger of these sums, to grant a pension to the applicant if eligible (3) A person shall not be thus cligible who, in the person shall not be thus eligible who, in the opinion of the pensioning authority, requires, owing to his physical of mental infilmity, relief in an asylum, infirmary, or as an inmate of a workhouse (4) A person to whom a pension may be granted shall receive the following sums from the pensioning authority—If his income is 25 6d and less than 35, an additional 25 6d per week, if 35 and under a further as a week and if a second the new control of the new determined the n 4s, a further 2s a week; and if 5s, is additional per week (5) "Assured income" is defined to be an income obtained from one of the following securities (a) real estate, (b) lease-hold property, the unexpired term of the lease being not less than thirty years, (c) any security in which trustees are authorised to invest either by statute or by order of the Court of Chancery, (d) any annuity purchased from the National Debt Commissioners, or through the Post Office, or from a registered Friendly Society, or from an insurance office, (e) of any other security approved from time to time by the Treasury. No allowance of outdoor relief from the rates shall be "assured income" (6) The Poor Law guardians of the district in (6) The Poor Law guardians of the district in which the pensioner resides shall be the pensioning authority. (7) The pensions shall be paid from the local rates, and a proportion, not beyond one-half of the cost, shall be made good by the State. (8) The receipt of a State-aided old age pension shall not involve the

forfeiture of any civil rights. The Committee stated that this scheme, in their judgment, was not free from objection, because "It (1) imposes on the State generally, and therefore on the industrial classes, a heavy charge for providing pensions for a portion only of these classes; (2) encourages that amount of thiff only which is required to ensure an income of 25 6d a week at 65, but discourages any further thift; and (2) by relieving the industrial poof from the obligation of wholly providing for their old age, probably tends to depress the wage rate. But on the other hand (1) it is capable of being brought into immediate operation, at any rate to some extent; (2) it leaves the industrial classes to save in their own way; (1) it requires no difficult investment of accumulated funds by the State; (4) it offers the public and to all persons of the industrial classes who can make the required contribution

The age of 65 is adopted as the pension age in their scheme, and 55, per week as the measure of income and pension, because, from the schemes and evidence which came before the Committee, this age and such measure appeared to be those concerning which there was most concurrence of opinion According to the census of '91, 1,372,601 persons out of a population of 29,002,525 for England and Wales were of the age of 65 years and upwards; the population of England and Wales is rather more than three fourths of the population of the United Kingdom Owing, however, partly to extensive emigration, the proportion of old people in Iteland is larger than the proportion in the remainder of the kingdom. Taking it, however, as similar, at least 343,000 must be added to the above total to arrive at the old age population of the United Kingdom Consequently there cannot have been less than 1,715,000 persons 05 years old and upwards in the United Kingdom in '91. One person out of every twenty-three was at least 65 years old. Ob-viously the aged in '91 were the people who had survived to old age out of the population born at least sixty-five years previously. In '21 the population of the United Kingdom was only 21,272,187 The 1,715,000 persons therefore are the survivors of those who were born at a time when the population was only 22,842,336 In 1961, according to the opinion of Sir Spencer Walpole, it may be assumed that the old aged will amount to 2,969,712, being the survivors of those born when the population was 39,536,721. The next subject for consideration 15, the proportion of the old people who are in need of teller. According to Mr. Ritchie's return, out of the 1,372,601 persons in England and Wales sixty-five years old and upwards, 268,397 or 19 5 per cent, in other words one person in every five, were in receipt of relief on a particular day, and 401,904 or 29 3 per cent, in other words three persons in every ten, applied for relict in the course of the year.

These figures, starting as they are, are more so still when it is known that probably one third of the population belong to the well-to-do classes, who are above all need of dependence on the rates. If these are deducted from the calculation, the proportion of paupers over 65 to the total of the population over that age and below the well-to-do will not be less than three out of seven, or nearly one in two. It is, therefore, a lamentable fact that nearly one-half the working population of this country sither cannot

or do not make sufficient provision for their old age, and are therefore more or less dependent on the rates at that period. The Committee considered that State aid cannot be justified unless it is limited to assisting the person when circumstances beyond his control make it practically impossible for him to save from his own carnings an adequate provision for his old age Such a limitation could not be enforced by any investigation into the past history of the earnings of an applicant for this assistance. The only test which can be made is the posses-sion at the pension age of an income within the limits specified as qualifying for the aid Such limitation to a large degree is dependent upon the average wages the individual can command, and in considering this question, it must not be overlooked that the power of the employed to obtain from the employer the full wage and value of labout has increased, and is likely to increase still further. As to what minimum merease still further. As to what minimum rate of wages enables a man, by the exercise of reasonable economy, to make sufficient provision for his old age beyond subscribing for sick pay and funcial expenses cannot be approximately determined. The evidence given to the Committee appears to suggest that men whose average cannings do not fall below the gaugeful of the agreement of the control of below the equivalent of 20s a week in towns and a rather smaller sum in the country should find no great difficulty in contributing 2d a week towards their maintenance when past work-a contribution which, if begun at 20 years of age, would produce, according to the rate of charge now made for deferred annuities through the Post Office, a pension of 25 6d per week from the age of 65, or if commenced begins from the age one of 35 per week. If not begin until 25, 23d a week would be required for the 25 6d pension. Lestimony has been produced to show that, while a large number of the class who earn less than Lr a week do now make sufficient provision for old age, t is a fact that many who have received a fai higher wage attain the age of 65 without any savings. The wage rates referred to can only apply to actual payments in money, and do not include remuneration partly paid in board and lodgings, as in the case of domestic service, etc.
The Committee said that "The people thus in

a position to require assistance must in any case form but a small proportion of the industrial population, and even of this section, which can hardly be estimated at more than a third, only a small proportion of those above 65 years of age who now appear as inmates of the workhouse or infirmary would under any system of State-aided pensions be able to support themselves independently. Unfortunately the old age of the working classes, following as it does on a life of hard work done under trying and unhealthy conditions, is very frequently accompanied by bodily or mental infirmities which demand special care and supervision. Those who are bedridden, those who are suffering from semile inability, those who have lost their power of self-control and have fallen into insanitary habits, and finally those who are no longer capable of the economical application

the workman dependent on wages have to prowork, and this consideration affects the late of his wages But if the whole or part of the cost of maintaining him when past work is under-taken by the State, the portion of the wage which applies to this service ceases to be essential, consequently, whenever the com-petition for employment is very keen the wage payment will tend to fall by a percentage approximating to that contributed by the State to the pension fund. This difficulty reappears in a different form when the power of the aged to contribute to their means of support by light labour is considered. A man or woman sub-sidisced by the grant of a State pension is in a position to underbid a competitor who has no resource but his or her actual earnings or the resource but his of her actual earnings of the rates. This difficulty, the Committee stated, is of very wide application. To obviate such, "an attempt might probably be made to prohibit all recipients of State-aided pensions from engaging in remunerative work of any kind. Such an attempt must assuredly fail, but even if it could succeed it would have the effect of creating a compulsorily unoccupied class, with doubtful advantage to the community." It has often been urged by the advocates of Stateaided pensions that the acceipt of money in this form from the taxes or the rates is free from the taint which attaches to allowances made under the Poor Law. The Committee declared that "this might be true of a system such as that advocated by Mr Charles Rooth, under which a uniform pension became the right of every individual at a certain age irrespective of his anticedents, his character, or his private means, but all such schemes are practically excluded by their enormous cost."

Now, both political parties are strongly in favour of pensions for aged persons above 65, if a good practicable scheme can be established for the purpose which will not pauperise the recipients of such on the one hand, or interfere with the benefits which the friendly societies confer in the same direction on the other. In short, nearly all intelligent persons are agreed, as the Speciator has well declared, that relief for the aged—namely, declated, that fellet for the aged—namely, for those inhabitants of the United Kingdom above 65 - should, if possible, be changed from the through pensions. Ihe better opinion is that the only method to raise the fund for the payment of such pensions is to compel every individual who is to be a recipient of it to mulvidual who is to be a recipient of a to subscribe to it a certain proportion, and to direct that the remainder shall be paid out of the Imperial exchequer. It is evident that, in the near future, if politicians will strongly advocate legislation for these pensions and point out well considered schemes for the payment of such a strong party may be formed to carry a working scheme. Efforts, however, will probably be required to carry it, com-mensurate with those which were necessary to legislate for the repeal of the Corn Laws and other Free Trade measures As regards the longer capable of the economical application of a small pension, must in any case find asylum. The cost of indoor relief will not therefore be appreciably diminished by the operation of any system of old age pensions."

As regards the question, Mr. Chamberlain, addressing a therefore be appreciably diminished by the operation of any system of old age pensions." As the conference at Manha State-aided pension will affect the wage rate, were not prepared to submit to compulsory it must be borne in mind that the earnings of deduction from their wages in order to provide

old age pensions. The State alone could not | afford at the expense of the taxpayers to give a pension indiscriminately to everybody who reaches the age of sixty-five, and any scheme which discouraged thirst or which did not encourage thrift would bring abou new cvils even greater than those which it was desired to remove. The report of the Committee above referred to was unfavourable, but he did not believe that the last word had been spoken He did not think it was possible immediately to deal with this question. There were financial considerations to be taken into account, and other matters might have a still more pressing claim upon the Government But still he entertained the hope that before the Government went out of office it might be able to do something to assist and to stimulate and to encourage provision for old age. See references to pension schemes in Iceland and Italy under LABOUR MOVIMENT V Foreign Notes.

Ontario, a province of the Dominion of Canada—also called Upper Canada—It joined with other provinces to form the Dominion in 1867 Area, 219,650 sq m., pop. 2,114,321 It extends along the north shoies of the great Dominion metropolis, Ottawa (pop 44,154) Provincial capital, Toronto, pop 181,220, on Lake Ontario, the second city in Canada in we alth and population Besides the two capitals, important towns are Hamilton (pop 48,980), London (pop, 31,977), Guelph, St Catherine's, Brantford, Belleville, and Chatham Administration of the company of tered by a Lieut-Governor and responsible Ministry. Anson, Bart., D.C.L., Waiden of All Souls', Prootors for '89-9, E. M. Walker, M.A., Quien's College; W. H. Hadow, M.A., Worcester College. Parliamentary Representatives, Rt. Hon. Sir J. R. Mowbiay, Bart., and Rt. Hon. J. G. Talbot.

racine Cable Projects. During the last ten years much discussion has taken place as to the importance and necessity of the laying down of a cable between Canada and the British Australasian colonies. The subject attracted much attention at the Colonial Conference at Ottawa in 194. Of the several routes which have been proposed for the cable two may be mentioned. One is from Vancouver, British Columbia, to Fanning Island, Fiji, and Norfolk Island to Iweedmouth in Australia, which is a distance of 6730 miles, and if a branch were made to connect it with New Zealand, there would be an additional 415 miles This route other route is from Vancouver to an island in the Hawaiian group, and thence through the Gilbert and Solomon Islands to Bowen in Queensland This route is about 6400 miles. The cost of a single cable from Vancouver to Australia has been estimated at from £1,250,000 to £1,750,000 It is calculated that the carnings therefrom would be at least 25 per word, and that the further charge of gd per word to England from Canada would reduce the charge between Australia and Great Britain to 35 3d in place of 4s 9d as at present. It appears that a large subsidy would be necessary to connect England telegraphically with Australia through Canada and the Pacific Ocean. This subsidy has been proposed to be equitably appointed, the contributing governments being Great Britain on behalf of the United Kingdom, and the Crown Colonies, Canada, Queensland, New South Wales, Victoria, New Zealand, Iasmania, and Westein Australia. It has been further proposed that if the Imperial Government by an arrangement with the Colonial governments, itself guarantee the whole amount, the total subsidy may be materially reduced, because the Imperial guarantee would cause the company for the construction of the line to find capital for this purpose at a reduced rate of interest. With such a guarantee, it is said that a total subsidy of \$\mathcal{L}_{OO}, for about four or five years would be enough. In June '96 a committee was appointed to consider. job a committee was appointed to consider the matter. The delegates from the Imperial Government were Lord Selborne, Under-Secretary of State for the Colonies, and Mr. G. H. Murray, C.B., a principal clerk at the Treasury, with Mr. W. H. Mercer as

Pacific Cable Projects. During the last ten | Secretary; the Canadian representatives ears much discussion has taken place as to the | were Sir Donald Smith and Sir Mackenzie Bowell, and the Australian delegates were Sir Saul Samuel and Mr Duncan Gillies The Committee have since reported on the subject, but have not published their report. As to other cable projects by foreign countries, mentioned in the previous editions of the Annual, nothing of importance appears to done, during the last twelve months. On the other hand, another cable route to Australia via the Cape has been proposed to be laid by and the Eastern Extension, Australasia and China Felegraph Companies. This project, in the opinion of these companies, is far perferable to the Pacific route to Australia, where a break in the cable would interrupt communication, while, as regards the proposed new route, it is Stated that except in the case of cables from Mauritius to Perth, Western Australia, if any of the sections were broken there would be two alternative lines as far as Zanzibar, and between there and Mauritius—In an article in the Times on Nov 9th, 97, on this proposed undertaking, it is stated that "when completed this new route from England to Australia will form a very considerable addition of about 13,684 natural miles to the Calisting submarine cables, which have been manufactured and laid by British industry and enterprise, and are worked by British clerks... The new cables will land only in British possessions, and will form a triplicate route to Australia removed from the volcanic dangers of the lava Seas, while experience on both sides of Africa shows that interruptions from seismic disturbances there are not frequent." The first part of the new project is to lay cables from Cornwall to clibraltar, thence to Bathurst or Sierra Leone, afterwards to Ascension, on to St. Helena, and from that island to Cap. Town. The other part of the Scheme is to extend the cable from Natal to Mauritius This is in conjunction with the present Zanzibar-Seychelles-Mauritius line, and will have the effect of providing an alternative to the Zanzibar-Mozambique and Mozambique-Delagoa Bay-Durban sections if they should be interrupted. From Mauritius the cable route may be to Rodriguez Island, thence

to Cocos or Keeling Island, and afterwards to Perth, Westralia.

Paderewski, Ignace Jan, the famous planist and composer, was born on Nov. 6th, 1860, in Padolia, a province of Russian Poland. He began to play the piano at the age of three, and, when seven years old, was placed under and, when seven years old, was piaced under Pierre Sovinski, a local tutor. In '72 he went to Warsaw, learning harmony and counterpoint from Roguski, and subsequently from Frederick Kiel He toured through Russia, Siberia, and Koumania, playing only his own compositions. In '78 he became Professor of Music in Warsaw Conservatoire, still continuing to practise his art indefatigably. For a short while in '84 he was a professor at Strasburg Conservatoire, but then definitely decided to try his fortune as a virtuoso. After three years' study with Leschetizky, in Vienna, he made his debut in '87 with instant success. He next toured through Germany, and in the He next toured through Germany, and in the autumn of '89 appeared in Paris, where he created a furor. His debut in London took place under Mr Daniel Mayer's direction, on Mayoth, '90, at St James's Hall. In the following year he visited America, and has since repeated the tour. He has composed more than eighty vocal works, a concerto in A minor for piano and orchestra, a suite for orchestra in G, and many picces for the piano His "Polish Fantasie" was produced at the Noiwich Festival in 93. M Paderewski is a widowei

"Pall Mall Gazette" Evening newspaper and review Established 1865, by George Smith, of Smith, Elder & Co I ransferred to Henry of Smith, Elder & Co Transferred to Henry Yates Thompson, his son-in-law, in '80 First number appeared Feb 7th, '05 Edited first by Frederick Greenwood, next ('80) by John Morley, who in turn was succeeded in '83 by W. T Stead, and he by Mr. E. T. Cook. In Oct. '92 the paper was sold by Mr. Thompson to the Hon W. W. Astor The press nt editor is Sir Douglas Straight Offices, 18, Charing

Pamirs, The, are sometimes called "The Roof of the World, and consist of a number of ble ak plateaux and shallow valleys situated about 13,000 feet above the sea level. They lie between Chinese Furkestan, Russian Turkestan, and Afghanistan, and are inhabited chiefly by nomad khirghiz bands. They command the routes to many of the territorics which they overlook, and so Russia and England and the Afghans and the Chinese are all interested in them. In April '94 Russia so far conceded China's demands as to undertake that, pending the conclusion of a final agreement, Russian troops should not touch the portion of Pamir territory claimed by China Negotiations beterritory claimed by china Regolations be-free the Russian and British Governments fresulted during March '95 in an agreement that the spheres of influence of the two countries and british dovernments. Banbury '53, Manchester '58, London, City should be divided by a line starting from a point on Lake Victoria (Zor Zul) near to its eastern extremity, and following the crests (Chairman of Congregational Union of England of the mountain range running somewhat to

the south of the latitude of the lake towards the Chinese frontier. For full details see ed. '96. A joint commission of British and Russian delegates was entrusted with the demarcation of the line. The British Government engaged that the territory lying within the British sphere of influence between the Hindu Kush and the line from the east end of Lake Vietoria to the Chinese frontier should form part of the territory of the Ameer of Afghanistan, that it should not be annexed to Great Britain. and that no military posts or forts should be established in it. A further condition of the agreement was the evacuation by the Ameer of Afghanistan of all the territories then occu-pied by him on the right bank of the Panjah, and the evacuation by the Ameer of Bokhara of the portion of Darwaz lying to the south of the Oxus, in regard to which the British and Orus, in legara to which the Diffish and Russian Governments agreed to use their influence respectively with the two Ameers. These conditions were duly carried out.

Parker, Gilbert, is the son of Captain Joseph Parker, R.A., and was born in Canada, Nov 23rd, 1862. He was educated at Trinity University, Foronto, from which he holds the degree of D C L. He was for some years associate editor of the Sydney Morning Herald, New South Wales, and there devoted himself to New South Wales, and there devoted himself to dramatic and literary work entirely. He is the author of "Round the Compass in Australia," "A Lover's Diary," "Pierre and his People," "Mrs Falchion," "The Irespasser," "The Translation of a Savage," "When Valmond came to Pontiac," "An Adventurer of the North," "The Scats of the Mighty," "The Pomp of the Lavilettes," and "The Battle of the Strong" A damatised version of "The the Strong. Adiamatised version of "The Seats of the Mighty' was produced at the opening of Her Majesty & Theatre in April' 97. Address 7, Park Place, St. James's, London,

Parker, Rev. Joseph, D.D., minister of the City Temple, Holborn Viaduct, was b. at Hexham, 1830 Ed. at Univ. Coll., London 32.

83, and a second time '97, and of London Congregational Union '90. Founder of Not-Congregational Union '90. Founder of Not-tingham Congregational Institute. Dr Parker, in addition to being a vigorous and popular preacher, is also an author of repute Among preacher, is also an author of repute Among numerous works written by him may be mentioned "The Paraclete," "Ecce Deus," "Springdale Abbey," "Inner Life of Christ" (3 vols), "Apostolic Life" (3 vols), "Paterson's Parish," "Studies in Texts" (6 vols), and "The People's Prayer-Book" He has visited the United States five times. He was for years engaged on the "People's Bible," which is now completed in twenty-five vols, and may be recorded as the warment of the literary. regarded as the magnum opus of his literary labours The conclusion of his twenty-fifth year of ministry in London was celebrated during '94 by numerous good wishes and gifts from all denominations, and the purchase of an annuity, value £250 On June 18th, 98, Dr. an annuity, value £250 On June 18th, 98 Parker celebrated his preaching Jubilce connection with this event he has a book in the press entitled "A Preacher's Life an Autobiography with Sidelights" Dr. Parker preaches in the City Femple every Thursday at 12 (noon)

PARLIAMENT AND PARLIAMENTARY PROCEDURE.

Parliament is composed of the Sovereign and the Three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Icmporal sitting together and forming the House of Lords The Sovereign alone has the power of summoning or prologuing of dissolving Par-liament, and gives the Royal Assent to measures which have passed both Houses Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary, and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign See also Commons, House OF, and PLERAGE.
The Houses of Lords and Commons differ from

likewise in respect of their powers and methods of procedure. It is in the House of Peers, for instance, that the Sovereign meets Parliament, and the formal ceremonies connected with the opening or proroguing of the Legislature are gone through. On these occasions, as also when the royal assent is given to public or private bills, the "fathful Commons" merely attend in their lordships' House. But, on the other hand, the House of Commons has an individuality of its own, which is yearly becoming more marked Its powers and privileges are enormous it is in the Lower Chamber exclusively that the national estimates are voted, and it is in the Commons that the majority of important legislative proposals are initiated.
The Royal Assent to bills is always given in the
House of Lords, more frequently by commission than otherwise; and it is a curious circumstance that the French language is still employed in connection therewith. When a public bill is

each other not only as to their constitution but

the bill have subsidies for its object, the official says, "Le roi (or, la reyne) remercie ses loyaux ujets, accepte leur bénevolence, et aussi le veult. If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "Le roi (or, la reyne) s'avisera." This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707.

The most striking feature with the procedure of the House of Commons is the great power vested in the Speaker. Unlike the Lord Chancellor, the Speaker must abstain from debating. unless in committee of the whole House, and even there he rarely takes advantage of his right The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the castone equal, in which case he gives the cast-ing voice. The chief duty of the Speaker un-doubtedly is the preservation of order, with respect to which the rules of the House of Commons are very stringent. Only the royal assent can convert a bill into an Act of Parhament. It occasionally happens that the opponents of a bill are not desirous of meeting the motion for its second reading with a direct negative An amendment is therefore proposed to the effect that the bill "be read the day three months," or "this day six months," it being understood that three months or six months hence the House will not be sitting. In the cases of motions in respect to which the House is also unwilling to come to a decision, "the previous question" may be carried, in which case the other business of the day is

at once proceeded with
The business of both Houses of Parliament, but more especially of the House of Commons, is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the Mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in Committee of Supply, while in Committee of Ways and Means resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand committees, Select Committees chosen for specific purposes, and committees for the consideration of private bills No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "Chiltern Hundieds." No office having emolument attached can be conterred on a member of the House of Commons without his vacating his seat, and therefore by obtaining "the stewardship of Her Majesty's Chiltern Hundreds, the stewardship of the Manor of Poynings, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties.

The rule regulating the Sittings of the House of Commons provides that unless the House shall otherwise order, the House shall meet every Monday, Tucsday, Thursday and Friday, at 3 o'clock, and shall, unless previously adjourned, sit till i o'clock a m., when the Speaker shall adjourn the House without question put, unless a bill originating in Committee of Ways and Means, or unless proceedings made in pursuance of any Act of Parliament or standing connection therewith. when a public oil is and means, or unless proceedings made in approved, the clerk says, "Le roy (or, la reyne) pursuance of any Act of Parliament or standing le veult." If the measure be a private one, he order, or otherwise exempted from the operasays, "Soit fait comme il est desire." Should tion of the standing order, be then under

consideration. At midnight on Mondays, Tuesdays, I hursdays, and Fridays, except as aforesaid, and at half-past 5 on Wednesdays, the proceedings on any business then under consideration are to be interrupted, any dilatory motion which may be before the House is to lapse without question put; and the business then under consideration, and any business subsequently appointed, is to be appointed for the next day on which the House shall sit, unless the Speaker ascertains by the preponderance of voices that a majority of the House desires that such business should be deferred until a later day. On the interruption of business the closure may be moved, and in such case the Speaker or Chairman is not to leave the chair until the questions consequent thereon have been decided. After the business under consideration at midnight, or at 5.30 on Wednesdays, has been disposed of, no opposed business is to be taken A motion may be made by a Minister of the Crown at the commencement of public business, to be decided without amendment or debate, to the effect that the proceedings on any specified business if under discussion at midnight that night be not interrupted under this standing order. When the House meets at 2 o clock for a morning sitting, the sitting is suspended at 7 (no opposed business to be taken after 10 minutes to 7), and is resumed at 9, and coutinued, unless previously adjourned, until midnight, the evening sitting being subject to the provisions of the Standing Order No. 1, which relate to the interruption of business and the adjournment of the House On Wednesdays the House meets at noon, opposed business is not taken after 5 30, and the House adjourns at 6—Closure of Debate Questions Questions for the closure of debate are to be decided in the affirmative, if when a division be taken it appears by the numbers declared from the Chair that not less than one hundred members voted in the majority in support of the motion.—Disorderly Conduct The Speaker or the Chairman may order members whose conduct is grossly disorderly to withdraw immediately from the House during the remainder of that day's sitting, and whenever any member shall have been "named" by the Speaker of Chairman for disregarding the authority of the Chair, or for abusing the rules of the House by persistently and wilfully obstructing business, or other use, he may, by vote of the House, be suspended from the service of the House, on the first occasion for a week, on the second occasion for a fortnight, and on the third or any subsequent occasion for a month, but such suspension is not to exempt the member from service on any private bill to which he may have been previously appointed —Irrelevance or Repetition The Speaker or the Chairman, after having called the attention of the House or of the Committee to the conduct of a member who persists in irrelevance, or tedious expetition either of his own arguments or of the arguments used by other members in debate, may direct him to discontinue his speech

Parliamentary Session, '98. See Session Parliaments, Clerk of the. An officer of

the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading

and witnesses, and signifying the Royal assent to bills which have passed both Houses. The Clerk of the House of Commons acts as chairman and is addressed by members during the election of Speaker He, like the Clerk of the Parliaments, is appointed by the Crown, and is associated with two clerks assistant, who make minutes of the proceedings. The office of Clerk of the Parliaments is held by Henry J. L. Graham, C. B., and Sir Reginald Palgrave, K. C. B., is Clerk of the House of Commons.

Passmore Edwards Settlement, The. The Settlement, towards the cost of which Mr. Passmore Edwards gave £14,000, embraces a lecture-hall, accommodating 450 persons, classnooms, gymnasium, library, cinertaining rooms, and rooms for a Warden and 18 Residents. It is intended to continue and develop the work that was formerly carried on at University Hall and Marchmont Hall, and to be a centre of duration, recreation, and social life for the district. Mrs. Humphry Ward, one of the founders of University Hall, delivered the opening lecture at the Settlement (Oct. 10th, 77), and it was formally opened, on the completion of the building, on Feb 12th, 198, by the Right Hon John Moiley, M.P. The Warden is Mr. R. G. Tatton, and the Settlement is located in Lavistock Place, St. Paneras

Patents for Inventions and how to get them. The right to patent and the pre deges which go with it are denied to no one of either The two principal points to bear in mind in patenting are novelty and utility. A patent is essentially a restricted monopoly, and the inventor is therefore called upon to observe certain limitations His protection extends over a period of fourteen years, provided the fees are paid, but he can extend it at the end of that term for a similar period. Before the actual date of patenting an invention may not be used for profit, either secretly or publicly Patents are issued at the Patent Office, ii, Staple Inn, London Application must be made on an application form accompanied by either a provisional or complete specification regulations. Forms are obtainable at the Inland Revenu Office, Law Courts, or, at a few days notice, of any money order office in the United Kingdom Patents may be taken out through patent agencies, and this is the best plan, provided only that the agent be respectprovided only that the agent be respectable and rehable. Applications are liable to adverse judgment by the Patent Office, and to outside opposition, in the former case ten days or more notice is given the applicant, and he may amend under certain regulations, in the latter, notice of opposition is made on a special form, the grounds being stated. When a complete specification is accepted, the inventor is informed of it, it is advertised in the official journal, and is open to inspection by the publicat the Patent Office on payment of a tee of one shilling, while certified copies of entries can be had at the rate of one hundred words for fourpence. The fees are, in brief: up to sealing, on application for provisional protection, £1, on filing complete specification, to sealing, £1 for , ditto, after sealing, £3. Unapplication to amend specification, up to sealing, £1 for , ditto, after sealing, £3. Every patent is granted for the term of fourteen years from the date of application, subject to Clerk, are performed such duties as making the payment, before the expiration of the minutes of the proceedings, swearing peers fourth and each succeeding year during the

term of the patent, of the prescribed fee. The patentee may pay all or any of the prescribed fees in advance. They begin with £5 in respect of the fifth year, increasing by annual instalments of £1 to a last payment of £14 in respect of the fourteenth year. Thus the total cost of a patent kept in force for the maximum period of 14 years is £99 Applications for patents communicated from abroad are entertained, as are also all inventions requiring international and colonial arrangements for their furtherance Special forms of procedure in these cases are necessary. The inventor, in conclusion, is advised to consult the "Illustrated Official Journal (Patents)," published published Wednesdays, price 6d., which contains abridgments of patents, and illustrations, and the volumes of abridgments. Copies of specificarounines of ablingments. Copies of specifica-tions can be had, on payment of the published price, at Quality Court, Chancery Lane, W C The above may all be consulted also at the Patent Office Free Library, Bishop's Court, Chancery Lane, where admitable facilities exist for readers. During '97 there were exist for readers During '97 there were designs, 1009 for sets of designs, and 10,624 for trade marks.

Patti, Madame Adelina Clorinda, was b at Madrid in 1843. Was trained profes-sionally under Ettore Parili, her step-brother, and made her first appearance on the stage at New York in '59 She first appeared in London in '61, as Amina in "La Sonnambula" at Covent in '61, as Amina in "La Sonnambula" at Covent Garden, and at once became the favourite prima donna of the day. In '70 she received from the Imperor of Russia the Order of Merit, and the appointment of First Singer at the Imperial Court. She married in '68 M Roger de Cahurae, Marquis de Caux, from whom she was divorced in '83, and afterwards Signor Nicolini, who died in '98. A theatre, which she had erected at Craig-y-nos, her Welsh residence that was copied in '99. Welsh residence, was opened in Aug Madame Patti has undertaken several very successful tours abroad, in the Argentine Republic and in the States, and in Oct 'a : she began her far well tour to the latter country In '95 she reappeared at Covent Garden after a ten years' absence She rarely appears now except at concerts

Peace Society, The, was founded in 1816, and has for its object the promotion of permanent and universal peace. It welcomes the support of Christians of all denominations, and also of those persons who oppose was on humanitarian or other grounds. The Society has always advocated a gradual, proportionate, and simultaneous disarmament by all the nations of Europe, and the principle of arbitration, and it is unquestionably due to its efforts that this mode of settling international difficulties has been adopted with increasing frequency and acceptance. During the period of its existence over 140 instances of pacific settlements have occurred. The Society maintains a constant propaganda in favour of peace, and, constant propaganda in favour of peace, and, amongst other methods of action, especially advocates the preaching of sermons on the subject of peace, in as many churches as possible, on the Sunday before Christmas. President, Sir Joseph W. Pease, Bart., M.P.; Treasuror, Walter Hazell, Esq., M.P., Secretary, W. Evans Darby, LL.D. Offices, 47, New Broad Street, London, E.C.

PEERAGE.

Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own containing the five temporal ranks or degrees and presendence, used before degrees. its own containing the five temporal ranks or degrees, and precedence in each degree depended upon the date of the creation of the title. Thus in each country the dukes came first, and took precedence of each other in order of date of title; then came the marquises, earls, viscounts, and barons, precedence in each rank being similarly governed by priority of date. At the union with Scotland, in the state was arranged that the Scotland. land, in 1707, it was arranged that the Scotch pecrages should rank after the English peerages then in existence, according to degree, and the Scotch dukedoms were accordingly placed in order of date after all the English dukedoms, and so on through the other ranks. The Act of Union also provided that the Scotch peers should be represented in the House of Lords by a portion of their number only; and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. From that time until the Union with Ireland the peerages created were either Irish or of Great Britain, the latter alone giving seats in the House of Lords, and taking precedence according to degree next after the English and Scotch peer-ages. The Act of Union with Ireland provided that peers of that kingdom should take precedence next after peers of Great Britain according to rank, and that Ireland should be represented in the House of Lords by a portion of her peers only It was further enacted that one new liish peerage might be created on the extinction of three existing Irish peciages, and that when the number should be reduced to one hundred, if one periage became extinct one other might be created. The peerages of the United Kingdom and of Ireland created since the Union take precedence according to rank and date of patent next after those of Ireland which were in existence at the Union, but of the two classes only the peerages of the United Kingdom give of themselves a seat in the House of Loids There is no limit to the mercase of these but the pleasure of the Sovereign The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. The House of Lords is composed of two of the estates of the realm, the lords spurtual and temporal. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics.
The Archbishops and the Bishops of London,
Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases the total number of lords spiritual to less than Pensions. See FINANCE NATIONAL, Part III. twenty-six, and then in order of seniority of

appointment. The Bishop of Sodor and Man is not included in this rotation, and has no seat in Parliament. A bishop ceases to be a lord of Parliament on resigning his see. The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, repre-sentative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scotlash peers send sixteen representatives to the House of Lords, who are elected im-mediately after every general election, and sit until l'arliament is dissolved. The Irish peers elect twenty-eight representatives for life. The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on resigning office, but by the Appellate Julis-diction Act of '87 any retired lord of appeal may sit and vote as a member of the House of Lords during his life And it was directed, '98. that the children of legal life peers and of legal life peers deceased should in future have the courtesy title of "Honomable," together with the rank and precedence next to and immediately after the younger children of all hereditary barons now created or hereafter to be created, and immediately before all baronets The pecis temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or hish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Bucclevch sits as Lail of Doncaster lords spiritual and temporal sit together, and all have an equal voice and vote in the house, whatever may be their rank As in the House of Commons, each peer must be present to record his vote, the practice of pecis giving proxies having been discontinued. A newly dicated peer, or one clevated to a higher title, is intro-duced by two other peers of his own degree, who are accompanied by the Earl Marshal (the hereditary office of the Duke of Norfolk), the Lord Great Chamberlain (now the Earl of Ancas ter), all in their parliamentary robes, attended by Garter King of Arms (Sir Albert Woods has long held this office), and Black Rod (Sir M Biddulph). The procession enters the house at the bar, and bows three times on the way to the woolsack, where the peer kneeling presents his patent and writ to the Lord Chancellor. Both these documents are read by the clerk, and the oath is administered to the peer at the table, and he subscribes the roll with further formalities conducted to one of the benches of the house, the position chosen varying with the rank of the new peer, where he and his introducers bow thrue to the Lord Chancellor, by whom he is afterwards congratulated Peers are robed on these occasions, and at the opening of Parliament by Her Majesty, but wear their ordinary tress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above, representative peers simply present their writs, and are sworn like peers succeeding to a title. The peers place themselves somewhat differently to the commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but

in the Loids there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party. The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in pover. The other lords range themselves pretty much as the commons do,—the leader of the House and his colleagues on the Ministry on the front bench to the right of the woolsack, his supporters taking their places on the benches behind him, and the leader of the Opposition in that House and the ex-Ministers on the left front bench, behind them There is no arrangement of then adherents peers according to rank, the different degrees sitting together indiscriminately if of the same political complexion The House of Lords has both legislative and judicial powers. It is the highest appellate court of the United Kingdom it may in certain cases try members of ts own body, it tries any person who may be impeached by the House of Commons, and it also decides claims to the perage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex lord chancellors, and the lords of appeal in ordinary. It may sit during a parliamentary recess, and its hours of business are from 10,00 am to 4 pm. The following list contains in alphabetical order the names of all peers of whatever classification, whether they be English, Scotch, Irish, of Great Britain, or of the United Kingdom, those who are not entitled to a seat in the House of Lords hiving an * prefixed lt also includes the bishops, whether they be lords of Parliament or not, the distinction between these being indicated in the same manner. The limiteds S.P. and J.P. and S.R.P. and J.R.P. initials 3 r and 1 r and 3 r and 1 r r are used to signify that the lord is a Scotch or Irish peer, or a Scotch or Irish representative peer. The abbreviations n, s, bro, un, hb, and gs will be readily understood on, no, and gs will be teadily understood to mean riphew, son, brother, under half-brother, and grandson PC is used where the pect is a Proy Councillor, and L L stands for Lord Lieutenant. The following is the present composition of the House of Lords: present composition of the House of Lords: Peers of the Blood Royal, 6, Archbishops, 2; Dakes, 2*, Marquises, 22, Farls, 123, Viscounts, 9, Bishops, 24, barons, 319, Scotch Representative Peers, 16, Jiish Representative Peers, 28, total, 550 Fourteen of the foregoing are minors, and two are reckoned both as peers of the United Kingdom and Jiish remessed they been seen see that the actual votting. representative peers, so that the actual voting strength of the House is now (Nov. '98) 575

Devonshire, Spencer Compton, 8th D. of (cr. 1604) Surname Cavendish B 1833, st 1897 P.C., K. G. He is e. s. of the late Duke of Devonshire L at Trin Coll, Camb, where he graduated BA '54 Fhe Duke was long familiar to the world by the title of the Maximus of Hartmaton, which he hope preyous Marquis of Hartington, which he bore previous to his succession to the dukedom. He was returned for North Lancashire as a Liberal in '57, and in '59 moved the vote of want of confidence which resulted in the defeat of Lord Derby In March '63 he was appointed a Lord of the Admiralty, and in April of the same year Under-Secretary of State for War in Lord Russell's administration In Feb '66 he obtained Cabinet rank as Secretary for War. At the general election of '68 he was defeated In North Lancashire, but was returned for the Radnor Boroughs He was appointed Postmaster-General in Mr Gladstone's first administration, and retained that office till '71, when he succeeded Mr Chichester Fortescue as Chief Seoretary for Ireland. On the returement of Mr. Gladstone after his defeat in '74, Lord Hartington was unani-mously chosen as leader of the Liberal Party

at a meeting held at the Reform Club under the presidency of Mr. John Bright. In '79 he was elected Lord Rector of the University of Edinburgh, which office he held till '91. At the general election of '80 he was elected M.P. for North-East Lancashire and was M.P. for North-East Lancashire, and was sent for by the Queen on the defeat and resignation of Lord Beaconsfield. He de-clined, however, to form an administration, being content to serve again under Mr. Gladstone. He became Secretary for India, but returned to the War Office in '82 At the general election in '85 he was returned by an enormous majority for the Rossendale Division of Lancashire. When Mr Gladstone formulated his policy of Home Rule Lord Hartington disagreed with him, and became the recognised leader of the Liberal Unionist Recognising his commanding influence with the Unionists of both parties, Lord Salisbury first offered to serve under him if he would accept the premiership, and after the secession of Lord Randolph Churchill, again endeavoured to induce him to join his Cabinet. But, on the ground that he could best serve the Unionist cause without taking office, he declined both offers, Subsequent events only served to emphasise his antagonism to Mr. Gladstone's Home Ruel policy, and he has since assumed an attitude of close alliance with Lord Salisbury He was appointed Chairman of the Royal Commission on Labour April '91. The Duke, as he became at the end of '91, was "inaugurated" as Chancellor of Cambridge University in Jan. '92, and "installed" in June, in succession to his father In August he was married privately, at Christ Church, Mayfait, to Louise, Duchess of Manchester, a daughter of the late Count von Alton of Hanover, and widow of the 7th Duke of Manchester, who died in '90 She was born in '32. During the same mouth his grace was invested with the Order of the Garter. He was appointed Lord President of close alliance with Lord Salisbury He Garter. He was appointed Lord President of the Council in the Coalition Cabinet '95 Is President of a Cabinet Committee of National and Imperial Defence such as was recommended by the famous "Hartington Commission" Lord-Lieutenant of Derbyshire and Co. Waterford. Elected Mayor of Eastbourne '97. Hen, Victor Cavendish, M.P., n 78, Piccadilly, W

Rothschild, M.P. She died in Nov. '90. Lord Rosebery succeeded his grandfather in '68, appointed a commissioner to inquire into endowments in Scotland '72, Under-Secretary of State, Home Office, '81-3, elected Reotor of the University of Edinburgh '80, was Lord Privy Seal, and First Commissioner of Works '85. On the accession to power of Mr Gladstone in the beginning of '86, Lord Rosebery strained the distinguished post of Secretary for Foreign Affairs Ile held the portfolio for only six months, until the fall of Mi, Gladonly six months, until the fall of Mr. Gladstone's Government in June, but he estab-lished a very high reputation even in that short period Lord Rosebery cast in his fortunes fully with Mr. Gladstone, and entirely agreed with his Home Rule policy. Though a peer, he moved ('84) for a select committee to inquire into the best means of improving the efficiency of the House of Peers. Mr. Gladstone some years ago forecast his future, and publicly spoke of him as destined to a great part in the history of country. He is a strong advocate of Imperial Federation (q v), and takes a great interest in movements for the improvement of the social condition of the masses in the Peerage of Scotland. Surname Leslie, B. 1877, 5. 1893. Hences, Lady Eleanor M. Leslic, st. Rothschild, Nathaniel Mayer, 1st L. (cr. 1885). Surname Rothschild. B. 18840. M.P. Ayiesbord County Council Jan 17th, '89, and on Feb. 12th appointed Chairman of that body, over whose deliberations he presided with over whose deliberations he presided with great success But, owing to his many public duties, he had to resign in June 'oo. His lordship abstained to a great extent from his usual political and social labours during or, owing to the lamented death of Lady Rosebery. His monograph on William Pitt the Younger was assued in November. In Jan. '92 he again became the Chairman of the London County Council, and held the position for some months, till the approach of the general election compelled him to resign it. When Mr, Gladstone succeeded

to power Lord Rosebery became Secretary for Foreign Affairs, and in October he was made a Knight of the Garter. On the resignation of Mr. Gladstone in March '94 the Queen offered the post of Prime Minister to Lord Rosebery, and he carried on the government with no little success till July '95. He then urged upon his supporters that the general election should be fought upon the question of the predominance of the House of Lords. During '96 his attitude upon the Armenian Question differed from that of Mr. Gladstone, and finally he decided upon resigning the leadership of the party in order to leave himself an absolutely free hand upon this question. His view was that Great Britain should not be hurried into an intervention in the Armenian Question, which would lead to the risk of a European war. In '91 Lord Rosebery, from his place in the House of Peers, pand a noble and eloquent tribute to the life and public services of Mr. Gladstone, and later on spoke in the country in support of the attitude taken up by Lord Salisbury on the Fashoda situation. Lord Rosebery

on the Fashoda situation. Lord Rosebery beeps an excellent racing stud, and both in o4 and '95 he won the Derby. Heir, Lord Dalmeny, s. L. Menimore, Leighton Bussaid, Palmeny Park, Edinburgh. 8alisbury, John, 93rd Bp. of. (See founded 1042) Surname Wordsworth. B. 1844, of the late Bishop of Lincoln, and gn. of the poet Wordsworth. E. at Ipswinch, Winchester, and New Coll, Oxon, graduating in '65. Ordained deacon in '67 and priest in '69. His cierical life until he was ordained Bishop His cierical life until he was ordained Bishop was passed in academical and cathedral apwas passed in academical and carterial appointments. He was Fellow and College Tutor of Brasenove, Proctor, Grinfield Lec-turer, Select Preacher, Bampton Lecturer, Examiner for Classical Moderations and in the Theological Schools, and Examining Chaplain to his father. In '83 he was appointed Canon of Rochester and Oriel Professor of Interpretation of Scripture, and Bishop of Salisbury'85 Dr. Wordsworth is a moderate High Churchman, and has written several theological and classical works, the best known of which are "Fragments and Speci-mens of Early Latin," the Bampton Lectures for 'st, and his critical edition of the Vulgate New Testament (in partnership with the Rev H. J. White), of which the first volume, containing the Gospels, was published in 68 His Visitation Addresses on the Holy Communion reached a second edition in '92 "Consideration on Public Worship and on the Ministry of Penitence," addressed to the clergy, with a "Pastoral Letter to the Laity of the Diocese" ('98), has been recently much read and commented on. Made a voyage round the world in '04-5, spending two months in New Zealand In Jan and Feb '98 hc executed a commission from the Archbishop to visit the Patriarchs and Chief Presbyters of the East, and Alexandria, Nicosia (Cyprus), Damascus, Jerusalem, and Constantinople and to present the resolutions of the Lambeth

and to present the resolutions of the Lambeth Conference of '97 on Union among Christians. He consecrated the Anglican Church of St. George at Jerusalem '98. Palace, Salisbury, Lollards Tower, S. E. Salisbury, Robert Arthur Talbot, 3rd M of (cr. 1789). Surname Gascoyne-Cecil. B 1830, s. 1868. E. Eton and Christ Church, Oxford, and—as Lord Robert Cecil—was elected for the family borough of Stamford in '53. K. G., P.C. He received a place in Lord Derby's ministry of '66 as Seoretary of State for India ministry of '66 as Secretary of State for India ('66-7), under the title of Lord Cranboine, which he assumed on the death of his elder brother. Owing to certain divergencies of opinion on the question of the extension of the franchise, to which he was opposed, Lord Cranborne separated himself for a time from his political associates; but on taking his place in the House of Lords at his father's death, in '69, as Lord Salisbury, he returned to his old party associations, and

soon took rank as the foremost debater of the Upper House. In '64 he was elected Chancellor of the University of Oxford. He gradually assumed a high position of authority on Indian and foreign affairs; and when Mr. Disraeli resumed office as Premier in '74, Lord Salisbury became Secretary for India ('74-8). He was despatched to Constantinople in '76 to take part in the Conference which was expected to settle the matters in dispute between Russia and Turkey. The the war broke out which ended by the Treaty
of San Stefano Lord Salisbury accompanied
Lord Beatonsfield to the Berlin Congress He
was Secretary for Foreign Affairs '78-80. Upon Lord Beaconsfield's death, in '80, Lord Salisbury became the recognised leader of the Conservative party, and when the Gladstone Ministry resigned office in June '85 Lord Salisbury became Premier as well as Secretary (or Foreign Affairs The new Administration, however, did not last long. The general election in November of the same year did not result favourably to the Government, and immediately after Lord Salisbury resigned. Mr Gladstone succeeded, but he too signed. Mr oladstone sinceeded, but it is had a short lease of power, and was defeated on the second reading of the Home Rule Bill June 8th, 86. The general election which took place in the following month brought Lord Salrsbury again into power, and his tenure of office during the Jubilee year of the Queen's reign will be memorable in his lordship's family for the honour which her Majesty paid him by going in person to visit him at Hatfield. In May '88 he introduced a Bill into the House of Lords for the reform of that Assembly and the creation of life peers. He was presented with the free-dom of the city of Glasgow May 20th, '91, and in July he had the honour of entertaining the German Emperor at Hatheld, which was also visited by the Prince of Naples. Though the result of the general election in '92 was adverse to his Government he remained in office till he was defeated in the Commons, when he gave way to Mr. (dad-stone Lord Salisbury was an occasional contributor in his younger days to the Quarterly Review, but he now seeks relaxation from the cares of office in scientific rather than in literal y pursuits, experimental physics being his favourite study. He spends much of his time in his laboratory at Hatfield, and has greatly interested himself in the application of electricity to practical purposes on his estates. On the resignation of Lord Rosebery, in June '95, Lord Salisbury formed his third Administration, which is a coalition ministry, in which places were found for a number of Liberal Unionists (see Ministry). Lord Warden of the Cinque Ports '95, D L. Kent. He was occupied throughout '66 by the conduct of our relations with America in regard to the Venezuelan Boundary dispute, and by affairs in Armenia, and in '97 events in Ciete, and afterwards in Greece, found ample occupation for him, apart from other foreign affairs. His conduct of the negotiations in regard to the China question ('96) exposed him to criticism even from his own eide, but in the firm stand he made on the Fashoda question he received the support of both great political parties. Heir, Cranborne, M.P., s. C. Carllon.

People's Palace for East London, The, opened May '87 by Her Majesty, is situated in the busy thoroughfare of the Mile End Road. It provides for the vast population of the East End a large hall for concerts, entertainments, etc.; a library and reading-rooms, gymnasia, swimming baths, social meeting rooms, game rooms, refreshment rooms, and trade shops and technical schools. The last-named department is intended to instruct youths in their trades, and is subdivided into day and evening departments. The day school, the fee of which per session of about 40 weeks is £2, contains 400 boys, of whom 205 pay fees, and the rest hold scholarships. The evening classes attract an average attendance of about 954, and embrace such subjects as brass-finishing, bookbinding, physiology, tailors' cutting, elocution, machine construction and drawing, elocution, machine construction and drawing, elocution, machine construction and drawing, elocution, the second of £20,000, by the Drapers' Company, were opened by the Master and Wardens of the Company Oct. 5th, '88. The site has cost in all £22,400. The "Palace" idea is a resuscitation and development of the Beaumont Philosophical Institute, established nearly half a century since in Mile End, the Governois of which are some twenty gentlemen closely identified with the East End. In '92 the buildings and grounds were practically completed by the grant of £3500 by the Drapers' Company towards the laying out of the grounds and the public gardens, which were then thrown open to the public. Patron, the Queen; Chairman of the Governors and Treasurer, Sir | H. Johnson; Secretary, C. F. Osborn. Offices. People's Palace, Mile End Road, E.

Persia. An independent Asiatic state lying between Turkey and Afghanistan, three times as large as France. The chief cities are Tele-ran, Tabriz, Ispahan, Meshed, and Shiraz The Shah, officially called the "Shahinshah" or king of kings, is the autociat of the realm, and carries on his government through a cabinet of 12 responsible ministers, and several ministers without portfolios. The country is divided into 33 provinces under governots-general, generally called Hakim, who, with the Sheikhsel-Islam, or chief judges of the cities, administer justice and superintend the collection of the revenue. The provinces are subdivided into districts. The chiefs of the nomad tribes exercise authority over them and collect the re-venues from them The nomads consist chiefly venues from them—the homans consistentially of Turks, Kurds, Arabs and Lurs, and altogether number nearly 2,000,000. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and Persian literature. The the Shia sect, and Persian literature chief products of the country are silk, grain, fruits, gums, opium, carpets, and tobacco." army numbers about 100,000, of whom about one-fourth are kept in active service. Revenue, '97-8, about £1,450,000. The Government obtained from the Imperial Bank of Persia in '92 a loan of £500,000, repayable in eighty half-yearly instalments. This is the only public debt. The imports and exports of '97 were estimated to amount to about £7,500,000. Area, 628,000 sq. m.; pop. about 9,000,000. For Ministry see Diplomatic. See also Parsian Roads and Tramways under Engineering.

Persia, Shah of. See Muzaffer-ed-Din.

Persian Gulf, etc. For Residents, etc., see DIPLOMATIC.

Peru. A republic on W. coast of S. America. The capital is Lima, with an estimated population of 104,000. The country contains wast stretches of rich agricultural and pastoral lands, besides profitable mining and petroleum fields and immense forests. The Sierra is a region of mineral wealth. The climate is very good, and the duntry is admirably suited for European immigrants. The disastrous war with Chili completely shattered the power of Peru. The Constitution is modelled on that of the United States, the legislative power being vested in a Senate elected by the provinces, one member for every 30,000 inhabitants, and a House of Representatives nominated by the electoral colleges of the provinces. Executive in the hands of a President elected for four years. Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion, although some degree of theration exists. Education is compulsory and free in the elementary schools Chief products are sugar, wool, cotton, coffee: and guano Area, 464,000 sq. m.; ppp., 3,000,000 Revenue, 96, about £1,072,100; expenditure, about £1,130,000; imports, 97, about £1,000,000 For Ministry, etc., see DIPLOMAILC.—Bitstry, '98. In his Message to Congress the President stated that 1,000,000 soft the lansom of Iacna and Arica (July 28th).

PHILIPPINE ISLANDS.

A large group of the Asiatic Archipelago, and antil '98 ruled as a Spanish colony by a Governor-General, with the Caroline, Sulu, and Marianno Islands. Area, 114,326 sq. m., pop. over 7,500,000. I he largest islands are Luzon and Mindanao Capital, Manila. The inhabitants consist of the aborigines, called Negritos, the Igolotes, probably of Chinese descent, who are the agriculturists of the islands, and the Tagalos, who are Malay immigrants. Over the two former races the Spaniards easily obtained the ascendency, but the Tagalos never bowed to Spanish rule. Great mineral wealth is said to exist throughout the islands, but their unhealthy climate prevents any effective attempt being made to work it properly. The chief industries are in the hands of the Chinese, who number about 100,000. Sugar, hemp, and tobacco are exported. The islands are specially rich in timber. The imports amount to about \$\mu_{2,000,000}\$, and the exports to about \$\mu_{4,000,000}\$. A conspiracy to secure the independence of the islands developed into open rebellion during '96. General Primo Rivera, appointed Governor in the latter part of '97, was charged by the Spanish Government with instructions to carry out a seheme of reforms. In December terms were arrived at with Agulnaldo and other rebel leaders for their submission. This was accomplished largely by the help of money, and a

full amnesty was granted, many of the leaders emigrating to Hong-Kong. Despite a small rising against the taxes in Luzon during March '98, which was speedily crushed, peace prevailed till the Americo-Spanish war broke out. Then Admiral Dewey sailed with an American squadron from Hong-Kong and completely destroyed the Spanish ships in Manila harbour, capturing the forts at Cavite, and thus having Manila itself at his mercy. Being without military aid, he could not, however, proceed to reduce the city, so Aguinaldo and other rebel leaders were brought from Hong-Kong, and soon the old insurgents took the field again, and completely hemmed in Manila from the land side Meanwhile, American troops with supplies of ammunition left San Fiancisco (May 26th), and a second expedition was despatched later on. The Spanish garrisons all over the country were overpowered and the lack of provisions made the situation of the troops in Manila desperate. The Captain-General, indeed, proposed to surrender (June 5th), but finding himself unsupported resigned, and was succeeded by the second officer in command, afterwards leaving the island. The Ladrone Islands were seized by an Amerikan cruiser (20th) In due course the American troops arrived, and the disembarkation began (July 181) Aguinaldo had meanwhile made great progress, but a German man-ol-war inter-fered with his troops while attacking Isla Grande in Subig Bay Thereupon Admiral Dewey sent two of his ships to take the island, and the German vessel retired (7th) The attitude of the Germans generally, and especially of the German squadron at Manila, was by no means friendly to the United States. Aguinaldo began to get troublesome early in August, owing to his arrogance, and his apparent desire to oust the Spaniards and then to get 11d of the Americans and run a rebel republic himself. However, the city was bombarded and taken by the American land and seaforces co-operating(13th), just one day after the signature of the peace protocol at Washington (see Spain and United STATES), and before the proclamation of the President, ordering a cessation of hostilities, could reach Mania. A deputation of the most influential natives in the Southern Philippines waited on the American Consul urging that the United States should annex the islands. and declaring that they would never submit to the rule of the Tagalos (Sept 3rd) Meanwhile the insurgents attacked the Spanish positions till they controlled the whole island of Luzon, except Manila and Cavite Their headquarters were fixed at Malolos, and there an Assembly of Delegates met (15th), and decided (23rd) to request the Americans to recognise the independence of the islands, save for an American protectorate relating only to external affairs Aguinaldo was elected President Consider able friction manifested itself as time went on between the American forces and the insurgents, and there was even a naval engagement (Oot. 19th), while General Otis obliged them to evacuate the suburbs of Manila. Meanwhile the Peace Commissioners were sitting in Paris, and the American delegates presented a demand pear, and it must be regarded as an important communication on the subject. At about the indemnity for the expenses of the war. This same time the adaptation of Dr. Joly's methods was, of course, rejected by the Spanish Computer to the ordinary amateurs' needs further brought missioners; but ultimately the United States colour photography into popular notice the Cabinet sent instructions (Nov. 19th) that the colour photography into popular notice the

American terms must be accepted within a week. The Spanish Commissioners thereupon refused to discuss the question of Spanish sovereignty, and proposed that to avoid a rupture the interpretation of the clause of the Protocol relative to the Philippines should be submitted to arbitration (16th).

PHOTOGRAPHY, '98.

General activity in all branches of photographic practice during the year has resulted in many technical advances, whilst the average of artistic work is distinctly higher. Perhaps the most important announcement of the year was the communication to the Royal Society which Dr W J Russell made in his Bakerian lecture with reference to the photogenic emanations of a great many substances, especially metals such as zinc Dr. Russell's careful experiments carried to a further point Captain Coulson's "Vapography," so called from the fact that this eminent investigator found that certain metals give off at ordinary temperatures vapours which, even at a distance, and trrespective of intervening substances, such as glass or celluloid, will affect the gelatino-bromide film in the same way as will light. The interest almost amounting to consternation which these communications are ited amongst inventors and makers of apparatus will be easily understood when it is remembered that zinc has often been largely used for apparatus wherein it was brought into contact with the sensitive plate, to which it was never sus-pected of doing injury. Among the organic bodies round to affect a plate may be placed oils and turpentines. Alcohol, ether, petroleum, etc., have no apparent action, but amongst organic solids which are injurious may placed mahogany (of which nearly all cameras are made), also oak, acacia, cork, charcoal, etc. Gutta percha, paper, parchinent, gelatine, and collodion, though mactive themselves, permit the active emanations of other bodies to pass through them, whilst mica, selenite, and gum arabic arc opaque to them. These emanations in other respects justify their being termed vapours flowing, turning corners, and generally moving piccisely as fluids and vapours generally do Whilst a great deal more remains to be done to systematise and explain the discoveries thus far made, the subject bristles with interest, and would seem to open up difficulties of grave import, at the same time possibly clearing up some matters hitherto but little understood.

Colour photography, misleadingly so-called, has been the constant object of study by Capt. Abney, Ives, Joly, Lippmann, and others, and under the term heliochromy many interesting lectures and demonstrations have been given, and the various methods of three-colour printing have come into more general commercial use. The scientific requirements of colour photography, and the difference between this and photography in natural colours, formed the by Capt. Abney in '97, but the publication of which was not until February of the past supplying, in such a form that any photographer might use them, the necessary ruled screen and tinted glass for taking the three negatives for subsequent superposition, and thus producing a heliochrome. The Chassagne process, which created so much excitement last year, is discredited, and of Bennetto's alleged discovery little more has been heard, so that for all practical purposes colour photography, in the sense the average person understands the term, is about where it has been any time this last ten years. At the exhibition of the Royal Photographic Society this year a result was shown in vivid colours by M1. Edwin Brewerton, in which two subsequent printings were made in pigmented-bichromated gum of the requisite transparent colouis on a blue ferro-prussiate foundation, the result being a vividly coloured print in hues approximately true to nature ior this he was awarded a medal. At the same exhibition some examples of carbon printing in colours, and also with aniline colours, were shown by Mi. Thos Manly, who christens his process Ozotype The principle of this process, however, remains a secret with its exhibitor With regard to the at present chimerical notion of combining the powers of photography and the electric telegraph, various more or sensational announcements have appeared from time to time in the general press accrediting obscure persons here and there with having made astounding discoveries which would revolutionise all known methods of long-distance communications. What may be called Teleellectroscopy, however, remains as yet only within the sphere of the possible. According to Herr Liesegang this can be accomplished with almost any degree of perfection, it being merely a question of cost for the maintenance and delicate construction of apparatus. The results of the expeditions at the beginning of the year to observe the total eclipse of the sun were attended with much photographic interest, owing to the very complete arranagements which were made to secure complete photo graphic records. Much that was of great value in this direction was secured, and formed the nucleus of an interesting lecture delivered by the Astronomer Royal during the great photographic exhibition at the Crystal Palace in May. Under the title Canematograph, and a host of other faucy names, this popular and entertaining form of photograph is new being shown all over the country, though neither the film nor the projected image can be said to have been very noticeably improved, and most of the draw-backs are still present. In October Mr. Birt Acres, who was the first to show "animated pictures" in London, introduced to a critical audience a new and simplified machine which would be within the reach of nearly every one, and by means of which apparatus, attached to any ordinary camera, cinematograph films can be exposed and again projected on the screen by any photographer of only ordinary attain-ments and opportunities. The National Photographic Record and Survey Association has now taken definite form, and has already been the means of depositing several hundreds of excellent historical photographs in the British Museum In this connection Sir Benjamin Stone has established an excellent department. connection with improvements in photographic optics Mr. T. H. Dalimeyer has been prominent, whilst Ross, Ltd., have given to the photographer an eminently useful instrument in the

Ross-Goerz lens. Actions as an alkaline accompaniment of pyrogallol has been prominently brought to public notice and highly spoken of, whilst a new reagent, Diogen, has been added to the list. The Gum Biohromate printing method, a resuscitation of an old and nearly obsolete process recommended on account of the liberal amount of control the operator can exercise over the formation of the image, has found incegasing favour. Other printing methods, more or less modifications of familiar ones, new brands of dry plates, many new and remarkably ingenious hand cameras, have been introduced, and the extension and increase of manufacturing firms who are solely eccupied in the making of photographic materials of appliances, all point to the continued vitality of photography as an assistance in arts, crafts and industries, and as a hobby for the more leisured classes.

Penhaps from a general standpoint the event of the year was the great International Photographic Exhibition held at the Crystal Palace under the auspices of the Royal Photographic Society, and opened by H R II The Prince of Wales on April 25th It was the most complete and extensive exhibition of Photography in all its branches and applications that has even been held. Almost simultaneously an exhibition of the Photographic Trades was held at the Portman Rooms, London. At the commencement of the year an important photographic exhibition was held in Glasgow; and in April the North-Western Photographic Exhibition at Manchester was up to that time in some respects unique as regards photograph exhibitions outside London, the system of awarding medals and prizes being abolished with notable success. In November, in the City Art Galleries of Bradford Corporation lending the Galleries and in other ways assisting the undertaking.

The Annual Exhibition of the Royal Photographic Society was hold from Sept 20th to Nov 12th, at 5.9. Pall Mall, in the gallerits of the Royal Water Colour Society, as usual 515 medals were awarded, the smallest number on record, the recipients being Art Section, W. J. Warten, W. F. Fraser, Charles S. Baynton, Mathide Weil, George E. Inompson, Technical Section, W. Edwin Brewerton The Photographic Salon was hold in the Dudley Gallery, Piccadilly, from Sept 30th to Nov. 5th The Photographic Occupantion met at Glasgow from July oth to 12th Mr. John Stuart being the president for the year. The Earl of Crawford, the president of the Royal Photographic Society, hopes to prevail on Government to establish Photographic departments at all principal public museums, for the supply of official photographs of the objects they contain. In addition to the boon which this would be to authors, publishers, etc., it would be giving photographers an official status which might in time necessitate and so lead to the establishment of a Government training school.

Picquart, Colonel, was born at Strasburg in 1854, and was educated at St. Cyr 72-74, and at the General Staff School from 74-76, gaining high places at the examinations in both schools. After serving in Algeria with the Zouaves he entered the infantry, and

gained his captaincy '80. In '83 he was appointed to the War Office staff, and in '85-88 served in Tonquin, where he earned a decora-tion. Returning to France he became professor at the Military School, and in '93 rejoined the War Office, becoming head of the Intelligence Department in succession to Colonel Sandherr, of lieut-colonel, but then he began his in-quiries into the Dreyfus case, moved thereto by certain suspicious discoveries which he made as to Major Esterhazy. In this he was at first encouraged by his official superiors, at irst encouraged by his official superiors, but afterwards discouraged, and in January '97 he was sent in disgrace to Tunis. He returned to take a prominent part in the inquiries and legal proceedings which took place in the winter of '97 and during '98, and his evidence formed the strongest proof of the illegality of the trial at which Dreyfus was condemned, and of the astounding methods employed by the War Office to hush up the affair. In Feb '98 he was placed on the anair. In Feb. 30 He was pinced in a charge of revealing War Office secrets See France, History, 98, for full details.

Pinero, Arthur Wing, dramatic author, was in London in 1855 Commencing a legal b. in London in 1855 Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Hay-market Theatres. Devoting himself to playmarket Theatres. Devoting himself to play-writing he produced his first piece, which was entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "Zoo a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons," "The Rocket" ('83), "The Magistrate" ('85), "Sweet Lavender," "The Profligate," "In Chancery," "Lady Bountiful," "The Times," "The Second Mis. Lanqueray" ('93), "The Notorious Mrs. Ebbsmith" and "The Benefit of the Doubt," both produced in '95, "The Princess and the Butterfly," moduced at St Princess and the Butterfly," produced at St James's Theatre, March '97, and "Trelawny of the Wells," produced at the Court Theatre Jan '98. He also collaborated with Sn Arthur Sullivan and Mr Comyns Carrin " The Beauty Stone," a romantic musical diama produced at the Savoy Theatre in May '98 Address 63, Hamilton Terrace, London, N.W

Poet Laureate. An office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV, the first patent being granted in 1630 It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III Amongst those who have held this office may Boroug be mentioned Dryden, Southey, Wordsworth, Irish C and Tennyson. Mr Alfred Austin (q.v) is the Police. present holder of the office.

Poisons Bill See Session, sect 76.

Poland, a general government of Russia,

of its administrative independence, and in '68 of its administrative independence, and in '68 it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was prohibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the Socialist party Rut both are equally opposed to the Russian Government. See Russia.

Police Courts. Oity Mansion House, presided over by the Lord Mayor; Chief Clerk, C. G. Douglas Guildhall, presided over by one of the Aldermen, in rotation for a week at a time; Chief Clerk, H. G. Savill. Metropolitan; Bow Street, Covent Garden Magistrates, Sir J. Bridge, Knt, Su J. Vaughan, Knt., and F. Lushington, Esq., Chief Clerk, H. Cavendish. Glerkenwell, King's Cross Road Magistrates, J. R. W. Bros and H. Smith, Esqs.; Chief Clerk, O. Wheeler Lambeth, Lower Kennington Lane Magistrates, G. L. Denman and A. A. Hopkins, Esqs.; Chief Clerk, T. C. Martin. Great Marlborough Street Magistrates, Albert De Rutzen and E. N. F. Fenwick, Esqs.; Chief Clerk, J. R. Lyell. Marylebone, Seymour Place Magistrates, M. Curtis Bennett and A. C. Powden, Esqs.; Chief Clerk, W. Tate. Southwark, High Street, Borough Magistrates, W. Slade and E. S. Fot dham, Esqs., Chief Clerk, H. Naim North London, Stoke Newington Road: Magistrate, E. C. T. D'Eyncourt; Chief Clerk, F. S. Newer Thames, Arbour Square, Stepney, Magistrates, F. Mcad and John Dickinson, Frons. Chief Clerk, S. Swill Wattminster. ney Magistiates, F. Mead and John Dickinson, Fsqs, Chief Clerk, S Savill Westminster, Vincent Scharc Magistiates, R. H. Bullock Vincent Scuare Magistiates, R. H. Bulloca Marsham, and Jas Sheil, Esqs; Chief Clerk, A. H. Safford Worahip Street Magistrates, Haden Corser and A. R. Cluer, Esqs.; Chief Clerk, H. Fitterton West London (West Kensington), Vernon Street Magistrates, John Rose and R. O. B. Lane, Q. C., Fsqs., Chief Clerk, F. E. Lowris South-Western, Lavender Hill: Magistrate, C. K. Francis, Esq.; Chief Clerk, G. A. Bird Greenwich and Woolwich Magistrates, Gilbert G. Kennedy and G. Paul Taylor, Esqs.; Chief Clerk, H. P. Newton. West Ham. West Ham Lane, Stratford Magistrates, Esqs, Chief Clerk, H. P. Newton. West Ham, West Ham Lane, Stratford Magistrates, E. Baggallay, Esq. and the Borough Justices; Chief Clerk, W. H. Fowler The Clerken-well and North London police courts are together served by three magistrates, as are also the South-Western and West London. Hours of Sitting. Mansion House, 12 to 2; Guildhall, 10 to 4; Greenwich, 10 to 1.30; Woolwich, 2.30 to 5. All other Courts, 10 to 5.

POLICE OF THE UNITED KINGDOM.

Below will be found a series of articles on Relow will be found a series of articles on the police forces of the United Kingdom, arianged in the following order 1, Metropolitan Police; 2, City of London Police; 3, Police of England and Wales (Counties and Horoughs), 4, The Scotch Police; 5, Royal Irish Constabulary; 6, Dublin Metropolitan

Metropolitan Police. - Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by roland, a general government of Russia, the district by watchmen was discontinued by including ten provinces, with a total area of 49,159 square miles, and a population of over 9,000,000. The country had a separate constitution #815-30, and a separate government all places within a radius of fifteen miles of '30-64, but, in the latter year it was deprived Charing Cross, except the City of London,

which has its own police. The Metropolitan police district consists of twenty-one land divisions, in addition to its jurisdiction on the river Thames. Every division is under the immediate charge of a superintendent, and the subdivisions under that of inspectors. Each subdivision has a station house in charge of inspectors, who are sometimes assisted by sergeants. About 260 mounted police patrol the more distant parts of the outer subdivisions, and assist in the inner divisions during processions assist in the inner divisions during processions and large meetings. The Thames police are selected from sailors, and patrol in boats and steam launches. For executive purposes there are three police districts, each of which is in charge of a superior officer, called a Chief-Constable. The Metropolitan police are also employed in H.M dockyards, and in the principal military stations of the War Department. In each division there are about fifty men selected as a reserve force to carry out special duties, headed by an inspector and assisted by several sergeants. The supreme government of the Metropolitan police is vested in the Commissioner appointed by and acting under the control of the Home Secretary This office control of the Home Secretary Into office is now held by Sir Edward Bradford, G.C. B., K.C.S.l. There are three Assistant Commissioners—A. C. Bruce, Esq., Dr. Anderson, C. B., and Sir A. C. Howard, C. B.—and four Chiel Constables. Latest returns, for the year ending Dec. '97, give the strength as 15,452, compilising 32 superintendents, 578 inspectors, 1908 sergeants, and 12,934 constables. Four superintendents, 52 inspectors, 197 sergeants, and 15 5 constables were employed on special duties for various Government Departments. The police available for service in the Metropolis, exclusive available for service in the mecropolis, excilisive of the last named, were 28 superintendents, 526 inspectors, 1711 suggeants, and 11,429 constables; total, 13,694. The financial administration is under the control of the Receiver for the Metropolitan police district, A R Pennefather, Esq. C B, who is appointed by the Crown. He has the direction of contracts of every description, the management of all of every description, the management of all police buildings, he buys the sites of and elects new buildings, and all the property of the police force is vested in him. He is constituted a corporation sole with perpetual succession. He receives all moneys applicable to the purposes of the Metropolitan police, and makes all disbursements. He is also the receiver for the Metropolitan police courts. He has a staff of 22 clerks, 19 surveyors and assistants, 12 storekeepers and assistants, and 65 subordinate officers. The income of the force for the year '05-7 was £1,72,078, and of the pension fund £300,442. There are also about the surveyor that the formal of a chief surgeon and about thirty Civil Service clerks. There are local surgeons of the police in the divisions. The most important branch of the police not engaged in ordinary divisional duty is the Oriminal Investigation Department, which was organised in '78 under a "director, and is now presided over by Dr. Anderson, CB, assistant commissioner. A part of this service is at New Scotland Yard, and consists of a superintendent, three chief and three firstclass inspectors, seven second-class inspectors, and about eighteen sergeants. There is also another part of the service in each division, under the charge of an inspector, responsible to the director. The number of members beto the director. The number of members be-longing to each branch is regulated according to circumstances. The Convict Supervision

Office, established in '80, is a branch of the Criminal Investigation Department, under a superintendent. It registers the names and particulars of discharged convicts on licence, particulars of discharged convicts on licence, and other criminals under police supervision in England, and retains photographs and marks of these persons, under the provisions of the Prevention of Crimes Act of 71. The development and progress of this office has been immense, and the amount of good it has done in co-operation with Discharged Prisoners' Aid Societies and otherwise for the prevention and repression of crime, not only in the Metropolis but throughout the provinces, cannot be exaggerated. The number of licence holders, supervisees, and expires registered by the Metiopolitan Police from '64 to the end of December '97, was 56,898. So commendable are the results of this work that the number of identifications in '97 was 3701 as compared with 3503 in '96 The register is a national one, dealing with every convict, supervisee and habitual criminal discharged in England and Wales. In Oct '93 the Home Secretary appointed a orininals

This committee reported in Feb. '04, recommending the adoption in a modified form of the French method of anthropometry as carried out in France by M. Bertillon, together with Mr. Francis Galton's finger-print system. This proposal has been approved by the Home Secretary, and he has entrusted its administration to Dr Anderson, Assistant-Commissioner of Police, and has appointed Dr J G Garson as an expert to assist in organising the department established for that purpose Among other departments of the Metropolitan police are the executive branch, and the public carriage and lost property branch. Satisfactory provisions are made for rewards for diligence and praiseworthy acts by the police, as well as for punishment for breach of discipline. Appreciable regulations also exist for promotion and testing by examination the qualifications of members to fill the higher offices Provision is made by the Police Act '90 for payment of pensions for life to all ranks in the force who have completed 25 years' approved service; and the pension is to be not less than $\frac{1}{2}$, or more than $\frac{3}{6}\frac{1}{6}$ of their annual pay, with an addition of not less than $\frac{1}{60}$, or more than 3, of such pay for every year of approved service above 25 years, so that the pension shall not exceed more than 4 of their yearly pay. Provisions are also made for payment of pensions to policemen who have served a less number of years, and who are incapacitated by injuries in the performance of their duty. Pensions are to be paid to the widows and allowances to the children of a member of the force who dies from the effect of an injury received in the execution of his duty. Gratuities may be granted in other cases to the widow and children of a policeman who dies from any and children of a politerian who dies from any other cause while in the force. The rateable value of the Metropolitan area for '96-7 was £40.265,598. The police rate is now fixed at 9d. in the £, of which 4d. in the £ is payable out of the Local laxation Account under the Local Government Act of '88. The pay of the Metropolitan Police Force for '97 was about £1,340,000.

City of London Police.—This force is under the control of a Commissioner, who

is appointed by the Mayor, Aldermen and Common Council, subject to the approval of Her Majesty the Queen. The total strength of the force is 948, consisting of 1 Assistant-Commissioner, 1 superintendent Executive Department, 1 superintendent Detective Department, 8 chief inspectors, 15 district inspectors, 22 station inspectors, 12 detective inspectors, 72 sergeants, 7 detective sergeants, and 795 constables. In addition to the above, 55 constables are employed on private service duty at the expense of persons engaging their services, the charge being at the rate of £135 per annum for each man The force has also per annum for each man The force has also a surgeon, receiver, chief clerk, and several assistant clerks. The detective department consists of a superintendent, 12 inspectors, 7 sergeants, 12 detective constables, and about 45 plain clothes constables, who are selected from the uniform branch. The Police area is divided into three districts, each con-taining two divisions (exclusive of the chief and detective offices) and under the immediate charge of a chief inspector, assisted by five district inspectors and six station inspectors. Fhe Superannuation Fund is provided from the stoppage of 22 per cent of the pay of the force, the amount of fines at Police Courts, etc., the balance being provided from the Police rate The City Police Superannuation Act, '94, pio-vides pensions for members of the Force with 25 years, service in espective of age. The total cost of the force is about £136,000 per annum, one-louth of which is paid from the City's cash, the remainder by a rate of 51d on the assessable rental of the City. The City Police, unlike the Metropolitan Police Force, is supported entirely by the citizens, without Imperial aid. The pay of the force is considerably in advance of any other similar body in the United Kingdom. The members also enjoy other advantages, perhaps the greatest of which is the scheme for granting requirements. est of which is the scheme for granting pensions to the widows of deceased members of the service. All married men contribute from 4d. to 15. per week, according to their rank, the balance is made up by grants from the City's cash, the pensions varying from 7s. to 21s per week. The services of nearly 200 men are daily required to cope with the enormous and ever-increasing traffic of the City, the most capable men being selected for this dangerous and important duty, for which they receive a small allowance of extra pay. Headquarters, Old Jewry, Cheapside Chief Clerk and Superintendent, Mr. John Whatley.

The Police of England and Wales (Counties and Boroughs)—See previous eds. for the various Acts from 39 to 56 felating to the appointment of police in counties and boroughs. Important changes were made concerning their control and payment by the Local Government Act 1888. By this statute the powers, duties and liabilities of quarter session and magistrate out of session respecting the county police, are to be exercised and discharged through the standing joint committee of the quarter sessions and county council. In those boroughs (not being county boroughs), which according to the census of 3n had a population of less than 10,000, it is provided by this Act that the power and duties of the watch committee have now accased and have been transferred to the council of the administrative county which comprises these

boroughs. County boroughs, as defined by the Local Government Act, are those cities and towns each of which on June 1st, '88, either towns each of which on June 1st, '88, either had a population of not less than 50,000 or was a county of itself. To a considerable extent, the system of administration in cities and large towns is based upon that which exists in the Metropolitan police. The cost of the county and bolough police is paid from rates levied in counties and boroughs, supplemented by a contribution from the Exchequer or Local Taxation Account of half the cost of pay and clothing of every force certified by the Home Secretary on the report of the Inspector of Constabulary to be efficient. The Local Taxation Account has been provided by the Local Government Act, '88, and consists of the proceeds of the duties on local taxation, licences, and four the duties on local taxation, licences, and fourifths parts of one-half of the probate duty payable in certain ascertained proportions to each county and borough in aid of their rates. By the Police Act, 90, equitable provisions were made for payment of pensions for life to all members of county and borough police forces in England and Wales In certain cases gratuities are case Metropolitan Police for further statements under this head, which are substantially applicable to the county and borough police). The pension scales are, as regards the great majointy of the forces, the maximum rates men-tioned in the Act In a considerable proportion of counties a limit of age is required, and in of counties a limit of age is required, and in some instances as much as sixty years of age is stipulated before pensions are granted. The authorised strength of county and borough police was for the year ended Sept. 29th, '97, 25,701. Out of this number there were 1460 in the Liverpool force, exclusive of 436 of all ranks additionally appointed—viz, 373 for the Docks, 11 for private duty, and 52 for the fire brigade, 1031 in the Manchester force, exclusive duty and 52 for the fire brigade, 1031 in the Manchester force, exclusive duty and 52 for the fire brigade, 1031 in the Manchester force, exclusive duty for the fire force of the fire sive of 6 constables appointed at private cost; different ranks appointed at private cost; 484 in the Leeds force, 402 in the Bristol force, exclusive of 6 constables not paid by rates; and 440 in the Sheffield force, exclusive of 10 of different ranks appointed at private cost. All these boroughs and a few other of the more populous towns have a more or less meritable detective police service. Those for Liverpool, Manchester, Birmingham, Leeds, and Bristol appear to be very good.

The Acotch Police.—Several statutes have been passed from an early part of this century for establishing and maintaining police forces in Scotland The principal Acts under which they are now regulated are those of '57, to render more effectual the police in counties and burghs, and the Act of '62 for making better provision for regulating the police of towns and populous places. The authority of each county force was vested in the Commissioners of Supply, acting through a police committee. By the Local Government (Scotland) Act, '89, this authority has now been transferred to a standing joint committee, consisting of County Councillors, and such Commissioners not exceeding seven of each class. The Sheriff of the county, or one of his substitutes in his absence, is to be an ex-officio member of this Committee. It is provided also by the same statute that the administration of the police in any burgh or police burgh, containing a less population than

7000, shall also be transferred to the same authority. The Inspector of Constabulary for Scotland, appointed under the County and Burghs Police Act, 57, submits a report annually. According to that for the year ended Dec. 31st, '97, the authorised strength of the force is 4713, of which 1701 belong to county forces and 3012 to city and burgh forces. There are also goap additional police who are privately employed. If these are added, the total in counties will be 1770 and in cities and burghs 3152, giving a grand total of 4922 policemen in Scotland, excluding the Orkney and Shetland Islands. There is a detective staff of 131 officers in 12 county and in 11 city and burgh forces. The staff in the former is 24 and in the latter 85. In addition to these detectives constables in plain clothes frequently assist them In Edinburgh there is a detective staff of 26, consisting of i lieutenant, i inspector, 3 sergeants, and 21 detective officers. In Glasgow, which has a police force of 1320 members and an estimated a pointer force of 1320 members and an estimated population of 715,000, there is a detective staff of 42, consisting of 2 lieutenants, 7 sub-inspectors, and 33 detective officers. The Criminal Registry kept at Edinburgh, (slasgow, Aberdeen, Inverness, Greenock, Dumfries, Dun-dee, Perth, Stirling, Elgin and Ayr works very satisfactorily in supplying the police with valu-able information concerning habitual criminals. The total amount expended for the last financial year for pay and clothing for the whole authorised force was £377,551 165 9d. The aggregate cost of the police, excluding the additional police, privately employed and paid for, was £460,365 68., which includes rent, taxes, buildings, and all other expenses connected with the police. Towards the cost of pay and clothing £150,000 per annum is distributed out of the Local Taxation (Scotland) Account. This amount is made up of duties of local taxation, licences, and a part of the probate duty Only those forces, however, are entitled to be aided out of the amount which obtain a certifiaided out of the amount which obtain a certifi-cate from the Secretary for Scotland under the Police Act of '57. A satisfactory system of paying pensions and gratuities has been pro-vided by the Police (Scotland) Act, '90, sub-stantially similar to the system established for the police of England and Wales by another statute passed in the same year.
In his last annual report the Inspector of

In his last annual report the Inspector of Constabulary states that he has always been in favour of a General Criminal Investigation Department for Stotland, working from a central office, which would be of the greatest service in the prevention and detection of Crime.

Royal Irish Constabulary.—This is a semi-military force, consisting of 11,240 members, who are drilled and disciplined as soldiers, live in barracks, and are armed with rifles, swords, bayonets, and revolvers Inquelling disturbances they are frequently required to act in large bodies in the double capacity of policemen and soldiers, but upon all their ordinary duties they are, like the men of other police forces, armed with a truncheon only. As at present constituted, the Irish Constabulary force was established by Act of Parliament in '36. It has undergone several changes and additions to its strength by subsequent statutes. In '67 the title of Royal Irish Constabulary was conferred on the force by command of Her Majesty. The City of Dublin

and its suburbs are protected by the Dublin Metropolitan Police, and the Royal Irish Constabulary perform police duties for the remainder of Ireland This force is directly under the Irish Government, and the Parliamentary responsibility is in the Chief Secretary for Ireland. The principal officer of the Constabulary is the Inspector-General, resident in Dublin, and who is assisted by a Deputy Inspector-General and three Assistant Inspectors-General. Each county or riding is under the immediate charge of a county inspector. A certain number of districts are allotted in every county, with a district inspector in charge of each. The members of the force subordinate to the district inspectors are head constables, sergeants, acting-sergeants, and constables. The duties of this imperial constabulary consist of the following among other numerous civil services not imposed upon police forces in the United Kingdom viz, collecting agricultural statistics yearly, taking the census decennially, acting as auctioneers for sale of distress; acting as inspectors of weights and measures; the performance of Custom officers' duties for the prevention of smuggling, and of Excise the prevention of smuggling, and of excise duties to prevent illuit distillation. A Reserve Force in Dublin was established in 39 for duty, when required, in any part of Ireland Its authorised strength consists of 4 district inspectors, 8 head constables, and 400 sergeants, acting-sergeants and constables. The headacting-sergeants and constables. The head-quarters of this body is at the depôt in Phœnix Park. This is also the place for recruiting and the professional education of all members of the Constabulary, Recruits must be un-married, at least 5 ft 9 in in height, and between 19 and 27 years of age. The chief officer in command is called the Commandant of the Depot, and is one of the Assistant Inspectors General A separate extra force was established by Act of Parliament for selfast in '65, with an inspector in charge now styled Commissioner of Police, whose salary and half the cost of the extra men was to be paid for by that borough. In '70 a small additional force was appointed to Londonderry, the cost of which was to be defrayed in the same manner Civil Service examinations are held, where candidates nominated by the Chief Secretary for Ireland compete for cadetships in the force. The vacancies for district inspectors are filled in fixed proportions by cadets or by specially selected head constables of exceptional merit. Candidates for cadetships must be unmarried, at least 5 ft 8 in, in height, and between 21 and 26 years of age. The Royal Irish Constabulary is the only police force in the United Kingdom which is almost entirely supported from the Imperial funds, the remainder of the cost is met by the comparatively small payments made in various districts when special services of the Constabulary are necessary. An equitable pension system, which has varied very much from time to time, has been established by statute law. Special provisions have also been made for men who are incapacitated from injuries received in the discharge of their duty. Pensions and gratuities are also payable to the widows and children of head constables and other subordinate members of the force who die while serving therein. Payment of gratuities is also authorised to the widows and children of pensioners who die within one year after their superannuation

Dublin Metropolitan Police.—In 1808 Dublin was formed into a district called the "Police District of Dublin Metropolis" After several changes the police system of this arter several changes the police system of this city was in '36 reorganised upon the basis, in a great measure, of the Metropolitan Police Force, as established by Sir Robert Peel's Act of '29. After other statutes had passed for the amendment of the Lublin police it was further assimilated to the Metropolitan Police, and has since continued to be worked as far as practicable on the same lines. The Dublin Metropolitan Police is under the immediate direction of a Commissioner and an Assistant Commissioner, and the offices of Receiver and Secretary are consolidated. The Commissioner submits an annual report to the Chief Secretary for Ireland, accompanied by statistical tables respecting the work of the police, the state of crime, and particulars concerning public and refreshment houses, drunkenness, and hackney carriages. When the duties of the Dublin Metropolitan Police commenced in '38, it consisted of gir officers and men At the end of '97 the effective strength of the force was 1144 of all ranks, consisting of 7 superintendents, 24 inspectors, 35 station sergeants, 143 sergeants, and 903 constables. An excellent detective staff exists in the force for the prevention and staff exists in the force for the prevention and detection of crime, headed by a superintendent and other officers. The area of the Dublin Metropolitan district is 32 15 square miles, and the population, according to the census of '01, is 352,277. The expenditure of the force for the year ending March 31st, '07, for the Dublin Metropolitan Police Courts and police establishment, was £144,78 78 5d, of which £52,661cs. 1d was received as appropriations in aid from local sources, and the balance from the Imperial Treasury Pensions and gratuities are provided for the force by an Act of Paillaare provided for the force by an Act of Parliament passed in '83.

POLITICAL PARTIES OF THE UNITED KINGDOM.

In the first years of the Parliament of 1868 only two parties were known to the House of Commons—(1) Conservatives, and (2) Liberals, the latter being subdivided into Whigs and Radicals. Irish members who were not Conservative were classed as Liberal, though they occasionally asserted their independence. Home Rule movement was statted in Dublin by the late Mr. Butt in '70, and soon gained considerable support At the general election of '74, 56 Home Rulers were returned by Irish constituencies, and in '80 the number rose to Almost from the first the party consisted 63 Almost from the first the party consisted of a moderate and a more forward section, and this division was maintained in the Parliament of '80, the one section giving a general support to the Liberal party, while the second and larger half acted independently of, and in the main hostilely to, them under the leadership of Mr Parnell At the general election of '85 the moderates disappeared, and Mi. Parnell led a party numbering in all 86 In the spring of '86 Mr. Gladstone, up to that time the acknowledged head of the whole Liberal party, dec • Parnell cared himself in favour of Irish Home Rule, and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's action,

declined to continue their support, and combined with the Conservatives to form that Unionist majority which succeeded in defeating the Home Rule Bill. An appeal to the country followed, and in Aug. '86 a new Parliament met, consisting of 85 (afterwards 86) Nationalists or Parnellites, 192 Gladstonians, 77 Liberal Unionists, and 316 Conservatives.

The Conservatives, with the support of the Liberal Unionists, then carried on the government of the country for six years. The Liberal Unionists, although cordially working with and supporting the Conservative Government, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. The only Unionist to take office was Mr Goschen, who, at the greatest crisis in the history of Lord Salisbury's Government, accepted the post (which Lord R. Chuichill had resigned) of Chancellor of the Exchequer. Attempts were made to compose the difference between the Gladstonians and Unionists, notably at the famous Round Table Conference, but all failed in opposition the relations between Mi Gladstone and the Nationalists were, after he had accepted Home Rule, most coid all. The even course of events was, however, naturally disturbed by the decree made in the Divorce Court proceedings mistituted against Mr Parnell. The result of the memorable discussions in "No. 15" was that 54 Nationalists revolted against his leadership, and 30 remained faithful to him as the exponent of a Home Rule scheme more advanced or complete than, according to his declarations, Mr. Gladstone was prepared to propose. Mr Parnell died in '91, and Mi. John Redmond became the exponent of his policy and the leader of his following.

The General Election in '92 resulted in the return of a Notonalists, a Parnellites, are Gladstone was prepared to the propose of the return of a Notonalists, a Parnellites, are Gladstone was prepared to propose.

The General Election in '92 resulted in the return of 72 Nationalists, 9 Pai nellites, 275 Gladstonian Liberals, 46 Liberal Unionists, and 268 Conservatives from the point of view of party combination the Ministerialists found upon the whole little to complain of during the famous and protracted Home Rule Bill session of '93. Contrary to the expectation of some members of the Opposition, the Liberal and Nationalist alliance held together wonderfully well. On March 1st, '94, Mr Gladstone made, in the House of Commons, a vigorous attack upon the House of Commons, a vigorous attack upon the House of Loids for its action upon the Parish Councils Bill, and this speech proved to be his last utterance from the Treasury Bench. The subsequent appointment of Lord Rosebery to the premiership was undoubtedly popular with the bulk of the Liberal press, and was commented upon very favourably by the Opposition organs. Mr. Labouchere, however, and a number of Radicals acting with him, strongly objected to the appointment of a peer as Premier, and urged the claims of Sir William Harcourt to the position. The effect of their opposition, though not noticeable at the time, was seen later on in '96. On June 14th, '95, the Liberal Government were beaten on the estimate for the Houses of Parliament buildings, on the 20th they were in a majority of 7 only on an amendment to the Welsh Church Bill, on the 21st they were defeated on the ammunition question in committee on Army Estimates; and on the 22nd Lord Salisbury Placed his resignation in the hands of the Queen, by whom it was accepted. Lord Salisbury

was sent for, and duly formed an administration. His cabinet, as ultimately constituted, consisted of no less than nineteen members, of whom fifteen were Conservative, including Mr. Goschen (who in '93 was announced to be mr. Goschen (who in 33 was announced to be a member of the Carlton) and four Unionists.

The latter wing of the Coalition Party also received such a share of the minor appointments as caused no little heart-burning in many Conservative breasts

The dissolution many Conservative Deasts The dissolution of '95 which followed was notable for one thing, in that it marked the disappearance of Mr. Gladstone from Parliamentary life

The General Election of '95 resulted in giving the Unionist coalition a majority of 152, the biggest majority of modern times, instead of a minority of 28. There were 40 Conservatives, 71 Liberal Unionists, 177 Liberals, 70 Nationalists and 12 Parnellites returned Although the Anti-Parnellites had acted together in Parliament, rumours were prevalent of internal dissensions; and in July '95, in the very midst of the general election, a serious dispute arose as to certain Irish seats. Mr McCarthy having as to certain Irish seats. Mr McCarthy having decided not to again stand for the chairman-ship of the Irish Parliamentary or Anti-Parneilite party, Mr. Sexton was unanimously requested by the party to serve as its chairman, but declined the honour. At a meeting of the party held on Feb 18th, '96, Mr. Dillon was elected sessional chairman by 38 to 21 votes. In April Mr. Sexton equation of the chairman by 38 to 21 votes. votes. In April Mr Sexton accepted the Chil-tern Hundreds. That there were sharp differences of opinion in the ranks of the party was more than once made manifest in the course of the session. The reverses of the general election left Loid Rosebery leader of the Liberal party, and leader of the Opposition in the House of Lords, Sir William Harcourt being leader of the Opposition in the Combeing leader of the Opposition in the Commons, and these positions they respectively continued to fill during the session of '96. Very little of note occurred in the House of Loids, but Sir William Harcourt led the Liberal Opposition in the Commons with especial brilliancy and success in the debates on the Education Bill and the Agricultural Rates Act. Cn Oct. oth, '96, in the midst of the agitation arising out of the Armenian attocities, Loid Rosebery wrote to the chief Liberal whip. "I find myself in apparent difference with a considerable mass of the Liberal party on the Fastern Question and in some couldict of on the Eastern Question, and in some conflict of opinion with Mr. Gladstone, who must necessarily always exercise a matchless authority sarily always exercise a matchiess authority in the party, while scarcely from any quarter do I receive explicit support. This situation, except as regards Mi Gladstone, is not altogether new; but in saying this I complain of no one. I regret only that I should appear to divide the energies and try the faith of Liberals. This question, however, is above and beyond personal considerations. When I speak, which I do this week [at Edinburgh], I must reach my myind and such it nutrious reference speak my mind, and speak it without reference to party. Under these circumstances it is best for the party and myself that I should speak, not as Leader but as a free man I consequently beg to notify to you that the leadership of the party, so far as I am concerned, is vacant, and that I resume my liberty of action." In his speech a few days later Lord Rosebery declared

European war. It afterwards became apparent that this was the view taken by a large section of the Liberal party, though there were others undoubtedly who were prepared for isolated action under certain circumstances.

During '07 but little change occurred in the mutual relations of the parties in Parliament, or in the internal condition of the parties themselves Political antagonism was allowed to fall into abeyance during the outburst of patriotic feeling evoked by the Diamond Jubilee; the business in both Houses of Parliament was got through as rapidly and with as little party contention as possible. The two most con-tentious items were the Workmen's Compen-sation Act and the Voluntary Schools Act. Several bye-elections occurred, at nearly all of which the Liberal poll exhibited a very marked improvement upon that of '95, and many of which were won outright by the Liberals. buring the excitement consequent upon the state of affairs in Gieece, a section of the Liberals—conspicuous among them being Mr. George Russell—formed a Forward Party advocating a more determined attitude against Turkey on the part of Great Britain. Early in October the disaffection of many Conservatives on account of the deference paid by the party to on account of the deference paid by the party to Mr. Chamberlain—especially in respect to the Workmen's Compensation Act—found expression in a threat of revolt offered by Lord Londonderry and others. This was supposed to have had some weight with the leaders of the party but no defeate a contract.

the party; but no definite action followed.

During '98 the criticism of the Government. which is supposed to be the prerogative, if not the duty, of the Opposition, was performed very largely by the Government's own suppotters, notably in the press | The course of affairs, in China in particular, provoked the disapprobation of many Conservatives, and the Liberals were not slow to take advantage of their opportunities. The details are given fully in the article SESSION. Later in the year -which all through was characterised by the overwhelming interest of foreign affairs— politicians of all parties patriotically rallied to the support of the Government in regard to the situation in the Upper Nile Valley, and the dispute which areas thereupon; and the Government were somewhat rehabilitated by the firm stand which they made on this question. Considerable feeling was aroused by the lish Local Government Act and by the action of the Government over the Vaccination question, but on the whole there were no sharp lines of party division. The state of parties in November is shown under article Commons. in the summary table, on page 171.

Political Science, The British Library of. See Economics and Political Science

Polytechnic, Regent Street. With the view of further developing the movement on behalf of young men to whom Mr. Quintin Hogg had shown such generosity, he pursichased in '80 the old Polytechnia, Regent Street, for £50,000, and converted it into a great technical and recreative school. The institution has been a great success, upwards of 15,000 members and students having attended its classes during the last twelve months. The his strong disapprobation of any policy which should involve Great Britain's isolated interwention in regard to the Armenian question, fees, etc., and £6000 is contributed from other since he held that this would precipitate a sources. Previous to '89 the deficit of £9000 was

annually made up by Mr. Hogg, who has alto-gether spent £150,000 upon his scheme. The curriculum embraces over 500 classes weekly in upwards of 80 different subjects, including carpentering, plumbing, metal work, engineering, pottery work, photography, furniture, decorative art, electricity, and numberless other subjects. A Young Women's Institute has also been founded up premises adjoining the Polytechnic, and promises to be as successful as the latter. The Mailborgugh Rooms, acquired in 92, have been converted into one of the most commodious schools of art in London. Mr. J. E. K Studd acts as Hon. Secretary, and Mr. R. Mitchell as Director of Education. Continental tours are also a feature of the Institute, over 6000 persons making use of them every year. They include cruises to Norway, visits to the Polytechnic châlets in Norway, visits to the Polytechnic chalets in Switzerland, where a considerable freehold has been purchased, and trips all over the Continent, Baltic, Madeira, etc.

POOR LAW.

The English Poor Law is contained in a number of statutes, the earliest being that of the 43rd year of Elizabeth, and in innumer-able reported cases. The modern system of and reported cases. In modern system of poor relief was established by the Poor-Law Amendment Act of 1834. Under this Act the parishes which had formerly been areas for poor-law purposes were grouped into unions, a market town being generally taken for the centre There are about 650 unions in England a market to the control of the contr duty is the care of the poor in their union and the administration of relief; but they have many other duties, such as the enforcement of the Vaccination Acts By the Local Government Act, '94, great changes were made in the constitution of the boards of guardians and the mode of election. Each board of guardians provides a workhouse, in which the poor in their union requiring total relief are maintained They also give relief to poor persons in their homes where necessary this is termed "outdoor relief," and is given in money, or food, or other necessaries. Outdoor relief is distributed by the relieving officers. District medical officers are appointed by the guardians, who are required to attend free of charge on poor persons on receipt of an order from the relieving officer Relief is also given by the guardians in other ways, such as in providing for emigration and apprenticeship; and they are empowered to subscribe to many institutions for the maintenance therein of paupers and the children of tenance therein of paupers and the children paupers. Guardians also have many duties as regards lunatics. The receipt of relief is a disqualification for voting or election at Parliamentary and local elections A board of guardians employs a large staff of officers, the chief of which are the clerk, the treathe chief of which are the clerk, the treasurer, medical, vaccination, workhouse, and relieving officers. The workhouse is under the control of a master and matron, has a medical officer attached to it and a special staff of nurses. Boards of guardians are largely controlled by the Local Government medical officer attached to it and a special staff of nurses. Boards of guardians are largely controlled by the Local Government. Board (see Local Government, which by its general orders regulates the mode of their ment in lieu of poor rate, on property belong-election, their procedure, their finance, and

their administrative methods, whilst by its special orders it compels observance of the law in particular cases. The accounts of the receipts and expenditure of guardians are strictly audited by auditors of the Local Government Board. The expenses of the guardians and of poor relief generally are defrayed out of poor rates, which are levied by the overseers in each parish The guardians issue half-yearly precepts to the overseers for the amounts required to a valuation list which is prepared by them to a valuation list which is prepared by the overseers of each parish, and after publication is sent to the assessment committee of the guardians, who must hear objections. After altering the list as they think proper, the committee approve and sign it. From the decision of the committee there is an appeal to quarter sessions. Overseers are appointed for each parish by the parish council or meeting, or in urban parishes by the urban district council or the justices They can give orders for poor relief in cases of sudden and urgent necessity. Boards of guardians receive grants from the county council out of the proceeds of licence and excise duties towards many of their expenses, such as the salaries of officers, maintenance of lunatics, etc. As to the total cost of the relief of the poor, see Poor RATE STATISTICS, '98. Other Poor Law authorities, who exercise powers in relation to the relief of the poor, are (1) The Metropolitan Asylums Board, who are the managers of the Metropolitan Asylums District, constituted under the Metropolitan Poor Act (67) for the reception and relief of fever and small pox patients and the insane poor charge-able to the unions and parishes in the district;
(2) The Managers of two Metropolitan Sick Asylum Districts, constituted under the same Act; and (3) The Managers of School Districts formed tunder the Poor-Law Amendment Act (*44) for the maintenance of district schools, to which children are sent by certain boards of guardians instead of being maintained in the The subject of Poor-Law Children workhouses has recently received much attention. A somewhat similar system of poor relief exists in Scotland and Ireland, where the central authority is the Local Government Board for Scotland and Ireland respectively. A Boyal Commission was appointed, Jan. '93, to consider whether any alterations in the system of poor law relief are desirable in the case of persons whose destitution is occasioned by incapacity for work resulting from old age, or whether assistance could otherwise be afforded in those cases "A majority and a minority report were presented and issued at the end of March os, for the details of which see eds. '96 and '97. 75, for the (Scotland) Act, '98, see Sassion, sect 77, and for Poor Law Unions Association (Expenses) Act, '98, see Sassion, sect. 78,

POOR RATE STATISTICS, '98.

1. RECEIPTS.

From Part I. of the Local Taxation Returns

6930,699 more than in the preceding year. The Receipts in Aid, consisting of various sums paid by the County Councils and County Boroughs to the Poor-Law authorities in respect of teachers in Poor-Law schools, fees for workhouse children attending public elementary schools outside the workhouse, registrars of births and deaths, lunatics, the remuneration of medical officers in the Metropolis, the maintenance of indoor paupers in the Metropolis, and the cost of Union officers, etc., in Unions out-side the Metropolis, amounted to £2,009,756 Miscellaneous sums received by Roards of Guardians and Managers of School and Asylum Districts for, inter alia, the maintenance of paupers (amounts recovered from their friends), the sale of oakum, stone, etc, rents and dividends, gave a further amount of £557,739
The total receipts from and in aid of the Poor Rate may be summarised as follows -

Poor Rates raised				£22,166,906
Receipts in aid .		•		2,009,756
Other Receipts .	•	•	•	584,866
Total				£24,761,618

2. EXPENDITURI

The principal items of the expenditure on the relief of the poor, and purposes connected therewith, were .-In-maintenance . £2,256,667 Out-relief 2,680,200 Maintenance of lunatics in asylums or licensed houses 1,642,505 Workhouse or other loans repaid, and interest thereon 703,001 Salaries and rations of officers, and superannuation allowances 1,781,500 Other expenses . 1,278,211 Total . £10,432,189 The expenditure on purposes unconnected with

the relief of the poor was as follows :-Payments for county, borough, or police rates . £9,129,874 Payments to Highway Boards.
Payments to Burial Boards. 70,205 127,387 Payments to Rural District Councils for sanitary and highway purposes Payments to School Boards . . . 1,772,688 1,336,145 Payments to Parish Councils or Parish Meetings 87.430 Payments to Commissioners of Baths and Washhouses 75,676 Payments to Free Library Commis-Sioners 59,227 Payments to Urban District Councils for School Attendance Committee 8.382 Conservators of Commons . School Attendance Committee expenses 46,671 Payments on account of the Registra-

The expenditure partly connected with the relief of the poor and also with other purposes

tion (Births, Deaths, etc.) Acts

Parliamentary, municipal, and county registration, and cost of jury lists .

Total .

Vaccination fees and expenses

Other expenses

WAS .-

Cost of legal proceedings . . . Payments under the Union Assessment Committee Acts and the £48,600 Valuation (Metropolis) Act, '60 120,351 Salaries and superannuation allowances of parochial officers, and other expenses partly connected and partly unconnected with the relief of the poor 722,811 Total . £891,771

The total expenditure amounted to £24,473,507, of which £13,149,547, or more than one-half, was for purposes altogether unconnected with the relief of the poor. There was an increase in every item of expenditure connected with relief of the poor, the largest item of increase being that in respect of the maintenance of lunatics.

3. MISCFLLANEOUS STATISTICS.

The gross estimated rental of property in England and Wales hable to contribute to the was £199,380,667, and the rateable valu £165,990,085 The total number of paupers of all classes in England and Wales in receipt of iclief on Jan. ist, '98, was 836,913, of whom 231,606 were indoor and 605,125 outdoor paupers, plus 182 who received both indoor and outdoor relief. There was an increase of 3641 III the Indoor and a decrease of 3422 in the outdoor paupers, and an increase of 20 in the other classes as compared with the previous year. It was estimated that the proportion of the total number of paupers to the population amounted approximately to 1 in 37. Of the total of 837,095 paupers, 90,540 were insane and 13,563 were vagrants, while of the residue 184,853 were adult males, 332,487 adult females, and 225,652 children under 16 years of age. Of the adults 150,050 males and 250,210 females were not able-bodied. The Report of the Local Government Board for '97-8, from which these figures are taken, states that the number of paupers relieved in the year ended Lady Day '98 was, proportionately to the popu the years 92.3. The greater part of the decrease in pauperism of recent years is attributable to a reduction in the numbers of outdoor paupers.

Pope, The His Holiness Lee XIII., the 258th Roman Pontiff, son of Count Ludovico Pecci, was b. at Carpineto, 1810. Ed. at the Jesuit Coll of Viterbo (18-24). Entered the School of Collegio Romano (24). where he greatly distinguished himself, and proceeded to the College of Noble Ecclesiastics. 'Having become a Doctor of Laws, he was made by Pope Gregory XVI Referendary of the Segnatura ('37). Took holy orders, and was consecrated priest ('37) by Cardinal Carlo Odescalchi. The title of "Prothonotary Apos-84,150 tolic "was bestowed on him by Pope Gregory, tolic "was bestowed on him by Pope Gregory, who also appointed him Apostolic delegate in succession at Benevento, Perugia, and Spoleto. Was sent as nuncio to Belgium (43), and created shortly after Archbishop of Damietta; nominated Bishop of Perugia (46); created cardinal (53). Elected Pope Feb. 20th, '78, and took the title of Leo XIII. Among the events of his Holiness's reign may be mentioned the restoration of the hierarchy in Scotland the restoration of the hierarchy in Scotland

the contest with Germany, the Kulturkampf, the now famous Falk Laws, and the rapproche-ment with Prince Bismarck. Towards the close of 37 and the beginning of 38 Rome was the centre of great rejoings in connection with the Papal Jubilee, intended to commemorate the 50th year of his Holiness's assumption of holy orders. In June '91 he issued an important Encyclical on Labour, which gaverise to much discussion It is said that the average annual expenses of the Vatican are about £286,4000 Of this sum £20,000 are at the Pope's disposal, £28,000 go to the cardinals, £18,400 to poor bishopings. 72,000 for administration of apostolic palaces, 440,000 for diplomatic expenses, £60,000 for employes, £48,000 for schools and charities On the occasion of his episcopal jubilee (Feb 19th, '93) vast numbers of pilgrims flocked to Rome from all countries The Pope summoned a conference of the Patriarchs of the Eastern Churches at the Vatican in Oct. '94, but no practical results followed, and the same may practical results followed, and the same may be said of his letter to the English people in April '95, urging them to return to "holy unity" with the Church of Rome His Hollness said Mass in St. Peter's (Feb 13th, '98) in celebration of the 60th anniversary of his '91st Mass.

Porto Rico, until '98 a Spanish colony, lies to the east of San Domingo in the West Indies Its area is about 3688 sq m, and the pop 900,000, of whom about 300,000 are negioes and about the same number mulattoes. The chief towns are San Juan, pop. 23,414, Ponce, 37,545, and San German, 30,146 The Island is mountainous, and the climate healthy The is mountainous, and the climate neating the country is generally fertile, and the chief exports are coffee, cacao, sugar, tobacco, and timber. The annual value of the exports is about £3,000,000. An American expedition under General Miles effected a landing at Guanica (July 25th, '98), and easily overcame the Spanish opposition. Their advent was the Spanish opposition Their advent was accepted with gladness by the people generally The city of Ponce was taken possession of (27th), and the Spanish troops were everywhere being forced back when terms of peace were arranged (see Spain and United Statis for One of the details) and hostilities ceased conditions was that the island should be ceded to the United States, and a joint commission arranged all the details for the evacuation of the island by the Spanish troops and authorities and the transfer to the States (Sept. 18th) The American flag was hoisted (Oct. 18th), the bulk of the Spanish troops having left by that

PORTUGAL

Portugal is a kingdom in the Peninsula in Portugal is a lingdom in the Peninsula in S. W. Europe, under Carlos I of the House of Praganza. Area (including the Azores and Maleira, which are regarded as an integral part of the kingdom), 36,038 sq m; popabout 5,082,257. Constitution of 1826 (amended in '52, 85, and '95) gives a special moderating power to the king. There are two legislative chambers, the Peers and the Deputies, collectively called the Cortes. By royal decree (Sept. '95) the Chamber of Peers consists of 90 members nominated for life, in addition to the members nominated for life, in addition to the princes of the blood and the twelve bishops of the continental dioceses. The nominated peers may be selected without limitation as to clear the members of the continents of the cont

tions are imposed. The elective portion of the Chamber was put an end to. The second Chamber, under a decree published in March 'os, is composed of members elected under a system composed of members elected under a system of universal suffrage every four years, to the number of 146, of whom 6 are elected by Portuguese colonies. The king has no veto on a law that has been twice passed by both houses. The State religion is Roman Catholic, but all others are tolerated. Education, Dut all others are tolerated. Education, though nominally compulsory, is in a very backward state. Chief exports: wine, cork, cattle, fish, and copper. There are 1453 miles of 1ailway. Revenue, '97, £11,748,000; expenditure, £12,347000, imports, '06, £9,070,000; exports, £0,640,000. Public debt, '97 foreigh, £05,000,625, internal, £91,731,217. See Colombies, 17c, oi European Powers, Diplomatic, Foreign Armits, and Foreign Navies.

Political Parties. The legislature of Portugal is the Cortes Geraes, consisting of two houses, the Camara dos Pares and the Camara dos Deputados The deputies are divided oughly into Conservatives (also called Re-generadores), led by Scinhor Serpa Pimentel, Progressists (or Liberals), Independents, and Republicans In '93 another party, the Miguel-istas, or supporters of Dom Miguel, a pretender to the thione, who was at the time living in Austria, showed renewed activity, and began to press their leader's claims on the people, The general elections in recent years have all resulted in triumphs for the Government, the Conservatives being returned with large majorities.

Portugal King of See Carlos I

Positivism. The philosophical and religious system of Auguste Comte (1798-1857). The chief principles of the former side of the system are (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows mathematics, astronomy, physics, chemistry, biology, sociology, morals, and (2) The doctrine of the "three stages" through which the human mind has to pass in the investigation of phenomena, the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the cultus of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical of doctrinal basis, corresponding to the theology of the supernatural religions, but besides this. it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or régime of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead Europe, which is ultimately destined to lead the whole world, the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the Revue Occidentale, and Comte's anartments, at 10. Rue Monsieur and Comte's apartments, at 10, Rue Monsieur le Prince, are kept as a place of meeting Other groups exist in other cities of France, of the Continent, of America, both North and South, and in five or six cities in England. class, but certain restrictions and disqualifica- In London the principal places of meeting are

Newton Hall, Fetter Lane, E.C.; and Chapel Street, W.C. In both of these halls the various Positivist publications may be obtained In London, also, the Positivist Review, edited by Professor Beesley, is issued monthly.

Postmaster-General. The Parliamentary head of the Post Office His Grace the Duke The Parliamentary of Norfolk at present occupies that position, bee next article.

POST OFFICE STATISTICS, '98.

The forty-fourth annual report of the Postmaster-General, issued during '98, showed the following results as to postal packets for the year ended March 11st, '98 -

	Number Stimated. Average Number each Person	tı
	1	
Letters	2,012,300,000 50 1	
Postcards	350,400,000, 9.0	
Book-packets, Circu-		
lars, and Samples .	727,300,000 18 1	
Newspapers	150,000,000 18	
Parcels .	67,823,000 1.7	
Готаl	3,318,7 3,000 83 1	

The number of registered letters was 14,213,479 An increase was recorded in every 14,113,479 An inclease was recorded in every variety of postal packet save that of news papers. The revenue for the year, in respect of the Post Office, amounted to £12, £00,376, and the expenditure to £8,680,713, showing a profit of £3,918,044. The figures for the telegraph of L_{3} 938,014. Inc figures for the telegraph department were revenue, L_{3} ,971,723, expenditure, L_{3} ,481,261, showing a loss of L_{3} ,09,538. Therefore the net profit of the whole department was L_{3} ,090,076. The Express Delivery Service, under which a letter can be sent by express messenger to any train, forwarded by that train, and met at the station and delivered by another messenger, dealt with 551, 179 letters, as against 438,120 in the previous year. I wo thirds of these were in London. The numbers of undelivered packets were as follows 7,699,040, an increase of 1,063,878, Postcards 1,294,216, an increase of 115,079, Book-packets 11,640,374, an increase of 94,100; Newspapers 534,120, a decrease of 28,361, and Parcels 175,075, an increase of 10,271 Property exceeding for the Returned Letter Offices The letters posted without any address numbered \$8,860, and in them was contained property worth £4715 As to Home Mails, the number of daily country mails to London was increased by 23, and from London by 35; 430 new post offices and 1231 new letter-boxes were added during the year, making the totals 21,107 and 30,303. Money-order and savings-bank business is transacted at 12,300 offices. The Staff of the Post Office increased during the year from 144,700 to 150,110. The number on the permanent establishment, at 12,300 offices. The Staff of the Post Clinic characteristics of the Post Clinic characteristics. The number of the permanent establishment, including 1,000 women, was 84,300. As to Money Orders and Postal Orders, the total number of inland money orders issued was 9,429,600, an increase of 115,587, for the total amount of £27,494,145, an increase of £1,574,292. The total number of foreign and colonial orders issued and advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of in the United Kingdom and payable abroad

was 523,886, an increase of 30,082, for a total sum of £1,477,836, an increase of £153,864. The number issued abroad and payable in the United Kingdom was 1,174,763, an increase of 51,972, for the total sum of £3,142,598, an increase of £137,336. In the **Post Office Savings Bank** the amount due to depositors on Dec. 31st, '97, was £115,896,786, as against £108,098,641 on Dec. 31st, 96. There were 7,239,76. accounts open on Dec. 31st, '97, and the average sum to the credit of each account at that time was thus (16 os. 2d.

as against £15 158 1d in '96
The number of ordinary telegrams forwarded in the United Kingdom (i.e. excluding foreign, press and free telegrams) was 68,810,786, an increase of 3,248,969, giving a revenue of $\pounds_{2,130,973}$ as compared with $\pounds_{2,070,045}$ in '96. The number of foreign telegrams was 6,482,806, an increase of 274,819, of press telegrams, 20,102,509, an increase of 20,785.

Increase of 20,785.

The total number of press telegrams increase of 20,785.

The total number of press telegrams increase of 20,785. telegrams, inland and foreign, increased from 79,423,556 in '96-7 to 83,029,999 in '97-8 New telegraph offices were opened at 268 post offices and 32 railway stations, making the total num-ber of offices at which telegraph business is

done 8172 and 2311 1ailway stations
As to telephones, the Post Office made considerable reductions in the charges for Post Office telephone exchange wires, and for short lines of private wire. The Department now controls a total mileage of 53,526 miles of tunk wire, and the system consists of over 880 separate trunk circuits, supplemented by more than 2009 circuits between post offices and the National Telephone Company's Exchanges There are 264 post offices open for trunk telephone business. The total number of trunk conversations during the year was 5,898,247, and the revenue therefrom £133,974 I here are 660 telephone operators (women) employed by the Department For Post Office Guarantee Act,

Poynter, Sir E. J., was b in Paris in 1836, and is the son of M. Ambiose Poynter, an architect. He was ed at Westminster School and Ipswich Giammai School, and studied art in English schools, and at Paris under Gleyre '56-9 He was cleeted an Associate of the Royal Academy in '69, and an Academician in '76 In '71 he became a member of the Belgian Water Colour Society, and in the same year and again in '73 was appointed Slade Professor of Art at University College, London He was Director for Art and Principal of the National Art Framing School at South Kensington for some years, and in '94 was appointed Director some years, and in '04 was appointed Director of the National Gallery In '06, on the death of Sir John Millais, he was elected to the Presidency of the Royal Academy His best known pictures are "Israel in Egypt" '67, "Perseus and Andromeda" ('72), "Atalanta's Race" ('76), "The Fortune Teller" ('77), "The Meeting of Solomon and the Queen of Sheba" ('91) He is known not only for his pictures, but as the author of "Ten Lectures on Art" ('72) and as one of the desirance of the new

periodical session of a competent Board of Examiners to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth "Under the powers conferred by the charter, the Council have established schemes of examination. (1) For teachers, to ascertain their qualifications and fitness to take part in the work of instruction; (2) for pupils, to test their progress, and to afford at once to the teacher and to the public a satis-factory criterion of the value of the instruction they receive The diplomas granted by the College to teachers are of three grades—Associate, Lucentiate, and Fellow: and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade the number of candidates examined for certificates was about 17,500. Visiting examiners are also appointed by the College for the inalso appointed by the College for the in-spection and examination of public and private schools. In 73 the Council of the College instituted a Professorship (the first established in this country) of the Science and Art of Education, and regular courses of lectures for teachers are delivered in the College letureteachers are delivered in the College teachers thall. The new buildings were opened by HR.H. the Prince of Wales, March 30th, 87 Offices, Bloomsbury Square, Organ, Lduca-Secretary, C R Hodgson, B A tional Times

Presbyterianism is church government by presbyters (or elders), and by them only Session of a Presbyterian Church consists of the ordained ruling elders, and the pastor or teaching clder of the church, who always presides when present. In case of a church being vacant the pastor of some other church within the bounds of the presbytery is chosen moderator ad interim. The Presbytery consists of the pastors of churches, and a ruling elder from each con-gregation within prescribed boundaries. The Synod consists of presbyteries within a larger area, and the General Assembly, where the size of the church renders one necessary, takes in the whole church, and consists either of the pastors of all the churchs, together with a ruling clder from each congregation, or representatives chosen from amongst both pastors and ruling elders. The standards of the Presbyterian Churches are the Westminster Confession of Faith, with the Catechisms, Larger and Shorter The United Presbyterian Church in Scotland, and some others, receive these with an explanation, especially in respect to Chapter XXIII of the "Confession". The United Presbyterian Church has adopted a Declaratory Statement in regard to its relation to the "Confession." The Presbyterian Church of England has adopted a similar document together with XXIV brief "Articles of the Fath" See Cherch of Scolland, Church in Ireland, Presbyterian Citure of England, and Welsh Presbyterian Citure of England, and Welsh Presbyterian Citure of England, and Welsh Presbyterian Citure of England.

Presbyterian Church of England. revival of Presbyterianism in England in the earlier portion of the present century was due to influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism

Presbyterian body in England in '76, so forming the Presbyterian Church of England. O the present congregations 28 trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 244 have been established within the present century.—Statistics. The Church consists of 314 fully organised congregations and 16 preaching stations, providing accommodation for 162,041 persons Several churches are in course of re building, and consequently their sittings cannot be given. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 320, with 19 ordained and 1 medical missionaries in the foreign field, besides 3 missionary teachers and 25 lady missionaries. There are also 20 licentiates, and about 20 theological students preparing for the ministry. The property of the Church is estimated at £1,501,215, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad The total income of the Church Church finance is the Sustentation Fund, which since 78 has secured for the body of the ministers, excluding a limited number under special arrangements, a minimum sti pend of £200 Underthis scheme 93 congregations were aid-receiving in 'or to the amount of L880 78 10d, as against 103 in '78 to the amount of L880 78 10d, as against 103 in '78 to the amount of L644478 0d, the average amount of aid required being at date L629 7d per congregation, as against L62 108, in '78 A new Church Building and Debt Extinction Fund was content buttoning and rect extinction rund was inauguit atted by the Synod of 'os. The amount contemplated is £50,000, piyable over five years, and nearly £30,000 has already been subscribed. The Key John Bogue, M.A., is organising secretary of this Fund. General Secretary, Rev I Thobain McGaw, MA, DD, 7, East India Avenue, Leadenhall St, EC. Financial Secretary, Mr John Leggat

Prime Minister 15 he who at the summons of the sovereign has succeeded in forming an administration, of which he is the head, and which may be named after him. It may be assumed that those who accept office under him agree with his policy in the main Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own patronage is very extensive. In forming an administration, he extensive In forming an administration, he scleets all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred Crown livings are filled; and upon his recommendation that the most envied temporal titles and honourable distinctions peerages, baronetcies, and the Garter, for example-are conferred, and such high appointof Scotland which led up to the formation of the
United Presbyterian Synod in '46. The English
section of that Synod united with the older ships and celonial governorships, and the lord

lieutenancies of counties, are made by the Crown. He is the leader of the House of Par-liament of which he is a member. Yet as Prime Minister he enjoys no legal precedence over his colleagues, his official existence being indeed not recognised by statute

Primitive Mothodism. See Wesleyan Methodist Churches.

Primrose League. A league originated in 1883, in memory of the late Earl of Beaconsfield, and so called because on the anniversary of his death every member wears a bunch of primroses. The members, who include both sexes, are styled Knights, Dames, and Associates, and their branches are called "Habitations." The members of the Primrose League took an active part in the last electoral campaign, and exercised considerable influence in favour of the Constitutional-Unionist candidates The testimony of both candidates and election agents leaves it beyond doubt that the extraordinary development of organised work on the part of the ladies of the Primiose League attained a measure of importance and success far greater at the last general election than on any former occasion. Grand Master, Marquis of Salisbury, K.G., Chairman of Grand Council and Chancellor of the League, Duke of Marlborough Members enrolled up to September 98 number, including Scotland, 1,444,000, divided among 2306 Habitations Vice-Chancellor, G. S. Lane-Fox Head Offices 64, Victoria Street, S. W. Official Organ, The Primrose Largue Gazette (monthly)

Prince Edward Island. A province of the Dominion of Canada It lies in St Lawrence Gulf, north of Nova Scota and between New Brunswick and Cape Breton Area, 2133 Sq. m.; pop. 100,078 Capital, Charlottetown, pop 11,485. Divided into three counties Administrate by a Lieut-Governon and Executive Council The people elect a House of Assembly of them, by membrod suffrage. The Propose of the Council Council State of the Council State of thirty by manhood suffrage. The Province has four seats in the Dominion Senate and five in the House of Commons. Education is stateaided, free, and compulsory, between the ages of 5 and 16 Entered the Dominion 1873. See BRITISH EMPIRE (table) and CANADA

Prison Reform. For a report of the Committee on this subject, which reported in 95, see eds. '96 and '97.

PRISON STATISTICS (ENGLAND AND WALES).

All the essential information which has been published on this subject appears to be com-prised in Part I of the Judicial Statistics for '96-7 the Reports of the Commissioners of Prisons and the Directors of Convict Prisons frisons and the Directors of Convict Prisons for the year ended March 31st, '98, and the report to these officials of the Rev P. G. Merrick on the operations of Discharged Prisoners' Aid Societies in '96. The following statements are mostly gathered from the Commissioners' reports

LOCAL PRISONS

The number of prisoners received in such prisons during '06 and '07 were -

, , , , , , , , , , , , , , , , , , ,	'96	·- , ₉₇
Under sentence of ordinary courts. Soldy re and sailors sentenced	148,113	153,965

	102,034	167,574
	_	

The population of these piisons on March 11st, '98, was 14,021, as again t 14,001 at the corresponding period of the previous year. The average daily population in 07.8 was 14,225, of which 11,075 were males and 250 were females. In the previous year such population consisted of 13,927 - viz, 11,570 males and 2417 females. If the increase due to retaining con-Nets under sentence of penal servitude in local prisons is deducted, the average daily population would be 13,723 in '97 8, and 13,427 in the previous year. The average population of local or short-sentenced prisoners was consequently higher by 12 in '97-8 than in the preceding year, The following table shows the general tendency to decrease of committals to prisons and the number committed iclative to population -

	0	n Indictment.	On Summary Conviction	
Yearly Average Number of Persons imprisoned in England and Wales	Actual Number	Number per 100,000 of Population of Fngland and Wales		Number per 100,000 of Population of England and Wales.

Decrease per cent	196	30.0	20	17 0

It is also important to consider that many new offences have been created recently, and there has been a material extension of the powers of dealing with other offences, and also greater activity by the police and local authorities in prosecuting. This fact is well notified by sta-

last ten years for certain offences of a quasi-oriminal kind, including adulteration of food and drugs, cruelty to animals, offences against the Diseases of Animals Act, and in relation to activity by the police and local authorities in dogs, offences against Highway Acts; offences prosecuting. This fact is well notified by statistics showing the increase that has taken local bye-laws, etc, and against gaming; in-place in the number of convictions during the corrigible rogues, and "other offences" under

the Vagrancy Acts. The total number of con-1 of juveniles committed to reformatories victions for all offences on indictment and summarily, which was 510,781 in '85-6, had increased to 644,226 in '96-7, being an increase of 23 per cent. The total number of convictions for quasi-criminal offences in '96-7 were 24,944, as against 229,285 in 85-6 Among such convictions for the former period there were 162,665 for drunkenness alone; 29,328 for offences against the Highway Acts. 76,055 for breaches of police regulations, local byelaws, etc., and 19,605 under the headings of gaming, incorrigible rogues, and under offences under the Vagrancy Acts there are a variety of cases of a quasi-criminal character in which the proceedings approach nearly to the criminal form. and most of which would be deemed criminal for purposes of appeal under the Judicature Acts. Thus, it appears from the Judicial Statistics relating to Crime, for '96—the latest returns published—that in 19,631 cases applications were made for orders to require persons using threats, etc., to find surcties, and in 17,007 orders were made, and in 1231 cases the defendant was imprisoned in default of finding the sureties. The sentences under this head are occasionally severe. In 41 instances they exceeded three months. Bastardy olders were made in 6401 and enforced by imprisonment in 057 Cases Orders for maintenance of wives were made in 5314 and enforced by imprisonment in 865 cases The Prison Commissioners, in their report for '16-7, state that "the large increase of convictions for the minor offences detailed, and the considerable proportion that they bear to the total volume of crime, has an important bearing on the general question of the increase of crime, if that is to be gauged solely by the total annual number of convictions irrespective of the offence, and by the fact that about three-fourths of the persons convicted escape by the payment of a fine imposed for comparatively trivial offences." Under the Protection of First Offenders Act the court before whom an individual not previously convicted is convicted of largeny or false pretences may, having regard to the youth, character, antecedents, etc., of the offender, or to the trivial nature of the offence, order that he be released, on entering into recognisance, etc., to come up for judgment when called upon, and to be of good behaviour. If he fail to conform to any of the conditions of his recognisances, he may be brought up to answer concerning his conduct and to receive judgment. It is provided by section 10 of the Summary Judicature Act, 79, that when the charge, although proved, is of a trilling nature, the court, without proceeding to conviction, may dismiss it, and may order the defendant to pay damage not beyond 40s or costs. By the same section it is further enacted that the court, on conviction, may order the defendant to give security with or without sureties, and with or without payment of damage or costs

The prisoners discharged under the First Offenders Act '87, and the Summary Jurisdiction Act '79, in cases which came before Courts of Summary Jurisdiction, were no less than 9.9 7 in '97. The number of juveniles in prison at the end of that year was about the same as the previous year, being 46 as against 42, but there has been a considerable diminu

new rules for the treatment of juvenile offenders are now in full operation, and are working well. The Governor of Bedford Prison reports. "As a result of these rules being carefully applied, strict discipline combined with discretion and kindness and constant employment, it is proved beyond doubt that the imprisonment of these lads has a most salutary effect, which is only realised by a comparison, both as regards their moral and physical state, on reception with their condition on discharge." The Chairman of the Aid Society in their report states that "Exery effort is made, by a combination of kindness with firmness, to reclaim them from criminal courses, and the prejudice and objections which have arisen to the imprisonment of juvenile offenders would appear to have no reasonable foundation in view of the new system that has been introduced by H M Commissioners of Prisons." The Governor of Warwick Prison also speaks highly of the new system, and stated "that the physical drill, habits of cleanliness, and implicit obedience, with instruction both in religious and secular knowledge, cannot but bear some fruit in a majority of these poor boys who are at an age apt to learn

CONVICT PRISONS

The number of mile convicts received in these establishments from local prisons and the Channel Islands, under fresh sentences during the year ended March 31st, '98, was 655, besides 189 with licences revoked or forfeited The number of female convicts received into the convict prisons from local prisons under fresh sentences and during such year was 30, besides 18 with licences revoked or forfeited The Penal Servitude Act, '91, by which courts of justice are enabled to pass sentences of penal scryitude for three years and upwards instead of being restricted to terms of five years and upwards has been freely taken advantage of The average length of the sentences of all the convicts in convict and advantage of local prisons on March 31st, '98, was 686 vears for males and 8 34 for temales, while on the same date in '97 it was 7 or years for males, and 7 50 years for females. As regards local and convict prisons generally, and their prisoners, some important statements are to be notified. Firstly, concerning first offenders, and since the formation of what is called "the star class" in convict prisons, in '79, up to March 11st, '98, 1330 male convicts have been placed therein, of whom only 21 of those discharged have returned to penal servitude under fresh sentences, and only 5 have had then lectures revoked or forfeited. Of 99 females in the class, none have returned to penal servitude

The Prison Commissioners state that, regards the segregation of first offenders, the very results of the "star clasp" led the Commissioners to anticipate that an analogous system of the separation of first offenders in local prisons would have a most beneficial effect. The Commissioners therefore carried into practical effect in '97 the complete separation of first offenders from the habitual criminals by the establishment of the "star class" system in all local prisons. During the year 9812 males and 2210 females have been placed in that tion since '95, when the number was 127 There class, of whom 485 males, or 4 9 per cent., and has also been a slight falling off in the number 152 fc males or 7 per cent., have been recommitted

'o prison under fresh sentences. In their similar posts of trust, most of whom have had report for '07 the Commissioners state that, a fairly liberal education. Now, to most of its regards the "star class" referred to, these imprisonment is a crushing blow, and success in a great measure depends on were it not for the fact that one is, able to offer the co-operation of the police and of the visiting magistrates, which it is expected will be forthcoming. The advantages of the segregation of the first offenders from other the Chaplain of Wormwood Scrubs Prison, who states that "frequent personal intercourse with this class on a whole shows that they are not thieves, neither are they criminals as this term is generally understood. They are of a better stamp, both socially, morally, and in-tellectually, than the ordinary prisoners, consequently one has better material to work upon I find among them managers, bankers' clerks, insurance agents, clocks to solicitors, in mer-cantile and other offices, diapers' assistants, men employed in H.M. Post Office, and in

__ _ _ _ _

them some helping hand on discharge, would almost overwhelm them, I find them well behaved, free from schous reports, very ready to listent to and receive advice. The very fact that they are in the "star class" and regarded as first offenders at once raises them a step above the ordinary prisoners, a position they are not slow to realise, and yet not to presume upon it So far, therefore, the scheme is a step in the right direction"

The following table shows the population of England and Wales with the number of prisoners sentenced to death, to penal servitude for life, to penal servitude for a term of years, to imprisonment on indictment, and on summary conviction or want of sureties in each

year from '88 to '97 inclusive

PRISON INDUSTRIES.

A further advance has been made in the regulation of prison labour by the appointment of paid instructors for these industries which require special skill and technical qualifications The Prisons Committee advised that better provision should be made for the supply of skilled workers as teachers, and for the direct superintendence of industries in each prison, and that workers who acquire sufficient knowledge to supervise skilled work should receive an extra allowance. A scheme has been ap-

proved, and is now in operation, giving literal effect to this recommendation. In Appendix No 18 to the Commissioners' last report a very interesting statement is made by the Comptroller of Prison Industries as to the work done therein by prisoners during '07-8. In gauging the industrial powers of our prisons the following points must, he states, be borne in mind (a) the shortness of the sentences of the bulk of the prisoners. (b) the fact that the law requires for the first month, or during his sentence if it is less than a month, every prisoner sentenced

to hard labour (unless the medical officer objects on the ground of health) to be employed in one or other of those forms of severe toil, of which the treadwheel and the crank have been so long the accepted types; (c) the comparatively low physique of the ordinary prisoners of to-day, (d) the scarcity of skilled workmen among the prisoners now received, (e) the fact that not less than 22 per cent of our local prisoners are practically non-workers, consisting as they do of debtors, prisoners awaiting trial, and prisoners on the sick list

An increased support compared with 'a6 has been given to prison trade operations by Government Departments. The Admiralty, the War Office, the Post Office, the Crown Agents for the Colonies, the Office of Works, the Stationery Office, etc., have used prison labour on an extended scale, and their technical officers have in many cases rendered valuable assistance by suggesting improvements made in the Among the details of prison manufactures details of prison manufactures. Among the date of all unproductive crafts supplies have been, brooms and brushes, tin labour. The value of the private, mattresses, bolsters, pillows, sacks, at local and convict prisons to hammocks for wounded men, kit bags, haver-

sacks, baskets, canvas, clothing, clothes-bags, bed sackings, sand-bags, nose-bags, mail-bags, leather leggings, beds, drabbet, twine, pouches, packing-cases, crates, rugs, mats, poucnes, packing-cases, crates, rugs, muts, foundy-work, hand-stoves, carpentry, shoemaking, bookbinding, upholstery-work, matting, ship-tenders, despatch-bags, tool bags, firewood, and washing for the Government Offices in London

An interesting experiment is in progress with the binding of books for the Home Office Library, and it is probable to undertake work or this kind for other branches of the Government service A large proportion of the bookbinding and printing required for the Prison Commission Office and for the or local and convict prisons in England and Wales has been done in prisons. A depletion in the tanks of the oakum pickers has been steadily proceeding, and arrangements have been completed for the final discontinuance at an early date of all unproductive crank and treadwheel The value of the prisoners' earnings at local and convict prisons for the year ended

The total earnings from the Aylesbury convict prison amounted to L2155 118 4d, of which L1055 188 10d was obtained from manufactures, and £1100 128 6d. from the service of the prison

DISCHARGED PRISONERS AID SOCIETIES

Many such societies have been formed for the object of the reinstatement in honest life of men and women on release from prison, and where a helping hand or a kindly encouragement on discharge may save from a relapse into crime Since Jan 1st, '87, every prison in England and Wales has had a Discharged Prisoners' Aid Society working in connection with it. Some of these societies are well organised and managed, and are doing their work well. There are others, however, which do but little for the purposes for which they concerning such societies by the Rev. G. P. Merrick in his report to the Commissioners of Prisoners on the operations of Discharged Prisoners' And Societies in '96, are supplemented by others of great importance on this subject. He adds that some of the societies leave the care of the work and of the interest of such bodies to a very few zealous members. "Some, again, are deeply interested

in the work, but do not march with and times. There are other Discharged Pritimes. There are other Discharged Prisoners' Aid Societies which are active and zealous, and are in various ways endeavouring, at much cost of time, money and labour, to find out how best to help the ex-prisoner to become a respectable, law-abiding citizen, and to recover his good name and place in the everyday world . These societies are doing their self-appointed work in such a manner that thousands who have been discharged from the prison-gates have abundant reason to be thankful for their existence." In '96 these societies offered to help nearly 26,000 men and women who, out of a total of 169,137, were released from the prisons of England and Wales during the year The Prison Commissioners state in their report for '97 that they have given much attention to the question of aid on discharge, and that Mr Merrick's comprehensive report on the existing system in relation to local prisons, and his suggestions for its improve-ment, have afforded them (the Commissioners) the opportunity of submitting a scheme (the details of which are not yet finally approved) for the future organisation of the Aid Societies referred to, with a view to developing their effectiveness towards the end for which they

were created. These officials further state that it is neither their object nor wish "to hamper or interfere with the free play of the voluntary societies constituted for the aid of prisoners throughout the country . . venture only to offer advice and guidance, having opportunities as the central authority of seeing by what methods this form of charity is likely to be excreised to the greatest advantage in the interests of the individual prisoner tage in the interests of the individual prisoner and of the State. It is our object also to recognise and simplify the principle on which the Government grant will be allocated, and generally to introduce uniformity of operation into a great system of charity, which, while it is best discharged by voluntary persons and agencies, must, having regard to its important and far-icathing results, always be a subject of State concein and interest. Aid to convicts is on a different principle. There is no local society, and no additional grant, the gratuity which a prisoner under long sentence earns which a prisoner under long sentence earns being considered sufficient to meet his actual needs on discharge. The function of aiding convicts on discharge rests mainly with the two well-known London societies—the Royal and the St. Giles's Christian Mission We have ascertained by inquiry that the governors and chaplains of convict prisons are on the whole satisfied that existing means are adequate for at least affording an opportunity to a dis-charged convict who is desirous of leading a better life . . With regard to the question of the aid on discharge generally to female convicts who have fulfilled their sentence, we are not satisfied that existing methods are sufficient, and the governor and chaplain of Aylesbury Prison concur in this opinion." The Commissioners therefore recommend that this prison "should be specially treated, and that a system should be established analogous to that in use in local prisons—viv, a Government grant at so much per head of discharged prisoners, to be disbursed by a specially constitution. stituted Aid Society, consisting of the prison authorities and the official visitors working on the spot, with fell knowledge of the character, antecedents, and prospects of this special class of prisoner.

According to the Report of the Com-missioners published in '98, the improved scheme referred to for the better organisation of discharged prisoners' and societies has been approved, and came into operation on April 1st since that date six societies have applied for the certificate, and forty-four have been duly certified. There still remain ten to whom certificates have not yet been issued pending further inquiries. Great efforts have been and are being made in various localities to comply with the provisions of the scheme. An arrangement has now been completed under which the authorities of the Royal Society for Assisting Discharged Prisoners co-operate with the lady visitors of the Aylesbury Prison with the object of making special provision for all deserving cases. Since the previous report of the Commissioners for the year ending '97 further advance has been made in the appointment of lady visitors to the local prisons. The Commissioners state that excellent results follow from the appointment of discreet and judicious ladies in this respect. Hitherto their efforts have been chiefly directed to making provision for deserving cases among ferred to the Committee for Privileges of the the female prisoners on discharge. The success House of Lords, a body which is composed of

of the system, and the evidence that their work among the prisoners in gaol can be carried on without any detriment to its discipline and good government, has led the Commissioners to desire that the sphere of influence of these ladies might be more extended. A circular has been addressed to the Visiting Committees throughout the country, inviting their opinion whether the services of lady visitors might whether the services of lady visitors might be placed on a more satisfactory footing, and used not only for purposes of aid on discharge, but for duties more closely connected with the internal life in prison during imprisonment. The Commissioners were of opinion that "good might follow if ladies connected with the locality were to advise as to the industrial occupations that might be followed in prison, and if to a certain extent they undertook the duties of scripture reader in selected cases, reading to and conversing with prisoners in their cells,"

MISCELLANEOUS.

As regards extradition, the number of cases which occurred in 96, according to the "Judicial Statistics concerning Crime" before mentioned, was very small In that year the surrender of 23 (11minals was granted to foreign Governments, and the suirender of ; criminals was obtained from such Governments During the vear ended March 31st, '88, there was a considerable decrease in the number of cases of msanity, compared with the corresponding period of '96-7, the total number of cases in the former year having been 150, and 164 in '96-7; while the number of those in which the symptoms of insanity first appeared after reception into prison was 62, as against 43 in 96-7, but of these 62, as the Medical Inspection has stated, the mental condition of 18 was returned as unsatisfactory on reception Concerning criminal lunation, these consist of persons charged with a criminal offence who persons charged with a climinal offence who are found ins mely the jury at assizes or quarter sessions, and of criminal prisoners who are cittlifed insane while awaiting trial or undergoing sentence. The latter class are more numerous, and chiefly consist of prisoners sentenced to short terms of imprisonment for minor offences. These persons are generally removed to the nearest county or borough asylum, and after the end of their sentence are detained therein as ordinary pauper lunatics. The more serious cases—when the charge is minder of some other grave crime—are sent to Bloadmoot Criminal Lunatic Asylum. The number of criminal lunatics received into asylums during '06 was 194, of whom 24 were found in ane by the verdict of juries, 138 were certified to be insane while serving sentences in prison, and 16 were found insane while under detention on remand or awaiting trial. Forty-one of the lunatics were received into the Broadmoor Asylum Of those remaining under detention at the end of the year, 645 out of a total of 769 were in this Asylum, and of these 145 had been confined therein for ten years, 115 for fifteen years, 68 for twenty years, and 146 above twenty years. For Prison Act, '98, see Session, sect. 80.

Privileges, Committee for. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the

the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

PRIVY. COUNCIL.

A body of persons nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject, and as he is created by the sovereign, so he can be removed from the list at her pleasure It is customary to include in the body the royal princes and the archbishops, several of the principal officers of State and of the Household become privy councillors by virtue of their office, the principal secretaries of state are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council, the Judge-Advocate-General is always included, and the rank is bestowed upon ambassadors and the principal colonal governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Occasionally in recent years a colonial state sman of eminence has been appointed, and in '97 all the premiers of the self-governing colonics, who by invitation officially attended the celebration in London of H M Diamond Jubilce, were added. Any privy councillor may act as a justice of the peace. The Lord President of the Council is appointed by letters patent under the great scal, his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to Her Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new sovereign. For the ordinary business of new sovereign. For the ordinary pusiness of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times is it Royal may deem necessary and desirable proclamations, summoning or processing of dissolving Parliament, and for many other purposes are made by and with the advice of the P.C. before being issued. Several public departments have grown out of or are even now committees of the Council The Board of Trade, although it is now an entirely separate department, is still officially entitled the Committee of Council for Trade Ihe Education Department, with its own vice-president, use a Committee of the Privy Council, and there are besides a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judoial Committee for appellate humans and a Pudoial Committee for appellate humans. late business. It is provided by statute that certain of the colonial judges, acting or retired,

who may have been appointed members of the Piny Council, shall be members of this committee, and two such appointments were made in or Included among the powers and duties of the Board of Agriculture (see AGRICULTURE) are many which were formerly discharged by the Agricultural Dept. of the Privy Council – The Privy Council in Ireland, a smaller body than that in England, advises the I ord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only. -As the Privy Council in Great Britain and the Privy Council in Iteland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov '98 The word "Per is intended to signify that some par-ticulars regarding the public life of the noble lord referred to are given under the head of "Pecrage", and "MP" is meant to refer the reader to our list of the House of Commons. In cases where the Privy Councillor is neither Peci nor MP come biographical facts are All Privy Councillors should be appended. addressed as "Right Honourable" MINISTRY

Quarantine. From Nov 7th, '66, the system of quarantine ceased to exist, so far as regards the British Islands. The Quarantine Act of '25 required that quarantine should be performed by vessels coming to the British Islands from places from which "the plague or other infectious disease or distemper highly dangerous to the health of his Mryesty's subjects" might be brought; but in recent years this Act has applied only to the plague and yellow fever, and has not often been used. Vessels arriving from mfected places or carrying goods, etc., from such places, were required to be kept at some safe distance from the shore and from other ships all their passengers and crew being detained on board -until all danger of spreading infection was considered to have passed. Healthy persons were thus exposed to the risk of taking any disease there might be on the slip. In some places quarantine establishments were maintained for receiving persons from suspected vessels, but most of these were long since abolished, and latterly the only such receiving ships were some old hulks at the Motherbank in the Solent. These were maintained by the Privy Council, on whom devolved the administration of the Quarantine Acts Orders in Council prescribed the system of quarantine By the Public Health Act of '75, the defence of the country against cholera was placed in the hands of the Local Government Board, and regulations were issued by that Board for the purpose Instead of quarantining the entire crew of an infected or suspected vessel, the method adopted con-sisted in the medical inspection of the persons on board, and the separation and detention of those who were suffering from cholera or who were suspected of being infected. All others were permitted to leave the ship, but were traced and watched by the local authorities Infected atteles no board were to be districted or destroyed. Quarantine has long been con sidered ineffective against the introduction of disease, besides being a source of much danger to those who were compulsorily detained under the system The sanitary ideas of our day favour the less showy but safer methods used in the case of cholera. The fate of quarantine was determined on in '04, when, in discussion on the Privy Council Estimates, objection was made to the cost of maintaining the quarantine establishment in the Solent on the ground of its uselessness, and the Government promised

which yellow fever and the plague are to be dealt with in the same manner as cholera, and regulations made by the Local Government Board will apply equally to the three diseases Of course quarantine is still required to be performed in many foreign countries.

Cuarries The Quarties Act of '94, which came into operation on Jan 1st, '95, applies to all workings for minerals, except mines, which are more than 20 feet deep. A return has to be sent annually from every quarry exceeding this depth to the inspector for the district, specifying the quantity of mineral obtained, and statistics are prepared from these yearly returns. The quantity of clay, brick earth, sand, and gravel obtained from shallow quarries is large, but without further statutory powers no accurate account of the quantity and value can be publicly notified. The minerals from quarities more than twenty feet deep in Great Britain and Ireland with the Isle of Man. during '97 is returned at 37, 378, 108 tons minerals include - iron ore, 13,787,878 tons, of the value of £ ,217,795, 3,856,237 tons of chalk, valued at £10,595; clays, 12,705,196 tons, of the value of \$1,453,120, granite, 1,847,323 tons, priced at £552,004, gravel and sand, 1,356,787 tons, of the value of £111,33,, limestone (exclusive of chalk), 11,003,524 tons, valued at \$\text{Li,155,093}\$, sandstone, 4,064,100; tons, of the value of £1,524,700; and slate and slate slabs, 609,704 tons, valued at £1,619,576 The 1 manning minerals obtained from quarries more than 50 feet deep include barytes, quartz, valuent clay cohe unblor and through the content of the c gypsum, clay, ochie, umber, and tin ore, etc. Kent its by far the most important chalkyielding county, and much of its produce is used in the manufacture of Portland cement at works on the banks of the Thames and the Medway There are few counties in England which do not produce minerals for brickmaking, but the workings for clay and brick earth are often shallow, and there are many quarries of less than twenty feet deep which produce much of both As regards granite the term is used very vaguely in commerce, and therefore some of the stone so called is not entitled to that name when used in its proper geological sense. Limestone, without taking chalk into account, appears to be the most important mineral quarried in the United Kingdom, owing to its various uses by builders, farmers, iron smelters, and chemical manufacturers. Derbyshire, Durham, and Yorkshire are the counties which produce more than others. The leadto abolish the quarantine system As a result which produce more than others. The lead-the Public Health Act of '96 was passed, by ing producers of sandstone are the counties

of Lancaster, York, Glamorgan, Edinburgh, and Lanark. North Wales supplies most of the slate. As to the persons employed at quarries under the Act of '94, these numbered 123,370 in '97, of whom 58,845 worked inside the excavations, and 64,525 outside. At these quarries in the same year there were 118 fatal accidents, which caused 123 deaths. The death rate from accidents of the inside workers was 158 per 1000, while the death rate of the persons at factories and workshops outside the quarries but connected with them was 46 per 1000 for the purpose of inspection of quarries, under the '94 Act the United Kingdom is divided into thirteen districts. A list has recently been published, prepared by the Inspectors of Mines, by direction of the Home Secretary, which contains the names of the quarries, under the Quarries Act, 94, situation, names and addresses of owners, date of signature of special rules, number of persons employed, and kind of minerals obtained from the quarries.

Quebec, a province of the Dominion of Canada. It has eastward of Ontario, occupying both banks of the 5t Lawrence. Area, 344,050 sq m; pop 1,485,535, mostly descendant of original french colonists. There are 1,201,060 Roman Catholics in the province. Capital, Quebec, pop 6,5000, a picture-sque, imprignable fortress, with historic associations. Montreal, a splendid city, at the head of the St. Lawrence navigation, is the chief scaport and the most populous town in the dominion, with 210,650 inhabitants. Other towns are 5t. Henri, Hull, and Sharbooke. Administered by a Licut-Governor and responsible Ministry. A Legislative Council of 24 members appointed for life by the Licut-Governor. The Legislative Assambly has 7; members. Quebe, has 24 stats in the Dominion Schate and 05 in the House of Commons. Primary education obligatory, face, under local control. There are separate schools for Roman Catholes. Sec. British Fnith (table), Canada, and Difformatic

Queen Margaret College is the women's department of Glasgow University. See article on Womin, Higher Librarion of

QUEENSLAND.

Until 1859 the territory of Queensland was administered by New South Wales, but in that year it was raised to the dignity of a colony. It comprises the N E section of the continent, immediately N of New South Wales. On the W. it is divided from South Australia by 141st meridian of E long from New South Wales boundary to 26° S. lat, thence by 138th meridian to Gulf of Carpentaria. It is 1300 the divided from N to S., and 800 miles from E to W, including 808,497 sq. m of area. Population, situated on the river Brisbane, pop 100,913, situated on the river Brisbane, 500 miles N of Sydney; and is a thriving city, rapidly increasing, and provided with various excellent.

institutions. Other leading towns are Ipswich, Maryborough, Rockhampton and Iownsville. The colony is divided into three districts— Southern, Central, and Northern. In the first the bulk of the population Icside, with 45 representatives in Parliament; the Central district has it representatives; and the Northern 16 representatives. The railways all run east and west, so that there is as complete an absence of communication between the districts as there is of similarity between the conditions of labour and of climate in them. There seems to be an opportunity for developing a most prosperous sugar industry in the colony if only it is attempted by a number of men on small plantations instead of on a large scale. The pastoral industry is very large, and there is a considerable amount of mining for gold carried on Executive vested in Governor and responsible Ministry. Parliament consists of two houses Council and Legislative Assembly Legislative The former is composed of members, 41 nominated for life by the Governor on the advice of the Ministry. No limit is placed to the number of members. The latter has 72 members elected from 61 electoral districts for three years on a manhood suffrage basis. The members are paid £300 The colony is represented in a year Federal Council of Australasia, but so far has take i no part in the proceedings of the Federal Convention The principal religious bodies are Church of England, Roman Catholic, and Presbyterian. Valuable land grants were formerly made to these bodies, which they now retain free from taxation. Education is now retain free from taxation. Education is free and un ectarian, and is well provided for ne every branch. There are about 772 primary schools, with an average daily attendance of 54,316 pupils. The chief exports are gold, wool, frozen meat, hides and skins, and sugar are about 2500 miles of rulway open Revenue, 96, £3,613,150, expenditure, £3,601,264, imports, 90, £5,425,191, exports, £0,031,557, public debt, £33,495,414 See Australia, British Empire 2,33,498,411 (table), and for Vinistry, etc., see Dipromatic.

Wistory, '98. The redetal Liabling Bill was laid before the Assembly by the Premier for second reading (Nov. 4th, 47), but as he refused to assent to a proposal to divide the colony into three electroates for ideal electrons, an amendment that the Bill be withdrawn was carried. The Premier (Sir II. M. Nelson accepted the presidency of the Legislative Council (April 14th), and the Cabinet was then reorganised, with Mil Byrness Premier. The Budget statement showed an estimated revenue for the ensuing year of \$4,382,440, and expenditure \$\int_3,866,500 (Aug. 15th). In consequence of the death of Mil Byrnes, the Hon I Dickson became Premier and Chief Secretary, tem porarily combining the Ministry of Justice with that of Postmaster General (Sept. 30th).

From the above figures it will be seen that a very large proportion of the railway mileage of the world is in the United States, and that, relatively to population, that country is far better supplied than any other of those owning large mileage, with the exception of British North America and Austrialista. France has the next best supply per population, and then follow in order Germany, Great Britain, and Austria Hungary. Russia and British India, though they possess large mileage in the aggregate, are both very poorly served per inhabitants, and these great countries should in the future be able to support very many miles more. The greatest quantity of railboad relatively to population is found in the Australian colemes. In West Australia, for instance, there are no less than ris miles for each rosoo inhabitants, but, on the other hand, the mileage per ror square miles is so scanty as not to be expressible in a instinction.

The railway system of the United Kingdom, on the latting system of the Onted kingdom, on the 31st, 65, nad, according to the Board of Irade returns, a total extent of 21,13 miles, the mileage for the three countries separately being Lingland and Wales, 14,818; Scotland, 415, ricland, 4168. Of new lines opened computely in '98, perhaps the most important is the Highland Company's new directions between Perhaps Institute of the direct line between Perth and Inverness, the final portion of which, from Daviot to Inver-ness, a distance of 11 miles, was brought into use on Nov 1st. The new line leaves the Company's old main line at Ayiemore, and the portion between Avience e and Daviot, 2 miles, was opened last you, and has been worked is a branch. Now that the remaining portion is finished, it is being worked as the main line in place of the present circuitous route cha Forces and Nann, and thus a saving of 26 miles in distance, or about one hour in time, is effected on the through journey between inveniess and the South. The works of the new line are very heavy, and it has been under construction for no less than fifteen years Another newly opened line in the north of Scotland is the Cruden branch of the Great North of Scotland Railway, opened on Aug 2nd, 97, mention of which was accidentally omitted from our 'aged This line leaves the Company's Buchan line at I flon (19 miles north of Aberdeen), and runs in a north casterly direction until it strikes the beautiful Cruden bay, where the Company is creeting a large hotel to be opened in 99 Thence the line proceeds northwards through the famous Peterhead deposits of red granite to its terminus at the fishing village of Boudam Other new lines opened in Scotland in 98 are the East File Central (from Cameron Bidge to Lochty), and the Aberlady and Gulline Railway, both constructed by the North Pritish Company Next to Scotland, in point of new railway openings in '98, comes the South west of England, where the Lynton and Burnstaple, so miles, the Holsworthy and Bude, 11 miles, the Lambourn Valley, 1.2 miles, and the Mailborough and Grafton, 7 miles, have all been opened in '98. The Lynton and Bainstaple, and Lambouin Valley, are local lines, constructed and worked by independent companies, the one having a connection with the South-Western and the other with the Great Western system. The Mailborough and Grafton is a link line consolidating the system of the Midland and South-Western Junction Railway Company, whose traffic is principally between the Midlands and Southampton. The Holsworthy and Bude line is the undertaking of the South-Western Company, which Company has also recently opened a new branch line of 6 miles to Budleigh Salterton, a seaside place in South Devon, and wile shortly extend this to Exmouth. The same Company, too, on Oct. 12th, '98, laid the coping stone of its new deep-water quays at Southampton Docks In Norfolk and Suffolk the Great Eastern Company and the Midland and Great Northern Joint Committee have united to construct a system of new railways for further developing the seacoast, the first portion of which, from North Walsham to Mundesley, 52 miles, was opened on July 1st, 98 On the same day the Gicat Fastern opened a new station, with a connecting railway more than a mile in length, at Felixstowe. On April 4th, '88, the Great Northern opened a further portion, 5 miles, of its Leen Valley extension in Nottinghamshire, which is eventually to connect with the Lancashire, Derbyshire and East Coast Railway at Langwith, and the London and North-Western has added two additional lines to its Trent Valley line for a distance of it miles. The Valley line for a distance of 3 miles The Cawood, Westow and Selby line, 41 miles was opened by the North-Eastern in '98, and in connection with the same system a branch line, 4 miles in length, constructed by an independent company, has been opened from (hathill to North Sunderland Some important electric lines have been opened during the year, including the Laxey and Ramsey (Isle of Man), rol miles, the Fleetwood and Blackpool, io miles, and an extensive system in the neighbourhood of Stockton-on Pees London's second underground electric railway, the Waterloo and City, 11 miles, was opened in August, and the opening of the Central London Is expected next year. An extension of the City and South London northwards is well in hand, the Baker Street and Waterloo has been commenced, and a" (neat Northern and Strand' line is projected

An addition to the railway mileage of the United Kingdom far larger and more impor-tant than any of those recorded above is that made by the Great Central Company's new trunk line from Annesley to London, 92 miles July 98 Its complete opening is to take place in the course of '99. Starting at Annesley (about 10 miles north of Nottingham), where large sorting sidings have been laid out, the new line crosses over the Great Northern and Midland Railways at Linby, and runs on to Hucknall Town, the first station. Stations are also being provided at Bulwell, Basford (Haydn Road), and Carrington Between the latter two stations the line is in tunnel, called the Sherwood Rise tunnel, 662 yards long Immediately south of this the Mansheld Road tunnel-1188 yards long-commences, which emerges into the site excavated for the Central station, Nottingham, which is being constructed jointly by the Great Central and Great Northern Companies. I wo large island platforms, with bay platforms at the end of each for the local

A large and close to the Market Place. commodious hotel is also in course of erection here The goods vard at Nottingham, where a large goods warehouse is being erected, is situated between Kirk White Street and the situated between Kirk White Street and the river Trent Stations are also being erected at Aikwright Street (Nottingham), Ruddington, Fast Leake, Loughborough, Quorndon and Woodhouse, Rothley, Belgrave and Birstall, Leicester, Whetstone, Ashby Magna, Lutterworth, Rugby, Willoughby, Charwelton, Woodford, Culworth, Helmdon, Brackley, Finmere, Calvert, and at Marylebone Road, London, The bissenger station at Leicester extends The passenger station at Leicester extends from Talbot Lane to Soar Lane, and the principal entrance to the station will be from a new road, 50 feet wide, which the Company are constructing from Soai Lane to Sycamore Lane. The station has a commanding position, and will be very convenient. The goods yaid is being laid out on the Bedehouse Meadows, where an extensive goods warehouse is being built. The access to the station at Rugby will be obtained from Hillmorton Road, one of the principal thoroughfares of that town. In addition to the passenger station at Woodford, large sorting sidings, are being laid down, and short branch lines have been made forming a connection with the Last and West Junction Railway, which will open out a new route to Railway, which will open out a new route to Stratfoid-on-Avon and other places. Large hydraulic and electric lighting plant are being provided at Annesley, Nottingham, Leicester, Woodford, Neasden, and London. The sorting sidings at Neasden are of an extensive character. The tunnelling under Lord's Cricket Ground, St. John's Wood, for the new line, was completed in March, '97, and the three tunnels which the Company were under agreement with the Cricket Club to cover over have been entirely hidden from the public view by a layer of earth which has been turfed over, and leased to the Club by the Railway Company. The large area of land which belonged to the Clergy Orphan Corporation has been acquired by the Company and handed over to the Cricket Club, so that not only has the Club suffered no damage whatever by the advent of the Railway Company, but it has actually obtained a considerable addition to the ground. The coal traffic in London 15 being dealt with on a site between Grove Road and Carlisle Street, lying to the rear of Edgware Road, and absorbing the property between Luton Street and Orcus Street on the north, and Samford Street on the south The Regent's Canal, opposite the goods station yard, has been widened to a minimum width of 100 feet, to enable barges to turn with ease. A large transit shed is here being erected, and extensive sidings laid down, to be used in connection with the traffic to be barged along the canal to the docks on the Thames. The goods warehouse at the I ondon terminus is being built on the most modern principles. About 6500 tons of steelwork have been used in its construction. The passenger station, which is being constructed of red brick, will have a frontage of 325 ft, and will contain dining and refreshment rooms, and the usual dming and refreshment rooms, and the assau waiting and other rooms on the ground floor, with offices, etc, on the first floor. Between the station buildings and the arrival and de-Companies. I wo large island platforms, with bay platforms at the end of each for the local train services, are being constructed for this being provided. The hotel, which is fast apstation, which is in the centre of the town,

station in Marylebone Road, should be a source of considerable attraction to the new route.

In addition to taking a half-share in the construction of the Nottingham Central Station, as mentioned above, the Great Northern is constructing a junction line through that town This will enable it to run express trains through Nottingham, and thence, by its running powers over the Great Central, to Sheffield and Manchester, thus providing itself with an alternative route to the present one via Retford, by which the joint traffic of the two companies has hitherto been conducted. The Great Northern has already begun to carry on its goods traffic with Manchester and the northwest independently of the Great Central, having opened on July 1st, '98, a portion of the very large goods depot which it is electing in the centre of Manchester, and having also set up its own separate organisation in other important places in this district whose traffic it previously obtained through the agency of the Great Central

Besides the very large works connected with the construction of this new trunk railway, there have been many important new lines under construction during '58 I he Northunder construction during '58 The North-Western still proceeds with its two great works mentioned in ed '97, viz —Ashbourne to Parsky Hay, 13 miles, and Heaton Lodge to Wortley, 14 miles, the one to provide a new route between the Midlands and Manchester, and the other a new route between Huddersfield and Leeds This Company is also constructing a new viaduct over the river Dee The Great Western's short-cut line to South Wales (from Western's short-cut line to South Waks (from Wootton Bassett to Patchway, 30 miles), and its new route to Weymouth and the west of England from Stert to Westbury, 14 miles), continue to make good progress, and the latter is expected to be completed next year. The Midland partially opened on Nov. 14th its Kentish I own widening (14 mile) and its new London coal depot; it is pushing on with its harbon and railway works at Heysham, Lancashire, and it has taken in hand an important new line between New Mills and Heaton Mersey, 10 miles in length, to improve its route to Lancashire Both the Great Northern and North-Eastern have short extensions in hand to Hunslet, a manufacturing suburb of Leeds
The South-Western has just started on its
Meon Valley (Alton to Farcham) line, which is to extend 25 miles through an undeveloped part of Hampshire, and it is also constructing a link line, 8 miles, from Alton to Farnham, and a light railway, 12 miles, from Alton to Basing-stoke The North Cornwall Company's line stoke The North Cornwall Company and from Wadebridge to Padston, 5 miles, will, when completed, be worked by the South-Western The Brighton Company 5 new line Constant to Pallswood, to replace running powers over the South-Eastern, is expected to be completed shortly The South-Eastern is enlarging Folkestone harbour The Great Central is enlarging its Sheffield station and extending Grimsby docks. The North British's great improvements at Edinburgh are approaching completion, and it has also in hand a new dock at Burntisland, and an extension of the West lightness and Railway from Banavie to Mallarg The clasgow and South-Western is building a new bridge over the Clyde, and the Caledonian has just started a Clyde, and the Caledonian has just started a the chief holiday resorts, and lowered their new dock at Grangemouth The Highland is parcel rates The North-Eastern started a doubling its main line for 184 miles north of new express service between Sheffield and Blair Athol. The Belfast & North Counties is

about to open an hotel at Belfast, where it has just completed other extensive improvements. Of new railway schemes authorised in '98, by far the most important is the Fishguard and Rosslare scheme, by which the Great Western and the Great Southern and Western of Ireland Companies propose to establish a new shortcompanies propose to establish a new short-sea route between England and Ireland. The works authorised include a new harbour at Fishguard, in South Wales, an improved harbour at Rosslard, and a new line from Rosslard to Walet Judy with a bridge the company. to Waterford, with a bridge there over the river Sun In connection with this scheme the Great Southern and Western proposes to absorb the Waterfold and Limerick and Central Iteland Railways, if Parliamentary sanction can be obtained. The Great Western has also obtained powers for a new harbour at Weymouth. The Midland has secured sanction for new lines (19) miles) in the West Riding, which will give it a new direct route to the North through Bradford, avoiding the existing loop via Leeds The North-Western's Act included a deviation line, 81 miles, at Shap, in Cumberland, and an enlargement of Euston terminus, the Great Northern's, an extension (20 miles) of its Enfields bruich to join the main line again at Stevenage, and so make a new loop line to the North, the Gir it Central's, a suburban line to serve South Harrow, Sudbury, and Wembley. The North-Eastern was authorised to absorb the Scarborough and Whitby Railway (202 miles), and the Great Eastern to make a line, 6 miles long, from Woodford to Hford. The Glasgow and South-Western was empowered to enlarge St. Fnoch's Station, Glasgow, and the approach lines thereto, and the North British to construct a link line (10} miles) from Dunfermline

In providing improved facilities for travel and transport all the leading companies were more or less active in '98; but again, as in '97, the most important work was done by the London and North-Westein This company's day express service, London to Dublin, was accelerated by an hour and a half, and the time of departure from Euston is now if a m instead of 9 30 as formerly, the arrival time at Dublin icmaining the same-viz, 8 30 p.m In the opposite direction the day express service was accelerated by an hour The day Irish mail was also quickened by nearly an hour in each direction. To the oa m Scotch express in both directions luncheon cars for both classes were attached The service to the North Wales coast watering-places was considerably im-proved, and a new through express service was established to Llandrindod Wells and other watering-places in Central Wales New breakfast-car trains were put on from Liverpool and Manchester to London, and the service with these places was quickened and otherwise improved Breakfast cars for all classes of passengers are now run upon the 5 45 Belfast boat train, Fleetwood to London The Midland Company commenced rebuilding their express rolling stock on an improved pattern, the interrors of the compartments being much larger and more arry than those in general use, and placed new dining carriages on several of their services. They have also extended their Winter tourist and week-end fares to most of

to Kincardine

and Belfast, via Newcastle, Carlisle, Stranand Beliast, via Newcaste, Carlise, Stran-raer, and Larne, the latter connecting by the Great Northern line with London. The Great Northern and North-Eastern also joined hands to run a "Wilson Line express" between King's Cross and Hull. The Great Cential added to its stock some beautiful new corridor trains, with dining and luncheon cars

As regards the southern lines, the Brighton Company, under its newly appointed general manager, Mr 1 1 S Gooday, started a special Sunday service between London and Brighton. covering the distance in an hour each way, and turther improvements are likely to follow. Still more important reforms are likely to accrue from the great change which took place during the year in the relationship of the South Eastern and London, Chatham, and Dover Companies. These are in the tuture to be worked as one concern, so far as regards competitive traffic, under the management of a joint committee of the two boards, of which Mr Cosmo Bonsor, M.P., is chairman, and Mr Alfred Willis general manager, Mr 1 5 Fotbes, the late chairman of the Chatham, having consented to be relegated to a consultative position. As regards improvements in Scotland there is not much to be said, but in Ireland the development of touristicatic by means of new facilities and improved accommodation made much progress, particularly in the matter of hotel accommodation The London and North-Western opened a very large hotel at Greenere, the Great Northern of Ireland opened a new ho'el at Warrenpoint, and took over the management of the Mourne and Woodside hotels at Rostrevor, while the Belfast and County Down completed the Slieve Donard Hotel at New castle. The Great Northern of Ireland was also very active in improving the comfort of travelling on its line by means of breakfast, luncheon, and dining cars, and by the installa-tion of the electric light. In connection with the Fishguard and Rosslare scheme already mentioned, a joint committee of the Great Western and Great Southern & Western of Ireland took over on November 1st the Waterford, Dungarvan and Lismore, and Fermoy and Lismore lines, and has equipped them with

up-to-date rolling stock.

A new code of bye-laws was framed by the Solicitors of the various leading railway companies, and in June last was submitted to the loaid of Irade by the North-Eastern Railway Company. The other companies will await developments, and if the North-Lastern secures the assent of the Board to its proposals, they will in their turn submit identical ones, each for itself Improvements are introduced into many of the clauses Progress was also made in the promotion and construction of light railways under the Light Railways Act, 96 (for origin and scope of which see previous eds.) The first report of the Commissioners ap-

sittings in all parts of the country, and given their approval to a large number of other schemes Up to May '98, when the last list of applications was published, the total number of schemes promoted under the new Act was 123, and a goodly number of others are being framed as this article goes to press. But a considerable proportion of the applications have failed to win the Commissioners' approval and of those sanctioned a good number will probably not be carried out, so that the success of the new Act, great as it undoubtedly has been, is not really so important as might appear at first sight. Moreover, the economy of the new method of promotion has not proved so marked as was hoped for by its originators, and various knotty points have arisen in connection with it, the most important being whether or not urban tramways should be promoted under the Act I he construction of several of the lines sanctioned have already commenced, and more than one will probably be opened for traffic in '99

II BRITISH RAILWAYS AS INVESTMENTS FOR CAPITAL.

The paid-up capital of the railway companies of the United Kingdom reached the stupendous sum of over £1,000,000,000 at the close of and at the end of last year it exceeded that amount by nearly £00,000,000, making the cost amount by hearly 5,0,000,000, making the cost of our tailways nearly 5,0,000 per nule. Of this total, however, over 6,5,2,000 represents merely nominal capital, i.e. additions made on the consolidation, conversion, and division of stocks, but, even after allowance for this has been made, the result arrived at proves that British railways have been very far above the average in costliness - that, indeed, they have cost nearly double as much per mile as the lines of the rest of Europe, and nearly four times as much per mile as railways in other parts of the world Moreover, owing to the large sums which are constantly being spent by the companies, particularly in London and other large towns, from which no addition to mileage year by year

Such being the abnormal and increasing

ostliness of failway construction in the United kingdom, one would not be surprised to find that a large part of the capital sunk therein yielded no return to investors, and that this is true of little more than 1 per cent, of the whole prepares us to find that the companies revenue The official returns, during the forty years over which they extend, show an almost uninterrupted growth under the head of "gross concurrently of course with, but receipts, more than in proportion to, the increase in mileage worked. The gross receipts for '97 reached the very large total of £917 millions, origin and scope of which see previous eds.) Trached the very large total of f_{93} ? millions, the first report of the Commissioners apslowing the very satisfactory increase of pointed under this statute was issued in March 198, and from this it appeared that up to the date covered by the report—the end of f_{97} —the corders for five light railways had been approved by the Commissioners and confirmed by the Board of Trade—viz, the Basingstoke of f_{95} —the following the experience of f_{95} —the total of several years and Alton, East and West Porkshire Union, passenger traffic increased in f_{95} —the total of f_{95} —the total of

had been reached any time during the ten years preceding The change in the tendency of second-class receipts has been even more noticeable, the increases of '96 and '97 having made up so much of the leeway of the preceding six years that the total for '97 was only a small amount less than in '92. The explanation of this is that the movement for the abolition of the second-class has ceased, and given place to the policy of encouraging that class by reducing its scale of fares more nearly to the level of third. Coupled with the increase in first and second-class passenger traffic, an increase of fairly average proportions was registered in '07 in the season-ticket takings. The bulk of the increased passenger revenue, however, was, as usual, derived from third-class traffic. under which head there have been gains of greater or less amount your by year since '85.
The total gain from that date to '97 has been £8,000,000, or at the rate of £666,000 per annum, and the increase in '97 was a little above this average, although less than that of several individual years. The receipts from third-class passengers now amount to over three-lifths of the total passenger revenue. The increase ru the goods traffic revenue for '97 was at the same proportionate rate as the passenger traffic increase. Under the heading of "minerals" the gain was larger both in amount and proportion than for '96, and considerably in excess of the average for the previous nine years. The increase in "general merchandise," though less increase in "general merchandisc, induguless than that for '96, was also in excess of the average for the past nine years, but these have included one of two bad years for railway business. The decreases in "hive stock" traffic which occurred in '95 and '96 were arrested in '97.

Turning now to the other side of the account. we find that the total working expenditure of the companies showed an increase in '97 larger both in amount and in proportion than any which has occurred for several years, with the result that the proportion of expenditure to receipts, after having stood at 56 per cent for the three previous years, was raised in '97 to 57 per cent. This is the same level as that reached in '93, the year when revenue suffered so much from the great coal strike, and it is the highest yet recorded Moreover, the 50 per cent. of '94, '95, and '90 was itself in excess of the mean of the percentages of the previous decade; so that it appears that the cost of railway working has not only been permanently raised during the last few years, but that it tends still further to increase. Much of the gross increase of expense is, of course, due to increased business, but, whereas the increase which occurred in '06 was very largely the outcome of satisfactory business conditions, it was not so much so int'07 In other words, the companies in '97 spent more money, on the whole, to earn the same amount of revenue To a large extent this increase of expenditure is outside their own control, particularly in the department of wages, advances in which have been necessitated by the operation of the Act dealing with the hours of railway servants, the agitation of the men's unions, and the additional facilities demanded by the travelling public. From these causes the wages bill may be expected to go on increasing in the near future. An increase in the items of rates and taxes also continues year by year, though perhaps at a less rate than a few years ago. In '97, also, there was a substantial increase in the amount paid for fuel, in which item a reduction had occurred in each of the five years ending with 36. This increase may be expected to be much greater in 36, owing to the Wish coal strike.

From the above it is evident that the railway shareholder has little to hope in the near snareholder has little to hope in the near future from diminuition of working expenses, but that, on the contrary, he has to fear a further increase in this department. Never-theless, thanks to increasing gross receipts, the net earnings available for distribution as dividends seem likely to increase sufficiently to keep pace, on the whole, with the constant additions to real capital. The figures for '97 showed, it is true, an apparent decline in the proportion of the net earnings to total capital from 188 per cent, the figure for '96, to 37, per cent, but this was largely, if not entirely, due to the large nominal increase of capital made during the year, the ordinary stocks of the Midland and Glasgow and South-Western companies being divided in '97 into "preferred" and "deferred" stocks, in such a way as to double the amounts while reducing the rates of dividend. The figures for '98 are sure to be of dyldend. In figures for 38 are sure to be adversely affected by the coal strike in South Wales, from which the Great Western and some of the Welsh companies have suffered very severely Other companies, notably those serving the Northern and Midland coalfields, have done unusually well, and generally the traffic returns have been satisfactory, but no marked improvement in the profitableness of railway business can be expected to be shown by the returns for '98, indeed, it is very doubtful whether the status quo has been preserved

III. RAILWAYS AS EMPLOYERS OF LABOUR.

The iclations between the railway companies and their employes have, on the whole, been less distuibed during '98 than seemed probable at the end of the previous year. In ed '98 we chromoled the presentation to the companies by the Amalgamated Society of Railway Scrvants of a "national programme," embodying the men's demands, replies being asked for by Nov 10th, '97. Most of the companies sent only formal acknowledgments of this ultimatum, and the Society, much disappointed, threatened a general strike at Christmas, if more attention were not paid to the men's grievances. Ultimately, however, Mr. Bell, the secretary of the Society, contented himself with appealing, on Dec 31d, to the Board of Irade for its intervention, "so that the disaster of a general strike might be averted." Sir Courtenay Boyle prompily replied, on behalf of the Board, definitely declining to intervene, and pointing out that "any attempt to force the claims of the men by a strike would be entirely inconsistent with the exceptional position secured to the men by the Legislature, and would show an entire disregard of the convenience of the travelling public." This severe rebuke quite put an end to all talk of a general strike in England, and the Society fell back on other methods of pressing its national programme on the attention of the companies. In Ireland, however, the situation had become more acute, strike notices having been actually served upon the Great Southern, and Midland Great Western Companies, and, although these

were withdrawn, an actual rupture was not averted, though fortunately it was confined to a small area On Jan 24th, '98, 350 men came out from the service of the Cork, Bandon & South Coast Railway, this extreme step being precipitated by the alleged "victimisation" of a signalman. The traffic of the system was much impeded, but not paralysed, the loyal portion of the staff working devotedly. The strikers, having obstinately refused an offer to return before the end of the month, who served with summonses, both for breach of contract and for impeding the traffic of the railway Some of the mengot off the penalty asked for on the ground of not being manual I, bourers, but cight of them- four guirds, two shurters, and two signalmen-were sentenced each to two months' imprisonment without the option of a fine a great blow to the Society, which had assured them that a fine would be the extreme penalty. A disgraceful incolent in this strike was a fortunately unsuccessiol attempt to wreck the Cork mail by the displacement of rails at Frankfield on March 20th Soon after this the Frankfield on March 20th 2000 docc shown strike began to break down, the directors having agreed to register 'trikers' names as the constatement, and by May'th applicants for reinstatement, and by May the affair was at an end. Meantime a somewhat similar rupture of a more local character had occurred on the Midland Railway at I cods and Shelfield On March 21st 50 leeds men leit Shellicid On March 214 to 1 cros men her work, the occasion of their coming on being, as in the other case, the alleged victualisation of one of their number. On the 4th about 180 Shelfield her struct in sympathy. and on the same div a number of lenester men came out, but only stayed out three hours On the petition of the Secrety the Midland but declined to do so in the Leeds case. whole affair was subsequently characterised by the Society as a "blunder", and the Society may also be said to have condemned the Trish stille by dismissing its firsh scrictar, at its annual congress, held at Leeds in October 11. At this congress an amalgamition was effected between the Amalgamated Society and the Railway Workers' Union After the severe punishment imposed upon the Cork men fo impeding radway traffic by leaving their work abruptly, it is not it all likely that striles will be resorted to hastily by rails is workers in the future, and so the events of the year may be said to have marked a decided step in the direction of peace. Moreover, the companies have done much during the year to conciliate their men by granting improved conditions of service, and that legitimate grounds of grice ance on the latters' part have diminished in accent years is proved by the filling off in the number of cases with which the Board of Irade has had to deal under the Railway Servants For the year (Hours of Labour) Act of a ended July 27th, 68, these numbered 50 only, as compared with 10 dealt with 11 the previous year. It is also worthy of note that the men have never carried a case beyond the Board of I rade to the Railway Commission, though the Act gives them the right to do this, and the Board of Trade is quite willing to assi t in such an appeal. During the year the Amalgamated Society has made some strong complaints to the Board of I rade as to the "victimisation of men attached to the Society, and a list of such alleged cases has been furnished to the Board, but without any practical results at present.

Rainy, Robert, D.D (Glasgow and Edin.), b. in Glasgow 1526. Ed. Glasgow University, graduated M.A. '43. Having joined the Free Chuich of Scotland, he studied theology at New College (Edin.) '41 to '48. Ordained minister of Free Church, Huntly, '54. Elected to Free High Church, Fdinburgh, '54; Professor of Church History, New College, Edinburgh, '62; Principal, '74. Dr. Rainy takes the first place in Scotland as an ecclesiastical statesman and tader. His chief works are "Three Lectures on the Church of Scotland.' (722), "The Delivery and Development of Christian Doctrine ('74), "The Bible and Critisism" ('78), and "Epistle to the Philippians" ('02). Address. 28, Douglas (ressent, I dinburgh.

Rangyalona III, the late Queen of Madagastar, was bin 1801, and succeeded Queen Rangyalona III. The late Queen of Madagastar, was bin 1801, and succeeded Queen Rangyalona II in 181, having been nonmated by her as the future Queen. She married the Prime. Minister, Rainilanaryony (deposed most and ecceased in 60) soon after ascending the throne. She was crowned in Nov. 31. Her kingdom and capitil were taken by the French colony. In 67 she was exiled to Reumon Ster Mady years.

Rayleigh, Lord. See under Pitrage.

Recorder of London. See London Corposylics.

Record Office, Public The public records and state papers are preserved in this office, which is situated between Chancery Lane and Fetter Lane Previous to the erection of this building they were stored in the Chapter-house of Westminster Abbey, the Tower, the Rolls Chapel, the State Paper Office, and the Queen's Remembrancer's Office Among the more Interesting books at the office is the Domesday Book of William the Conqueror A Record Commission was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient Then first publication was made in interest. rion, and the series is being continued under the direction of this Office. The Marter of the the direction of this Office Rolls was made leeper of these records in t's6, when this public department was first constituted. There are public search rooms at the Office, where the records and state papers can be consulted by historians and others

Referendum A system of legislation which consults all the electors of a state as to whether new laws shall be confirmed. In some cantons of Switzerland a method resembling the reterendum has been practised since the sixteenth century. The present form was adopted in the canton of St. Gallen in 1830. In '48, in spite of Conservative opposition, the referendum was, by the action of the Radicals, incorporated in the Swiss Federal Constitution, and in '74 its application was extended. In all the Swiss cantons, except Freiburg, the referendum is now established. According to the Swiss. Federal Constitution, all constitutional amendments must be ratified by the Swiss electorate before they become law. Other measures must be submitted to the popular vote, it demanded within minety days after their publication by 30,000 voters, or by the governments of eight cantons. During the seventeen vectors, 24 to 91, out of one hundred and forty-nine laws, twenty-seven were referred to the people, of these lifteen were rejected. The referendum has worked so well.

that it has conquered all opposition to it, and In the above three classes of occupiers the it is now generally regarded as a check on hasty and class legislation. It will be observed that the essence of it is that it submits to the people a single and clear issue upon which they may give their decision. There exists also an Obligatory Referendum in eight Cantons, where every law and every expenditure beyond a fixed maximum must be submitted to the mass of the electors, and it is not necessary that a demand for this submission to the electors should be made. In Great Britain what may be termed a kind of local referendum with regard to the "Adoptive Acts" was set up by the Parish Councils Act of oa. There 15 a growing demand in the United States for the general introduction of direct legislation by means of the referendum

REGISTRATION, PARLIAMENTARY.

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. Most of the law as to the compilation of the register and the qualifications for enrolment thereon is contained in some fifty or sixty Acts of Parliament, but these are subject in some measure to the principles of the common law, and hable to alteration in several particulars by Order in Council. The following sketch may afford a good general idea of the different classes of males of full age who are entitled to be registered There are, besides those set out below, some ancient franchises, such as those enjoyed by can be registered who has within the twelve months preceding July 15th received parochial assistance other than medical relief or who is an alien. In counties the qualifications are as tollows Freehold of inheritance or by purchase of the clear annual value of 405 and upwards. Treehold for life must be of the clear annual value of Ls, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which ceses 40% clear annual value is sufficient. Freeholders by purchase are required to be six months in possession previous to July 15th, by descent, etc., no length of possession is necessary. Copyhold of the clear annual value of £5 of upwards Copyholders are subject to the same terms of possession as trecholders.

Leanehold, it created originally for a term of not less than sixty years, of the clear annual value of \$\int_5\$ of upwards, if for a term of more than twenty, but less than sixty years, the clear annual value must be \$\int_0\$ to Leaseholders by purchase are required to be twelve months in possession previous to July 15th, by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before the 20th of July - Counties and Boroughs Occupation as owner or tenant of any land or tenement of a clear yearly value of not less than ten pounds Occupation as owner or tenant of any dwelling-house. The term "dwelling-house" includes part of a house in which the landford or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers. Occupation by virtue of any office, agent for his district of the political party to service or employment, of any dwelling house which he belongs. Such agents are appointed which is not inhabited by a person under whom and paid by the various party organisations in such office, service of employment is held most constituencies, and make it their business

occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. Occupation as lodger of any lodgings of a clear yearly value, if let unturnished, of £10. Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house Ir all cases of occupation, whether as own r or tenant, servant or lodger, twelve months occupation is required up to the 15th day of July in any year Occupiers need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and in case of such omission or misdescription they must send in their names to the overseers on or before the 20th of August Lodgers must claim every year, and when claiming for the first time must send in their claims to the overscers on or before the 20th of August The revised register comes into operation on the 1st of January in each year.

Any person whose name appears on a list of electors may object to the name of any other person appearing therein Written notice of such objection must be given both to the overseers and to the person objected to On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to Copies of all the lists that have been published are then forwarded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections, and transmits it to the revising barrister for his district Revising barristers are appointed every year, for London and Middlesex by the Lord Chief Instice, and for other places by the senior judge of assize The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at or near every polling place in the county. The clerk of the peace, or town clerk, and the overseers, must attend The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to appeal lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who must have it printed in a book and delivered to the sheriff, in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must keep printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration") In the case of any person not having his name on any list of voters, or in case of his receiving a notice of objection, he should apply to the registration agent for his district of the political party to to know the intricacies of the law on the

The number of registered electors for the United Kingdom was in '98 retuined at 6, 528,629 of whom 4,813,728 were in England, 289,829 in Wales, 604,695 in Scotland, and 720,312 in Ireland. The grand total of lodgets came out at only 120,738, 48,296 being in the counties and 101,487 in the boroughs. The number in some of the large constitueights was quite insignificant. For Registration (Ireland) Act.

Reid, Sir Wemyss, was but Newcastle-on-Tyne 1842. Beginning journalists life at the early age of cighteen, in 64 he became editor of the Preston Guardian, and (70 to 50) editor of the Least Mercury, which he conducted with so much ability that it speedily turked as one of the most influential provincial new spapers. Sin Wemyss Reid has written several highly successful books. His monograph on "Charlotte Bronte" admirably supplements. Mis Gaskell's "Life. His movels "Gladys Fane and "Mauleverer's Militons," have commanded a very wide on ollation. "Cabinet Portraits," and "Politicians of To-dat," are telling sketches of leading statesmen. He has also written lives of the Right Hon. W. F. Forster, of Lord Houghton, and of Mr. Gladston. In 89 he accepted the postion of general manager to Messis Cassell & Co., Limited, and in 50 became editor of the Speaker. Hon. Ll. D. St. Andrews, 92. In 98 he was elected President of the Institute of Journalists. He was knighted in 54 Addies. 5, Bramham Gardens, London, S.W.

Reid, The Right Hon G. H., Premier of New South Wales, was be at Johnstone, Renirowshite, 1815, and is the son of a Presbyterian minister. His parents went to Melbourie in 52, and to New South Wales in 50. Mr. Reid embarked upon a legal carcer, and was called to the New South Wales bir, but soon entered politics, and was elected as member for East Sydney. In 80. In 83 he was appointed Minister of Education, and rapidly advanced his influence with his party. He is an enthusiastic free trader. When 50 George Dibbs ministry was overthrown in 64, Mr. Reid, who had been leading the Opposition since of, was made Premier, the Covernor, to the surprise of many, calling upon him instead of upon 50 Henry Parkes. The country emphatically endorsed Mr. Reid's free trade and progressive policy, and at the 50 general election gave him a big majoricy to carry it out. He visited Fingland for the Jubilee celebrations to 57, and was made a member of the Privy Council. In 98 he became Q.C. His attitude towards the Federation question is described under Viw South Walles. History, 98.

Federation question is described under Niw South Walls, History, 98.

Religious Tract Society, The (instituted 1799), has for its object the circulation of religious books and treatises throughout the British dominions and foreign countries. The Society has published in 120 languages and dialects. The business is conducted by a committee chosen annually in London, and consists of four ministers and eight laymen, and of six trustees, half the Committee being members of the Church of England and the other half Nonconformists. The Society has in its catalogue some 4000 separate tracts and hand-

bills, books, etc., for adults, besides books and tracts for children. The well-known Leisure Hour and the equally well-known Sunday at Home are published by this Society, as well as the Bov's Oun Paper, and the Girl's Own Paper. Circulation of the Society's publications for '97-8, 50,003.00. Income for '97-8, from subscriptions, donations, etc., £2,622 for 2d, including part payment from recipients of grants, £6307 for 5d. Grants in money, paper, publications, etc., £2,005 for 3d. Secretaries, Revs Prebendary L. B. White, D.D. and S.G. Green, D.D. Association Seos. England, Revs. A. Mercer, M.A. R. C. SISSION, SECT 84

Restitution of Conjugal Rights may be brought for this purpose in the Divorce Division by cither husband or wife, not being themselves guilty of a matrimonial offence must be preceded by a request to the respondent to resume cohabitation, couched in concibatory terms. Until '84 a decree for restitution was enforced by imprisonment Since then, by virtue of an Act known as the Welldon Act, passed as a result of the suits of Mr and Mr. Welldon, such a decree results in monetary advantages to the petitioner, the respondent being compelled to settle portions of his or her property on the petitioner, and neither party can by imprisonment be com-pelled to live with the other. A failure to comply with the decree is legal descrition and ground for a podicial separation, or, coupled with dalltriv for divorce. See Divorce and with daltery, for divorce LUDICIAL SLEARATION

Revenue Act, '98. See Sission, sect. 85. Rhodes, Right Hon Cecil, P.C., is a younger son of the late Rev. F. W. Rhodes, Rector of Lishop Stortford. After taking his degree at Oxford (Oracl College) he went out to Africa, where he at first met with but little success However, when the De Beers mine (with which his name is now so prominently connected) was anything but prosperous, he combined various Kimberley mines under his direction, and amassed a large fortune Cape politics attracted him, and he represented West Barkly attracted him, and he represented West Barkly for a short period, and held a position in the ministry of Sn I Scanlon. On the fall of the Springs, Ministry, a new government, with Mi Rhodes as Prime Minister, took office at the Cape (July 17th, 60). He remained in office from that time till Jan '96, when he resigned in consequence of the Jameson raid into the Itansvaal. His gift of £10,000 in support of the cause of Home Rule in '91, when he was a Fingland, attracted much attention. he was in England, attracted much attention Mr Rhodes was the prime mover in obtaining mining rights over Matabeleland and Mashonaland, and till '96 he was the Chairman of the When the British South Africa Company trouble with Lobengula began, in Sept '93, he went to lost Salisbury to direct the operations against him. His policy in this direction was warmly approved at the Cape, as was evidenced at a banquet given to him by the citizens of Cape Town in Jan. '94. Mr. Rhodes,

in his speech of thanks, defended his policy,

and sketched in outline the United South Africa which he hoped to see in the near future, covering all the country south of the Zambesi, one in the question of tariffs, of railway communication, of law, and of coinage, although possessing full local government in local matters. He was sworn as a member of the Privy Council in Feb '95. After resigning office at the Cape in '96 he visited England, and after an interview with Mr Chamberlain left for Buliwayo, intending to devote himself to the development of Rhodesia. He took an active part in suppressing the Matabele revolt and in arranging terms of peace, although he gave up his managing directorship of the Company. In Jan '97 he came to England again, and gave cyldence before the South Africa Committee, after which he returned Rhodesia, later on resuming his place on the Board of Directors of the Company. He took a leading part in the elections to the Cape Parliament during '98, and was himself re-turned for two constituencies. See Capi Colony and Rhodesta.

HODESIA.

Rhodesia is the name given to that part of South Africa which has been occupied of recent years by the British South Africa Company, acting mainly under the leadership of Mr. Creil Rhodes—It is bounded on the east by Portuguese East Africa, on the west by Angola and German South-West Africa, on Angola and William Fast Africa and the Congo Free State, and on the south by Bechuanaland and the Transvaal The whole territory, covering an area of \$50,000 square miles, is administered by the British South Africa Company (q v), which was given a royal charter in Oct '80. The river Zambesi flows through it, cutting the region into two portions—Southern and Northern Rhodesia

Southern Rhodesia consists of the two provinces of Matabeleland and Mashonaland Mashonaland is bounded on the porth by a line running roughly in a S.E. direction from Zambo, on the Zambosi, to the intersection of the river Mazoe with 33 E. long, on the south-west by Matabeleland, and on the east by the Pottuguese province of Lorenzo Marques
The capital, and the scat of government of
Rhodesia, is Salisbury, with a population of
Soo. The other principal townships are New
Umtah, Melsetter, and Enkeldoorn A rail
way is being built, running inland towards
Salisbury for Borrs on the coast and it is Salisbury from Berra on the coast, and it is already sixty miles beyond Umtali Its completion will place Salisbury in direct communication with the sea over a line 382 miles in length It is then proposed to connect Salisbury with Bulawayo. The African Trans-Continental Bulawayo. The African Trans-Continental Telegraph Company has constructed a line between Umtali and Tete, and from there on To Blantyre in British Central Africa, and to Zomba, Fort Johnston, Kota Kota, or the western shore of Lake Nyasa, and Karonga, at the north-western end of the lake. The survey on to Lake Tanganyika is practically completed Matabeleland lies between the Limpopo and middle Zambesi rivers, and is bounded on the north-east by Mashonaland and on the south by the Transvaal and Khama's country. The principal town, and the chief commercial centre | industry, and many mines have machinery on in Rhodesia, is Bulawayo, with a population | the ground. The crushings at the Geelong

of 5000. Telegraphic communication exists between Cape Town, Bulawayo, and Salisbury, and in the Bulawayo district the telegraph system has been considerably extended. Bulawave has also telephone communication with the principal stations. The extension of the Cape Government western railway system through Kimberley and Lryburg to Bulawayo was completed in October '97, and officially opened on Nov 4th The distance from Cape Town to Bulawayo 18 1365 miles.

Northern Rhodesia consists of the whole of the British sphere north of the Zambesi, lying between Portuguese East Africa, German East Africa, the Congo Free State, and Angola, with the exception of the strip of territory forming the British Central Africa Protecto-rate, which is under direct Imperial administration North of the Zambesi the country has as yet been little prospected. Coal has been found on the shore of Lake Nyasa The North Charterland Exploration Company, which holds a grant of 10,000 square miles north of the Zambest, is engaged in trading, agriculture, and stock breeding operations. A new industry has lately been started in fibic, on which the representative of a large London company has been experimenting with

satisfactory is sults Public roads in Rhodesia have been made to the extent of 2 io miles, and telegraph lines to the extent of 1850 miles of the and 580 miles of vite. The rinderpest, which for several years has been devastating Africa, travelling slowly through the continent from moth to south, made its first appearance in Matabeleland in February '96. The adoption of the diastic regulations which the Administration decided to enforce had to some extent checked the progress of the epidemic, when the outbreak of the Matabeleland rebellion put a stop to all precautionary measures. The effects of the disease have been far-reaching. and, apart from considerations of human life, have been more disastrons than those of the native rebellion. During the twelve months succeeding the outbreak of the rebellion, agriculture was practically at a standstill Since the pacification of the country considersince the pacification of the country considerable tracts of land have been placed under cultivation, and fresh stock, including Angora sheep and Meriro goats, is being imported Throughout the country the conditions of soil and climate are suitable for all kinds of I uropean cereals and vegetables, and, in addition, many trees, shrubs, and plants, peculiar to subtropical regions, can be successfully cultivated. Good results have already been obtained from the introduction of fruit and gther trees. Fobacco occurs in a wild state, is grown universally by the natives, and has been produced of excellent quality by white farmers in several districts. Indiarubber, indigo, and cotton are similarly indigenous, and will probably well repay cultivation. Rhodesian forests produce abundance of hard timber of fine quality, and a company is working this industry with a view to meeting the large demand for building and other purposes in Salisbury and Bulawayo In addition to gold, silver, copper, coal, tin, plumbago, anti-mony, arsenic and kiesiguir have been discovered. The arrival of the railway at Bulawayo has given an impetus to the mining

Mine for the month of September ('98) averaged 102 dwts., including tailings, to the ton In Southern Rhodesia a company is being formed to develop the indiarubber industry on a large scale Full advantage has been taken of the facilities afforded to the Administrator in Council by the Matabeleland Order in Council, '94, to legislate locally by means of regulations, and upwards of forty measures have been thus and upwards of lott, measures may be believed as several Order in Council, entitled the "Southern Rhode sa Order in Council, entitled the "Southern Rhode sa Order in Council, '98, which modifies the provisions of the Matabeleland Order in Council, '94, and in some measure bestows a new constitution on Southern Rhodesia, has been prepared A Customs clause in the new Orde, in Council provides that the duty on British goods imported into Southern Rhodesia, shall not exceed the present Cape tariff. By a proclamation, dated lune 10th, on, the laws of the Cape Colony passed prior to that date were adopted for, and are to be administrated in, Rhodesia, as far as the circumstances of the country will permit In consequence of the lameson raid into the Transvaal the control of the military forces of the Company was removed from their hands, and is now in the hands of the Imperial Government See Africy British SOUTH AIRICA COMPANY, and IRANSVA'I (map)

Tiestory. '98.—At a conference between Captain the Hon Arthin Lawley, the Deputy Administrator, and King Lewanika of Barotseland, held in September, it was agreed that, in addition to the concessions already granted to the Company, administrative powers over the whole kingdom of Parotseland should be conceded to them. The kingdom wis, by the Anglo Portugue se treaty of an left within the British sphere. It is, roughly speaking, as large as the German Limpine, and combraces the whole basin of the Upper Zambesi lying between 12 yo' and 13. S. lat, and o and 27 so' E. long. The western boundary between it and Angola has not yet been definited Ladiu is the capital, and Mr. R. I. Corvidor is the British homes of their

Ripon, Bishop of. See under Pitragr Roberts, Lord. See under Pitragi

Robertson, Johnston Forbes, is the son of Mi 1 forbe's Robertson of Mordeen, and was bein London Jan 10th, 1973. He was ed, at the Charterhouse, and at Rouen, and has been an actor since he came of age. He studied his art under Phelps, and for some time took the principal parts at the Banc ofts' theatre and in Mr Hare's company, but recently has successfully been his own manager. He piooduced "Romeo and Juliet," and Mr H A Jones's play, "Michael and his I ost Angel," at the Lyceum in '95, "Hamlet in 97, and "Macbeth" in '18.

Robinson, Sir John R, the manager of the Daily News (qv), is the son of the Rev R. Robinson, and was be at Witham, Lescy He has been associated with this new spaper editor of the evening paper published by the editor of the evening paper published by the proprietors of the Daily News, under the aconstant contributor to the columns of the American press, especially to the Boston Advertiser and the Chicago Tribune. Appointed the

sole manager of the Daily News in '68, he was also editor '87-96. Knighted '93.

Rochester, Bishop of See under Peerage. Rodriguez. An island in the Indian Ocean, 344 miles east of Mauritus (q v), of which British colony it is a dependency. It is 18 miles long and 7 broad. Administration is provided for by a Civil Commissioner appointed by the Governor of Mauritius. The population is about 2000. Rodriguez was annexed in 1814. See British Emilia (14ble).

Rogers, Rev. J. Guinness, B.A., well-known Congregational minister and writer, was ed at Fine Coll, Dublin, and graduated at Dublin Univ in '43, afterwards studying for the ministry at Lancashre Independent College. His first pastorate was at St. James's Church, Newcastle-upon-Tyne ('46), and he went to Ashton-under-Lyne five years later. In '65 he succeeded the Rev. J. Hill at Grafton Square, Olapham, where he celebrated his semi-jubilee in '96. He was elected Chairman of the Congregational Union of England and Wales in '75, and in the annual meetings of the Union he has always taken an active part. His hterary labours have been extensive, and in the domain of politics he has always been active, of late years he has worked most energetically for the cause of Home Rule for Ireland. The jubilee of his call to the ministry was celebrated Jan 12th, '96. Address. 81, Clapham Common, S.W.

ROMAN CATHOLIC CHURCH.

The Roman Catholic Church is the name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors so fur as they are priests—and laity. The distinctive characteristic of the Roman Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are chiefly found in the articles of the Nicene Circd After the Council of Frent Pope Pius IV added to the formal Profession After the Council of Frent of Faith the articles on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility were defined as articles of faith in 1854 and 70 (espectively). One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross Scripture and tradition Sacrifice of the Cross Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of doctrine and what of datappline, the former belonging to the deposit of faith taught by Christ and the Anostles, which is invariable, whilst the latter. Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances—The Sacred Oolege of Cardinals—70 in number, after the 70 disciples—are the supreme council or

sovereign pontiff, and at the death of a pope they elect his successor. They are also the chief members of the Sacred Congregations, or permanent ecclesiastical commissions (about twenty in number), to which much of the business of the Holy See is entrusted. Among the best known of these congregations are the Propaganda, the Index, the Inquisition of Artor, Office, and the Congregation of Rites. The number of cardinals is hardly ever complete, in Nov. '98 there were 57. Including 52 of the cardinals, the patitiarchs, are bushops, and hishops. in '08 numbered 1284. There are Propaganda, the Index, the Inquisition of Holy to patriarchates with 14 patriarchal sees, and 19° archiepiscopal and 779 episcopal sees which are termed residential. Besides these, there are a number of titular sees, most of which are assigned to archbishops and bishops appointed, either to apostolic delegations, vicariates, or prefectures, or to the office of coadjutor, anxiliarv. or administrator of a diocesc There are altogether 8 delegations, 122 vicariates, and 48 prefectures See Andrican Orders

Statistics. - The total number of Roman Catholics throughout the world, ruled by about 1200 archbishops and bishops, is estimated at 240,000,000 There are in Great Britain and Ireland about 5,500,000 (1.1., about 3,550,000 in Ireland, and the remainder in Great Britain), and in the rest of Europe more than 100,000,000 Ireland is divided into 4 ecclesiastical pro-vinces, subdivided into 27 dioceses, ruled by 4 aichbishops and 23 bishops (v mfia) The number of priests in Ircland is about 1450, Sciving 2444 churches and chapels, situated in 1090 parishes. The 24 archbishops and bishops of Great Britain (v. 111fra) consist of 15t, for England, 1 archbishop (of Westminster), with 14 suffragans and 1 coadjutor, and a suffragans bishop for Wales, 2ndly, for Scotlind, 2 archbishops (one of St Andrews and Eduburgh and one of Glasgow), with 4 suffragans and a auxiliary. The number of priests of England and Wales in 65 was 2005, with 1482 churches, chapels, and stations, of Scotland 421, with 350 churches, chapels, and stations The United States has about 12,000,000 Roman Catholics, oo archbishops and bishops, about To,750 priests, 0570 churches, 5105 chapels and stations, and 958,960 pupils in parish schools. In the British posses estons of North America there are about 2,000,000 Roman Catholics, 19 archbishops and bishops, about 2000 priests, 2000 churches, chapels and sta-tions, 800 colleges and academies, and 4400 parish rehools. From statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of this Church, and how vigorously she exercises the forces at her command for the extension of the Roman Catholic faith. Westminster Cathedial, a vast edifice in the Byzantine style, of which the first stone was laid by Cardinal-Vaughan and Logue on June 20th, 95, is rapidly rising, and every effort will be made to open it on Sept. 27th, 1900, the fifteeth anniversary of the restoration of the hierarchy in England Internally, the length is 342 ft, the width across have and aisles and side chapels 150 ft., the width of nave of ft, and its height 112 ft. ,, John Conmy Kıllala Rontgen Rays, The The experiments which led to the discovery of these rays by Professor Rontgen, of Wurzburg, were made at the end of '95, but were not communicated till the beginning of Jan '90. The essential part of the experimental apparatus is a Crookes' tibe, rr, a small glass tube are each end of which is fitted a wire from some form of electric generating apparatus, then, the tube being chausted by an air pump, the electric circuit is broken by the vacuum space in the tube between the two ends of the wires. If, when an electric current is made to pass along the wires, a living human hand be interposed between the Crookes' tube and a photographic plate, a shadow photograph can be obtained which shows all the outlines and joints of the bones most distinctly. In the same way Rontgen obtained photos of shadow pictures, of a set of weights in a box, of a compass card and needle completely inclosed in a metal box, and many other concealed objects From these and other experiments he inferred that some invisible kind of rays were generated in the neighbourhood of the Crookes tube, by the electric disturbance set up by the passage of an electric current, and that these invisible rays possessed the property of passing through all bodies interposed in their path But some bodies, being less permeable than others, east a shadow. Thus bone is much less permeable to these rays than flesh, hence the possibility of photographing a shadow of the bones of the hand, since a photographic dry plate is sensitive to the rays. Rontgen's experiments to determine the nature of these phenomena were for the most part negative in result. But he was warranted in assuming the presence of a form of radiation, and in consequence of the indeterminate character of the rays he proposed the name X-rays. The algebraical symbol has since been generally dropped in favour of the discoverer's name. A Röntgen Society was formed during '97, and Professor Silvanus Thompson delivered and Professor Silvanus Thompson delivered appointed Vice-Chancellor of the University of his presidential address at the mangural London. Addresses 10, Bramham Gardens, the exception of antiseptics and anæsthetics | næum Club.

no discovery of the century had done so much for operative surgery. The first great application of the rays had been to the diagnosis of dislocations and fractures, the study of bone discuse, and the detection of foreign bodies in various parts of the human frame, even the progress of tubercular disease in the lungs had been rendered evident, and to watch the motions of the living heart was now an every-day experience. Soon after the invention of focus tubes had furnished powerful sources of the rays, it was noticed that exposure to them frequently resulted in severe local inflammation, accompanied in some cases with destruction at least temporary of the hair, which fell out and left bald patches. It was disputed whether this effect was direct, like sunburn, or whether it was indirect and due to the chemical action of ozone generated by the ionizing of the oxygen of the air, or, finally, whether it was electrical. It appeared that the rays were not themselves homogeneous, but we red many kinds, differing in penetrative power, the quality of the mixture depending on the state of the vacuum as well as on the form of the tube and the nature of the emitting surface. The relations between the Rontgen and the cathode rays had been investigated by Mr A. A Campbell Swinton, by M. Perrin, and by several It than investigators. Many speculations had been put forward as to the speciations has been put forward as to the physical nature of the rays themselves, Crookes, Itsli, and others held them to consist of flights of minute atoms or hyperatoms, on the other hand, there was a hypothesis that they were merely an extreme soit of ultra-violet light, consisting of transverse waves of excessively minute wave-length Januaran and apparently, Rontgen regarded them as due to longitudinal vibrations, while Sir George Stokes had put forward the view that they might be transverse waves, not in regular trains, but consisting of innumerable

regular trains, not consisting or influence accessofter waves. For the progress of investigations during '08, see FIFETRICITY, '98

Roscoe, Sir H. E., was b 183, and is the grandson of Roscoe the historian. He was grandson to Roscoe the historian. He was grandson to Roscoe the historian. ed at University College, London, and at ed at University College, London, and at Hendelberg. He was Professor of Chemistry at Owens College '58-80, and distinguished himself specially by his researches as to the chemical action of light, and on the metal vanadum. His treatise on "Chemistry," in books written in conjunction with Professor Schorlemmer, 15 well known He has also written "I essons in Elementary Chemistry," which have been translated into many lan-guages, and "Lectures on Spectrum Analy-sis" He served on the Royal Commissions on Noxious Vapours, on Icchnical Education, on the Scottish Universities, and on Secondary Education In 87 he was chosen President of the British Association. He is a Fellow of Eton College, an officer of the Legion of Honour, Eton conege, an ometror are Legiona Tronous, a corresponding member of the Institute of France, an Hon D.C. ROWING, '98.

A finer summer for rowing could not have been wished for, and fain weather favoured all the regattas after the early part of the year. The Colquboun Sculls at Cambridge were won by R. Etherington Smith, First Frinity. The Open Boat Handicap on the Fine was won on Dec. 11st, '97, by J. White, and on March and W. Haines beat J. Wray on the Tyne for £100 a side. The 5sth Oxford and Cambridge Boat-race was rowed on March 20th in the worst weather in which it has ever been rowed, a gale blowing from the cast with sleet, hail, and snow storms, and ended in a signal victory for Oxford for the 9th year in succession. Cambridge had ben very unfortunate all the carlier part of the year there was trouble amongst the rowing men, and a split owing to the action of certain Trimity Hall B.C. men, and their luck for sook them on the race day as well. The gale was

blowing from the Middlesex shore, consequently Oxford, who had won the toss and chosen the Middlesex station, were comparatively sheltered. The Cambridge boat was full of water after two or three strokes had been taken, and Oxford, having led at Hammersmith Bridge by 6 lengths and at Baines Bridge by 12, eventually won by some 300 yards, in 22 min 15 sec. The crews were —0xford: 12, eventually won by some 300 yards, in 22 min 15 sec. The crews were -Oxford: R O Pitman (New), bow, 11 st olb., G O C. hawards (Nec), 12 st. 72 lb; C. K. The Wingfield Sculls, which carry with them the Amateur Championship of the Thames, were rowed for on July 25th, and won by B. H. Hewell, who beat H. Blackstaffe won by R. H. Hewell, who beat H. Blackstaffe after a wonderul race, in the record time of 22 min 57 sec, both men being thoroughly lowed out and having to be littled from their boats. The Amateui Single Punting Championahip of the Thames was won by W. Colin Romaine, the Doubles by C. R. Mullins and W. Colin Romaine. The Professional Chamin 35 min. 38 sec. On Aug 18th T. Bullman beat W. Bubear casily in a race over the Championship course on the Thames for £100 in 24 min 38 sec A L Hope won the Amateur Single Punting Championship of the Lower Thames at Sunbury Mr George Ashe, of the Thames R C, attempted on Sept 13th to 10w across the Channel in a river skiff, but only succeeded in getting about 4 or 4 miles out when his boat sank. The Sculling Championship of England, lowed over the Thames Championship course for the Sparkman Cup and Laco sweepstakes, was won by Barry, of Putney, who beat G. Lowns, the Australian, in 24 min. 3 sec.

Royal Academy of Music Established in Burghersh, atterwards Earl of Westmorland, the R A M was incorporated by charter in 1830. Students of all blanches of music are catered for, and find ample stimulus to exertion in the large number of scholarships and prizes which The chief scholarare officed for competition. The chief scholar-ships are the Westmorland, open to ladies and gentlemen in alternate years between the ages of eighteen and twenty iour, the Potter, also open to ladies and gentlemen, the Sterndale Bennett, open to male candidities in any branch of music, and providing free instruc-tion for two years, the Parepa Rosa, founded by the late Carl Rosa, for ladics who have not previously been students at the Academy, the successful candidate being entitled to two wars free musical education, the Sir John Goss, for organ playing: the Thalberg, for planoforte students, the John Thomas (Welsh), for vocalists and instrumentalists alternately, the Henry Smart, for organists and composers, the Sainton Dolby, for temale vocalists, the Liszt for composition and planoforte playing, the holder being entitled to three years' free tuition, and thereafter to about £80 a year for two years; the Hine Prize for composition, and the Macfarren Scholarship for composition, providing three years' free tuition, the Erard Centenary (2), one for pranists and the other for harpists, the Sainton, for violinists, the Goring Thomas, for the encouragement of lyneal composition, the Mence Smith, for vocalists, the Dove, for violinists, and the Costa, for composers Associates pass a qualifying examinate to the library G. 1 and the second ton, and are entitled to the use of the initial pose. Bodies G. 1 are elected by the Directors after leaving the are cleeked by the Directors after leaving the area of the control are elected by the Directors after leaving the Academy They are solely entitled to use the initials FR.A.M. Honorary members are entitled to the initials R.A.M. with the picfus Hon Musical composers, performers, and teachers, who have not studied at the Academy, can become Licentiates of the Institution by passing a qualifying examination held twice a year, -viz., in September and in the Christmas vacation-successful candidates at which are reaction—successful candidates at which are entitled to the use of the initials L.R.A.M. President, HRH the Duke of Save-Cobing and Gotha; Principal, Sir A C. Mackenzie, Mus Doc.; Secretary, F W Renaut The Academy is situated in Tenterden Street, Hanover Square, W

Royal Academy, The, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House Thence who gave it rooms in Somerset House Thence it was removed to Trafalgar Square (1834), and to its present abode, the site of which it occupies

pion is again W. Haines. Doggett's Coat and rent-free (1869). The principal objects of the Badge was rowed for on Aug 5th, and won by Royal Academy are (1) the establishment of A. J. Carter, Greenwich, by a dozen lengths, a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where open to attists of distinguished ment, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The Royal Academy is "a private society," supporting a school from its own resources without any grant of public money. The incinders are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the Society itself consists of 40 Royal Academicians, and at least 30 Associates; there may also be not more than four engravers, of whom not more than two may be Academicians. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir E J. Poyntor (7 7), elected Nov 4th, '90 There is a council of 10 members, who succeed by rotation, five returng every year, the President, the Keeper, and the licasurer being ex-officio members.

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was nearly £150,000, the whole of which was defrayed out of the funds of

^{*} RA, Iket

the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The result is that a really admirable collection of masterpieces is usually brought together. The exhibition remains open from the first Monday in January for a period of ten weeks. The fine library and books of prints belonging to the Academy are open to students and the general public at certain hours. The Diploma and Gibson Galleries, reached by a staircase to the right of the earner, reached by a startcase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician, the works of J Gibson, R.A., bequeathed by him, several interesting pictures of old masters, and

several interesting pictures of old masters, and some fine pieces of sculpture Royal Agricultural Society of England This, the premier agricultural society of the United Kingdom (though not the first established) was founded by Royal Charter on the 26th March, 1840 - The Charter gives a long list of the national objects which the Secrets was intended to promote and which Society was intended to promote, and which have been well embodied in its motto, have been well embodied in its motto, "Practice with Scunce" The results of the Society's efforts for what the Royal Warrant calls "the general advancement of English agriculture" have been great and striking It would be impossible in this brief record even to enumerate all the improvements in the different breeds of live stock, and in agricultural machinery, which have arisen from the annual competitions in the Society's showlards, or the advances in scientific knowledge as to the cultivation of the soil, which the Society sexperiments and grants to investigators have brought about It has two sides to its work (1) The practical, the chief feature of which is its annual shows, to which the best pedigree animals are brought to compete for the valuable prizes offered by the Society, and still more for the honour of being "Royal" prizewinners, and at which also the newest inventions in agricultural implements and laboursaving appliances are exhibited; (2) The soientific, for which purpose it maintains a complete chemical laboratory for the analysis of feeding stuffs, manures, soils, etc., and retains the services of Chemical. Botanical, Zoological, and Veterinary experts in order that its members may have at low rates the best scientific advice obtainable. It controls, moreover, an experimental farm and "Pot Culture' station at Woburn, where elaborate investigations into crops, soils, feeding stuffs, and other matters connected with agriculture are carried on. Its Journal has from the first taken high rank amongst scientific publications, and contains in each quarterly number articles by leading authorities on the most important agricultural questions of the day. The R. A. S. offers gold and silver medals and Life Memberships of the Society for competition

Scotland, instituted in 'or annual examinations for the award of a national diploma in the science and practice of dairying. It seeks in many other ways to foster the study of in many other ways to foster the study of agriculture. The governing body of the Society consists of a president (elected annually), twelve trustees, twelve vice-presidents, and fifty members of council, half of whom go out of office each year. The Jounnal meet once a month at the Society's house, 13, Hanover Equarc, and the business is divided amongst a large number of standing committees. Three general meetings of members are held in each year one on the 22nd of May (the anniversary meeting); one in the Society's show, aid in the summer, and one in December, usually on the Thursday of the Smithfield Cattic Show week. The number of members 15 OVER 11,000, including nearly all the chief landowners and practical farmers and stock breeders of the country Membership of the Society entitles to the use of a large and wellstocked library of standard books on agricultural subjects, and a reading-room, at which the principal agricultural newspapers and other periodicals can be consulted by members Members may obtain skilled veterinary advice in cases of disease amongst cattle, sheep, or veterinary College. They can also consult the professors of the College at fixed rates, and have the privilege of sending cattle, sheep, and pigs to the College infirmary. The Society makes annually a considerable grant from its general funds in order that members may obtain at low rates analyses of feeding stuffs, artificial manures, soils, etc., by the Society's consulting chemist (Dr. J. Augustus Voeleker), whom members may also consult either personally or by letter at a small fee Reports can be obbotanist (M) W Caritthers, FR S) on the purity of seeds, and on diseases of weeds affecting farm crops, at a fee of one shilling in each case. Information respecting any animal (quadruped, bird, insect, worm, etc.) which, in any stage of its life, affects the farm or rural economy generally, with suggestions as to methods of prevention and remedy in respect to any such animal that may be injurious, can to any such animal that may be injurious, can be obtained by members from the Society secologist, Mi Ceel Warburton, MA, the Zoological Laboratory, Cambridge, at a fee of one shilling for each case. The fifty-ninth annual show of live stock, implements, and farm produce was held in the week commencing June 20th, '98, at four Oaks Park, near Birmingham President for '98-9, The Period Country, Secretary Services (Jerke near Brimingham President for '98-9, The Earl of Coventry Secretary, Sir Ernest Clarke, 14, Hanovei Square, W

Assent. See Parliament and PARLIAMENTARY PROCEDURE.

Royal Botanic Society

The Society was memorporated in 1839 for the promotion of Botanical Gardens within the Metropolis

The Gardens, in the Inni' Circle, Regent's Park, are about 20 acres in extent, and are beautifully laid out as an ornamental English park. The Society is composed of fellows and members, admission to the Gardens being by personal introduction of Fellow's order. A School of Practical Gardening has also been established, and is officially recognised by the Technical Educaby agricultural students at its annual agriGardening has also been established, and is
cultural examinations, and has, in conjunction
with the Highland and Agricultural Society of tion Board of the London County Council.

The public are admitted on Saturdays and Mondays at a charge of 1s. Bank Holidays, 6d.). Musical promenades are held in the season on Saturdays, also on Wednesdays (admission 2s. 6d.). The public are now admitted, by payment, to the exhibitions and fetes held in the spring and summer. President, H.H. The Duke of Teck, G C B, Secretary. Mr. J. B. Sowerby, Library and Office, Innet Circle, Regent's Park, N.W Royal College of Music, The, Prince Consort Road, South Kensington, was founded in 1882, under the presidency of H R H, the Prince of Wales, and incorporated by Royal Charter in May 83, when the College was opened for the

May '83, when the College was opened for the may 93, when the Conege was opened for the reception of pupils. At its commencement the sum of £126,000 was raised by public gifts, and has all been invested. The pupils are of both sexes, and consist of scholars, exhibitioners and students. The Open Free Scholarships are fifty in number; they are gained by competition, and cutitle the holder to a thorough and practical music. There are also eleven Close Free Scholarships, for the benefit of persons residing in certain specified localities, as well as various Exhibitions and Prizes The following are the most important —The Council Exhibitions, each term, value L20 and L30, for pupils of one year's standing, and those of two vears' standing, 1espectively, the Erard Exhibitions, value £120 each, and tenable for three years; the Savage Club Exhibition, tenable for three years (value £40 a year), and the Charlotte Holmes Exhibition (£15) Various prizes, medals, etc., are also offered from time to time for competition to pupils in the College. Students (or paying pupils) are admitted on payment of a fee of £12 128. per term Associates need not necessarily be pupils or ex-pupils of the College, they have to pass a qualifying examination, which entitles them to use the initials A.R. C.M. (fee £55.) The teaching staff includes a large number of musicians of the highest eminence; amongst othercians of the highest eminence; amongst others the following gentlemen (who constitute the Board of Professors) —Sir J F Bidge, Mi E Dannreuther, Mi Richard Compertz, School F, Fernandez-Arbos, Sir Walter Parratt, Mi A Randegger, Prof C. Villiers Stanfold, Mi Franklin Taylor, Mi A Visetti Director, In C H H Parry; Hon Secretary, Mr Charles Morley, Registrar, Mr. Frank Pownall, to whom all communications relating to admission of all communications relating to admission, etc., should be addressed

Royal College of Surgeons of England. The Royal College of Surgeons in London was established in the year 1800. By a charter granted in '43 the name of the College was altered to that which it now bears, The Royal College of Surgeons of England. The first building of the College, in Lincoln's Inn Fields, was opened in '13, in '35-6 it was practically rebuilt by Sir Charles Barry In '90-92 considerable additions were made to the accommodation for both the Museum and Library. The nucleus of the present Museum was the celebrated Hunterian collection; this was purchased by the Government after John Hunter's death, and, under certain conditions, handed over to the College. The Library (Librarian, V. G. Plarr), which is kept up for the use of Fellows and members of the College, contains about 50,000 volumes. The examination for the L.R.C.P. and M.R.C.S is held conjointly with the Royal College of Physicians

at the Examination Hall, on the Victoria Embankment. That for the F.R C.S. is held by the College of Surgeons in the same building. Full particulars of all the examinations will be found in the College Calendar Secretary, E.

found in the College Calendar Socretary, E. Irinmer, 40, Lincoln's Inn Fields, London, W.C. Royal Colonial Institute. The growth of the RC 1 (founded 1868) since its incorporation by royal charter in '82 has been very rapid. In '78 it numbered 800 fellows, with an annual income of £1331 In '98 the number exceeded 4200, with an annual income of over £7500, exclusive of the building fund. The fact that the Prince of Wales is President of the Institute has given it much additional prestige. The Council is composed of gentlemen well known in connection with the Colonies; and Sir Montagu Ommanney, the senior Crown Agent for the Colonies, is Treasurer. The objects of the R C I are thus officially set forth:—
"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs, to establish a reading-room and library, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a museum for the collection and exhibition of Colonial and Indian productions, to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the reading of papers and for bolding discussions upon Colonial and Indian subjects generally, and to undertake scientific, literary and statistical investigations in connection with the British Empire But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character. Evening meetings are, as a rule, held on the second Tuesday in each month, from November to June, and afternoon meetings are also held from time to time Amongst the matters which engaged the special attention of the Council in 97-8 were the importance of diffusing amongst or-s were in importance of threaths among among the 11stns Colonics, geographically, historically, and commercially, as may be of practical service in after-life, the Extension of Commercial Relations between the Mother-country and the Colonies, the dissemination of authentic information on Colonial subjects to all inquiters, and the payment of income tax in the United Kingdom on income carned and taxed The monthly Journal and Proceedings give the papers read during the year, which are always of a valuable and very interesting description. On Sept. 181, '98, there were 1456. resident and 2753 non-resident Fellows. Library contains over 34,000 volumes and pamphlets, and is made readily accessible by the office, Northumberland Avenue Secretary, J. S. O'Halloran, C. M. G., Librarian, James R. Boose; Chief Olerk, William Chamberlain

Royal Family, Annutities to, and Civil List. The total amount of the Livil List is £385,000, thus divided Her Majesty the Queen's privy purse, £60,000; salaries of Her Majesty's household and retired allowances, £131,260; expenses of Her Majesty's household, £172,500; royalbounty,alm's and special services, £13,200; unappropriated, £8040. There are, besides, the Civil List Pensions, which, in the last financial year amount isaued on account of

the Civil List \$408,289 7s. 2d. Her Majesty, as Duchess of Lancaster, also receives the revenues of the Duchy, which amounted in the year for which the last return has been issued to \$60,000. The cost of maintenance and repair of certain of the Royal Palacesis defrayed out of the estimates (see Finance, National, for the amount voted for '38-9). Subjoined are the annuities to the royal family: H.IM. Victoria, Dowager German Empress (the Princess Royal), \$8000. H.R.H the Prince of Wales, \$40,000. the Princess of Wales, \$10,000; Duke of Edinburgh, \$10,000. —he formerly received \$25,000, but renounced \$15,000 per annum from Dec 31st, '93, on succeeding to the Duchy of Saxe-Coburg and Gotha, Princess Louise (Marchioness of Lorne), \$6000, Duke of Connaught, \$25,000, Duchess of Albany, \$6000; Princess Beatrice, \$6000, Princess Augusta (Duchess of Mecklenburg-Strelity), \$2000; Duke of Cambridge, \$12,000, Prince of Wales also receives the revenues of the Duchy of Cornwall, which, in the year for which the last return is available, amounted to \$58,118.

Royal Geographical Society, 1, Savile Row, W., was founded in 1830. It annually awards various medals to distinguished workers in the cause of geography, and distributes prizes among training colleges and University extension students for proficiency in this science. It contributes to the maintenance of chairs of geography in Oxford, Cambridge, and Owens College. It subsidises exploring expeditions It also gives instruction to and lends instruments to travellers in various parts of the world. In '98 the Founder's medal was given to Dr. Hedin, and the Patron's medal to Lieut R. E. Peary, U.S.N. During the year 305, and 3 Honorary Corresponding Fellows were elected, and on May 9th, '98, there was a total of 3906 Fellows. The published Journal is valuable, as tracing the propress of explorations and discoveries. The annual report presented at the anniversary meeting (May 9th) she wed that the moche of the Society during '07 had been \$\(\text{2}11,529 \) 193 \(\text{3} \) 4 \(\text{President}, \text{5} \) 10 \(\text{4}9,309 \) 175 \(\text{9} \) 4 \(\text{President}, \text{5} \) (Contents Markham, R.C.B., F.R.S., ct., Hon. Secretaries, Major L. Darwin, and). F. Hughes, Esq.; Secretary, J. Scott Keltie.

Royal Indian Engineering College, The, Coopers Hill, is primarily maintained under the orders of the Secretary of State for India in Council, to educate candidates for Government service in the Indian Public Works, in the Accounts, Indian State Railway, Telegraph and Forest Departments About 40 angineer students are admitted by arth to the College Candidates for Government appointments must be between the ages of 17 and 21 years on the 1st day of July of the year of admission. The collegiate year usually begins at the end of September Applications for admission and for all information should be made at the College, Coopers Hill Staines. Secretary, Lieut.-Col W. J. 150yes

Royal Institute of British Architects, The, was founded, in 1834, for the general advance ment of architecture and for promoting and facilitating the acquirement of the knowledge of the various arts and sciences connected therewith. It was incorporated by royal charter in

'37, and obtained a new charter in '87, conferring greatly extended powers. A Journal containing the papers read before the Institute and allied Societies, and articles, reviews, and reports of legal cases affecting architects, is published fortinghtly during the session, and monthly in the recess. A Kalendar, giving full particulars of the bye-laws, examinations, and prizes, with the Register of members, is published annually, in October Secretary, Mr. W J. Locke. Offices, 9, Conduit Street, Hanover Square, W. See Architecture.

Royal Institute of Painters in Water Colours I his Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 189, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the second week in March. The walls are open to artists whose works are approved, and members are elected according to the ment which their productions display. President, Sir James D Linton, Vice-President, L. M. Wimperis, Secretary, W. I. Blackmore. Office, 189, Piccadilly, W.

Royal Institute of Public Health, The Patron, Her Majesty the Queen Founded in 1886, and incorporated in '92 with the following objects To carry on the work of the Public Health Medical Society, and thus to provide a means for the association of medical practitioners possessing registrable qualifications in public health, state medicine, or sanitary science, also medical officers of health and others, with the object of promoting, by intercourse or otherwise, the development of all questions having for their object the public health, to aid the theoretical and practical investigation and study of all branches of public health medicine, to issue publications of the transactions of the Association, to found a library, and to publish a journal; to examine candidates, either alone or in conjunction with one or more kindred bodies, and to grant certificates of their having passed an examination s santary inspectors. Chairman of Council, Sir Chaires A Cameron, M. D. The '98 Congress was held in Dublin. The Journal of State Medicine is the official organ of the Instirute, and is published every month. The President is Prof. William R. Smith, M.D. D. S., F.R.S., the Treasurer, Brigade-Surgeon W. F. Ruttledge, and the Secretary, Henry C. Jones, Esq. Offices, 197, High Holboin, W.C.

Royal Institution of Great Britain. The Founded 1799, incorporated 1800, and enlarged in 1810. Its cline objects are—(1) To promote scientific and literary research, (2) to teach the principles of inductive and of experimental science, (3) to exhibit the application of these principles to the arts, and (4) to afford opportunities for study. The Institution includes Laboratories for the promotion of chemical and physical science. In the Laboratories the researches of Thomas Young, Humphry Davy, John Fyndall, Edward Frankland, William Odling, John Hall Gladstone, James Dewar, and Lord Rayleigh have been conducted. It gives Public Lectures, holds weekly meetings (on Friday evenings) of its members, and supports a model room and a reading-room. The entrance fee is ten guineas, which includes the first year's annual subscription of five guineas; or a life composition of sixty guineas may be paid.

In '94 Mr. Ludwig Mond conveyed to the members of the Royal Institution the freehold of No. 20, Albemarle Street, to be held by them for the purpose of a laboratory, to be named the "Davy Faraday Research Laboratory of the Royal Institution," and for the purpose of providing increased accommodation for the Institution The staboratory was opened by H.R. H the Prince of Wales on Dec 22nd, '96 The library contains about \$60,000 volumes House, Albemarle Street, Piccadilly; President, The Duke of Northumberland, K.G., D.C.L., LL.D.; Treasurer, Sir James Crichton-Browne, M.D., LL.D., F.R.S., Hon. Secretary, Sir Frederick Bramwell, Bart, D.C.L., LL.D., F.R.S., VP; Professor of Natural Philosophy, The Right Hon. Lord Rayleigh, M.A. D.C.L., LL.D., F.R.S. Fullerian Professor of Chemistry, Dr. James Dawar, M.A., LL.D., F.R.S., Fullerian Professor of Physiology, E. Ray Lankester, Esq. M.A., LL.D., F.R.S., Assaistant Librarian, Mr. Herniy Young; Assistant Librarian, Mr. Herniy Young; Assistant Librarian, Mr. Herbert C. Fyfe.

Royal Irish Academy. A scientific and literary society, meeting in Dublin, incorporated by royal charter of Georgee III, 1786, and having 400 members and "Proceedings," containing papers on Science and Polite Literature and Antiquities. President, Earl of Rosse, D.C.L., LL.D.; Treasurer, R.c.v. M. H. Close, M.A.; Secretary, E. P. Wright, M.A., M.D.; Secretary of Council, R. Atkinson, LL.D., Librarian, W. Frizer, F.R.C.S.I., Secretary of Foreign Correspondence, J.P. O'Reilly, C.E. Academy House, 10, Daw son Street, Dublin.

Royal Normal College and Academy of Music for the Blind, Upper Notwood, London Established March 1st, 72 Patron, Her Most Gracious Majesty the Queen. Chairman of Executive Committee, Right Hon J A Campbell, Ll, D, M.P., Vice-Chairman, Sti John Stirling Maxwell, M.P., Treasurer, Rt. Hon Lord Stalbridge: Hon. Sec., Arthur Mail, Lsq., Principal, F J Campbell, Esq., Ll. D. Lady Superintendent, Mrs F J Campbell Fig. Ll. D. Lady Superintendent, Mrs F J Campbell, Esq., Ll. D. Lady Superintendent, Mrs F J Campbell Field College curbraces a Preparatory School, a Grammar and High School, a Technical School, and an Academy of Music The instruction includes (1) general education, and the preparation of those who desire it for the University Examinations, (2) the science and practice of music, (3) the training of teachers, (4) pianoforte-tuning. The founders were convinced that the condition of the blind on this country could be improved by the employment of new and progressive methods of instruction, based upon a thorough course of physical training, and that thus many could be prepared for self-maintenance. The results have more than justified that expectation Eighty to ninety per cent. of all the pupils who have completed their course of training at the college are now self-sustaining men and women, their carnings during the past year having been about £25,000. It is important to remember that these pupils have, with few exceptions, been drawn from the poorest classes, and if they had not had this practical training would to-day be dependent upon charity. The work of the institution is not

only philanthropic but also eminently economic. From a national point of view, therefore, it is deserving of that liberal support which is indispensable to success. The work is carried on by voluntary subscriptions, and is in need of increased support, especially in the shape of annual subscriptions. Donations and subscriptions can be paid to the Principal at the College, or to the Bankers, Messrs. Barclay & Co, Ld., 1, Pall Mall East, S.W.
Royal Observatory, Greenwich. The great increase in British maritime trade in the

seventeenth century rendered the determina-tion of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II, who, on understanding that the first requisite was a more accurate knowledge of the positions of the moon and principal stais, founded the Royal Observatory at Greenwich in 1675, on the hill which was formerly the site of a castle built in 1437 by Humphrey, Duke of Gloucestei The first observation was made on Sept 16th, 1675. The Director of the Observatory is syled the Astronomer Royal, and is under the official control of the Admiralty, but receives his appointment directly from the Prime Minister, and holds office by warrant under the Royal sign manual. It has been the fortune of the Obser vatory to have at its head such men as Flamsteed, Halley, Bradley, Mas-kelyne and Airy The present Director is Mr. W. H. M. Christie, C.B. F.R. S. (q v) The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit circle. The largest instrument is a 28-inch refractor, with a spectroscope attached which has been recently mounted. Another fine instrument is the astrographical designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10 inch telescope lens, the other a 14-inch photographic lens by which the star images are imprinted on the photographic plate A new equatorial, having on one side of the declination axis a lens corrected for photographic rays of 26 inches aperture, and on the other side a mirror of 30 inches diameter, has recently been presented to the Observatory by Sir Henry Thompson There are several smaller refrac-Thompson Increase several similar remactors used for observing comets, occultations of stars by the moon, Jupiter's satellites, etc. Photographs of the sun are taken on every available day, and after being measured are carcilly stored for reference. Magnetic and meteorological observations, made continuously, form an important branch of the works. The chronometers used in the Navy are purchased, and generally examined, at the Observatory The average number being tested daily is nearly 400. Hourly and daily timesignals are sent out from the Observatory signais are sent out from the Observatory through the Post Office telegraphs giving Greenwich time to all parts of the country. By the influence of Sir Isaac Newton a Board of Visitors was instituted in 1710 to visit the Observatory and receive the Astronomer Royal's report of the work of the past year. This Board, which is recruited from our leading scientists, meets at the Observatory each year on the 1st Saturday in June. Persons

desirous of visiting the Observatory must satisfy the Astronomer Royal that they are interested in astronomy. Office hours 9 to 4.30.

Royal Scottish Academy, instituted in 1826, incorporated in '38, consists of three orders—viz., Academicians, Associates, and honorary members. A supplementary charter was granted in '91, by which the Academicians were empowered to add to the number of Associates, certain privileges being also granted the latter class. Each member is entitled to exhibit in the annual exhibition five works. President, Sir George Reid; Secretary, George Hay; Treasurer, John Hutchinson; Librarian, W D. McKay; Clerk, James Hastings

Royal Scottish Geographical Society. This Society was founded in 84 to promote inquiry into all subjects of geographical interest, to give special attention to Scottish topography, to form a library, to press for the recognition of geography as a branch of Higher Education, and for other objects. There are 1623 members, including 100 ladies. Monthly meetings are held in Edinburgh and Glasgow, and lectures and papers are given and read, while the Society publishes monthly the Scottish Geographical Magasine. The President is the Marquis of Lothian, the Editor and Librarian Mr. W. A Taylor, M.A. and the Beoretary Lieut-Col. Fred. Bailey. The Headquarters are at Queen Street, Edinburgh.

Royal Society, Burlington House. A society formed in 1660 for the pursuit of science, now famous throughout the world Charles II in 1662 granted the Society a charter of incorporation. This was followed by a second in 1663, giving further privileges. By that the Society was named "The President, Chuncil, and Fellows of the Royal Society of London, for Improving Natural Knowledge." Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons at 4 30 pm. from November to June. The Society awards the Copley, Rumford, two Royal, Davy, Darwin, and Buchanan, medals, each annually, with the exception of the Rumford and Darwin, which are given biennially, and the Buchanan, which is given quinquennially. In 60 opley is the most highly prized, and may be awarded to Englishmen or foreigners, and only goes to distinguished savants. Sir William Huggins was the recipient in '98. Among the presidents have been Sir Isaac Newton, Sir Christopher Wren, Samuel Pepys, Sir Hans Sloane, Martin Folkes, Sir Joseph Banks, Sir Humphry Davy, Sir Joseph Hooker, Prof Huxley, Sir Gabriel Stokes, and Lord Kelvin. The Lord Lister, F.R.C.S., is the present President There are now upwards of 450 Fellows and 50 Foreign Rembers. Fellows elected, '98 Henry Frederick Baker, M.A., Prof. Ernest William Brown, Dr. Alexander Buchan, M.A.; Sidney Frederic Harmer, M.A.; Albert Charles A. Parsons, M.A.; Prof. Thomas Preston, M.A.; Prof. Edward Waymouth Reid, M.B., Alexander Scott, M.A.; Albert Charles Seward, M.A. William Ashwell Shenstone, F.I.C.; Henry Martyn Taylor; James Wimshurst. The rooms of the Society are enriched with busts and paintings, while the library contains 50,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton.

W. Rücker, D.Sc., BurlingtonHouse, Piccadilly, W. Assistant Secretary, Robert Harrison.

Royal Society of Painter-Etchers, The, was founded in 1881 by Sir Francis Seymour Haden, who has thus stated its object. "The purpose of this Society is not merely the restoration of original etchings, but the re-infusion, into all forms of engravers' work, of those personal qualities which, whatever the process employed, in the hands of the great masters of painting made engraving a fine art." Annual Exhibitions of the work of members are held by the Society at the Gallery, 5A, Pall Mall East, in the spring of each year. All forms of engraving on metal, whether by the burin, the etching needle, by mezzotint or aquatint, or by whatever other process, are eligible for exhibition. The Offices of the Society are at 5A, Pall Mall East, S.W.

Royal Society of Painters in Water Colours. The older of the two Water Colour Societies was founded in 1804, and has held exhibitions annually since that date. The Summer Exhibition is opened to the public towards the end of April, and the Winter Exhibition, which, chiefly comprises sketches and studies, opens on the 1st of December. The number of associated exhibitors is unlimited. The exhibition of the Society, which are held at their galleries, 5A, Pall Mall East, S.W., are confined to the works of members and associates. Preadent, E. A. Waterlow, R.W.S., Socretary, Percy Ldsall. Attached to the Society is an "B.W.S. Art Club," established 84, for the purpose of holding a series of Conversation to which members are invited to send works of art for exhibition President, H. M. Marshall, R.W.S.; Secretary, Aubrey Stewart, 7.1, Mornington Rd., N.W. Office, 5A, Pall Mall East.

Royal United Service Institution, Whitehall, S.W., was established in 1631, for the promotion of naval and military art, science, and literature. Being only in quarterly occupation of the buildings in Whitehall Yard, an address was presented to her Majesty the Queen, Oct. '90, setting forth the request of the Institution that the Banqueting House, Whitehall, might be granted to it for a museum. Her Majesty instituted the Lord Chambeilain, in Dec. '90, to convey to the Institution her compliance with this desire. On Jan 181, '95, the transference took place. No interference has been made with the architecture of the structure. The Museum contains the celebrated models of Trafalgar and Waterloo, interesting naval and military relics, and models of modern war-vessels. Admission 6d. daily April to September, 11 to 6; October to Warch, 11 to 4. President, H.R. H., the Duke of Cambridge. Chairman of the Council, Lieut-Gen. Lord Methuen, K.C.V.O., C.B., C.M.G. Secretary, Lieut-Col. R. Holden.

Royal University of Ireland. See IRELAND, ROYAL UNIVERSITY OF.

Royal Victorian Order. See Victorian Order.

Rugby School Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into foundationers and nonfoundationers. Has, every July, 1007 12 entrance

and other scholarships of £100 to £20, and 7 Leaving exhibitions tenable at the Universities for 4 years, 3 of £60 and 4 of £30 annual value. Pupils, 570; admission at the age of 12. Head Master, Rev. H. A. James, M.A., D.D. (g v.) Motto, Orando laborando. Some distinguished alumni: Sir Ralph Abercrombie; Cave, Dr. Johnson's friend_and originator of The Gentleman's Magasine; Macready, the celebrated actor; Dr. S. Butler, afterwards Master of Shrewsbury School; Walter Savage Landor; T. Hughes; Lord Derby; Dean Stanley; Arthur H. Clough; Matthew Arnold; Lord Bowen, Professor T. H. Green; F. C. Selous; G. J. Goschen; Sir H. Drummond Wolff, Lord Davey, Dean Bradley; Dean Vaughan; C. L. Dodgson ("Lewis Carroll"); and Lord Brassey. In '89 it was decided to establish a Home Mission, in addition to the Fox Memorial Mastership in India, in connection with the School. Consult Rughy School Register.

Rules of Procedure. See Parliament and Parliamentary Procedure.

Rumbold, Sir Horace, Bart., G.C.M.G., H.M. Ambassador at Vienna, is the son of Sir William Rumbold, Bart., and was b in 1859. He was appointed Attache at Washington in 19, and served successively at Florence, Paris, Frankfort, Stuttgart, and Vienna. In 18 he was appointed Secretary of Legation at Pekin, and in 162 filled a similar post at Athens Further promotion led him to St. Petersburg, as Secretary of the Embassy there, in 168, and thence he was transferred to Constantinople in 71. In 172 he became Minister and Consulgeneral in Chili, and thereafter he acted as Minister at Berne 78, to the Argentine 79, to Sweden and Norway 181, to Greece 84, and to the Netherlands and Luxembourg 188. In Aug 196 he was appointed to succeed Sir Edmund Monson at Vienna.

Rural Dean. See Church of England

Rural Labourers' League, The, was established in May '88. Its Preadent is the Right Hon. Jesse Collings, MP. The objects of the League are: To assist in putting into operation the Allotment Acts of '82, '87, and '90; and the Parish Councils Act, '94. To assist every practical effort to secure a more direct connection of the agricultural population with the soil. To assist in the promotion of a practical scheme, either by old-age pensions or some other means, by which the agricultural labourer may be relieved of the necessity of ending his days in the workhouse, and may have secured to him a condition of reasonable comfort in old age. The Secretary is Mr. F. G. Pyne, and the Offices are at os. Colmore Row, Birmingham.

may be relieved of the necessity of ending his days in the workhouse, and may have secured to him a condition of reasonable comfort in old age. The Secretary is Mr. F. G. Pyne, and the Offices are at 95, Colmore Row, Birmingham.

Ruskin, John, M.A., LL.D., was b. in London 1819. Educated at Christ Church, Oxford. where he gained the Newdigate prize ('39) Having early developed a taste for art, he studied with great success under Copiey Fielding and Harding, and, becoming enamoured of Turner, in response to an attack made on him in Blackwood's Magazine. This developed into the celebrated work "Modern Painters," vol. 1. ('43), which obtained a great success, though it evoked some sharp criticism on the part of those who discented from his views. He resided for some time in Italy, and subsequently published the remaining volumes of "Modern Painters," making five (all issued in '46-60). These con-

tained valuable illustrations by himself, and have run through many editions. He had previously (49) written "The Seven Lamps of Architecture" and "The Stones of Venice" (5:-3); both books have been frequently reprinted. He has also written extensively on economic and other questions, and more recently was engaged upon his autobiography, which after being brought out at very irregular intervals under the title of "Trustartis," has now stopped altogether Address Brantwood, Coniston.

Ruskin Society of London (Society of the Rose) was established in 81. It invites the help of all earnest friends of Mr. Ruskin and students of his works, and suggests the establishment of local centres as branches or reading societies. It offers public readings, papers and addresses, in exposition of Mr. Ruskin's writings and teachings, to literary and other associations. It possesses a good library of Mr. Ruskin's works (most of which have been presented to the Society by the author) for the use of members Subscription, ios. 6d For information as to the Society apply to Mr. J. P. Smart, on the Ruskin's William & Mount View Road, Crouch Hill., No.

ition as to the Society apply to Mr. J. P. Smart, jun, 5, Mount View Road. Crouch Hill, N. Russell, George W. E., the younger son of Lord Charles Russell, and grandson of the 6th Duke of Bedford, was born in London Feb. 3rd. 1852. Educated at Harrow and University College, Oxon, of which he was a Scholar and Prizeman, he became M.P. for Ayle-Sbury in 80, and was appointed Parliamentary Swiretary to the Local Government Board 83-5. He returned to the House of Commons as Member for North Beds, '92-5, and held the offices of Under-Secretary of State for India '92-4, and for the Home Department '94-5. He was also an Alderman of the London County Council '89-95. His literary achievements include a monograph on Mr. Gladstone contributed to the Prime Ministers series, and the "Letters of Matthew Arnold," which he edited. In '96 and '97 he was prominent as a leader of the "Liberal Forward" Movement with regard to Armenia and Crete. In '88 published "Collections and Recollections." Address. 18, Wilton Street,

London, S W.
Russell of Killowen, Lord. See under
PEERAGE.

RUSSIA.

Russia is one of the largest of the military powers of Europe. It has a European area of 2,005,504 sq. miles, and the total area of the Empire, including the Asiatic possessions, is 8,644,100 sq. miles. The total population is about 130,000,000. The fifty governments of European Russia contain 94,188,750 people, the Vistula Province (Poland) 9,442,500, Finland 2,527,801, the Caucasus 9,723,553, Siberia 5,731,732, and Central Asian possessions (Turkestan and Franscaspia) 7,506,687. The Slavs constitute nearly two-thirds of the population (about 70,000,000), of whom 5,000,000 are Poles; the rest of the population being made up of Lithuanians, Finns, Germans, Tartars, Jews, Armenians, and a variety of Asiatic peoples. The population of the capital, 5t. Petersburg, is about 1,200,000. The Government is an autocracy, the Czar being the supreme ruler and legislator, and the only source of power in the body politic. He, however, entrusts the administration of the empire to four chief Councils, known respectively as the Council of State, a consultative body, the members of which he appoints, and which is

divided into three departments,viz. Legislation, Civil and Church Administration, and Finance; the Euling Senate, which is a partly deliberative and partly executive body, and promulgates all laws; it also supervises the general administration of the empire, superintends courts of law, and is the high court of justice for the empire; the Holy Synod, which superintends religious matters, and the Committee of Minisreligious matters, and the Committee of Elnisters. For purposes of local government the empire is divided into the five general governments of Finland, Poland, Wilna, Kieff, and Moscow, 68 governments and 635 districts in European Russia, and into the five general governments of the Caucasus, Turkestan, the Steppes, Irkutsk and the Amur, 10 governments 12 territories and 2 districts in Asiatic ments, 17 territories and 3 districts in Asiatic Russia. In European Russia the country is divided into communes, groups of which are united to form cantons. Communal and can-tonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments, entrusted to elective district assemblies, called zemstvos, in which the landowning nobles have great power. There are elective administrative bodies in most towns elective administrative bodies in most towns and cities. The State religion is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government. The orthodox number 73,000,000; Roman Catholics 8,300,000, Protestaints 2,050,000, [lews 3,000,000, Mohammedans 2,600,000. In educational matters Russia is perhaps the most backward country in Lurope. There are comparatively few primary schools, though the lack of official information on the subject may make matters seem worse than they are. The administration of justice, though nominally reformed in 64, is very defective. Grain and other agricultural products, timber, naphtha, flax, linseed, and hemp are among the chief products of the country. By an Imperial Ukase, issued Nov 26th, 97, the currency was established on a gold basis, and the relative value of silver and paper roubles in gold was perivanently fixed. There were in '97 26,217 miles of railway opened and working in the empire. Total revenue, '97, \$150,450,600, expenditure, £158,801,054; exports, 97, \$270,091,167; imports, £75,528,200; total debt, '98, about £75,000,000, including about £250,000,000 incurred in respect of railways. See Dirlomatic, Foreign Armies, Foreign Navies, Siberia, etc. and cities. The State religion is Græco-FOREIGN ARMIES, FOREIGN NAVIES, SIBERIA.

History, '98.—M. Witte's financial state-ment for '88 showed the estimated revenue and expenditure balancing at 1,474,049,493 roubles, with a surplus of 14,000,000 roubles ordinary revenue, and a deficit of 106,000,000 roubles extraordinary revenue (Jan. 13th)
This deficit largely represented outlays on
railways. During the following months the
main interest in Russian policy lay in the
development of hei influence and the expansion development of her influence and the expansion of her territory in China, more particularly in Manchuria. A full account of the steps by which Port Arthur and Talien-wan were secured, and of the efforts put forth to get control of various important railway concessions, will be found under China and under

prevail during the ensuing winter. The following proposal was by direction of the Czar sent

out to all the Powers, and made public (28th).
"The maintenance of universal peace and a possible reduction of the excessive armaments which weigh upon all nations in the present condition of affairs all over the world represent the ideal aims towards which the efforts of all Governments should be directed. This is the Governments should be directed. This is the view which fully corresponds with the humanitarian and mage animous intentions of his Majesty the Emperor, my august master Being convinced that this high aim agrees with the most essential interests and legitimate requirements of all the Powers, the Imperial Government considers the present moment a very favourable one for seeking by way of international discussion the most effective means of assuring for all peoples the blessings of real and lasting peace, and above all things for fixing a limit to the progressive development of present armaments. During the last twenty years aspirations towards general pacification have grown particularly strong in the consciences of civilised nations. The preservation of peace has been made the aim of international policy; for the sake of peace the Great Powers have formed powerful alliances, and for the purpose of establishing a better guarantee of peace they have developed their military forces in an unprecedented degree, and continue to develop them in spite of every sacrifice. All these efforts, however, have not yet led to the beneficent results of the desired pacification. The ever-increasing financial burdens attack public prosperity at its very roots. The physical and intellectual strength of the people, labour and capital, are diverted for the greater part from their natural application and wasted unproductively. Hundreds of millions are spent to obtain frightful weapons of destruction, which, while being regarded to-day as the latest inventions of science, are destined to-morrow to be rendered obsolete by some new discovery. National culture, economical progress, and the production of wealth, are either paralysed or turned into false channels of development. Therefore, the more the armaments of each Power increase the less they answer to the purposes and intentions of the Governments. Economic disturbances are caused in great measure by this system of extraordinary armaments, and the danger lying in this accumula-tion of war material renders the armed peace of to-day a crushing burden more and more difficult for the nations to bear. Evidently, therefore, if this situation be prolonged, it will certainly lead to that very disaster which it is desired to avoid and the horrors of which achieves he have a many divisit terror. skike the human mind with terror in anticipation It is the supreme duty, therefore, at the present moment, of all States to put some limit to these unceasing armaments, and to find means of averting the calamities which threaten the whole world. Impressed by this feeling, his Majesty the Emperor has been pleased to command me to propose to all Governments accredited to the Imperial Court wance Fort Artnur and 18-inen-wan were Governments accredited to the imperial Court secured, and of the efforts put forth to get control of various important railway concessions, will be found under China and under Session, sect. 7. Coming back to European Russia, it was reported in August that the harvest had failed in many districts, and that these districts famine would accordingly peace over the elements of trouble and discord. It would, at the same time, bind their agreement by the principles of law and equity which support the security of States and the welfare

of peoples."

Most of the Powers in reply formally expressed their sympathy with the aims of the proposal, but little belief appeared to exist in any probable practical outcome. In France a strong disposition to resent the proposal as a breach of the understanding between the two countries was manifested. It was stated (Oot. 19th), that the Governments of all Lurope and America, as well as the greater part of Eastern Asia, including China and Japan, had agreed to send representatives to the proposed Conference.

Said Hamud bin Mahomed, the present Sultan of Zanzibar, was placed on the throne by the British Government in August 'oo. His predecessor, Hamid bin I hwain, died suddenly, and a cousin, Said Khalid, tried to usurp the throne, but was driven from the palace by the British forces and the rightful ruler proclaimed Sultan. He is a man of about forty-six well disposed towards Great Britain See ZanAiban.

St. Albans, Bishop of See under PLIRAGE St. Andrews University, founded 1411, 15 thus the most ancient of the Universities of Scotland It included three separate colleges and corporations: (1) St. Salvator's (1450), (2) St. Leonard s (1512), and (3) St. Mary's (1537) In 1747 the two first-named were united and took the faculties of arts and medicine , St. Mary's being devoted to theology University College, Dundee (founded in 1880), was affiliated to and made to form part of the University of St Andrews by an ordinance which received the approbation of Her Majesty Jan 15th, 197 Chancellor, the Duke of Argyll, Vice-Chancellor and Principal, J. Donaldson, MA, LLD Rector, The Marquis of Bute Jointly with Rector, The Marquis of Bute Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir William Overend Priestley, M.D., LL.D. Registrar, Mr. J. Maitland Anderson Degrees M.A., B.D., D.D., LL.D., M.B., Ch.B., M.D., B.So., D.So. The Bachelors in the several faculties—divinity, law, medicine and several faculties—divinity, law, medicine and several faculties—divinity, law, medicine, and science—have the hoods of their faculties bordered with white fur instead of lined with white satin. The diploma and title of L L.A. is also granted to women In Oct '92 the classes of the University and also the degrees of M A, BSc, MB, ChB, and MD were thrown open to women A number of bursaries are available for women students, and a Hall of Residence has been built on the University rounds at Rathelpie for their accommodation Miss L I Lumsden has been appointed Warden

St. Asaph, Bishop of. See under Prerage St. Christopher, or St Kitts. A British West Indian island, forming with Nevis and Anguilla a Presidency of the federal colony of the Leeward Islands. Capital, Basseterre, with a population of about 9000. The local government is that of a Commodian than the state of the state o ment is that of a Crown colony, though representatives sit in the Federal Council of the Lecward Islands. A President is the chief official. For statistics see BRITISH EMPIRE (table).

Atlantic belonging to Great Britain, 1140 miles from the African coast, and 800 miles S.E. of Ascension, the nearest land. Port and capital is Jamestown The opening of the Suez Canal and the consequent diversion of shipping from the island have led to its continuous decline of late years Area, 47 sq in , pop. 4120. An effort is being made to set up a fishing and fish-curing industry for statistics see British EMPIRE (table), see also DIPLOMATIC.

"St James's Gazette" An evening review and newspaper, founded in 1880. In politics the paper has always maintained a somewhat independent and individual line, while giving a general support to the Conservative and Liberal Unionist parties. In addition to articles on the political questions of the day, it contains interesting papers and sketches on social, literary and scientific topics, an epitome of the news of the morning, and the latest sporting, financial and general intelligence of the aftermon Mi Hugh Chisholm is the editor, and Mr Phodorc A Cook and Mr. J. Penderel Brodhurst are assistant-editors The "8t. James's Budget," a weekly illustrated paper, is published in connection with the Gasette. Office, Dorset Street, Whiteinars, E C.

A British West Indian island St. Lucia forming part of the Crown colony of the Windward Islands, of which it is the most northerly. Area about 240 sq m, pop. 46,671 Capital, Castries, the harbour of which is one of the best in the West Indies. The whites are mostly French Creoles, the dominant religion Koman Catholic, and education chiefly so; the law is based on old French codes. The scenery of the island is exceptionally beautiful. Products chiefly sugar, logwood, cocoa, tobacco, and spices Government in the hands of an Administrator with an Executive and a Legislative Council For financial statistics see BRITISH EMPIRE (table)

St Michael and St George, the most Distinguished Order of, was instituted in 168, 77, and 187, and is the order to which subjects of Her Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It onsists of the Sovereign, a Grand Master (the Duke of Cambridge), and three classes of members

G C,M G. K.C M G C,M.G Knight Grand Cross. . Knight Companion. Knight Commander.

St. Davids, Bishop of. See under Peerage. Members of the first two classes, being Knights, St. Helena. Is an island in the South are entitled to the prefix "Sir." The first

class is to consist of 65 members, exclusive of honorary members and princes of the blood, the second of 15c, and the third of 260 members Piclate of the Order is Dr. Machray, Bishop of Rupert's Land. The motto of the Order is Auspicium melioris ævi. See Knighthoods

St. Patrick, Most Illustrious Order of Established in 1783 by George III., and is to consist of the Sovereign, a Grand Master, who is the Lord-Lieutenant of Ireland for the time being, and twenty-two Knights Its abbrevia-tion is K.P.; its badge is suspended from a sky-blue ribbon, with motto Quis separabit? There are, at present, twenty-eight K.P.s., including the sovereign and princes of the blood, and subjoined is a list of them -The Sovereign

Prince of Wales. Prince Edward of Saxe Reigning Duke of Saxe-Weimai.

Salvation Army, The. A home and foreign missionary society with a semi-military organization before the semi-military organization.

commissioners, colonels, brigadiers, majors, and other officers, both commissioned and non-commissioned, with large contingents of soldiers, after the model of the British army, scattered throughout the world. Originated in the year 1865 by the Rev. William Booth, previously a Methodist minister, the movement wiscalled the Christian Mission until m '88 the was called the Christian Mission until, in '78, the present name was adopted. Its objects are to reach, by means of adaptation, the great masses of the people, both at home and abroad, who are either too degraded or too indifferent to be are either too degraded or too indinerent to be reached by oldnary religious agencies. This it perpetually strives to do by adapting its work to the understanding and tastes of the people it seeks to reach, rather than by appealing or commending itself to the approval of the more refined classes of society; hence in the earlier days of the button the people its highest seem to have days of its history its objects seem to have been much misunderstood, which led to some amount of opposition from legal and other authorities. This feeling, however, now appears to have almost entirely passed away. Although, comparatively speaking, so young a missionary society, its growth has been very rapid Its own supported officers now number 13,85., and these proclaim the gospel in no less than 20 different languages and dialects. There are also some 33,600 voluntary officials specially selected and appointed to take definite work. The Army publishes in the several countries, in the vernacular, 42 illustrated newspapers and magazines, with a total annual circulation of over 45,000,000, the sale of which is mostly entrusted to its own members. The above summary conveys a briefidea of one side of the army's work Another side is the Darkest England Social Scheme for mulated by General Booth, which has for its object the immediate alleviation of the present misery of the outcast poor and their actual rescue from destitution, keeping always prominently in view likewise that reformation in character which, undoubtedly, is the true secret of permanent improvement. In this branch of the work the Salvation Army goes to the slums, and ministers to the workless, the homeless, the tramps, the starving, the wais and stray children of the streets, and amongst the outcasts of society in every land, irrespective of creed or colour For the accommodation of these this department has, in different parts of the world, 404 shelters, homes, labour factories, and other institutions in full operation, under the guidance of 1600 officers, men and women. Arrangements are to be made to tound the Oversea Colony, when the most desirable locality has been fully decided upon by the General and the experts who have the matter in hand. The International Headquarters are at 101, Queen Victoria Street, London, E.C. The large International Trading Depot, for med mainly to supply the needs of its own institutions and followers, is at Fortress Road, Kentish Town, and the Printing Works and Publishing Offices are at 98 and 100, Cleik-enwell Road, E.C. The offices of the City enwell Road, E.C. The offices of the City Colony of the Social Scheme are at 272, White-chapel Road, E. The British Farm Colony is at Hadleigh-on-Thames, Essex.

SCHOOL BOARD Schreiner, Olive, is the daughter of the Rev Mr. Schreiner, a Lutheran clergyman of South Africa. She came to England when about twenty with the manuscript of "The Story of an African Farm," desiring, above all things, to devote herself to physiological studies. Her manuscript, after various adventures, was submitted to Mr. George Meredith, who saw in it great promise, and suggested certain alterations, which she carried out. The story was then published under the pseudonym of "Ralph Iron," and met with great success It is a singularly powerful spiritual autobiography, representing the natural liberation of a lofty, idealistic temperament from the ultra-Calvinism of the Dutch profession. The heroine is named after the maiden name of Olive Schreiner's mother, a very remarkable woman, the daughter of a Congregational minister who lived in East London Besides the above-named work Miss Schreiner has published "Dreams," a collec-In May '93 she tion of occasional parables again visited England, and on her return to Africa in October left a small volume, which was published in the Pseudonym Libiary under the title "Dieam Life and Real Life" Her larger book, the title of which is said to be "From Man to Man," is not to be published, it appears, for some time. She was married in '94 to Mr Cronwright, a young colonist, and has latterly been actively engaged in opposing Mr. Khodes and his South African policy, the book she published in 97, "Trooper Peter Halket," having apparently this end in view.

Schreiner, The Rt. Hon T., 18 the son of the Rev. Mt Schreiner, a Lutheran clergyman of South Africa, and brother of Olive Schreiner the well-known authoress. He was educated at Cambridge, where he studied for the law. Having taken his degree he returned to South Airica, and commenced practice as a barrister at the Cape. He soon obtained a considerable reputation, and when Mr. Rhodes became Prime Minister of the Cape Parliament Mr. Schreiner was appointed Attorney-(ceneral It thus became his duty to advise the Cape Government when the closing of the Drifts to all Colonial traffic was proclaimed by President Kruger in '95, and he then gave it most authoritatively as his opinion that the action of the South African Republic was in direct opposition to the terms of the London Convention This view being also taken by the Crown lawyers in England, the Imperial Government, supported by the Cape Ministry, including Mr. Schreiner himself, brought such strong pressure to bear upon the South African Republic

as nearly resulted in war. In the early part of '97, however, when Mr. Schreiner was examined before the South African Committee at Westminster, he expressed himself as being now of the opinion that arbitration would have been a better solution of the difficulty, though he was still convinced that the closing of the Drifts was a violation of the London Conven-tion. Mr Schreiner is considered, along with Mr. Rose Innes, one of the two most able debaters in th. Cape House of Assembly, and is a supporter of the Afrikander Bond in politics. It was on his motion of want of confidence that Sii Gordon Sprigg's Government was defeated (Oct. 11th, '98), and he afterwards became Premier.

Science and Art Department, The, of the Committee of the Council on Education. Under this department are the Royal College of Science, South Kensington, with which is in-corporated the Royal School of Mines, and the Royal College of Art, S. Kensington, numerous schools of science and art, which receive payments on attendance, on results, grants in aid, etc., the S Kensington, Bethnal Green, and Indian Museums, the Science and Art Libraries, the Museum of Practical Geology, Jermyn Arreet, the Museum of Edinburgh and Dublin, and the Geological Survey of the United Kingdom The department holds annual examinations to test the science and art teaching in the various elementary, secondary, and special science and art schools in England, Wales, and Ireland, as well as in the colonies. Special examinations for navigation schools may be held Payments are made for instruction in drawing and science, and for Manual Instruction in public elementary schools and training colleges, and grants late made in aid of technical instruction and of local museums. The sum of money voted annually by Parliament tor these purposes is liable to be decreased and eventually discontinued Grants are intended to supplement and not to supersede local effort Every Science and Art school or class must be under the superintendence of managers responsible to the Department It must not be conducted for private profit or farmed out to the teacher, and it must have local support tither in the form of fees and subscriptions or of rates (For fuller particulars see the "Directory of the Department, with Regulaions for establishing and conducting Science and Art Schools and Classes," published by Messis Fyre & Spottiswoode in London, Messis Menzies & Co in Edinburgh, and Messis. Hodges, Figgis, & Co, Ltd, in Dublin.) The 45th annual report of the Department was issued in Aug. '98 It showed that under the Science division there were, in '97, 2424 schools, wioz classes, and 197,795 students, the figures showing a slight decrease on those of of, except in the number of students, which increased by 3442 Of the 2424 schools, 156 were Schools of Science, with 19,063 students. Of the total number, too, 1899 were in England and Wales, 298 in Scotl nd, and 121 in Iteland. The results of the May examinations showed that 92,246 students from the schools and 980 self-taught students and pupils from classes ineligible for grants had been examined, 151.212 papers worked, 62.266 papers passed, and tha 43.073 had obtained a first class in the elementary or in the advanced stage. There were also 37,548 papers worked in the day examinations in certain of the science subjects held for the first time in '97. The examinations were held at 2131 centres in the provinces, at 189 in the Metropolis, and in the Isle of Man, the Channel Islands, Tasmania, Natal, New Zealand, and South Australia. In the Art Zealand, and South Australia. In the Art division the report showed that 20,493 elementary day schools with 2,286,431 scholars were taught drawing and were examined by the Department in 57. Of these schools, 19,267 were in England and Wales, 976 in of Man, Jersey, etc. There were 1083 evening continuation schools examined, in which 51,633 scholars were taught drawing, and classes for Manual Instruction in connection with 1271 elementary day schools were examined, with 106,423 scholars The number of art schools and classes examined in '97 was 1849, a decrease of 2 on the previous year, but the number of students in those schools and classes was 146,720, an increase of 527 There were 248 schools and 1283 classes in England, 21 schools and 159 classes in Scotland, and 13 schools and 56 classes in Ireland The total number of students who sat for examination was 79,687 There were 149,429 exercises worked, 116,998 in elementary stages, of which 73,455 passed, and 32,126 in advanced stages, of which 23,812 passed. Under the head of expenditure the report stated that the total sum of £814,862 was report stated that the total sum of £814,862 was disbursed during the year, as follows —Expenses of administration, £48,154, direct parments, prizes, etc., to encourage instruction in science, £182,215, and in art, £80,777, services common to both divisions, £87,241, institutions supported or aided by the State through the Department, £61,320, South Keisurgton and Bethinal Singen Museums. £81.832. sington and Bethnal Green Museums, £81,832, payments for instruction in public elementary schools and training colleges in drawing, £258,402, grants in aid of local museums, £499, and in aid of technical instruction, £2407 See Education

"Scotsman. The." The representative Scottish political daily paper—occupying in Scotland much the same position as the Times in England First number appeared Jan. 25th, in Engiand risk number appeared Jan. 25th, 1817. For six years it was a weekly, price 10d., then a bi-weekly, price 7d. Appeared first as a penny daily, June 30th, '55 Editors have been Ch McLaren, John McCulloch, Alex. Russel, and the present editor, Mr C. A. Cooper In politics it is Liberal Unionist. It gives much space to general literature, art, science. Each week, in a single issue, it publishes a greater number of advertisements than any newspaper in Great Butain From the same office are issued the Weekly Scolsman and the Eurning Dispatch, which latter has carned a wide reputation as a fearless assailant of public and semi-public abuses Head office: Cockburn Street, Edinburgh.

London office:
45, Fleet Street, E C

appointed to Copenhagen, and there served with Count Muravieff, now Russian Foreign Minister. Sir Charles has a thorough knowledge of Russian, and so is particularly qualified for the post which he received in '98 of Ambassador at St. Petersburg.

Scottish Rights of Way and Recreation Society, The, Ltd., Edinburgh, is the society for Scotland which performs the same kind of work as the National Footpath Preservation Society of England. It has been instrumental in vindicating many rights of way in Scotland which were in danger of being lost, and is deserving of the support of all tourists, who have benefited greatly by its operations. The Secretary is Mr. C. E. W. Macpherson, C.A., 6, North St. David Street, Edinburgh.

SEA FISHERIES OF THE UNITED KINGDOM

The figures mentioned below are taken from statistics presented to the Board of Trade, and relate to the quantity and value of fish landed in '97 (exclusive of salmon particularised in the Fresh-water Fisheries Returns), the average price of such at the place of landing, the number of fishing boats and persons employed, and the exports of fresh and cured fish. The total quantity and value of the fish returned as landed on the coasts of the United Kingdom for '97 are

given in the annexed table.

The prime fish not separately distinguished includes brill for England and Wales and all sparling for Scotland. The statistics mentioned under Scotland, Ireland, and total United Kingdom are provisional figures, and are subject to rectification. The average price per pound of soles was 14,78d, of furbot 7,72d, of prime fish not separately distinguished 50id, of cod 106d., of haddock 110d, of herrings 55d, of ling 86d, of mackerel 113d, of sprats 38d, of fish not separately distinguished except shell fish 174d. The average price of shell fish per dozen was crabs 23 3d distinguished except shell fish 174d. The average price of other shell fish was 41d per pound The total value of all fish landed on English and Welsh coasts was £4.574,738 on the East coast, £619,415 on the South, and £709,923 on the West. The most valuable aggregate cargoes were landed at Grimsby, which amounted to £1,194,789. Hull tanks the next, with £811,514 worth, then London with £805,097, Lowestoft with £572,634, Yarmouth with £1478,715, Fleetwood with £160,788, and Scarborough with £13.5326, North Shields with £138,715, Fleetwood with £160,788, and

Scarborough with 6113,554.

The number of fishing-boats registered and employed in the Sea Fisheries of the United Kingdom (including the Isle of Man and the Channel Islands) in '96 (latest returns) was 24,021, including 7,704 first-class boats of 15 tons and unwards, 14,169 second-class boats of less than 15 tons navigated otherwise than by oars only, and 4,776 third-class boats navigated by oars only. Undecked boats fishing or dredging on the coasts of England and Wales, and the islands of Guernsey, Jersey, Alderney, Sark and Man, and going outside the distance of three miles from low-water mark along such coasts, or in cases of bays less than ten miles wide, the line joining the headlands of such bays, are exempted from registration. As regards the quantity of fish carried by railway from United Kingdom ports in '97, 354,235 tons were conveyed from these in England and Wales, 105,001 tons from Scotch ports, and 10,894 from those in Ireland Phe value of the fish imported into the United Kingdom, and returned for home consumption, increased from £2,112,000 in '89 to £2,808,000 in '97. The value of the fish consumed in the country during the last nine years has very greatly increased, as it rose from £6,365 000 in '80 to £8,681,000 in '97.

Secretary of State. As early as 1253 there was a secretary to the sovereign, but the office was not nearly so important as it after waids became, and it is doubtful whether before Henry VIII.'s days the holder was a privy councillor. From the time of Elizabeth until the union with Scotland there were two principal secretaries of state, and Anne added a third for Sootch affairs, but this office was abolished some years later. While there were two principal secretaries they divided home affairs between them, and one was at the head of the northern department, which included Denmark, Germany, Russia, and other countries, and the other was at the head of the southern department, which included France, Italy, Spain, etc.—to the elder of the two ministers being also committed Irish and Colonial affairs. A secretary for America or George III., but this office was abolished in 1782; the terms northern and southern were discontinued, and the duties divided into Home and Foreign, the affairs of Ireland and the Colonies being included in the former department. A third principal secretary, who was intrusted with War business, was appointed in 1794; in 1801 the business of the Colonies

was transferred from the Home Department to that Secretary, and in 1854 a fourth secretary of state was appointed, when the business of the Colonial Department was separated from the War Department The Secretary of State for the War Department in the following year took over the duties of the Board of Ordnance and the Secretary-at-War-a financial office in connection with military business which had existed for many years previously, and which was in '63 formally and finally abolished. In '58 a fifth principal secretary of state was appointed, for India, so that there are now five principal secretaries of state. They are appointed without patent, by mere delivery to them of the seals of office by the sovereign; each is capable of performing the duties of the other, and in successive statutes new administrative duties are east, not upon any one of the five individually, but upon the "Secretary of State," or "one of H M Secretaries of State." of State," or "one of H M Secretaries of State." Each Principal Secretary is assisted by a Parliamentary Under-Secretary and by a Permanent Under Secretary The five Permanent Under-Secretaries are Home Office, Sir Kenelm Digby, K C B; Foreign Office, Sir I H Sanderson, K C B, K. C M G, Colonial, Mi Edward Wingfield, C B, War, Sir Ralph H. Knox, K C.B. India, Sir A Godley, K. C B The office of Secretary for Sootland, re-created in '85, is not a principal secretaryship, so that although the holder exercises in Scotland many of the powers and duties of the Home Secretary, he is not by virtue of his office a Cabinet Minister. The Permanent Under Secretary for Scotland 18 Sit C Scott Moncieff, K C M.G. See Ministry. IRELAND, HOME OFFICE, etc

Seddon, Rt. Hon. R. J., P. C., Premier of New Zealand, was b at Eck ston, Lancashire, in 1845, and emigrated to Australia in '03. His profession is that of a mechanical engineer. Going to New Zealand, he stood for the House of Representatives, and was elected '79. Is now Premier, Colonial Ticasurer, Postmaster-General, Minister of Labour, and Minister of Native Affairs, from '03 he was Minister of Native Affairs, from '03 he was Minister of Native Affairs, from '04 he was Minister of England for the Jubilee celebrations, '27, and was made a Privy Councillor, and had the honorary degree of LL D conferred upon him by Cambridge University In '98 he was accusted by a member of the Opposition of having been concerned some years ago in a series of frauds, but a committee of inquiry unanimously and absolutely vindicated him from the charge.

Self-Help Emigration Society, for benefiting the underpaid and unemployed in Great Britain, by assisting applicants whose character and fitness are assured to emigrate to Canada, Australia, and other colonies. The Society in most cases supplements the funds of the intending emigrant, and assists him to obtain his passage. Introductions are furnished to the Society's correspondents, who are men of position resident in Canada, Australia, New Zealand, Tasmania, and South Africa, and work is usually provided for the emigrants on their arrival. During the past thirteen years 5640 persons have been thus located, at a cost of over £31,000 A large proportion of this cost has been contributed by the emigrants and their friends in '97 the emigrants assisted numbered 250. The income of the Society exceeded £2000, inclusive of emigrants contributions. Office, Memorial Hall Buildings, Farringdon Street, London. Applications from intending emigrants should be made to the Secretary, Mr Edward Wilson Gates

Senegal, or French Senegambia. A French colony in Western Africa, on the Senegal and Gambia rivers Capital, St. Louis, pop 20,000 The colony proper consists of various settlements on the tiver Senegal, but large tracts have been added to it till it now has a coastline stretching from Cape Blanco to the Gambia, and extends into the interior so as to connect with French Guinea and the French Soudan The total area is about 120,000 Sq m, and the pop, about 2,000,000 Great part of the country is fertile and rich in produce Chief exports are gum, india-rubbei, nuts, and skins, Senegal navigable 750 miles up There is a railway between Dakar, on the coast, just south of Cape Verd, and St. Louis, at the mouth of the Senegal rivet. The colony is represented at Paris by a deputy, but is administered by a governor-general and a Colonial Council See Colonies, etc., or European Powers.

Serjeant-at-Atms. The holder of this office carries the Mace (v v) when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee.

Serjeant-at-Arms. The holder of this office carries the Maos (q. v) when the Speaker enters and leaves the House, places it on the table when the Maos (q. v) when the Speaker takes the chair, and under the table when the House goes into committee He, by the messengers, notifies committees when the House is going to prayers. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order, even should they extend to the removal of a member who has been ordered to withdraw and has refused to obey the ruling of the chair Certain of the galleries, corridors, etc. are under his charge. The Serjeant-at Arms of the House of Lords attends the Lord Chancello with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod (q. v.). Both Serjeant-at-Arms are appointed by the Crown Mi. H. D. Eriskine is Serjeant-at-Arms of the House of Commons, and the corresponding office in the Lords is filled by Majoi-General Sii Arthui Ellis, K.C.V.O., C.S.I.

SERVIA.

Formerly an autonomous province of Turkey, now a kingdom under Alexander I of the House of Obrenovitch. The executive power was, by the constitution of '88, vested in the King, and the legislative in the King jointly with the Skuptschina or National Assembly There was a Senate or Council of State of 16 members, always in session, which examined and elaborated projects of Lws, etc. The

Skuptschina was elected by the people indirectly once in every three years. Besides this ther was the Great Skuptschina, with twice as many members as the National Assembly, which was called when required to decide vital and constitutional questions. All tax-paying citizens were electors. This Constitution was, however abrogated by the King in May '04, and tem porarily replaced by the Constitution of '69 by virtue of this Constitution the Government are entitled to appoint one-third of the members of the Skuptschina, while the electorate for the other two-thirds is greatly restricted, with open voting instead of voting by ballot. Great power over the press is also given to the Government, and the arbitrary power of the Crown is also increased considerably. A special commission is, it appears, to draft a new Constitution. For local pui poses the country consists of 15 counties and 1200 communes State religion is Greek Orthodox, but others are tolerated. Education is backwaid, but progressing. It is nominally compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold. Pauperism is practically unknown. The chief exports are agricultural produce, and animal produce, fruits, etc. Area, 19,050 sq. m; pop. 2,114,153. Bevenue, '97-8, £2,733,980; expenditure, £2,733,080; public debt, '08, £14,850,000, imports, '07, £1,812,553; exports, £2,237,598. See DIPI OMATIC and FORBICN ARMIES.

History, '08 — Ex-King Milan took up the post took of the Armity, the for the Armity of the Armit

History. '98 — Ex-King Milan took up the position of Commander in thief of the Army (Jan 20th). The general elections to the Skuptschina resulted in a victory for the Government (June 4th). The final figures showed that 112 Liberals, 62 Progressists, 19 Neutrals, and 1 Radical had been elected. The King declared (July 6th) that he was determined in future to govern without regard to party. Party rule, especially Radical rule, had brought the country into disorder and debt, and he would never again invite the Radical leaders to form an Administration.

Servia, King of. See ALEXANDER I.

SESSION (PARLIAMENTARY). FEB. 8th—AUG. 12th. '98.

[1] This article gives an outline of some of the principal business transacted and the legislation accomplished during the session of '98 As in previous editions, military, naval, and educational matters generally are dealt with under the headings Army, Navy, and Education in the body of the work; though references to the increase of the available military strength of the country are made in sects. 5 and \$4, something regarding the naval programme as originally presented and revised will be found in sect 3; the Teachers' Superannuation Act, and Secondary Education Bill are noticed in sects. 51 and 52, and some of the observations of Sir J. Gorst on the education vote will be found in sect. 8 The Budget's atement in brief is included under the heading Finance, National, in the body of the book, though the provisions of the Finance Act are summarised in sects. 16-19, and also in 61, 63 (Local Govi. Act), and other sects. In order that the narratives may be continuous and complete, foreign and colonial matters are for the most part dealt

with under their proper headings in the body of the book, but some space is given under sect 7 to the parliamentary proceedings regarding events in the Far East Under Peerage and Commons will be found biographical hists of Lords and M.P.s., and information as to matters of party policy and voting strength is given under Political Pirties For convenience of reference the subjoined article is broken up into numbered sections and divided into three parts, the first containing the Gueen's Speech and having reference to a number of miscallaneous matters of interest, the second being devoted to proceedings on Bills and an analysis of some of the principal Acts passed, and the third to Reports of Committees. A list of sitting Royal Commissions will be found at the end of the article

QUEEN'S SPEECH AND MISCELLANEOUS.

[2] The fourth session of the fourteenth Parliament of Queen Victoria was opened by Royal Commission on Tuesday, Feb 8th, the Lord Chancellor reading the Queen's Speech "My Lords and Gentermen, My relations with other Powers continue to be friendly The negotiations between the Sultan of Turkey and the King of Greece have been brought to a conclusion by the signature of a treaty of peace between them, under which the territorial relation of the two Powers is practically unchanged. The question of an autonomous Government for the Island of Crete has occupied the attention of the Powers The difficulty of arriving at an unanimous agreement upon some points has unduly protracted their deliberations, but I hope that these obstacles will before long be surmounted Intelligence, which is apparently trustworthy, has been received of the intention of the Khalifa to advance agains the Egyptian army in the Soudan, and I have therefore given directions that a contingent of British troops should be despatched to Berber to the assistance of His Highness the Khediye I have concluded a Freaty of Friendship and Commerce with His Majesty the Emperor of Abyssima The report of the Commission which I appointed in Decem ber '96 to inqui e into the condition of certain of my West Indian Colonies has conclusively established the existence of severe depression in those Colonies caused by a heavy fall in the price of sugar, which is mainly attributable to the reduction in the cost of production and the great increase in its extent during recent years But this fall has been artificially stimulated by the system of bounties to the producers and manufacturers of beetroot sugar maintained in many European states. There are signs of a growing opinion in those states that this system is injurious to the general interests of their population, and communications are now in progress between my Government and the Governments principally concerned, with a ricw to a conference on the subject, which I trust may result in the abolition of the bounties. In the meantime, measures will be proposed to you for the relief of the immediate necessities of the West Indian Colonies, for encouraging other industries, and for assisting those engaged in sugai cultivation to tide over the piesent crisis. On the not havesten borders of my Indian Empire an organised outbreak of fanaticism, which spread in the summer along the frontier, induced many of the tribes to break their engagements with my Government,

to attack military posts in their vicinity, and even to invade a settled district of my territory. I was compelled to send expeditions against the offending tribes for the punishment of these outrages, and to insure peace in the future. A portion of the Afriditiibes have not yet accepted the terms offered to them, but elsewhere the operations have been brought to a successful close. The courage and endurance exhibited by my troops, British and Native, have overcome the almost insuperable difficulties of the country in which they were operating, but I have to deplote the loss of many valuable lives, both amongst my own troops and those whose services were voluntarily and lovally whose services were voluntarily and loyant placed at my disposal by the Native Princes of my Indian Empire—Papers on this subject will be laid before you. The plague, which appeared more than a year ago in Western India, returned in the autumn, and, although the mortality is less alarming than it was at this time last year, it is still such as to cause anxiety. No effort will be spared by my Government in the endeavour both to limit its extent and to initigate its effects, and I am confident that they will receive the loyal assistance of my Indian subjects in this arduous task. I rejorce, on the other hand, to inform you that the famine, which prevailed to many months over several large districts, may now be said to be at an end, excepting within a small tract in Madras, and that there is reason to anticipate a prosperous year, both for agriculture and commerce, throughout my Indian dominions. Gentiemen of this House of dominions. GINTHIMEN OF THE DOOS. O. COMMOSS, The Festimates for the service of the hard before you. They have been framed with the utmost desire for economy, but in wiew of the enormous armanents which are now maintained by other nations, the duty of providing for the defence of the I'mpire involves an expenditure which is beyond former precedent. My LORDS AND GENTLIMEN,—A measure will be introduced for the organisation of a system of Local Government in Ireland substantially similar to that which, within the last few years, has been established in Great Britain Proposals having for their object to secure increased strength and efficiency in the Army and for amending the present conditions of military service will be submitted to you. Bills for enabling accused persons to be heard as witnesses in their own defence, and for cheapening and improving the procedure of Scottish Private Bill legisla-ion have been before Parliament on many previous occasions. I trust that in the course of the present Session a final decision may be given upon these important questions. measure for facilitating the creation of muni-cipalities in the Administrative County of London will be brought before you. A measure for the amendmen of the Vaccination Law will be recommended to your earnest attention Proposals for the prevention of certain recognised abuses in connection with Church Patronage, for the constitution of a Teaching University for London, for the amendment of the Law iclaim to Prisons, for dealing in part with the subject of Secondary Education, for amending the Law relating to the Mercantile Marine Fund, for guarding against fraud in the management of Limited Companies, for the better ascertainment of the rights of landlord and tenant on the termination of an agricultural tenancy, and for preventing the adulteration of

drugs and food, will be laid before you in case the time at your disposal should permit you to proceed with them I heartly commend your momentous deliberations to the care and guidance of Almighty God."

[3] The Address in reply to the Queen's Speech was moved and seconded in the Lords by the Earl of Hardwicke and the Earl of Albemarle, and in the Commons by Colonel Lockwood and Viscount Milton. In the one House it was, as usual, disposed of in course of a few hours, in the Commons the general debate and the various amendments submitted occupied attention until late in the sitting of Finday, Feb 18th, among the subjects discussed being slavery in Zanzibai, the military opera-tions on the Indian frontier, the situations in the near and far East, and several questions of special interest to Ireland. The great measure of the session was of course the Irish Local Government Bill, on which the proceedings were for the most part businesslike, and, although there were naturally a few rather contentious points, harmonious. The leading contentious points, harmonious. The leading debates of the session arose out of the developments and ministerial policy in the Far East, the Government meeting in this regard, as also on their proposals and change of front in reference to vaccination, not a little criticism from then own side. The death-roll of members for then own side. The death-roll of members for the period between the end of the session of '97 and that of '98 was exceptionally heavy, among those who passed away being Sir G Osborne Morgan, Sir Frank Lockwood, General Sir H. Havelock-Allan, Mr Vilhers, "Father of the House" (his successor in that esteemed position being Sir John Mowbray), Mr George Dixon the educationalist, Mr. Hamm Bass, Mr. Abel Smith, and Mr Charles Harrison Mr. Curzon was appointed to the Viceroyalty of India, and accepted an Irish peeriage, which of India, and accepted an Irish peerage, which does not disqualify him from returning to the House when his period of Indian service shall have expired. Mr. Gladstone survived his retilement from Parliamentary life rather more than four years, the Commons adjourned on the day of his death, and his remains were, at the unanimous wish of Parhament and the nation, accorded a public functal in Westminster

Abbey (see sect. 10)

[4] The Queen's Speech at the prorogation was in the following terms —My Lords and Gentlemen,—My elations with other nations continue to be friendly. I have witnessed with the deepest sorrow the hostilities that have taken place between Spain and the United States, two nations to whom my Empire is bound by many ties of affection and tradition The negotiations which have recently been opened give a fair ground for hoping that this deplorable conflict will speedily be brought to termination by the conclusion of an honourable and enduring peace. Changes which have taken place in the territorial relations of other powers with the Chinese Empire have induced me to conclude agreements by which the harbour of Wei-hai-wei and certain positions adjacent to my colony of Hong Kong have been leased to me by the Emperor of China I trust that these arrangements will conduce to the maintenance of his independence and the security of his empire, and will be favourable to the development of the extensive commerce which is carried on between the people

the French Republic, I have consented to guarantee a loan to enable the King of Greece to satisfy the stipulations of the recent treaty of peace between himself and the Sultan. The evacuation of Thessaly has, in pursuance of that treaty, been duly carried into effect. After lengthened negotiations, I have had great satisfaction in concluding with the Government of the French Republic a convention by which the numerous questions of territorial and com-mercial rights 12 West Africa, which had been for years in dispute between the two countries, have been finally settled This convention is subject to ratification by the French Chambers, but in the meantime both Governments have instructed their officials to confine their occupation to the places and territories which, under the convention, have been recognised as belonging to their respective countries Arrangements have been made for the establishment at an early date of a penny postage between the United Kingdom, my Dominion of Canada, my Colonies of Newfoundland, the Cape of Good Hope, and Natal, and other parts of my Empire In certain portions of Western India, and in a small district of the Punjaub, the plague, though it has abated during the hot weather, still exists, and a few cases have occurred in other parts of the country. My officers have done all that lies in their power to relieve the victims of the epidemic and to arrest its growth. I am thankful that bountiful harvests have been gathered throughout the greater part of India, and that the internal and external trade of the country is rapidly occovering from the depression caused by the famine of the preceding year GENILEMEN OF THE HOUSE OF COMMONS, -I thank you for the the all provision which you have made for the defence of my Empire The sacrifices which have been asked of you are severe, but they are not greater than the exigencies of the present time require. I am glad to recognise the value of the provisions to which you have assented for increasing the strength and efficiency of the Army My Lords and GLNILFMIN, -- I have seen with much gratification that you have this year added to the Statute Book an important measure for assimilating the local institutions of Ireland to those of England and Scotland I trust that this valuable reform will tend to strengthen the bonds which unite the people of Great Britain and of Ireland, and to increase their common affection for the fundamental institutions of the realm. I have seen also with satisfaction that among the many important bills which you have passed are to be found the Bill for the reconstitution of the University of London, the Bill for enabling accused persons to be heard as witnesses, and the Bill for preventing abuse in the patronage and occupation of benefices in the Established Church The principles on which these measures rest have been generally accepted for many years, but an opportunity has not till now been found for passing them into law. I pray that the blessing of Almighty God may attend you.

Africa See sect 6 (East and Central), sect. 26

(South and Transvaal), sect. 30 (West).
[5] Army. Mr. Brodrick (Feb 25th), in introducing the Aimy Estimates, stated generally the policy that the Government proposed to adopt with regard to the Army. The number of land forces asked for was 180,513 men, a of Great Britain and China In concert with of land forces asked for was 180,513 men, a the Emperor of Russia and the Piesident of figure exceeding by 21,739 those voted last

year, and making, with last year's addition, a total additional force on the establishment, as compared with two years ago, of over 25,000 men. This is the largest number of men voted in any year of this century, except during periods of European wat, and the greatest increase ever proposed to the Army in time of peace. Although the Army was a few hundred men short of its establishment, we had actually 220,000 serving with the colours and 80,000 in the Reserve. We could put into the field three army corps or 112,000 men, there were 120,000 men in gairison, and there were reserve and auxiliary forces to the number of upwards of 200,000. With the exception of artillery we could mobilise now the force required for home defence, and we could provide for a big war by means of our reserve, but our present force at home was too small in peace to maintain the force abroad, and in the case of minor wars we had either to send composite battalions or to withdraw strong battalions from foreign stations, replacing them by weak and immature ones. It was proposed to increase the cavalry and field artillery, to commence at once to raise six new battalions of infantiy, and to add 80 rank and file toothe establishment of the home battalions, raising it from 720 to 800—4 battalion never to be reduced below 600, to meet the annual drafts for the force abroad Until the army leached its new establishment, men of good character were being allowed to rejoin it from the Rcserve without repaying the deferred pay which they had carned According to the incmorandum of the Secretary of State, a certain number of men would be enlisted for the line for a term of three years' colour service, with option of extension to seven years. It was proposed to give an allowance of 3d. per day to cover cost of groceries and vegetables, thus raising the pay to 1s. per day, but this increase would only be received by efficients of 19 years of age, and would not be given to men cristed for only three years with the colour. On the other hand, it was proposed to aboush the deferred pay of 2d a day, at present given to the soldier on his discharge or transfer to the Reserve, and to substitute for it a gratuity at the rate of Li for every year of service with the colours, up to a maximum of £12. Men transferred to the Army Reserve after three years, and men entitled to pension, would receive a gratuity of £2. With a view to facilitating the preparation of a force for special service out of the United Kingdom, when required, from the battalions at home, without mobilising the Reserve, a Bill was to be introduced to enable infantry soldiers on leaving the colours to undertake voluntarily the hability to recall during their first year of reserve service

Men who assumed this liability would receive extra reserve pay of 6d. a day, making with the ordinary reserve pay 13. in all The number of the special reservists for whom pay was provided was 5000. It was also proposed to empower militiamen to volunteer for general service in emergencies Certain reloims of the War Office were also proposed For the first time in 26 years troops would be trained in large manœuvies In course of a prolonged discussion Lord Charles Beresford expressed the opinion that the reserve of guns was very of the East African Protector ate. Mr. Curzon, small, and hoped the authorities would not adopt any new quick-firing gun in preference Attorney-General had been consistently acted to that of France and Germany. An amendment

of M1. Labouchere to reduce the proposed establishment by 13,367 was negatived by 232 to 45, and the vote for men agreed to. A supplementary aimy vote of £1,20,000 for the year 1897-98 was carried March 14th (see sect. 84).

Ascension Day. The motion that committees

of the Commons should not sit until 2 o'clock was carried by 178 to 30 (May 18th). The motion for the meeting of the House on Ash Wednesday at 2 o'clock instead of noon was

Wednesday at 2 octook instead of froof was (Feb. 22nd) carried by 215 to 121.

Derby Day fell in the Whitsuntide recess.

[6] East and Central Africa (Uganda, Zanzibai, etc). Mi. Joseph A Pease moved on the Address (Fcb 10th) an amendment expressing regret that, having regard to the assurances given by the Government as to the abolition of slavery throughout the Zanzibar Protectorate, no efficient action appeared yet to have been taken to this end. Mr. Curzon maintained that the Government had given effect to their promise to abolish the legal status of slavery in the Protectorate, and that under the decree which had been is ued all slaves would be able to claim their freedom by going through the necessary formalities. Sir W. Harcourt said the decree was condemned by the fact that only a very small number of slaves had been emanci-Mr Ballour replied that the Unionist party had, both in opposition and in office, shown a great desire, and had now taken effective steps, to further the cause of freedom. The amendment was negatived by 181 to 120.
Mr. Labouchere (March 31d), on a grant in aid of the expenses of the British Protectorate in Uganda, and there had been great mismanagement in Uganda, and moved the reduction of the vote Sir Charles Dilke contended that we had broken faith with the Soudanese troops. Mr H. M Stanley, while in favour of in-creasing the grant, thought there had been a total absence of consideration for Soudanese troops. Mr Curzon contended that the mutiny had nothing whatever, to do with Major Macdonald, but was owing to circumstances long anterior in their origin to the appearance of that officer upon the scene. He at the same time agreed with Sir E. Grey as to the necessity for a thorough inquiry into the grievances of the Soudanese mutincers. In the result the proposal to reduce the Estimate was defeated by 212 to 55 Lord Stanmore (March 31st) discussed the condition of affairs in Uganda, and myited a statement with respect to the pro-posed inquiry. The Duke of Devonshire said Mr Berkeley would inquire and report upon the cause of the mutiny of the Soudancse troops, and also with reference to all the circumstances connected with the muider of Major I hurston and his fellow-captives. The disaffection and his fellow-captives. among the troops had taken both the civil and military authorities in Uganda by surprise. Certainly their gricvance as to arrears of pay had been entirely removed before they were ordered up to join Major Macdonald's force, and in the official papers there was no evidence of any remissiness in attending to grievances. Sir C. Dilke (Aug. 5th), on the Diplomatic and Consular Vote, diew attention to what he regaided the extraordinary change of front which had been executed by the Foreign Office with regard to the fugitive slaves on the coast strip of the East African Protectorate. Mr. Curzon, in course of his reply, said the dictum of the Attorney-General had been consistently acted

instructions of the Government had been violated. An amendment for the reduction of

the vote was defeated by 110 to 55.
[7] China. In view of the situation of affairs in the Far East, the meeting of Parliament was awaited with exceptional interest. Germany had occupied and secured a lease of Kiao-Chau Bay without objection by England. and had demanded the right to make railways and work mines. The Chinese Government had approached England for a loan, and Sir Claude Macdonald was reported to have mformed the Chinese Government that England formed the Chinese Government that England was willing to assist China to liquidate the Japanese indemnity, and would provide a loan of £12,000,000 to run for 50 years at 4 per cent including sinking fund, the conditions to include the opening of three treaty ports—Ta lien-wan, Siang-yin, and Nanning—a declaration that no portion of the Yang-tisze valley thould be also need to one other with the conditions of the provided to one of the provided of the conditions of the provided to one of the conditions of the provided to one of the conditions of should be alienated to any other power, and the right to extend the Buima Railway through Yunnan. The Russian Charge d'affaires had protested strongly against the opening of Ta-hen-wan, and had thi eatened reprisals and the withdrawal of Russia's friendship if the port were opened, and, supported by France, had herself offered a loan to China The policy of the Government had been declared by Mr. Balfour at Manchester (Jan 10th). Our interests in China were not territorial, but commercial We had a special claim to see that the policy of China was not directed to the discouragement of foreign trade, and if we asked for freedom of trade we meant freedom asked for fleedom of trade we meant freedom of trade for all the world alike. This policy of the "open door" was emphasised by the Chancellor of the Exchequer, who, speaking at Swansea lan. 17th, said that the Government desired to open China to the benefit of the trade of the world, and were absolutely determined at what were absolutely, determined, at whatever cost-if necessary at the cost of war-that the door should not be shut. Just before Parliament met it was stated that Great Britain had definitely withdrawn her demand for the opening of Ta-lien-wan as a condition of the proposed loan, and the loan negotiations appeared to have failed.

Lord Salisbury, speaking on the Addiess (Feb. 8th), said with regard to China the Government had not surrendered one iota of our treaty rights, not did it intend to do so, and there was no effort that this country would not make rather than allow those rights to be infringed. But nobody had indicated the least intention to infringe them, nor did he believe that any such intention would ever be enter-tained. The Government had been willing to make an advance of money to China on condition that certain concessions in no way injurious to her were made with the object of further freeing trade. The Chinese Council said it would embairass them very much if our proposal as to Ta-hen-wan were insisted on, and he then suggested as a compromise that the opening of the treaty port should be post-poned until the railway was completed to the port. The Russian Government had spontaneously given a written assurance that any port they might obtain as an outlet for their com-merce should be a port free to the commerce of this country; while the German Government had acted in a similar spirit with regard to Kino-chau.

Replying in the Commons (Feb. 24th) to Sir

E. Ashmead-Bartlett, Mr. Curzon said Russia had given assurances that any port she might have as an outlet for her commerce on the have as an outlet for her commerce on the coasts of the North Pacific would be open to the ships of all the Great Powers and the commerce of all the world. Mr. Curzon informed Lord C. Beresford (Feb. 25th) that the French Government had given an assurance to Her Majesty's Ambassador at Paris to the effect that they had not the least intention to occupy temporarily on permanently a naval base in Chinese waters similar to the recent occupation by Germany and Russia. It was further stated that the post of Inspector-General of Maritime Customs was in the future, as in the past, to be held by a British subject, so long as British trade with China at the ports continued to exceed that of any other Power; and a port was to be opened in Hu-nan within two years. "that it is of vital importance for British commerce and influence that the independence of Chinese territory should be maintained This was seconded by Mr. G. Bowles. M Curzon said the Chinese had withdrawn then proposal for a loan, and the issue of the loan had been arranged by certain banks. The three objects which the Government had in view were the maintenance of the integrity of China, the preservation of our treaty rights, and freedom of commerce From statements made by Mr Cuizon (Maich roth), it appeared that Russia was negotiating with China for the lease of Port Arthur and Ta-hen-wan, as well as for the constituction of a railway to one of those ports, on the same conditions as the Manchulian Railway, but Ta-lich-wan, if so leased, was to be opened to foreign trade, like other Chinese ports Her Majesty's Minister at Peking, in confirming the existence of the negotiations, stated there was no indication of anything in the shape of an ultimatum Mr. Cui zon stated in answer to Sir C Dilke (March 21st), that regulations with reference to the recent opening of all internal navigation throughout China were being drawn up by the Inspector-General of Maintine Customs at Peking. Mi. Curzon stated (Maich 28th), in answer to Si E Ashmead-Bartlett, that the Russo-Chinese agreement was signed on the 26th, and that on March 20th the Russian Ambassador had notified to the Government that by a convention signed on that day the usufruct of Port Arthur and Ta-hen-wan and the adjacent territories had been granted to Russia by the Chinese Government Replying to M. Marks Maich Government Replying to Mi Marks (March 31st), Mi. Curzon said the Russian Foreign Minister on March 16th had authorised our Ambassador at St Petersburg to inform Her Majesty's Government that in the event of China consenting to lease to Russia Ta-lien-wan and Port Aithui both ports would be open to foreign tiade like other ports in China. Our Ambassador was further authorised to assure the Government that there was no intention on the part of Russia to infringe the rights and privileges guaranteed by existing treaties between China and foreign countries, which privileges include the right, under the Treaty of lientsin, to send ships of war to all ports within the dominion of the Emperor of China. Sir E. Ashmead-Bartlett was informed by the Under Foreign Secretary that the Russian Ambassador's note of March 28th stated that the two ports would be occupied at once by Russian troops and the Russian flag hoisted by

the side of the Chinese flag. Lord C. Beresford was informed (April 5th) that the assurances given by Russia on March 76th, that Ta-lienwan and Port Arthur would be open to foreign trade, were only renewed in the note on March 28th with regard to Ta lien-wan; but on the attention of the Russian Minister for Foreign Affairs being called to the omission, he replied that he held to the assurances previously given In reference to questions addressed to him (April 1st) regarding the Chinese provinces of Yunnan and Szechuen, Mr. Curzon informed Mr. J. Walton that the French Government. under the Anglo-French declaration about Siam, agreed that all railway concessions and commercial and other privileges and advantages conceded or which may be conceded in those provinces should, as far as tests with France, be extended and rendered common to Great Britain.

Mr. Balfour, on the motion for adjournment over Easter (April 5th) maintained that the principles of Far East policy laid down by him in January had since guided the Ministry and were still guiding them. China had, he said, undertaken at our instance that the region of the Yang-tsze should in no circumstances be parted with or leased to any other power, that the successor to Sir Robert Hart should be an Englishman so long as the commercial predominance of this country gave us an equitable title to have an Englishman in that position, and to permit access by the stramers of ali nations to the great waterways of China, while three new treaty ports were to be opened-at Chinwang Peitaiho in the Gulf of Pechi li, at Fu-ning in the inlet of Sam-sa, and at Yo-chow, on the Tung ting Lake, this last being the first treaty port over opened in Hu-nan He believed that the principle laid down by Russia, that our treaty arrangements should be in no way interfered with, would be carried out to the letter. Furning to points as to which he thought Russia had pursued an unfortuna e course. Mr Baltour remarked that it would have been well could Russia have confined her policy to the extension of her system to an ice free commercial port, but un fortunately her statesmen took a different view of their duties and interests, and resolved, in addition to a commercial port, to obtain the control of the port and harbour of Port Arthur Port Arthur was not a commercial port, but a naval port The Russian Government had, in Mi. Ballours view, given a shock to the Chinese Empire by taking a port which dominates the mailtime approaches to Peking Her Majesty's Government had, it seems, on news of the negotiations, officied, if Russia would abstant from taking Port Arthur, to give a corresponding pledge that they would take no port in the Gulf of Pechi-li This offer not being accepted, they had obtained from the Chinese Government Wei-Hai-Wei, with a right to navigation, after the Japanes should have left it, on the same conditions and for the same term of years as those obtained by Russia in the case of Port Arthur [Japan, it seemed, entirely concurred in this arrangement], Wei-hai-wei being the one port in the Gulf of Pe-chi-li which might be said to balance the possession of Port Arthur

made by the Duke of Devonshire to the Peers.

Important concessions to the demands of France were made by China in April. Mr. Balfour replying (April a6th) to Mr. Maclean (who asked whether any notice was taken by the Government of an official statement that, in reply to the British Minister's exhortation to China to make a stand against Russian threats, the Chinese Government said that a promise of protection against Russia was the only thing that would help them) said the request was equivalent to a demand that we should guarantee Chinese territory, and this was certainly not a demand which in existing was certainly not a demand which in examing circumstances ought to be granted. It was stated (April 18th) that a portion of Ta-lien-wan Bay was to be fortified, and that the Govern-ment had spontaneously intimated to the German Government that it had no intention of calling in question the German rights or interes s in the province of Shantung. Sir W Harcourt (April 20th), after reviewing the despatches from the point of view of the principles of the Government, felt obliged to describe them as a record of continual failure at every point. Mr. Balfour, in course of his reply, maintained that the position of Russia with regard to China was incomparably better twelve months since than now. He warmly repudiated the suggestion that the British ships were withdrawn from Port Aithai in pursuance of a cowardly policy, stating that this was done in the ordinary course of Admiralty nanagement Mr Brodrick announced (May 10th) that the garrison of Hong Kong was being strengthened. The Earl of Kimberley) May 17th) put questions as to matters in the I at East, and made some references to Mr. Chamberlam's speech on May 13th at Birming thambertain's speech on May 13th at Birming ham, in which, in allusion to the negotiations with Russia, the Colonial Secretary had quoted the old proverb that "he who superwith the devi must have a long spoon." Mr Curzon stated (May 23rd) that a notification that no Englishmen or other foreigners would be permitted to land at Ia-lich-wan or Port Arthur without a passport wird by the Russian Consul had been issued without the knowledge of the Russian Government, and that instructions had been given to withdraw it On June 6th Mr Curzon stated that the latest information received by Her Majesty's Government, so far from corroborating the success of the endeavours of the Russo-Chinese Bank to obtain, by means of a railway foan, the control of the sole railway from the north of China to Peking, was to the effect that a preliminary agreement for the extension of the northern line of railway between Peking and New-chwang was signed on June 1st between the representatives of a British syndi-cate and the Chinese Director-General of Railways Foreign affairs generally, though with special reference to the Far East, were again discussed, June 10th, when the proceedings of the Government were criticised from their own side, and Mr. Chamberlain justified his Birmingham speech (see sect. 29), and denied that there was any difference of opinion between him and the P. Jime Minister Loid Salisbury stated (June 13th) that a convention had been concluded W. Harcourt said the polic, now enuncia ed was not that of the "open door", and other speakers continued the discussion at some length. A joint extension would be given to the colony of Hong Kong, and it would be made strategismilar statement to that of Mi. Balfour was cally safe. On June 17th his lordship added

that the Government had every reason to hope that the distinguished officer who had already performed valuable duties in the Chinese navy would make arrangements with the Chinese Government by which he would be able to help them to reorganise their service. With regard to the construction of railways in China, Her Majesty's Government would do everything to secure British capitalists concessions where they showed capacity for fulfilling the engagements they undertook In reply to the Earl of Kimberley, who (Aug. 15.) asked what steps the Government proposed to take to safesteps the Government proposed to take to safe-guard British interests as regards railways in the provinces bordering on the Yang-tsze-kiang, the Marquis of Salisbury said the Chinese Government had always been extremely well disposed towards Great Britain, and he was sure we should get concessions equal to those of other nations. Sir Claude Macdonald had been instructed to inform the Chinese Government that Her Majesty's Government would support them in resisting any Power which committed an act of aggression on account of granting concessions to make or support any railways or public work to a British subject Mr. Curzon on the same day said Her Majesty's Minister had been in structed some time ago to press for the insertion in every concession granted by the Chinese Government, of proper provisions for the equal treatment of all nationsals and trade The policy of the Government was further criticised (Aug 2nd), when Mr. Balfour denied that the open door had ceased to exist either in Manchuria or clsewhere, and had been shut in our face. As to the new railway policy of the Government, the concessions secured by us in China during the last few months were far greater than those obtained by all on invals put together. On Aug. 9th Mr. Curzon stated that Sr. Claude Macdonald reported by tele-graph on July 25th that the Chinese Govern-ment had expressed their gratitude to Her Manustric Government for the status. Majesty's Government for the promise of sup-port which had been given to them, and added that no threat of aggression had been made In answerto Mr. | Walton, the Under Serretary stated that instructions to resist prefer ential treatment for foreign subjects on trade were sent to Sir Claude in March last Renewed and particular instructions with reference to railway concessions were sent to him on July 13th. Sii Claude Macdonald had, Mr. Curzon informed Mr Provand, telegraphed on Feb. 18th that Ge. many had opposed a scheme for a trunk railway from Iren-tsin to Chin-kiang, on the ground that no railway could be constructed in the province of Shantung without an arrangement with them, but it had been explained that the demand put forward was merely to the effect that if the Chinese Government desired to obtain foreign assistance for the constituction of railways in the province, they should in the first instance offer the work and supplies to German industry and German trade. No exclusive privileges had been claimed, and no attempt had been made to exclude other nations from free competition in the province. The situation was further disthe province. The situation was nutrier dis-cussed on Aug. 10th, Mr Balfour denying that the open door had been closed anywher. On Aug. 11th, the day before the protogation, Mr. Balfour informed Mr. Provand that on March

ascertain whether German tenders could be obtained for railway construction on better terms than those made by Bittish capitalists, but that Her Majesty's Government could not admit a preferential right on the part of Germany simply on the ground of a projected line many simply on the ground of a projected meeting in the province of Shantung. No reply had yet been received from the Chinese Government Mr. Yerbuigh asked whether the fact that the Tsjing-h-Yamen had given a formall assent to the conditions imposed by Mr. Pavlori with regard to the contract for the Niu-chwang Railway extension loan, the said conditions being that the railway should not be mortgaged as security, and no foreign con-trol or interference of any description should be permitted, even in case of default; and whether these conditions were not in direct conflict with the terms of the signed contract. Mr Balfour replied that the facts were substantially as stated, and that the matter was engaging the "serious attention" of the Government. On the following day he could and nothing regarding the railway questions, though in answer to Mr Lowles, he stated that every legitimate commercial enterprise in thing would receive the support of Her Majesty's Government.

[8] Education, England and Wales. Sir J Lubbock (Maich 22nd) moved a resolution declaims it to be desirable to assimilate the provisions of the English Education Code as regards class and special subjects to those in the Scotch Code of '97. He proposed to re-move a limitation in the Code upon the number of class and special subjects in which children in clementary schools may be presented. Mr. Jobb seconded Sir J Gorst thought the present number of such subjects was enough for the children at the tender age at which they go to school in this country. The law relating to the attendance of children in Scotch schools was much more stringent than that relating to those in English schools, and in the Scotch schools they had older children and more teachers. Sir W. Harcourt said the official answer to the demand of the mover and seconder was that we had not in this country the machinery for giving to English whild any detail education, and have children a decent education, and hon-members should endeavour to awaken the members should endcavour to awaken the minds of the Lighish people to the greatest of all their deficiencies. The resolution was withdrawn Mr Lloyd George (April 19th) drew attention to the subject of public education, and moved "that it is essential to a just and afformative testing of public discounter that is a second of the subject of public education, and moved "that it is essential to a just and afformative testing of the subject of public discounters." efficient system of national education that there should be within reach of every child in I ngland and Wales a public elementary school under local representative management; and that there should also be provided increased facilities for the training of teachers in colleges free from sectarian control." This was seconded by Mr Alfred Hutton. Sir J Gorst, in opposing the resolution, said it was acknowledged that the present parliament could not pass a comprehensive measure for the development of national education, and it was necessary therefore that the fragmentary efforts of the Legislature should be made, not in accordance with some settled policy, but in order of their urgency. The most urgent reform was to get into the existing schools more children who Baltour informed Mr. Provand that on March were in a condition to receive instruction, and ist Sir Claude Macdonald was instructed that to keep them there until they were over age, the Chinese Government were at liberty to Sir W. Harcourt said our system of national education was inefficient from top to bottom. Mr. Knox opposed the resolution, which was rejected by 183 to 161. Sir J. Gorst, in proposing the Education Vote for England and Wales (June 17th), said that in the sum asked for there was an apparent increase of £332,005 over the sum voted in the previous year, but the true increase was only £2.8,055 Adding to the sum voted by Parliament towards elementary education the sums derived from voluntary subscriptions (£845,000) and from the rates (£2,725,801), it might be assumed that in the current financial year a sum of upwards of £11,690,000 would be spent in England and Wales upon elementary education. There were however serious obstacles which prevented the expenditure of the e large sums from fully obtaining the desired purpose. He included among these the early age at which children leave school, integularity of attendance, the unfit condition of many children attending to receive instruction, the inferiority in great towns of the voluntary schools to the board schools, the inferiority of the rural schools, the want of teachers, and the want of an organisation of secondary education. In discussing these points he observed that if the Govern-ment liked to make the attendance at school really compulsory it could be don, and he had no hesitation in saying that in London Bible teaching in board schools was so superior to the teaching in voluntary schools that there was no comparison between them. Sir W. Hancourt observed that the statement would have an immense influence on the House and the country, and asked why they were not dealing with these educational defects. The dealing with these educational detects 2.16. Government had been in office for three years, and with a powerful majority, but what had they done to cure the defects in the education of the people beyond granting half a million to the voluntary schools and a trifle to the board schools? The view of the Archbishop of Canterbury seemed to be that voluntary schools were to be manipulated as a machine for doctrinal and sectarian teaching Mr. Balfour in reply warmly repudiated the statement that in the vast majority of the Church schools the titual and doctrine were inconsistent with those of the Church. The vote was carried after further discussion. Lord Hugh Cecil, on the report of the vote ([une 24th), adverted to the speech of Sir John Gorst, which he said had greatly offended a large number of the supporters of and teachers in voluntary schools J. Gorst, in reply, explained that he had applied his remarks, not to voluntary schools generally, but only to voluntary schools in the great towns, and that he had often stated that voluntary schools in the country were as a rule better than Board schools. His remarks as to religious education had reference to Bible teaching only The Archbishop of Canterbury (July 12th) asked the Lord President of the Council whether he could say on what authority or on what evidence the Vice-President of the Council stated publicly that the teaching of the Bible in board schools in large towns was far superior to the teaching of the same subjects in voluntary schools in the same places. The Duke of Devonshire replied that the statement complained of was an expression of Sir John Gorst's own personal opinion, of Sir John Gorst's own personal opinion, After further discussion the resolution was and was not based upon any official or other carried by 155 to 81. The Chancellor of the authority, but on personal observation. The Exchequer, replying to Mr. Kimber (July 1st), opinion of Sir John Gorst was the opinion of said the fact that the lean or grant to Egypt

that gentleman only. The opinion of the Vice-President did not purport to relate to the religious instruction given in the schools of the country generally, but solely to that given in he schools of the Metropolis, and he did not see why it need have given rise to any very great alarmor annovance to manager s of any voluntary schools. As to a further statement in the speech of the Vice-President, based on a quotation from the report of one of the departmental inspectors, to the effect that the farmers and squires were no friends of the education of the agricultural labourer, the noble duke regretted that such in assertion should have been made by any official of the Department, and also that it should have been repeated in an official statement by the representative of the Education Department On July 28th complaint was made that after a Bill to confirm a provisional maner unit atter a 1911 to confirm a provisional order of the Education Department, enabling the London School Board to acquire a number of pieces of land for school purposes, had passed through the unopposed committee, a paragraph relating to a scheduled site at Camberwell had been struck out without notice to the Board Sir John Gorst said that the site had been struck out from a previous Bill, the department were not aware that it had been reintroduced into this Bill, and there was no time to give notice. Si H Fowler moved the adjournment of the debate, but this was negatived by 148 to 92, further motion to recommit the Bill being also negatived, and third reading carried

[9] Egypt and the Soudan. The Chancellor of the Ixchequer informed Mr John Ellis (May 17th), that £708,802 had been advanced to the Egyptian Government [as a grant in aid for the year 'obor of the expenditure incurred in connection with the expedition to Dongola (see SESSION, sect. 14, ed. '98)], and was owing on March 31st, '98. The Egyptian Government had agreed to pix 1 per cent interest, but none had yet been paid. No date was fixed for the repayment of the sum advanced. The Chancellor of the Exchequer (June 27th) moved a resolution in favour of remitting the advance of £798,800 made last year to the Egyptian trovernment, in connection with the operations in the Nile Valley. He said peace now reigned from Dongola to Berber, Kassala and Suakim, and this had been achieved at a total cost of no more than £1,850,000, of which £750,000 had been expended on most valuable assets, comhundreds of miles of railways and hs. The Government did not contemtelegraphs. The Government did not contemplate the undertaking of any further military operations on a large scale or involving any considerable expense, after the power of the Khahla had been broken, for the recovery of the great provinces to the south of Khartoum. They anticipated that expeditions might be made by a gunboat flotilla to free the waterway of the Ni¹c from any interfe ence with perfect freedom of commerce with the interior. The estimated additional cost of the operations would not exceed \$\int_{750,600}\$, and if they remitted the loan of last year the Lgyptian Government would be able to provide all the extra funds necessary for the purpose Sir W Harcourt characterised the transaction as a most remarkable one, and entered his protest against it.

included the sum of £270,000 advanced for the purchase of material for the railway between Wady Halfa and Abu Hamed would not be overlooked in the settlement of accounts after the capture of Khartoum. The right hon the capture of Khartoum. The right hon gentleman informed Mi Dillon (July 4th) that the war expenditure south of the Assuan was being defrayed directly by the Egiptian Government. The extra charge for the British forces north of Assuan, including cost of transport thither, was being temporarily de frayed from Army funds, but would be refunded by the Egyptian Government, who would also provide the expenses of the expedition to Khartoum.
[10] (Balstone (Mr.) after a long and pointed)

[10] Gladstone (Mr), after a long and painful illnessborne with heroic fortitude and patience, died at Hawarden Castle, Flintshire, on the morning of Ascension Day, May 10th, '98 At morning of Ascension Day, May 19th, a large gathering of members being p esent, most of whom wore mourning, Mi rising almost immediately after prayers, before any other business had been entered upon, said he thought it would be felt in all parts of the House that they ought to do fitting honour to the memory of that great man whose long and splendid career had just closed by ad-journing their business that afternoon. This was not the occasion on which to give utterance to any of the thoughts which naturally to any of the thoughts which naturally suggested themselves, that occasion would be presented to-morrow, when it would be first duty to propose an address praying He i Majest to grant a public funcial to Mi Gladstone, should that not be inconsistent with lisexpressed wishes and the wishes of those who had a right to speak on his behalf, and also praying Her Majesty to give directions for a public monument to be ejected at Westminster public monument to be erected at Westmirster to his honour Mr Balfour then moved the adjournment of the House, and this having being seconded by Sir Wilham Harcourt, the proceedings, which had occupied only a few minutes, came to a close. The House being met on the following day, May 20th, the Speaker amounced that he had received Speaker a mounted that he mad recessed messages of sympathy from the President of the Italian Chamber of Deputies and from the Norwegian Storthing. The message from Italy was as follows. "The news of the death Italy was as follows "The news of the death of William Gladstone has been received with profound soriow by the Italian nation, exemindful of the interest constantly shown by that great statesman in the cause of our national resurrection, and has awakened a heartfelt and solumn echo of grief in the hearts of my colleagues of the Chamber of Deputies. As the Chamber is now prorogued, falls on me, in virtue of my office of President, to interpret their sentiments, and assure the House of Commons of our lively participation in its guief at the loss of so eminent a member, whose whole life was one constant expression of devotion to his country Bianchian expression of according to his country.

Bianchian, President of the Chamber of Deputies." Subsequently (May 21d) the following further message of sympathy was read: "From the President of the Chamber of Deputies at Athens to the Right Honourable the Spreaker of the House of Company. London. the Speaker of the House of Commons, I ondon In the name of my colleagues of the Hellemo Parliament, I beg you to transmit to the honourable members of the House of Commons

Gladstone. He was entitled to the gratitude of the Greek people, and his name will ever be venerated by my fellow countrymen." On May 24th urther messages were received from the Sena'e and the President of the Chamber of Deputies of the Argentine Republic, the of Inputies of the Argentine Republic, the former communication being as follows "Buenos Aues, 24th May -To he Most Honourable the Speaker of the House of Commons, kondon I have the honour to communicate to the Speaker that the Senate of the Aigentine nation, over which I preside, of the Algentine nation, over which I preside, to see to its feet in honour of the great memory of Wilham Fwart Gladstone, the glory of humanit, whose loss the whole world at this moment deplotes, and who merits the post-humous homage of all the Parliaments of the fice nations of the world - BARTOLOME MITRE A message of condolence from the Chamber of Peers of Portural was sent to both Houses

The scene in the Commons on May 20th was deeply impressive. The House was absolutely full of members, while the accommodation for peers, distinguished visitors, strangers, and ladies was utterly exhausted. The Speaker, in pursuance of the ordinary july regulating public business, called upon the member whose name headed the list of inquines to Ministers, but in response to a cry from all quarters of the House of "No questions," the more serious and solemn procccd ngs of the string were forthwith entered upon Mi Balfour, Leader of the House, observed that this was not the place, this still more was not the time, at which to attempt any estimate of a career which began on the morrow of the first Reform Bill, and which lasted for two generations. During that period the country went through a series of changes in science, changes theological, social, and political, and in all these phases of contempo-tary evolution Mr. Gladstone took the liveliest interest. How was it possible for any one to pretend to exhaust the many sided aspects of such a life, even on such an occasion as this? If he ventured to say anything, it was rather of Mr. Gladstone as the greatest member of the greatest deliberative assembly which so far the world has seen. There was no gift which would enable a man to move, to influence, to adorn an assembly like this, that Mr Gladstone did not possess in a supereminent degree From the conversational discussion appropriate to our work in committee to the most sustained eloquence befitting some high argument and some great historic occasion, every weapon of Pathamentary waitare was wielded by him with the sureness and ease of a perfect, absolute, and complete mastery. Mr Gladstone's place in history, and the judgment they ought to pass upon the great part which he had played in the history of his country and in the history of the world, were not to be discussed by him to-day, nor did he think that the final answer could be given to them, the final judgment prenounced, in course of this generation But one service Mr Gladstone did—in his opinion incalculable—which was altogether apart from the judgment which they might be disposed to pass upon particular opinions, or particular views, of particular lines of policy which Mr Gladstone might from time to time Parliament, I beg you to transmit to the have adopted. He added a dignity and he honourable members of the House of Commons the expression of our grief at the loss of the House by his genius for which it was imposeminent statesman and friend of Greece—sible to be sufficiently grateful. The Leader

of the House concluded by moving the following, explaining that in drawing up its terms
they had adhered closely to the forms of precedent "—" That an humble address be presented
to Her Majesty, praying that Her Majesty will
be graciously pleased to give directions that
the remains of the Right Honourable William
Ewart Gladstone be interred at the public
charge, and that a monument be elected in the
Collegiate Church of St. Petcs, Westminster,
with an in-cription expressive of the public
admiration and attachment, and of the high
sense entertained of his rare and splendid of the House concluded by moving the followsense entertained of his rare and splendid gifts, and his devoted labours in Parliament and in great offices of state, and to assure Her Majesty that this House will make good the

expenses attending the same."

Sir W Haicourt, in seconding, i cmarked that the sincerity of Mr Gladstone no man doubted. What he believed he intensely believed, what he wished he greatly wished; what he wrought he strenuously wrought. These were the con stituents of a great character, and these were the qualities which the judgment of history would crown with deserved fame, however people might differ as to the objects to which they were devoted. He concurred in Mi Balfour's testimony to what the House owed to the life of Mi Gladstone and to the natural powers of his genius. They felt, as the right hon gentleman had said, that he exalted the spirit of the assembly in which he was the undisputed chief, they felt that the House of Commons was greater by his presence, as it was by his memory What he did for the House he did for the nation too Si William thought it was impossible to overvalue the influence, which the purity and the piety of his public and his private life had had upon the life of this country. It had exercised a lasting influence upon the moral sense of the people at large. What Mr. Gladstone had practised. His life had been a lesson which was not, and would not be, forgotten was not a hamlet in this land where his virtues were not known and felt. They felt that his heart was ever with the weak, the miserable, and the poor. They remembered how much of his life was spent in labours to alleviate their lot. They knew him, they were almost his flesh and blood. His sympathies were not confined to narrow bounds. The strongest confined to narrow bounds. The strongest passions of his heart were for freedom and peace-freedom not only for his own, but for every race, peace with every people, glad tidings of great joy—the gospel of the religion to which he was devoutly attached, and his voice went forth to all who were desolate and oppressed wherever they might dwell

Mr. Dillon, leader of the Irish parliamentary party, said he felt that he had a peculiar right to join in paying a tribute to the great Fighshman who had died the day before For the later and-as all men agree-the most glorious years of his strenuous and splendid life were dominated by the love which he bore to his the speaker's—nation and by the eager and even passionate desire to serve Ireland and give her liberty and peace Mr Alfred Thomas, on behalf of the members representing Welsh constituencies with whom he was associated, added their tribute to those so feelingly expressed by the speakers who had preceded him; and the resolution was then agreed to nemine contradicente.

scene was enacted in the House of Lords, where there was a large gathering of peers, ladies, and members of the other House who had found time to cross the building from that chamber to this. The Marquis of Salisbury, in proposing a resolution similar in terms to that quoted above, said the most distinguished political name in this century had been withdrawn from the ioll of the living His history, his merits, his wonderful qualities, had been dwelt upon by many tongues and many pens, and there was no need to repeat them then, but the point which seemed to him remarkable, and which he thought would attract the attention of foreign nations and of future generations more than any other, was the universal consent of all persons, of all classes and of all schools of thought, in doing honour on this sorrowful occasion to a man who had been more mixed up in political conflict than probably almost any man even known. What was the cause of this unanimous opinion? It was that men recognised in him a man guided-whether under mistaken impressions or not, it mattered not-in all the steps he took, in all the efforts het made, by a high moral ideal. He left behind him, especially to those who had followed with deep interest the history of the later years one might almost say the later months of his life the memory of a great Christian statesman, set up necessarily on high, from which the sight of his character, his motives, and his intentions would strike all the world. It was situated so that it would have left a deep and most salutary influence on the political thought and the social thought of the generation in which he lived, and he would be long remembered not so much for the causes in which he was engaged or the political projects which he favoured, but as a great example, to which history hardly fur-nishes a parallel, of a great Christian man. The Earl of Kimberley, in seconding, said Lord Salisbury had undoubtedly struck the

keynote of the universal feeling towards the statesman they had lost—The Duke of Devonshire, in expressing on behalf of the Liberal Unionist peers their sincere concurrence in what had been said by the two leaders, rewhat had been said by the two leaders, remarked that, deeply as they regretted the difference of opinion which caused the separation between Mi. Gladstone and many of those who had been his most devoted adherents, they never doubted, and they did not then doubt, that in that, as in every other matter with which during his long public life he had to deal, he was actuated by no other consideration than that of a sense of public duty, and by his conception of that which was in the highest interests of the country

The Earl of Rosebery, in course of a noble oration, cited the words which were used by Lord Salisbury when Mr. Gladstone resigned the office of Piime Minister, "that his was the most bulliant intellect that had been applied Government began." That seemed to Lord Rosebery an adequate and noble appreciation; but there was also a side which struck one more strongly in regard to Mr. Gladstone than in regard to any one else, and that was that ded their tribute to those so feelingly exressed by the speakers who had preceded
im; and the resolution was then agreed
by he contradicente.

Almost immediately afterwards a similar

enormous power of concentration, the second was the infinite variety and multiplicity of his interests. There was no man in the history of England, no man at any rate of recent centuries, who touched the intellectual life of the country at so many points and over so great a range of years But that was in fact and reality not merely a part of his intellect but of his character, for the first and most obvious feature of Mr Gladstone's character was the universality and humanity of his sympathies Sympathy was one great feature of his character, but there was another with which the noble marquis had dealt, and that he would only touch on with a single word. He meant the depth of his Christian faith. The faith of Mr Gladstone obviously to all who knew him pervaded every act and every part of his life. It was the faith, the pure faith of a child confirmed by the experience and the conviction of manhood There was no expression so frequently on Mr Gladstone's lips as "manhood" It was obvious from all he said and all he did that the virile virtue of manhood, in which he comprehended courage, righteous daring, the disdain of odds against him-that virile virtue of manhood was perhaps the one which he put the highest. This nation loves brave men Mr Gladstone was the bravest of the brave There was no cause so hopeless that he was afraid to undertake it, there was no amount of opposition which would cow him when once he had undertaken it. Lord Rosebery thought the occasion ought not to pass without letting Mrs Gladstone (who not to pass without letting mrs. Gladstone (who for sixty years shaled all the sorrows and all the jovs of Mi. Gladstone's life) know she was in their thoughts that day "Yet, putting that one figure aside," continued the noble Earl, "to me, at any rate, this is not are occasion for beauty, and appropriate and continued the sorter of the sorter and continued the sorter of the so absolute and entire and unreserved lamentation were it indeed possible so to protiact the inexorable limits of human life that we might have hoped that future years and even future generations might see Mi. Gladstone's face and hear his matchless voice, and receive the lessons of his unrivalled experience, we might indeed grieve to day as those who have no hope But that is not the case. He had long exceeded the span of mortal years, and his latter months had been months of unspeakable pain and distress. He is now in that rest for which he sought and prayed, and which was to give him relief from a life which had become burdensome Surely this should not be an occasion entirely for grief, when a life prolonged to such a limit, so full of honou, so crowned with glory, has come to its termination. The nation lives that produced him. The nation that produced him may yet produce others like him; and in the meantime it is rich in his memory, rich in his life, and rich above all in his animating and inspiring example Nor do I think that we should regard this example as limited to our own country or race. It seems to me that, if we may judge from the papers of to-day, it is shared by, and is the possession of all civilised mankind, and that generations still to come through many long years will look for encouragement in labour, for fortitude in adversity, for the example of a sublime Christianity, with constant hope and constant encouragement, to the pure, the splendid, and the dauntless figure of Wilham Ewart Gladstone." The resolution was then agreed to nemine dissentiente.

passed by both Houses was immediately compassed by both Houses was immediately com-nunicated to Her Majesty, who at once gave her assent to its prayer. Mr. Herbert Gladstone, in reply to a letter addressed to him by Lord Salisbury, "on behalf of his mother and the family, and with a deep sense of gratitude to Her Majesty and to both Houses of Parlia-ment," accepted this signal tribute from the nation to his father. Mr. Gladstone had in his will left the paticulars of his burial to his executors, specifying only, "(a) that it is to be very simple, and also private, unless they shall consider that there are conclusive reasons to the contrary; (b) that I desire to be buried where my wife may also lie; (c) that on no account shall any laudatory inscription be placed over me" These "conclusive reasons" had in the judgment of the family been established by the offer conveyed to them, and by the marvellous manifestations of feeling in all parts of the Empire, and the necessary assurance had been given that the condition specified in (b) would be fulfilled. Both Houses accordingly passed a resolution that they would attend the funeral. what was virtually a memorial service was held in Hawaiden chuich on Ascension Day. The vody lay in state on Tuesday, May 24th, in the study in Hawaiden Castle, and was seen by many thousands of persons. On the Wednesday it was removed to Hawaiden church. In the evening the coffin, escorted by a long piecession of mouners, was conveyed to Broughton railway station, and thence carried by way of Chester, Crewe, Stafford, Rugby, to London, great bodies of people being assembled to see the train as it passed sometimes through open country or as it slowed down through the great centres of traffic. From Willesden the train proceeded to Westminster Bridge station, whence the coffin was borne to Westminster Hall, which had been specially fitted up for the occasion, and where, lying on a catafalque, it was specially watched through two nights by was specially watched through two nights by forty gentlemen who had volunteered for the service, and reverentially viewed during two days—Thursday and Friday—by some 300,000 mouriners. On Saturday, May 28th, members of the two Houses assembled in their respective chambers, and in due course walked in pro-cession through Westminster Hall to Westminster Abbey, and there attended the funeral SELVICE

On August 2nd a sum of £2000 to defray the expenses of Mr. Gladstone's funeral was voted by the Commons; and on August 3rd Mr. Balfour informed Lord Balcaires that the commission for the national monument of the deceased statesman had been entrusted to Mr Brock, R.A. [11] Greece, Turkey, Crote—Mr. Curzon, replying (Feb. 1 th) to Su. E. Ashmead-Bartlett,

said the Russian Government had informed the other Powers of their disposition to view favourably the candidature of Prince George of Greece as Governor-General of Crete, before recommending the Sultan to propose him. It was true that the Government of Great Britain and France had supported the idea of the candidatuie, but the Government were not aware that any attempt had been made by the ware that any attempt had been made by the Czar to force the candidature upon Turkey, ent, to the pure, the splendid, and the auntiless figure of William Ewart Gilastone." It was stated (March 28th) that the Austro-law the cashing the resolution was then agreed to nomine the resolution was then agreed to nomine the resolution was then agreed to nomine the resolution of Germany) were about to withdraw their squadron and contingent of troops from Crete by the 15th of the next month, only leaving a

sufficient naval force for the protection of their consular authorities and their own subjects consular authorities and their own subjects
But this measure was not to imply withdrawal
from the European concert, nor any departure
from the policy followed from the first by
Austria-Hungary in the Cretan question. Mi Balfour informed Mr. Legh (April 28th) that he
believed it was understood that the publication as Governor-General of Crete, and had been informed that the appointment of a Turkish subject was contrary to the declarations made by several of the Powers, and consequently ınadmıssible

inadmissible [12] Imperial Penny Postage. As the result of the Imperial Conference on Postage early in July, it was agreed that letter postage of in per half-ounce should be established between the United Kingdom, Canada, Newfoundland, Cape Colony, Natal, and such of the Crown Colonies as might, with the approval of the Government, be willing to adopt it Mr Hanbury stated (Aug. 9th) that the new scheme was to come into operation on Christmas Day, between Great Britain and such of the

scheme wasto come into operation on Christmas Day, between Great Britain and such of the British Colonies as are prepared to adopt it.

[13] India, Chitral and North-West Frontier operations. The Marquis of Sahi-bury, replying to observations made by the Earl of Kimberley during the debate on the Address (Feb. 6th) with respect to the Indian Frontier, said there was no wish on the paid of the Governthere was no wish on the part of the Government to occupy a single position which was not in the judgment of the highest expert authorities absolutely necessary for the security of our Indian Empire and the fulfilment of our treaty obligations. It was stated in the Commons (Feb. 10th) that the estimated cost of the operations on the North-West Frontier, for the whole year '97-8, would amount to about £2,541,000 sterling M1 Lawson Walton moved (Feb 14th) an amend ment to the Address, expressing disapproval of the policy pursued in the permanent military occupation of Chitial and the maintenance and fortification of the road from Peshawur through the territory of the independent tibes, and deploring the consequences which had followed from that policy, and further representing that the safety and prosperity of the Indian Empire would be best promoted by respecting the independence of the Frontier tribes and avoiding the occupation of their territory Lord G. Hamilton said the Liberal Government resigned before they had considered the alternative schemes which the Indian Govern-ment sent home. Had they considered those schemes they would, he believed, have largely modified their views. As to our future policy, there were two schools, the Sind and the Punjab; and the former of them, which aimed at establishing friendly relations with the tribes, was the more sympathetic and the more worthy of a civilised nation. If those who came after him would devote their attention to the future and not the past, there would be reason to hope that the upshot of this debate

be applied with firmness in the treatment of the various difficulties respecting the question of the Indian frontier as they presented them-selves. Sir H. Fowler said it was again and again declared that the agency established at Chitral was only to be a temporary arrangement. Mr Asquith (Feb 15th) agreed that it was desirable to have continuity of policy with regard to the Indian frontier, but contended that what the Secretary for India had done was to defend a most direct and most violent to defend a most direct and most violent reversal of the policy of one Government by another. After further debate, in which Mi. Cuizon, Sir W Harcourt, and Mr. Balfour joined, the amendment was rejected by 311 to 208. Mi S Smith moved (Feb. 22nd) that the expenditure involved in the recent operations beyond the frontier of India ought not to be charged entirely upon the revenues of India " Lord G. Hamilton said he could understand the House wishing to assist India in defraying the cost of some military expedition that was more Imperial than Indian in character, but it could not be contended that there was anything Imperial in the recent operations on the Frontier Sit H Fowler could not assent to the statement that this was not an Imperial question
| The resolution was re| reted by 188 to 96 | Loid Roberts of Kandahar
| (Maich 7th) called attention to the papers
| recently presented to Pallament relating to British relations with the neighbouring tribes on the North-West Frontier of India, and the on the North-west Frontier of India, and the military operations undertaken against them during the year '97-8. In the territories lying between our borders and Afghamstan there existed 200,000 fighting tribesmen, who could make the fulfilment of our obligations to the Ameer eithers very casy or extremely difficult, if not impossible. The all-important question that impossible I he air important question to us, therefore, was how we could maure that that enormous military force might be used for us and not against us. The system of non-interference with the frontier tribes, and especially the Afridis, had absolutely failed, and he appropriate that the covered protections are the system of the and he maintained that the forward policy was the only policy by which we could secure the allegiance of those warlike and uncivilised laces The recent outbreak among them had not, he contended, been caused by the forward policy, but rather by that policy not having been pushed far enough, and by our halfhearted manner of dealing with the tribes. The forward policy had not been simply one of military subjugation, but had hitherto been mainly peaceful. In his opinion it was imperative that we should occupy Chitral, the northernmost coiner of our frontier, because, though the chance of a successful attack on India from that direction was infinitesimal, the danger of allowing two or three thousand men to cross the passes would cause great excitement throughout Kashmu and the Punjab, and also have a very ill effect all along the frontier. The Earl of Onslow contended that the Indian finances would not bear the strain of a forward finances would not bear the strain of a forward policy, and urged that matters should be allowed to remain in their present position, and that we should go on endeavouring to cultivate friendly relations with the frontier tribes. After further debate, in which the Earl of Northbrook and the Marquis of Lansdowne joined, the subject dropped. In course of a discussion (June 7th) on the resolution on which the East India Loan Bill (see sect. 50) was founded Sir H. Fowler indied with Lord might be that the country would know herein omatter, no matter what party might be in power,
that the same principles and methods would was founded, Sir H. Fowler joined with Lord George Hamilton in an appreciation, which he was sure was fully shared by the House, of the admirable manner in which Lord Elgin had discharged the duties of his very troublesome Vice-royalty. Sir Henry also expressed the opinion that, now the operations on the North-West Frontier were over, there should be an investigation into the causes of the outbleak and the circumstances under which that unfor-

tunate conflict was entered upon.

[14] India (Ourrency). Mr Vicary Gibbs
(March 29th) moved a resolution proposing that a select committee or royal commission be appointed to consider the monetary condition of India and the effects of closing the Indian mints to silver on the different classes and interests affected thereby, to report on the suggested establishment of a gold standard in that country, and to make such recommenda-tions as they may think fit." This was seconded by Mi Maclean Mi Wile moved by way of amendment "that this House being satisfied that the Indian Government has been and is giving due consideration to the monetary condition of India, awaits further communications from the Indian Government before taking any steps in connection with this subject " Loid G Hamilton said the Government believed that any attempt to reopen the Indian mints without some international agreement would be an act of lunacy. He therefore could not associate himself with any inquiry which might lead to a reversal of the policy initiated in '93, but he was prepared to undertake an inquiry into the proposals which the Indian Government had sent home, and would therefore move, in place sent nome, and would therefore move, in place of the motion and amendment, "That it is desirable that a further inquiry be made into the monetary system of India, and into the proposals of the Government of India for the establishment of a gold standard in that country." Sir W. Harcourt thought this proposal perfectly satisfactory, and the amendment having been withdrawn, and the original resolution nega withdrawn, and the original resolution liegatived, the proposal of the Secretary for India was agreed to [The names of the members of the committee will be found at the end of this article]

[15] India (Press Law) Mr H Roberts (Feb 18th) moved on the Address an amendment setting forth that the House regarded with grave concern the policy of internal repression lately adopted by the Government of India, and especially the deportation and continued imprisonment of British Indian subjects without inal, the recent series of press prosecutions, and the present proposals to increase the severity of the law relating to sedition in India Loid G. Hamilton stated that the Government had no intention of entering upon a policy of repression or coercion in India. As to the As to the trial of certain gentlemen, they had published articles containing incitements to crime, there was not, however, the slightest intention to silence or curb the native press. Mr. Maclean expressed the opinion that the projected change in the law would suppress all kinds of free ex-pression of opinion in India. The amendment was negatived by 182 to 100 Mr. Herbert Roberts reverted to the subject on the East India Revenue Accounts (Aug 11th), moving an amendment setting forth in biref that the seemt alterations made in the law relating to sedition and the control of the press in India

clause of the Indian penal code merely confirmed the old law as judicially interpreted.

The amendment was negatived by 66 to 30.

[16] Iroland (Catholic University Education).

Mr. Dillon moved on the Address (Feb. 16th) an amendment representing that it was the duty of the Government immediately to propose legislation with a view to placing Irish Catholics on a footing of equality with their fellow-countrymen of other religious denominations in all matters concerned with University Education. The hon member said the Roman Catholics did not ask for the endowment of any form of religion The amendment was seconded by Mi Harington and supported by Mi Haldane and Mi T M Healy, but opposed by Mi Grant Lawson and Col Sanderson. Mr Lecky supported the principle of establishing an Irish Roman Catholic University, though he was unable to vote for an amendment which was directed against the Government, and declared that it was necessary to deal with the question in the present overcrowded session. Mr. Baffour said the proposal, he understood, the leaders of the Roman Catholic party in Ireland would be contented with, and which would meet the difficulty of providing higher education for the majority of the Irish population, was one that would not fence round the endowment given to any institution provided in Ireland with any more limitations than exist at the present moment in the case of Trinity could not conceive how any Unionist could support Unionism in all its aspects if he refused to consider the petition or demand carnestly put before them by the representa-Moley (Feb. 17th), speaking for himself alone, assented to the amendment without pld dging himself to any particular scheme until the details should be before him, though his idea was the establishment of a university without tests, restrictions, or limitations, and with a governing body elected by members of the university Mr Wallace (Edinburgh) opposed the amendment Mr Perks said the Noncon formists were opposed to the establishment and endowment of a Catholic university in Iteland Mr Llovd George decply regretted that he was unable to agree to the amendment; but Mr. Lyttleton expressed sympathy with it, and Mr. Carson strongly supported the bringing home of University education to Irish people in a way that would be accepted. The amendment was negatived without a division. Inebriates (see sect 58)

[17] Ireland, Distress in. Mr. Davitt (Feb. oth) moved on the Address an amendment repregovernment that in large districts of Ireland considerable bodies of the population were on the very brink of actual famine, that the temporary rehef measures proposed by the Government had been too long deferred and were entirely madequate, and urging the necessity, first, of applying measures of temporary relief on a large and generous scale to the suffering districts, and secondly, of introducing legisla-tion calculated to avert the constant recurrence of famines in certain districts of lieland."
Mr Hayden seconded, Mi Dillon and Mr.
Healy supported, and Mr. H. Plunkett thought sedition and the control of the press in India some scheme ought to be propounded for the demanded the immediate attention of Parliable lelief of the prevailing destitution. Mr. G. ment. Loid G. Hamilton said the re-diafted Balfour fully acknowledged that the situation

was grave, and called for exceptional measures. The Government had relaxed the conditions of out-relief, and where the provision for destitu-tion was likely to be la ge in the coming spring they would assist the guardians with public money on certain conditions, the principal of which was that the union itself should subscribe some of the necessary expenditure. This system was already at work in five unions. The Government would also introduce a Seed Supply Act, and they had authorised the Congested Districts Board to spend additional money in the poor districts of Mayo and Galway The amendmen was (Feb 10th) rejected by 235 to 153 Mr Dillon (April 22nd) obtained leave to move the adjournment in order to call attention to the "acute distress now existing in certain districts in the west of Ireland, and the failure of the relief measures of the Government." Mr. G. Balfour said it was impossible to point to a single case of death from famine and starvation during the last three or four months The motion was negatived by 904 to 100. Mi Dillon (May 13th) on the vote for the office of Chief Secretary, drew attention to the prevalence of distress in parts of Ireland, observing that the condition of things in the west was a disgrace to the administration of the country. Mi. G. Balfour denied that he was unsympathetic in the matter, he had never denied that distress existed and was acute in certain localities in the west, but the result of his inquiries had never borne out the statements that had been made to him of families being in a state of destitution and semi-starva Relief was given in every case where the relieving officer came to the conclusion that it was necessary. The problem of preventing the recurrence of distress had already been solved to some extent by the Congested Districts Board, to which he had given an additional £10,000, and he hoped next year to do more in the same direction. My Davitt adverted in the same direction. Mi. Davitt adverted (Aug. 9th) to the existence of distress in the west of Ireland, and Mi. Baltour said he hoped we might gradually see in that quarter such a growth in the size of the holdings as might ultimately make these recurring distresses more and more rare, until they finally disappeared

one of taxation, not of areas, but of individuals, irrespective of the place in the United Kingdom where they happened to reside. Taxation was absolutely fair as between all members of the community in whatever part of the United Kingdom they lived. There would be under the linsh Local Government Act anaddition of £15,000 to the existing grants for local services. In the subsequent debate the resolution was supported by Mr. Plunkett, Sir F. Clarke, Col. Saunderson, and Loid Charles Beresloid. Sir W. Harcourt, in supporting the motion, felt that if they were to deal with this matter wisely and justly, they must devise some system which would have regard to the taxable capacity, frist of the people of this country, who were in precisely the same position. After further debate the resolution was (July 5th) negatived by 280 to 144. Included in the minority were Col. Saunderson, Mr. J. Il Campbell, Loid C. Beresloid, Sir Thomas Lea, Mr. Lecky, Mr. Butcher, Mr. Yerburgh, and other Conservatives or Unionists.

19 Ireland (Independent Parliament). Mr. 1. Redmond moved on the Address (Feb. 11th) an amendment representing that the satisfaction of the demand of the Irish people for national self-government is the most urgent of all subjects of domestic policy, and that that demand can only be met by the concession of an Independent Parhament and an I'xecutive responsible for all affairs distinctively Irish.
Sir William Harcourt could not support an amendment which, he said, asked the Liberal party to condemn and repudrate the principle of the supremacy of the Imperial Parliament embodied in the Home Rule Bills of '86 and '93. Mr. Redmand asked too much when he called upon the Liberal party to support a resolution in favour of an Independent Parliament for Ireland Mr. Dillon said he could support the amendment, because the word "Independent parliament for the word "Independent for the word amenment, because the word "Independent" was ambiguous, while adhering loyally to the compromise in Mr. Gladstone's Home Rule Bills. The Nationalist party was still willing to accept a statutory legislature as a compromise and as full compensation for the national demand. Mr. Balfour, in reviewing the debate, remarked that Mr. Redmond and Mr. Dilloy though divergence. Mr Dillon, though disagreeing, intended to vote together, and that Sir W Harcourt and Mr Dillon, though agreeing, were going to vote in separate lobbies. Proceeding, Mr. Baltour remarked that Mr. Dillon and his party were determined that if a Liberal Parliament came in, Home Rule was to be first and foremost, but did the Liberal party, as a whole, accept that policy. Mr Flavin (N) here remarked that it would have to be their policy. marked that it would have to be their policy. Mr Balfour, continuing, said he thought it was possible and indeed probable Mr Clancy (P.) gave it as his opinion that hir W. Harcourt had that night abandoned Mr Gladstone's Home Rule policy. The amendment was negatived by 233 to 65, the minority consisting of Parnellites, Nationalists, and three Radicals; and the Front Opposition bench and the bulk of the unofficial Radicals present voting with the Government in the majority. A number of Radicals left the House just before the division Radicals left the House just before the division was taken (see sect. 21)

number of years Ireland had been grievously and scandalously overtaxed. He was in favour of Sir C. Dilke, on the vote on account (March 4th), further grants for local services. The Chancellor brought forward the subject of dangerous of the Exchequer said the existing system was trades; and in reference to the question of

lead poisoning in the Potteries, the Home Secretary agreed that it was an urgent and pressing one, and stated that the chief inspector was considering with him fresh special rules. The Home Secretary (May 12th) promised Sir C. Dilke an inquiry into the use of yellow phosphorus in match-making. He added subsequently that, although he had power to regulate, he had no power to prohibit its use. On July 13th the Home Secretary informed Mr. Steadman of the steps he was taking and the inquiries he was making with regard to the use of this kind of phosphorus. Mr. Tennant (July 20th) moved to reduce the Home Office Vote in order to call attention to the nadequate steps which had been taken by the Department to deal with lead poisoning in the Potteries and phosphorus-necrosis in the manufacture of matches. This motion was seconded by Sir J. Stirling Maxwell, among the other speakers being Sii C. Dilke and Mr. Drage Mr. Asquith urged that where raw lead was used young persons should not be employed, and that the Home Secretary should bring in a small Bill to so amend the law that special rules, instead of being a matter of arbitration, should lie upon the table of the House for a certain period. Young persons ought, he considered, to be altogether excluded from the pottery industry. Recent disclosures seemed to show that the system of our factory inspection had broken down, and the whole subject should be investigated by a select committee The Home Sccretary, in reply, admitted the disastrous effects of lead poisoning in the Potteries, and, pending the result of the inquiry now going on, asked that they should proceed under the special rules he had laid down. On the question of raising the age, they must proceed gradually, because if they raised it at once they would exclude some thousands of young persons from their present employment. He believed that they were on the eve of discoveries by which the use of raw or fritted lead might be avoided, and with regard to phosphorus-necrosis he hoped they were within measurable distance of applying special rules to that industry as well as to the potteries A motion for the reduction of the Home Office Vote was after further discussion, in which Mr. Woodall and

Mr. Burns joined, rejected by 60 to 52.

[21] Losal Self-Government for the different parts of the United Kingdom. Mr Heibert Roberts moved (March 15th) "That in order to relieve the congestion of business in the Imperial Parliament and in the various Public Departments, and in order to give speeded and fuller effect to local requirements, it is uigently necessary that there should be devolved upon bodies representative of the different parts of the United Kingdom a large measure of self government. Sin Robert Reid in seconding disclaimed absolutely any intention of aiming against the claim of Ireland for prior treatment. Mr. D A. Thomas proposed and Mr. Lough seconded an amendment for the omission of the words "uigently necessary," and the insertion in place thereof of the words "desirable subject to the claim of Ireland for the prior consideration by Parliament of a measure of Home Rule." Mr. Dillon told Radical members that they were mistaken if they fancied that they would improve the prospects of their party, or further the policy of self-government for Scotland and Wales, by putting Home Rule in the back.

ground. Sir H Campbell-Bannerman gave the resolution his cordial support, though he had always recognised the prior claim of Ireland, and still did so. Mr. Balfour said this plan would involve the creation of four legislative assemblies in addition to the Imperial Assembly and Ministry; and human ingenuity could not devise a more absurd plan on which to conduct the affairs of a great country. While the matter was under discussion the House was counted out

[22] Navy. Mr. E Robertson asked (Feb. 15th) whether it had been decided that contractors whose work had been delayed by the lock-ont are entitled to the benefit of the strike clause. Mr. Goschen replied that the time for considering the application of the clause in question was when the work contracted for was completed, and when the question of enforcing or not enforcing penalties for delay had to be decided. Mr. Goschen, in introducing (May noth the Navy Estimates, said the amount asked for, included with the sum taken under the Naval Works Act, reached the colossat total of £25,550,000. There would be a further increase of 6340 men of various ratings. The laboure troubles had put them back seven months in construction, but it did not follow that the contractors would ultimately be so much behind, as they usually allowed themselves a margin of time. In the coming financial year, '98-9, it was proposed to commence 3 battleships, 4 armoured cruisers and 4 sloops, so that, including new orders, the following vessels would be under construction or completing during "98-9: 12 battleships, 16 first-class cruiseis, 6 second-class cruisers, 10 third-class cruisers, 6 sloops, 4 twin-screw gunboats, 41 torpede-boat destroyers, and a royal yacht.
Mr. W. Allen moved "That this House desires to see a fuller provision for manning the Fleet This was seconded by Lord C. Beresford, but negatived after some conversation On March 11th Mr. E. Robertson called attention to the delay in carrying out Admiralty shipbuilding contracts, and asked for a full disclosure as to the way in which the Admiralty had dealt with the contractors who had locked out their men and had failed to complete their contracts, contending generally that the contract covered a strike, but not a lock-out Mr. Macartney replied that notices had been received from several contractors, and it was impossible now to say what course the Admiralty might pursue in regard to a set of circumstances which had not been completed Unless mala fides on the part of the contractors could be shown, it was (according to a judicial decision) immaterial whether the strike clause contained the word "lock-out" or not. Sir W. Harcourt contended that if there were any doubt on a question of this kind it should be carried by the Government to a court of law. The Attorney-General replied, in substance, that it was not until the final payment came to be made that the question would arise as to whether the contract tion would arise as to whether the contract vessels had been completed within the given time or not Mr. Woods brought forward the question of the dismissal of four men from Portsmouth Dockyard. Mr. Goschen justified the action taken by the Admiralty, and declined to assent to the men's reinstatement. Mr. Goschen informed Sir E. Gourley (June 20th) that the Admiralty and extractions to the that the Admiralty had sent instructions to the different ports to the effect that in view of the serious character of the strike among the South

Wales collieries it would be inexpedient to trench upon the reserves of coal for the Naval trench upon the reserves of coal for the Navai Manœuvres, and that therefore the customary partial mobilisation of the fleet would not take place. The Channel squadron and the coast-guard squadron would cruise as usual. We had never been in possession of a larger amount of coal actually in our hands, and this amount of coal actuary nour lands, and mines are measure was taken merely as a matter of prudence. Lord Hood of Avalon (June 23rd) called attention to the "very unsatisfactory condition" of the armament of seven of our first-class battleships, and he recommended that modern guns of greater power and less weight should be substituted for the 110-ton guns which they carry, and that the weight thus saved should be used in protecting their secondary armaments. The Earl of Hopetoun replied that these ships were not entirely out of date, and were capable of meeting on equal terms all but the most modern ships of foreign powers Plans for the reconstruction of vessels of the Admiral class had been prepared, and were under consideration. Mr Goschen (luly 22nd) explained his supplementary Naval Programme The original programme was considered suf ficient on the knowledge possessed by the Admiralty when the estimates for the year were presented, being based upon the principle that we must be equal in numbers and superior in power to the fleets of any two countries. What the Government proposed was not in the slightest sense aggressive, but in view of the steps taken by Russia to strengthen her fleet, he asked the committee to sanction the supplementary programme, to sanction the supplementary programme, consisting of 4 battleships, 4 cruisers, and 12 torpedo-boat destroyers, the construction of which would involve an ultimate expenditure of £8,cco,oco, or, including the hability incurred at the beginning of the session, of £15,000,000 in all on new ships, ai mament and ammunition The payment of this sum was to be spread over a period not exceeding four years; and, as time was required to get the plans out, the Government did not find it necessary to ask for a supplementary estimate this year, though one was to be presented early next session. Sir W. Harcourt complained of the hitherto unheard-of introduction of a financial system under which, after the annual estimate had been presented, and upon a mere surmise that some country or other was about to build more ships, the First Lord came

forward and asked for another £8,000,000
[23] Peers at Elections. Mr. J Lowther
(Feb. 8th) again took objection to the renewal of the sessional order against the interference of peers at elections, on the ground that as long experience had shown that the House was unable to enforce it, it was a meaningless farce to renew it. Mr. Balfour defended the renewal of the resolution, arguing that its abrogation might be regarded as an invitation to peers to take part in elections. The renewal of the take part in elections

order was carried by 319 to 100.

[24] Post Office Employees. Mr. S Woods moved on the Address (Feb. 18th), an amendment embodying certain grievances of Post Office servants which he asked should be rediessed. Mr. Lough seconded Mr. Hanbury, as representing the Post Office, maintained that the rules of the Department were most reasonable. Servants of the Post Office

in order to unduly influence members of Par-liament. The amendment was negatived by 163

[25] Privilege (Guardians and Journalist M.P.). Mr. Patrick ('Brien complained (July 26th) of the proceedings of the Board of Guardians of Mullingar, as reported in the Irish Daily Independent newspaper, on July 22nd, '98, containing threats against Mr. Hayden, M.P., on account of a speech made by him in the House against an amendment having for its object the admission of clergymen to the county and district councils to be established under the Irish I ocal Government Bill. According to the report in the Independent it was proposed and seconded that on that day fortnight the Board seconded that on that day fortnight the Board should take action "in regard to the vile and anticleric speech made by Mi. John P. Hayden last week in Parliament, with a view of having his paper deprived of the advertisement here in future, and himself and his reporter evcluded from our meetings." The House resolved "That the said proceedings of the Mullingar Board of Guardians as reported in the Irish Daily Independent newspaper on July 22nd, '68, constitute a breach of the privileges of this House." breach of the privileges of this House"
[26] South Africa (British) Chartered Company,

and Transvaal Mr Chamberlain informed Mr. 1. Bayley (bcb 22nd), the tall the costs incurred by the Government with 1 gard to the Jameson Raid, and to the subsequent native insurjection in Rhodesia, had been replad by the Chartered Company, with the e option of some very trifling matters still under consideration Replying to Mr O'Kell, and Sir E. Ashmead-Bartlett (April 21st), Mr. Chamberlain said he had not occeived a despatch from President Kruger dealining to recognise the Queen's suzerainty over the Transvaal. Mr. John Ellis (May 6th) called attention to the state of affairs in the territories controlled by the Chartered Company, and to the proposals of the Colonial Secretary for the better government thereof. The hon member condemned the policy of the Company, both commercially and in regard to the natives—Sir R. Reid considered that it was very unwise to allow Mr. Rhodes to resume his seat on the board of the Chartered Company, for Mr Rhodes was the real author of the Jameson Raid Su W Harcourt said Mr. Rhodes would in future be the real administrator of Rhodesia, and he felt no confidence that the scheme of the Government for the administration of the country would render impossible the recurrence of the evils of the M: Chamberlain in reply said if ever it Should be proposed that the property of the Chartered Company should be taken up by the Crown, the Chancellor of the Exchequer would carefully examine the financial proposals that might be made before accepting them. The proposal made by Mr Rhodes for a large extension of the railway through Rhodesia was under consideration, and the offer of Mr. Rhodes for favourable treatment of British goods had been accepted Under the Government scheme any repetition of the mistake made by the Company repetition of the mistake made by the Company in regard to the administration of Rhodesia would be next to impossible. The right hongentleman stated in answer to Mr. Courtney that Sir Marshall Clarke, who had been Commissioner in Basutoland and Zululand, would be the Resident Commissioner in Rhodesia. Replying to Earl Carrington, who had suggested might vote at Parliamentary elections as they Replying to Earl Carrington, who had suggested pleased, but they were not allowed to combine the restoration of their commissions to the

officers who took part in the Jameson Raid, the Marquis of Lansdowne (June 13th), said that of the thirteen officers who were implicated in the raid, eight were discharged at the suggestion of the Attorney General, as having only obeyed the orders of their leaders, while the others were not expelled from the service, but permitted to resign their commissions, receiving the full gratuities to which their services entitled them. The Government were willing to allow that some of these officers might have been, to a certain extent, the victims of circumstances, but could not accept that view in regard to Sir John Willoughby. Nor could they accept it in regard to Colonel Rhodes, who took a very conspicuous part in the proceedings in Johannesburg. The other officers would be appointed to unattached half-pay in the ranks they held when they left the army Captain Coventry, as a militia officer, would be allowed to return to his regiment in his old rank, though at the bottom of the list | Larl Carrington expressed dissatisfaction at the decision of the War Office, arguing that as the chief offender, Mr. Rhodes, had been forgiven, the same Jennency should be extended to his agents. [After Parliament was prorogued, Colonel Rhodes had his commission restored to him.

Supply The resolution of '96, which had been renewed in '97, was (Fcb 21st) re-charted, and worked as successfully as it had done the two previous years. On the last day for committee (Aug. 8th), there were at ten o'clock 30 outstanding votes, and divisions were taken on 16 of them. The report stage of the votes was days of the day of the stage of the votes was the days of the votes was the votes was the votes was the votes of the votes was the votes was

(Aug. 9th) disposed, of shorth, after ten o'clock.

[27] Trawling. Mr Buchanan (March 8th) moved "that it is the importantive fluty of the Government to see that the law with regard to trawling in the waters round the Scottish coasts is properly enforced." Mr. Tomlinson suggested the extension of the resolution to the waters round the "British" coasts, and the Loid Advocate accepting, the resolution as amended was carried by our to 80.

amended was carried by for to 89.

[28] Treason-Felony Prisoners. Mr. W. Redmond moved on the Address (Feb 11th), an amendment representing "that the time has come when the cases of all prisoners convicted under the Freason Felony Act, who are, and have been for many years, undergoing punishment for offences arising out of insurrectionary movements connected with Ireland, may be advantageously reconsidered "This was supported by Mr. W. Abraham (Cork), and also by Loid Chailes Beresford. The Home Secretary said these men were treated in just the same way as other prisoners. The amendment was rejected by 152 to 100. [Some changes were afterwards made in the treatment of life sentences generally, with the result that the sentences of these men came up for revision with others, and all or all but one of them has since been released.]

129) United States and Spain. The wai between these two countries received only a limited amount of public notice in Pailiament. On April 19th Mt. Baltoui informed Mr. Dalziel that the British Ambassador at Washington was, at the end of March, authorised to join with the representatives of other great Powers in a finefully representation to the Government of the United States in favour of peace, provided that he was first of all assured that such representation would be well received and

would be likely to be of use Pauncefote did, in consequence, join in the re-presentation made to the President on April 7th. On April 9th the British Charge d Affaires at Madrid joined the representatives of the other great Powers in a verbal and identical communication, expressing the opinion that the Spanish Government would do well to consent to a suspension of hostilities which might lead to an honourable peace in Cuba. Addressing his constituents at Birmingham (May 13th), Mr. Chamberlain, in the course of the memorable "long spoon speech" (see also sect. 7), remarked that "since the Crimean war the policy of this country has been one of strict isolation. But a new situation has arisen. All the powerful states of Europe have made alliances, and as long as we keep outside these alliances, as long as we are envied by all and suspected by all, and as long as we have interests which at one time or another conflict with the interests of all, we are liable to be confronted at any moment with a combination of great Powers so powerful that not even the most extreme, the most hot-headed politician would be able to contemplate it without a certain 5 nse of uneasiness." The first duty of the Government in the circumstances was to bring all parts of the Empire closer together. The Government had not, Mr. Chamberlain went on to say, neglected that primary duty, and their next duty was to establish and maintain bonds of permanent amity with our kins-men across the Atlantic "Even war itself men across the Atlantic Even was used would be cheaply purchased, if in a great and noble cause the Stars and Stripes and the Union Jack should wave together over an Anglo-Saxon alhance." These remarks producid a strong and deep impression at home, on the Continent, and in the States Officially Great Britain had declared herself strictly neutral in the struggle, but the outspoken sympathy individually of many prominent Finglishmen, coupled with the declared "open door policy of this country with regard to the Chinese ports, brought England and America closer together than they had ever been since before the War of Independence. A War Re-venuc Bill was submitted to the American legislature, containing a clause greatly increasing the American tonnage dues. Several questions regarding this proposal were addressed to Ministers in the Commons, it was the subject of representations at Washington, and on May 24th Mi Curron was able to announce that it had been struck out by the committee of the Senate On June 7th Mr. Curron in toil med Mi Dalziel that negotiations had taken place at Washington for the settlement of all pending questions hetween Great Britain and the United States by reference to a Commission

The text of the proposed arrangements had been despatched from Washington, but had not yet been received by Hei Majesty's Government

This was supplemented (June 10th) by a statement that the subjects it was proposed to refer to the Anglo-American Commission all relate to matters affecting Canada and the States, though some of them are of Imperial as well as of Canadian interest. In the course of a general debate, which was raised in the Commons the same evening (June 10th), Sir C. Dilke contended that Mr. Chamberlain's speech pointed to an alliance with Germany, and gave it as his opinion that any notion of a permanent alliance with Germany against Russia was a-

will-o'-the-wisp. Mr. Curzon said the proposal will-o'-the-wisp. Mr. Curron said the proposal or a treaty of arbitration with the States was not accepted, but it would be accepted at some future time. Although the Venezuela difficulty was not finally composed, it was en a fair process of settlement, and the Behring Sea question was about to be referred to a Commission. Sir W. Harcourt inemarked that if ever the Eastern Obestion was to be settled on a footing favourable to Great Britain, it one was more eager for more friendly relations with the United States than himself. Mr Chamberlain, in reply, said there was no difference of opinion between him and the Prime Minister, and there was solidarity in the Cabinet. The object of the Birmingham speech was not to lay down a policy, but to state the facts and the conditions of the problem. He did not advise alliances any more than he rejected them, but with one exception did say, in the strongest words he could use, that he most carnestly desired close, cordial, and intimate relations with the United States On June 10th it was announced, in answer to Sir G. Baden Powell, that the amount awarded by the Behring Sea Claim Commission was voted on the 13th inst. by a special Bill in the American House of Representatives

[30] West Africa. Among the supplementary estimates submitted for '97-8 was one of for,500, the largest item going to make it up being £730,000 to cover the initial cost of raising, aiming, and maint uning aforce "to be at present employed on the Niger Letritorics" It also included £20,000 for special expenditure for the administration and defence of the northern territories of the Gold Coast Protection torate, and £10,000 in aid of the cost of telegraphs in Lagos, in pursuance of an undertaking given by the Government to bear the cost of constructing the line not only in Lagos but on to Saki and Ogbomosho, and hence to the Niger, and then down the river to Forcados, roughly estimated to cost in all from £22,000 to £25,000 of which £10,000 was taken in 97 8 The estimate of £10,500 was discussed (feb 24th), when Mi. Chamberlain said the Government did not intend that the history of the Gambia and Sierra Leone should be repeated in the history of the Gold Coast and Lagos Germany and especially France had during the last three years carried out military expeditions at an years carried out minuty expeditions at an enormous cost, and had spread all over hinter land to which we had the most undoubted claim. If the expunsion which France had undertaken were allowed to go on without any corresponding expansion on our part, the result would be that the colonies of the Gold Coast and Lagos would be strangled in the same way as the colonies of the Gambia and Sicila Leone had been. The Government sent agents into their hinterland to make treaties with the native chiefs, which they thought would secure them against any foreign competition, but had found that in spite of those treaties France and Germany had not thought themselves precluded from going into those territories and endeavouring to make treaties. Great expeditions had been sent from the French colonies like a fan all over those territories. Accordingly it had been decided to raise a frontier force, which would be put under the command of Colonel Lugard on the Lagos side In regard to this policy the Cabinet were from beginning to end absolutely united. Sir E Grey thought that, to

prevent any wrong impression getting abroad, they ought to support the vote. An amend-ment for the reduction of the vote proposed by Mr. Labouchere was rejected by 234 to 27. Mr. Chamberlain announced (June 14th), that the Queen had approved the appointment of Sir David Chalmers, late Chief Justice of British Guiana, and formerly Chief Justice of the Gold Coast, as a Royal Commissioner to inquire into the circumstances that led to the insurrection in the Sieria Leone protectorate, and generally into the state of affairs in the colony and protectorate Replying to Mr. Knox and Sir C Dilke (June 24th) Mr. Curyon said the fiscal areas mentioned in article IX of the West Africa Convention, shortly summarised, include the lvory Coast and interior up to a point upon the oth parallel, the Gold Coast and interior up to the 11th parallel, with a projecting triangle, the apex of which is Wagadegree Dahomev and its interior up to the same parallel, and Lagos and the Niger territories "as defined in articles II, III., and IV of the Convention" French goods imported by way of the Ivory Coast, Senegal, or Algeria might be subject to any duty that the French Government chose to impose, but in the case of the Ivory Coast, which falls within the present area, such duties must be identical with those imposed upon British goods. Under the new treaty it would be goods impossible to give Canada, and other colonies which might decide to admit British products which might decide to admit British products on specially favoured terms, any reciprocal preferential advantages in the colonies of the Gold Coast, Lagos, and in the Niger Coast Protectorate, without extending the same advantages to the French, and, as a consequence, to all other powers with which most-favoured nation treated, existed Mr. Curzon informed Mr. C. McArthur (July 181), that communications had been passing between the Government and the Royal Niger Company with a view to the assumption by the former of the administration littleffer our red on by the Comadministration in the rocarried on by the Company In reply to a question by Mi Hedderwick (July 15th) on the point whether the terms of the Niger Convention did not preclude the French from installing Government commissioners and troops within the enclaves which it was proposed to lease to the French proof the Lower Niger, Mr. Carrens and the land upon the Lower Niger, Mr Curzon said the land which would be leased, if desired, to the French Government would by the lease which formed an annex to the Convention, be subject to the laws for the time being in force in the British Protectorate of the Anger districts.

[31] West Indies. Mr Chamberlain made

[31] West Indies: M. Chambellain made (March 14th) a statement on a supplementary vote of 1210,000 which was made up of 290,000, a free grant to West Indian islands in aid of floating deficits, and of 130,000 to enable the island Governments of St Vincent and Dominica to make certain roads and to settle labourers on lands. The right hon gentleman had previously explained (March 7th) that the above sums did not cover the whole ground, being indeed regarded by the Government as relatively a small matter. Speaking on March 14th, the right hon, gentleman said the Government were engaged in negotiations with the United States and Canada, and hoped these negotiations might result in a reciprocity arrangement between those countries and the West Indian rolonies for West Indian products, though he was unable then to state that the

negotiations had made much progress. Con siderable concessions were asked for by the United States in return for a reciprocity arrangement, and he was not sure that it would be possible for the West Indies to submit to the sacrifices which they were called upon to make. The Crown had in Dominica some 90,000 acres of land suitable for small cultivators, and the intention was to open that land by the construction of roads. An amendment to omit the item in aid of deficits was negatived by 236 to 78, and the further amendments of Mi. Labouchere to omit the item for cost of making roads was, after the proposed grant had been justified by Sir E. Grey, defeated by 222 to 46 Mr. Chamberlain (Aug. 2nd), made a further statement, in proposing a supplementary grant of £41,500 for the West Indian Islands, of which £20,000 was a grant in and of local revenues, the balance being the salaries and expenses of an agricul-tural department, grants in aid of botanic gardens and agricultural instruction experiments, steamer subsidies, and the formation and working of central sugar factories. He said that the negotiations with the United States with regard to a reciprocity arrangement and in connection with a movement for the abolition of bounties had not yet resulted in any conclusive settlement, though he was not without hope that they might do so I he proposals of the Government were based upon the report of the Royal Commissioners. Agricultural Department would be placed under the direction of Dr. Morris, now assistant director at Kew. The steamer subsidy, for ant director at Kew. The steamer subsidy, for improving the means of communication between the islands and the markets, was \$500 in the present year, but would be probably in the future \$20,000 a year. It was proposed to establish direct steamship communication between the West Indies and Canada and New York, and if possible between Jamaica and London. They had found the United States in the present negotiations on the surgar question very had begrouners undeed. the sugar question very hard bargainers indeed, but Canada had met us in a spirit of liberality which the Dominion had always shown in so remarkable a way. It was proposed to arrange with private capitalists in this country to advance £750,000 for the purpose of a central sugar factory in each of the three smaller islands, a guarantee being given by this country of 3 per cent, interest for ten years Mr. Labouchere moved to reduce the vote of £30,000, but this was negatived by 178 to 40, the vote being then agreed to.

ACTS AND BILLS.

The following is a list of the public Acts of the session of '98'. Royal assent March 29th—Army (Annual) Act, '98 (6r Vict Ch. 1), Registration (Ireland) Act, '98 (6r. 2), Consolidated Fund (No. 1) Act, '98 (Ch. 3); 103al assent April 1st—Greek Lean Act, '98 (Ch. 4), Public Buildings Expenses Act, '98 (Ch. 5); 703al assent May 23rd—Special Juries Act, '98 (Ch. 6), Bail Act, '98 (Ch. 7); 103al assent luly 1st—Sheriff's Tanure of Office (Scotland) Act, '98 (6r & 62 Vict. Ch. 8), Reserve Forces and Mintis Act, '98 (Ch. 9); Finance Act, '98 (Ch. 10), Buffragan Bishops Act, '98 (Ch. 12), East India Lean Act, '98 (Ch. 12), Fast India Lean Act, '98 (Ch. 12), royal assent July 25th—Marchant Shipping (Liability and Shipowars) Act, '98 (Ch. 14),

Societies' Borrowing Powers Act, '98 (Ch. 15 Canals Protection (London) Act, '98 (Ch. 16 Solicitors (Ireland) Act, '98 (Ch. 17), Post Offic (Guarantee) Act, '98 (Ch. 18), Poor Law Union Associatin (Expenses) Act, '98 (Ch. 19), Ex Officio Justices of the Peace (Sociland) Act, '98 (Guarantee) Act, '98 (Ch. 18), Foor Law Union Associatin (Expenses) Act, '98 (Ch. 19), Ex Officio Justices of the Peace (Soctland) Act, '9 (Ch. 20), Poor Law (Soctland) Act, '98 (Ch. 21), Statute Law Revision Act, '98 (Ch. 22), Union an Benefices Act, '98 (Ch. 23), Greenwich Hespita Act, '98 (Ch. 25); 1 oyal assent Aug. 2nd—Companies Act, '98 (Ch. 26), Lle of Man (Gustoms Act, '98 (Ch. 27), Euseols, Periwinkles, and Gocklet (Ireland) Act, '98 (Ch. 28), Leoomotives Act, '96 (Ch. 27), Euseols, Periwinkles, and Gocklet (Ireland) Act, '98 (Ch. 28), Leoomotives Act, '96 (Ch. 27), Pauper Ohidren (Ireland) Act, '96 (Ch. 31), Oon solidated Fund (No. 2) Act, '98 (Ch. 32), Telegraph (Money) Act, '98 (Ch. 33), Rivers Pollution Prevention (Border Gouncils) Act, '98 (Ch. 34), royal assent Aug. 22th—Vexatious Actions (Soctland) Act, '98 (Ch. 35), Criminal Evidence Act, '98 (Ch. 37), Parish Fire Engines Act, '98 (Ch. 38), Vagrancy Act, '98 (Ch. 39), Circunt Clerks (Soctland) Act, '98 (Ch. 40), Frison Act, '98 (Ch. 41), Trusts (Beotland) Act, '98 (Ch. 42), Metropolitan Poor Act, '98 (Ch. 43), Merchant Shipping (Mercantile Marine Fund) Act, '98 (Ch. 41), Metropolitan Poor Act, '98 (Ch. 42), Metropolitan Oommons Act, '98 (Ch. 43), Merchant Shipping (Mercantile Marine Fund) Act, '98 (Ch. 44), Motropolitan Poor Act, '98 (Ch. 45), Revenue Act, '98 (Ch. 46), Expiring Laws continuance Act, '98 (Ch. 45), Revenue Act, '98 (Ch. 46), Expiring Laws continuance Act,

The above list does not include a large number of local Bills which became law during the session Particulars of some of those promoted by the London County Council or otherwise affecting London will be found in sect 66. The measures mentioned in the following paragraphs, which were either intro-duced or afterwards taken charge of by the Government, have prefixed to them an . When a Bill was withdrawn or dropped, it is so stated, and cases in which the proceedings upon a measure lapsed are notified by the mark (-). The day on which total assent was given is signified by the small letters r.a; and the date upon which the Act came or is to come into operation is also notified, though it should be thderstood that where no date is set down the Act came into operation immediately after it was passed. In the absence of indication in the title or contents of the Bill the capital letter E. o. S. or I. is used to signify that the measure is specifically limited to a part of the United

Kingdom.
[32] Adulteration Bills. Two measures on this subject were laid before the Commons: one by M1. Kearley, the Adulteration (Food Products mi. Kearicy, the Adulteration (Food Products Bill, which contained 4c clauses, and proposed to consolidate and amend the law relating to the sale of food and drugs; the other by Mr. Chaplin, the *Agricultural Products, etc. (Adulteration) Bill, which contained to clauses, and was intended to make better provision against the adulteration of certain articles of agricultural and horticultural produce. Mr. Kearley could find no opportunity of discussing his Bill; and Mr. Chaplin's Bill was not introduced until luly 22nd, when he stated that the only condition upon which progress could be made with it was that it should be wholly uncontentious. Withdrawn July 28th.

[33] Aliens. In moving second reading (May 23rd) of a Bill to regulate the immigration of aliens, the Earl of Hardwicke stated that the measure reproduced the provisions contained in the Bill submitted by Lord Salisbury four years ago, so far as they related to the re-striction of the immigration of aliens whose presence in this country would be injurious lt enabled ports in the United Kingdom to be designated in which an inspector would be empowered to board any vessel arriving with immigrant passengers and prohibit the landing of any alien "who in his opinion is either an idiot, insane, a pauper, a person likely to become a public charge, or a person suffering from any dangerous, contagious, or infectious disease" (clause 3). The Earl of Dudley supported the broad principle of the Bill. Lord Heischell broad principle of the Bill. Lord Herschell expressed serious doubts whether in ots Prime Minister spoke in favour of the principle of the Bill, second reading of which was carried by his to 19. An amendment by Earl firety to omit from the inspector's powers that of prombiting the landing of an alich who was a pauper, or a person likely to become a public charge, was (lune such) detacted by 79 to 72. The Bill was considered, and amended by the standing committee, and from the amended clause 3 Lord Herries (July 5th) proposed to omit the added power to prohibit the landing of a person without means of support, but this proposal was defeated by 86 to 30. Bill sent to Commons (-).

[34] Allotments (London) Bill was introduced by Earl Carrington, the object being to enable the London County Council to acquire land and let it for allotments. The Bill was opposed

[35] *Attendance at School (Sootland) Bill was introduced by Lord Balfour Under the present rules as to school attendance in Scotland, scholars leave school at an unduly early age, when the effects of such education as they have previously obtained are not likely to be permanent. In order to provide for their longer continuance at school the Bill proposed that every school board might from time to time, with the approval of the Scotch Education Department, make by elaws to have effect within its district for all or any of the purposes following —(1) Prescribing (a) a higher minimum age, or (b) the passing of a higher standard, or (c) a higher minimum age and the passing of a higher standard, than is required, as the condition of the pattial or total exemption, as the case may be, of children not more than fourteen years of age from the obligation to attend school, by or in pursuance of any Act of l'arliament regulating the education of children or their employment in labour; (2) Revoking or altering any bye-law previously made. Bill passed Lords, withdrawn in Commons, July 28th. [36] 'Bail Act, '98 (6) Vict., ch 7—r.a. May 23rd). The preamble recites that accused

persons are sometimes kept in prison for a

long time on account of their inability to find sureties, although there is no risk of their absconding, or other reason why they should not be bailed, and it is therefore expedient to amend sect 23 of the Indictable Offences Act. 48; and the measure enacts that where a justice has power, under sect 23 of the statute in question, to admit to bail for appearance, he may dispense with sureties if, in his opinion, the so dispensing will not tend to defeat the ends of justice

[37] Benefices Bills. Two measures with regard to the transfer and exercise of Church Patronage and the amendment of the Pluralities Acts were introduced to the Commons of them was brought forward by Mr Lyttelton, who, when moving second reading (March and), stated that the object in view was to minimise the chances of having a bad parson appointed, and to increase the chances of the appointment of a good one. The Bill would extend the right of parishioners to object to unfit persons, and would slightly increase the power of a bishop to refuse to institute unsuitable persons, while it would also enable the bishop to get iid of a parson who had proved himself unfit. The Bill would also abolish the sale of next presentations altogether Mi Balfour stated the Government altogether Mr Ballour stated the Government measure was based upon, broadly speaking, the same ground as this Bill. After some discussion, second reading of the Bill was agreed to, and it was referred to the sanding committee on law. Mr. Ballour introduced the Government measure, Benchices (No. 2) Bill, on the following day (March 3rd), and second reading was taken on March 7th, Mr. Balfour amplicituding the second teaching was taken on March 7th, Mr. Balfour remarking in course of the discussion that the prohibition of the sale of advowsons was a question of vera great complexity, and expressing the opinion that this Bill was as far as practical statesmen dealing with the subject could go. An amendment for the rejection of the Bill, which was proposed by Mr Brynmon Jones and second to by Mr II S Foster, was negatived by 243 to 57, and the Bill referred to a standing committee on law, who took it as the basis of their proceedings and reported it with amendments on April 1st Mr Lyttelton's Bill was reported without amendment

On the Government Bill being considered as amended (June 16th), Mr. H. S. Foster proposed the rejection of the measure, objecting strongly to the Bill because in his view it proposed to confiscate private rights without compensation. The amendment was seconded by Mr Samuel Smith, who drew attention " to the prevalence Smith, who drew attention "to the privatence of Roman Catholic practices in the Church," and contended for legislation in restraint of doctrines and practices which he said were now so prevalent amongst the clergy. Sir W. Harcourt, who afterwards spoke, said an allegation had been made, and he believed it was well founded, that there existed in the Church of England a conspiracy to overthrow the principles of the English Reformation If they were going to deal with the question of institution to a benefice, was there any ground upon which institution ought to be refused stronger than that of perjuiy on the part of a priest who had taken an oath which publicly and secretly he was violating? He had seen no disposition whatever on the part of the bishops to discourage the appointment and promotion of persons by whom these practices were followed. It was the duty of the House to see that there should be some security against

the principles professed by the Established Church being deliberately violated in a secret and dishonourable manner. Mr. Balfour, in course of his reply, expressed regret that there were members who were willing to sacrifice the certain reform which the Bill contained in the hope that they might have at some future time a measure carrying out other objects, which, however desirable in themselves, were He did not complain of Mi Smith and Sir W Harcourt for taking advantage of this oppoitunity to raise controversies concerning ritual in certain London churches, but he did blame them for making the opportunity for a dis-cussion upon certain questions of ritual a ground for rejecting a Bill which was intended to deal with an entirely different class of grievances. The amendment was rejected by 220 to 75. A number of amendments was afterwards discussed at this and subsequent sittings of the House Among them was a proposal of Mi. Bryn Robeits that only Welsh-A number of amendments was speaking clergymen should be instituted to certain benefices in Wales, which was rejected by 185 to 99. An amendment of Mr Carvell Williams to abolish the sale of advowsons as distinguished from next presentations was defeated by 182 to 74. Mr. Samuel Smith (June 21st) moved an amendment giving a bishop power to refuse to institute or admit to a benefice a presentee who had within the five years next preceding his presentation taught doctrines contrary to or inconsistent with the 99 Articles or participated m ecclesiastical practices not authorised by the Book of Common Prayer. The present Bill ought, he said, to be used as an instrument to put a stop to a state of things which, if it went on much longer, would destroy the National Church The Attorney-General gave a blank demal to the allegation that many of the bishops were steeped to the lips in itualistic practices and held opinions equivalent to the doctrines of the Roman Church. This measure never of the Roman Church arms measure never purported to interiere with the power of the bishops with regard to ritual and doctrine Offenees connected with ritual and doctrine could now and ought to be dealt with as an objection to institution. Sit W. Harcourt said it could not be denied that there were hundreds and thousands of the ordained clergy of this country who were deliberately endeavouring to overthrow the law of the Retormed Church of England. The children of Protestant parents were computed by clergymen who not only taught them lessons which were abhorrent to the religious convictions of their parents, but who were themselves living examples of dishonour and of falsehood, who demortalised all those amongst whom they dwelt, and whose existence was in itself a living lie. Mr Balfour denied that he had endeavoured to minimise the importance of this subject He had denied that the evils complained of existed to anything like the extent that the right hon gentleman supposed. As far as any evidence that had come before him showed, the deplorable practices referred to were limited in their extent, and the clergy who regarded them with approval formed but a very small minority of the clergy of the English Church. The amend-ment, if carried, would not have the slightest effect in checking ritualistic practices. Mr. R. Wallace (Edinbuigh) characterised the amend-

popularity by raising a "No Popery" cry. The amendment was rejected by 215 to 103. On the third reading (June 28th), Sir W. Harcourt said the Act of Uniformity was the Act of Settlement of the Established Church. If the clergy of this country desired to be delivered from obligations which they might conceive to be oncrous and irksome, they could be discharged only by mixture an end to the compact charged only by putting an end to the compact by which they held their preferments and their offices. As far as the present measure reformed onices. As iai as the present measure retorned abuses in the sale of patronage and prevented unfit men from obtaining benefices he had nothing to say against it, but its exclusion of misconduct in respect to doctrine and practice seemed to him to be wholly illogical and irrational Mi. Balfour retorted that Sir W. Harcourt had sought to avert the course of national legislation in order to arouse in the country a feeling which he admitted had much to justify it, but which nothing in the Bill touched even remotely, and with which the Bill ought not to be brought even remotely into connection. He repeated that the great into connection. He repeated that the great majority of the clergy were loyal to the Church of England, as understood by them and by the general body of the laity Extreme ritualistic prætices were not only illegal but highly injurious to the Church. At the same time it should be remembered that the Church had been a great blessing to this country, because it was tolerant of wide differences of opinion within its boiders. He could never be a party within its boilders. He could never be a party to driving out of the Church any of those who obeyed the existing law, nor did he think anybody ought to desire, under any guise whatever, to nariow the boundaries of the Church Third reading was agreed to Second Church Third reading was agreed to Second reading taken in Lords July 7th, the Archbishop of Canterbury expressing approval of the measure, and the Maiquis of Salisbury in replying to some observations by the Earl of Kimberley as to practices on the part of some of the clergy that had excited a feeling of disquietude, observing that he believed the danger indicated was a real danger, but he did not think it prevailed largely, and many of the things about which excitement had arisen were of rather a trivial character. Bill passed through committee July 18th Considered as amended July 22nd, when further amendments amended July 22nd, when further amendments were made, the provision being added to clause it iclative to fees paid in respect of proceedings in the court under the Act. Further amendments made on third reading (July 28th), and Bill returned to Commons Lords amendments considered and agreed to

the teligious convictions of their paients, but who were themselves living examples of dishonour and of falsehood, who demoralised all those amongst whom they dwelt, and whose existence was in itself a living lie. Mr Balfour denied that he had endeavoured to minimise the importance of this subject. He had denied that the evils complained of existed to anything like the extent that the right hon genitleman supposed. As far as any evidence that had come before him showed, the deplorable practices referred to were limited in their extent, and the clergy who regarded them with approval formed but a very small minority of the clergy of the English Church. The amendament, if carried, would not have the slightest effect in checking ritualistic practices. Mr. R. Wallace (Edinburgh) characterised the amendament as a contemptible device to try to attain

in land of not less than 100 acres situate in the parish in which the benefice is situate or in an adjoining parish and belonging to the same owner as the advowson; and any person who offers any right of patronage for sale by auction in contravention of this section, or auction in contravention of this section, of who bids at any such sale, shall be liable, on summary conviction, to a fine not exceeding £100. (3) Any agregment for any exercise of a right of patronage of a benefice in favour or on the nomination of any particular person, and any agreement on the transfer of a right of patronage of a benefice—(a) for the re-transfer of the right, or (b) for postponing payment of any part of the consideration for the transfer until a vacancy or for more than three months, or (c) for payment of interest until a vacancy of for more than three months, or (d) for any payment in respect of the date at which a vacancy occurs, or (e) for the resignation of a benefice in favour of any person, shall be invalid. For the declaration set forth in the Clerical Subscription Act, '65, is substituted one scheduled with this Act, setting forth, among other things, that the presentee has not with respect to the presentation been party or privy to any agreement which is invalid under this Act; and it is made an offence to knowingly make any false statement in the declaration, or to commit any breach of the promissory part of his declaration. The expression "transfer" in this section is defined to include any conveyance or assurance passing or creating any legal or equitable interest inter vivos, and any agreement for any such conveyance or assurance, but shall not include (a) a transmission on marriage, death, or bankruptcy, or other wise by operation of law, nor (b) a transfer on the appointment of a new trustee where no beneficial interest passes.

Under sect. 2 a bishop may refuse to instiother sect. 2 a dishop may lettuse to institute or admit a presentee to a benefice (a) if, at the date of the vacancy, not more than one year has elapsed since a transfer, as defined by the first section of this Act, of the right of patronage of the benefice, unless it be proved that the transfer was not effected in view of the probability of a vacancy within such year, or (b) on the ground that at the date of presentation not more than three years have clapsed since the presentee was ordained deacon, or that the presentee is unfit for the discharge of the duties of the benefice by reason of physical or mental infirmity or incapacity, pecuniary embairassment of a serious character, grave misconduct or neglect of duty in an ecclesiastical office, evil life, having by his conduct caused grave scandal concerning his moral character since his ordination, or having, with reference to the presentation, been knowingly party or privy to any transaction or agreement which is invalid under this Act. A bishop shall not collate, institute, or admit any person to a benefice until the expiration of one month after notice, in the prescribed manner, that he proposes to collate, institute, or admit such person has been served on the churchwardens of the parish, who shall publish the notice in the prescribed manner. There is under sect. 3 an appeal against refusal to institute on any ground included in the pre-vious section, or of unfitness or disqualification of the presentee otherwise sufficient in law, except a ground of doctrine or ritual, to a court consisting of the archishop of the province and benefice with cure of souls of a judge of the Supreme Court, who is to decide all questions of law and find as to any fact from that date be presentative.

alleged as reason of unfitness or disqualification. and his decision on such questions of law and his finding as to any such fact shall be binding on the archbishop, who shall thereupon, (i) if the judge finds that no such fact sufficient in law exists, direct institution or admission, or (ii) if the judge finds that any such fact sufficient in law exists, decide if necessary whether by reason thereof the presentee is unfit for the discharge of the duties of the benefice and determine whether institution or admission ought, under the circumstances, to be refused. Certain parts of statutes are repealed which prevent the Universities of Oxford and Cambridge from presenting or nominating to the benefices and livings therein mentioned persons already holding any benefice with cure of souls, provided that nothing be done in contravention of the other Acts regulating the holding of benefices in plurality.

A change is made in the constitution of the commission under the Pluralities Acts; and where a commission appointed under those Acts and this reports that the ecclesiastical duties of a benefice are inadequately performed, and that this is due to the negligence of the incumbent of the benefice in the performance of those duties, the bishop, if he thinks the appointment of a curate desirable, shall himself appoint a curate or curates, without requiring the incumbent to do so, and may also, it in his opinion the adoption of such a course is expedient in the interests of the benefice, inhibit the incumbent from performing all or any of those duties The incumbent may appeal against the appointment of a curate by the bishop under this section and against any such inhibition to the court, constituted under this Act, within one month after such appointment or the 15 auc of such inhibition. On any such appeal the judge shall determine whether such appear the judge shair descrimine whether the incumbent has been negligent as aforesaid, and the archbishop shall thereupon—(i) if the judge finds that the incumbent has not been negligent as aforesaid, resend the appointment and inhibition, it any, or (ii) if the judge finds that the incumbent has been negligent as aforesaid, decide whether by reason thereof the said appointment should have been made, and also whether the incumbent should be inhibited from performing any and what ecclestastical duties of his benefice, and shall give judgment accordingly, and that judgment shall be final. And this section of the Act provides that as regards incumbents presented or collated after the commencement of the Act, in certain cases of sequestration the benefice is to become There is a power to make rules under the Act (clause 11), and in framing them regard is to be had to making the procedure and practice as simple and inexpensive as possible. The fees paid in respect of proceedings in the court under this Act are to be paid over to the common fund of the Ecclesiastical Commissioners, who shall, out of such common fund, defray all the expenses of and incidental to the sittings of the court and the remunera-tion of its officers, and all expenses which are necessarily incurred in the execution of this Act in such proceedings provided that no portion of any fund destined for the relief of necessitous incumbents shall be applied to the payment of the aforesaid expenses. Every benefice with cure of souls which at the commencement of the Act is donative shall as

[39] Canals Protection (London) Act, '98 (61 & 62 Vict., ch. 16-r.a. July 25th-commences Jan 1st, '99), was introduced by Mr. Holland. Within the administrative county of London within the administrative county of London the local authority may by written notice require a canal company to protect dangerous places on canals, and if the company refuse to comply with any such requisition, a court of summary jurisdiction may by order on complaint by the local authority determine, after due inquiry, whether any such danger exists, and whether the works required are necessary and such as the company may be reasonably required to carry out, and determine whether the costs for any such works and the future maintenance thereof shall be borne by the local authority or the company, or in what proportions between them. If the order be not complied with within the time limited, the local authority may execute the works necessary for compliance with the order, and may recover the costs thereof from the canal company, so far as payable by them Any order is subject to appeal to quarter sessions
[40] *Colonial Loans Bill was introduced (July

[40] *Colonial Loans Bill was introduced (July rath) with the object of creating a Colonial Loans Fund on the model of the Local Loans Fund for the purpose of granting loans to Crown colonies out of moneys to be raised either by the issue of Colonial guaranteed stock or by the issue of Colonial guaranteed stock or by the issue of bonds. When a colony required a loan, application would be made to the Colonial Secteary, and would be considered by him and the Treasury, if they were prepared to recommend the loan to Parliament, the rate of interest and the term of the loan would be fixed by them, and the colony would be required to pass an ordinance imposing a charge upon its revenues for interest, management, and repayment of capital by instalments. Full Parliamentary sanction would be required in every case. The resolution upon which the Bill was based was agreed to July 18th, and the Bill itself brought in on the following day

Withdrawn July 30th.

[41] Colonial Marriages (Deceased Wife's Sister)

Bill was int oduced by Lord Strathcona and
Mount Royal, and proposed that every marriage
between a man and his deceased wife's Sister
heretofore or hereafter lawfully and vahidly
contracted in any British colony, dependency,
or possession should be deemed to have been
and to be lawful and vahid for all purposes
within the United Kingdom, with a saving for
rights existing at the passing of the Act. Second
reading was moved July 5th, whereupon rejection of the measure was proposed by the
Lord Chancellor. The Bill was supported by
Lord lames of Hereford, Viscount Esher, and
the Earl of Kimberley, and opposed by Viscount
Knutsford, second reading being in the result
carried by 129 to 46. Among the supporters
of the Bill were the Prince of Wales, the Dukes
of Devonshire, Bedford, Fife, Grafton, Portland,
and Westminster, the Marquises of Lansdowne and Ripon, Earls Carrington, Cowper,
Derby, Kimberley, Northbrook, Portsmouth,
Ravensworth, Spencer, Viscount Wolseley,
Lords Brassey, Burton, Farquhar, Glenesk,
Heneage, Lawrence, Mount-Stephen, Norton,
and Plunket. The minority against included
the Archbishops and seven Bishops, Viscount
Cross, the Dukes of Norfolk, IRichmond, and
Rutland, the Marquis of Salisbury, Viscount
Llandaff, and Lord Balfour. In committee

parties to any such marriage must be domiciled in the colony where it was contracted. Bill read a third time and sent to Commons July a8th (=).

[42] Common Employment Abolition Bill was introduced by Sir Arthui Forwood, and proposed to abolish the defence of common employment in proceedings under the Employers' Liability Act, and to extend the liability to all cases arising from negligence by a fellow-servant, whatever his status in the employ. The measure did not apply to any of the occu-pations to which the Workmen's Compensation Act, '97, applies, but the second of its clauses permitted employers whose trade is not included in the Act to engage their workmen subject to its terms. Mr. Asquith supported the Bill as far as it went, though he regarded it as falling as it went, though he regarded it as lanning semously short of the requirements of the case. The Home Secretary remarked that if the House desired to read the Bill a second time the Government would not object, though their own view was that the time was inopportune to raise important questions which were experimentally, and he hoped more than experi-mentally, settled by the Act of '97. Sir A. Forwood announced his willingness to withdraw in committee the second clause of the measure. On a division the second reading was carried by 215 to 59. Considered in committee June 15th, when on the motion of Sir A Forwood words in clause 1 which limited the operation of the measure to proceedings under the Employers' Liability Act were omitted. An amendment of Mr. Renshaw for the omission of words whose object was to the omission of words whose object was to prevent contracting out of the Bill was supported by the Attorney-General, but defeated by 134 to 104. Some amendments were made in the Bill, but it was eventually withdrawn.

[43] Companies Act, '98 (61 & 62 Vict, ch. 26—1.4 Aug. 2nd), was introduced by Sir John Lubbock, and enables the court to grant tellef for non compliance with the Act of '67, where are shaded as fully or partly noid up.

(43) Companies Act, '98 (6) & 62 Vict, ch. 26—r a Aug. 2nd), was introduced by Sir John Lubbock, and enables the court to grant tellef for non compliance with the Act of '67, where any shale scredited as fully or partly paid up have been issued for a consideration other than cash, and at or before the issue of such shales no contract or no sufficient contract is filed with the Registrar and Joint Stock Companies, if the court is satisfied that the omission to file was accidental or due to inadvertence, or that for anyleason it is just or equitable to grant rehef. The object of the measure was stated to be to remove doubts caused by recent decisions of the courts, whether large numbers of shares honestly issued and taken up as fully paid or partly paid in manner intended.

[44] *Companies Bill, to amend the Companies Act, was reintroduced by the Earl of Dudley, and releried to a select committee, which further continued the inquiry that was commenced in '96 and carried on through '97, and reported the evidence taken this session (Aug. 8th), with a recommendation that if the Bill be again introduced into their Lordships' House a

Derby, Kimbeiley, Northbrook, Portsmouth, Ravensworth, Spencer, Viscount Wolseley, Lords Brassey, Burton, Farquhar, Glenesk, Heneage, Lawrence, Mount-Stephen, Norton, and Plunket. The minority against included the Aichbishops and seven Bishops, Viscount Cross, the Dukes of Noifolk, Richmond, and Rutland, the Marquis of Salisbury, Viscount Llandaft, and Lord Balfour. In committee

calculated to be injurious to the work of the Board, and rejected on second reading by 223

[46] Copyright. Two Bills on this subject were laid before the House of Peers, one by Lord Monkswell, proposing to amend the law relating to copyright in periodical works, lectures, abridgments, and otherwise; the other by Lord Herschell, which was the measure framed by the Copyright Association as representing the interests of publishers as well as authors. Both were read a second time, and referred to a select committee, which took much interesting evidence, and reported (July 20th), stating that they had been unable to complete the inquiry, and recommending that if a Bill upon the subject be again introduced into their Lordships' House a committee be again appointed

[47] Corn Sales Bill. Mr Rankin proposed (April 20th) second reading of a Bill to provide for greater uniformity in the weights and measures used in the sale of coin Future measures used in the saile of coin Future dealings were to be by weight only, and by the hundredweight of 112 lb, except in the case of any less quantity than the hundredweight, to which the Bill did not apply. The President of the Board of Agriculture suggested that, as the proposal to make the unit the hundredweight of 112 lb. met with much opposition, the second

of 112 16. Her with much opposition, the second reading should not be pressed. On a division the Bill was rejected by 150 to 76

[48] Court of Criminal Appeal Bill was introduced by Mr Pickersgill, and proposed the creation of a court of criminal appeal, to which there would be a right of appeal in capital cases and an appeal by leave of the court in non-capital cases where there had been a conviction on indictment. The Home Secretary could not on indictment. support a measure which gave this general right of appeal in criminal cases. Mr Asquith supported the second reading on the general principle that a court of appeal is desirable in certain cases, though wi hout committing himself to the machinery of this particular matter.

The Bill was rejected by 180 to 116
[49] *Criminal Evidence Act. '98 (61 & 62 \) ict ch 36-1 a Aug 12th-commences Oct 12th, '98
-E and S) This important measure, which enables (subject to certain provisoes) every person charged with an offence, and the wife of husband, as the case may be, of the person so charged, to give evidence for the defence, was at length placed on the statute book. It was presented by the Lord Chancelloi Feb 10th, and after being amended in some respects was sent arter being amended in some respects was sent to the Commons, where it was considered on second reading, April 25th Mi Pickersgill proposed the rejection of the measure, which was seconded by Mr J. L. Morgan. Mi. Lyttel ton, Mr. T. IM. Healy, Mr G. Bowles, Mi. Atheries Jones were among the other opponents of the measure, but it received the support of Sir R. Reid and Sir E Claike, among others Second reading was in the result carried by 229 to 80 In committee an amendment of Mi. Bowles proposing that children under the age of 16 should not be competent to give evidence on their own behalf was negatived by 159 to 51, and amendments limiting the operation of the Bill to charges on indictment and to offences

Ireland from the scope of the measure was the treiand from the scope of the measure was the subject of an animated discussion, after which it was withdrawn. Some amendments were made on the report. The rejection of the measure was proposed on its final stage (July 26th), but the third reading was agreed to without a division. Subjoined are the leading

Provisions of the Act.—
Sect 1 "Every person charged with an offence, and the wife or husband, as the case onence, and the whe or nusband, as the case may be, of the person so charged, shall be a competent withess for the defence at every stage of the proceedings, whether the person so charged is charged solely or jointly with any other person. Provided as follows.—(a) A person so charged shall not be called as a person so charged shan not be called as a witness in pursuance of this Act except upon his own application (b) The failure of any person charged with an offence, or of the wife or husband, as the case may be, of the person so charged, to give evidence shall not be made the subject of any comment by the prosecution (c) The wife or husband of the person charged shall not, save as in this Act mentioned, be called as a witness in pursuance of this Act except upon the application of the person so charged (d) Nothing in this Act shall make a husband compellable to disclose any communication made to him by his wife during the marriage, or a wife compellable to disclose any communication made to her by her husband during the marriage (e) A person charged and being a witness in pursuance of this Act may be asked any question in cross-examination notwithstanding that it would tend to criminate him as to the offence charged (f) A person charged and called as a witness in pursuance of the Act shall not be asked, and if asked shall not be required to answer, any question tending to show that he has committed or been convicted of or been charged with any offence other than that wherewith he is then charged, or is of bad character, unless—(i) the proof that he has committed or been convicted of such other offence is admissible evidence to show that he is guilty of the offence wherewith he is then charged, or (ii) he has personally or by his advocate asked questions of the witnesses for the prosecution with a view to establish his own good character, or has given evidence of his good character, or the nature or conduct of the defence is such as to involve imputations on the character of the prosecutor or the witnesses of the prosecution, or (iii) he has given nesses of the prosecution, of (iii) he has given evidence against any other person charged with the same offence (g) Every person called as a witness in pursuance of this Act shall, unless otherwise ordered by the court, give his evidence from the witness box or other place from which the other witnesses give their evidence (h) Nothing in this Act shall affect the provisions of sect 18 of the Indictable Offences Act, '48, or any right of the person charged to make a statement without being swoin sections of the Act provide that, Other

where the only witness to the facts of the case called by the defence is the person charged, he is to be called as a witness immediately after the close of the evidence for the prosecution. In cases where the right of reply depends upon the question whether evidence has been called for the defence, the not triable by a court of summary jurisdiction were negatived, but an amendment of Mi. J. L. Morgan (now paragraph b of sect. 1 fact that the person charged has been called as of the Act) was accepted. An amendment of Mr, Carson to omit the proviso excluding prosecution the right of reply. The wife of

husband of a person charged with an offence under any enactment mentioned in the schedule to this Act may be called as a witness either for the prosecution or defence and without the consent of the person charged. [The enactments so scheduled relate to punishment under the Vagrancy Act for desertion of wife or family; sect. 80 of the Poor Law (Scotland) Act, 45; certain sections of the Offences against the Person Act and of the Married Women's Property Act, and any section of the Criminal Law Amendment Act, '85, and of the Prevention of Cruelty to Children Act, '94] Nothing in the Act is to affect a case where the wife or husband of a person charged with an offence may at common law be called as a witness without the consent of that person

[80] East India Loan Act, '98 (61 & 62 Vict., ch. 13—r.a July 18t), authorises the Secretary of State in Council of India, at any time or times, to raise in the United Kingdom, for the service of the Government of India, any sum or sums not exceeding in the whole £10,000,000 sterling. On the money resolution on which the measure is based Lord George Hamilton (June 7th) made an interesting financial statement (see headed article India), explaining, in regard to this particular proposal, that the money was required to redeem obligations then approaching maturity, to provide capital for railway extension, and to give a ceitain reserve resource to the Secretary of State, so that in the case of any exceptional distui bances in India, or in the event of a famine or war that would reduce the revenue, he would have something behind him to temporarily meet the difficulty. Three millions of 3½ debenture stock would mature in August, and would be replaced by bonds bearing a lower rate of interest. The total amount required to replace existing obligations was £3,184,000, and £2,615,000 would be wanted to meet disbursements and for railway capital to be raised in this country for India.

this country for India.

[51] *Elementary School Teachers (Superannustion) Act, '98,61 & 62 Vict., ch 57—r.a Aug 12th—commences on April 13t, '99, or on such day, not more than three months later, as may be fixed by her Majesty in Council—E. and S.). The fixed by her Majesty in Council—E. and S.). The measure applies (a) to elementary school teachers certificated after the commencement of the Act, and (b) to existing teachers, "cei-tificated teacher" meaning a teacher who is recognised under the Education Code as a ceitificated teacher for public elementary

schools.

A teacher certificated after the commencement of the Act is not to be recognised by the Department as a certificated teacher until the Department are satisfied, in the manner to be prescribed by rules, of his physical capacity. There is to be compulsory retirement at 65, subject to exceptional continuation of service, without option of retirement in good health at an earlier age. The teacher is, while serving in recorded service, to contribute to the deferred annuity fund at the rate, if a man, of \mathcal{L}_3 , and, if a woman, of \mathcal{L}_2 a year, or at such increased rate as may for the time being be fixed by the Treasury in accordance with this Act. On retirement at or after 65 he is to be entitled, out of the deferred annuity fund, to such annuity for the remainder of his life in respect of his contributions to the fund as may be fixed by the tables to be proposed under the Act; but he is not to be entitled to any return

of contributions or to any benefits in respect of his contributions other than the annuity. His actual superannuation allowance will, however, be the annuity which the total amount of his own contributions will produce plus a State pension. If he has contributed to the deferred annuity fund in accordance with this Act, and half the number of years which have elapsed since he became certificated, the Treasury grant will be an annual allowance calculated at the rate of ros. for each complete year of recorded or actual service. There is a proviso for increasing the rate of contribution to the fund should the average salaries of the teachers exceed a certain sum, and of reducing it if the average emoluments have been so reduced as no longer to justify that increase. "Recorded service" for the purposes of this Act has a wide definition, though it does not include service in

an evening school.

Where a teacher satisfies the Treasury in the prescribed manner that he has served a number of years of recorded service not less than to and not less than half the years which have elapsed since he became certificated; and has not at the date of the application been for more than the prescribed time unemployed in re-coided service, and has become permanently incapable, owing to infirmity of mind or body, of being an efficient teacher in a public elementary school; and is not excluded by the prescribed disqualifications,—the Treasury may grant to such teacher out of moneys pro-vided by Parliament a disablement allowance not exceeding, if the teacher is a man, £20 for 10 complete years of recorded service, with the addition of £1 for each complete additional year of recorded service; and if the teacher is a woman, Lis for io complete years of recorded service, with the addition of 13s. 4d. for each complete additional year of recorded service. But in no case is the pension to exceed the superannuation to which the teacher might have been entitled on serving to the age of 65, and such pension is to cease if at any time the conditions upon which it was originally awarded are no longer fulfilled, or on subsequent mar-riage of the pensioner, or if he become in such a position as not to be in pecuniary need of the allowance. The contributions under the Act from certificated teachers are to be paid to the Department by the teachers or their employers, and paid by the Department to the National Debt Commissioners and be invested by them so as to form the deferred annuity fund.

The Department is to give to each existing teacher the option, within the prescribed time, not being more than one year after the commencement of this Act, of accepting this Act. If an existing teacher does not so accept this Act, it shall not apply to him. If an existing teacher does so accept this Act, it shall apply to him with the modifications that the rate of ios, upon which the State allowance is calculated may be augmented in the case of a man by 3d., and in the case of a woman by 2d., for each complete year of recorded service served before the commencement of this Act, that if the teacher has at the date of the acceptance attained the age of 65 years or any greater age, and has served in recorded service throughout the seven years next before the commencement of this Act, the provisions with respect to the expiration of the certificate shall apply as if the date of the acceptance were substituted for the date at which the teacher attained the age of 65 years; and that if the teacher has not at the date of the acceptance attained the said age, he must serve in recorded service after the commencement of this Act, and where, during any part of the seven years next belore the commencement of this Act, he was not in re-corded service, the duration of the recorded service after the commencement of this Act must not be less than the said part of the seven years. Nothing in this section is to authorise the grant of any allowance to any teacher who at the commencement of this Act is in receipt of a pension out of moneys provided by Parliament for the service of education. The Treasury and the Education Department may make rules for carrying into effect this Act, and shall provide thereby, amongst other things, for permitting certificated teachers to pay contribu-tions to the deferred annuity fund during any interval not exceeding six months in which they are not employed in recorded service, and for reckoning the time in respect of which such contributions were made, as if it were recorded contributions were made, as if it were recorded service. Provision is made for forfeiture, in case of misconduct, of any disablement allow-ance or superannuation allowance. Every assignment of or charge on, and every agreement to assign or charge any annuity or allowance to a teacher under this Act, whether payable presently or at some future date, shall be void; and provision is made for the case of

banks uptey.

[52] *Education (Board of) Bill. The Duke of Devonshire presented (Aug 1st) "a Bill to provide for the establishment of a Board of Education for England and Wales, and for matters connected therewith," and "a Bill for the registration of teachers," though not with a view of asking their lordships to make any progress with them this session, even to the extent of giving them a second reading. The first of these measures did not aim at the present creation of local educational authorities although the Government were perfectly well aware that the establishment of such authorities must come, and before long. It proposed to establish a central educational authority; to bring the Education Department and Science and Art Department together, and to make them divisions of one office, and probably under the control of one permanent secretary, to put an end to the Committee of Council and to the office of Vice-President of the Committee of Council, and to create a Board of Education on the model of the Board of Trade, the Local Government Board, and the Board of Agriculture If the Education Minister should be in the House of Lords, the President of the Council would be President of the Board, and the Department would be represented by the Vice-President of the Board in the House of Commons, but if the Minister of Education should be in the Commons, he would have the office of President, and there would be no Vice-President, though the Department would be represented in the Lords by some such an langement as had been found practicable in the case of other departments. The new central responsible Department would be charged with the supervision of secondary as well as elementary education, and of all the agencies appertaining to both. It would be entirely a mistake to suppose that there was any intention of simply merging the Department of Science and Ait into that of Education. The Education

Department itself might probably under the Government plan require some reorganisation, Some of the duties performed by it-such as those in relation to training colleges, to training pupil teachers, to the higher-grade schoolspertain rather to secondary than to elementary education, and it might be that it would be found expedient to group those functions which are now discharged by the Department with others which are now discharged by the Science and Art Department under a Secondary Education Department proper, while a third division might possibly be charged with the supervision of the more technical branches of science and art instruction, and at the same time the control and management of the science and art museums which exist both in the Metropolis and the provinces So far as administration was concerned, he saw no reason why the Government plan should lead to any increased expenditure; he rather thought it would tend towards rusts and the framing of schemes under the Findowed Schools Acts by the Charity Commissioners would remain untouched, except that an instruction would be given to the Commissioners to frame schemes, so far as they were educational, in consultation with the Education Board, and the Education Board would have power to move the Charity Commissioners to promote or alter schemes where such promotion or alteration was necessary. The educational examination of these endowed schools, which was provided for in all schemes, and their administrative inspection, so far as it relates to educational matters, would be transferred to the new Department As to the registration of teachers, for the purpose of forming and mainfaining a registry, the second Bill ing and maintaining a registry, the second minimal proposed to provide a separate council, though for this purpose only. Some of the members of this council would be nominated by the Crown and some by the Universities, though ultimately it would contain members directly. representative of the registered teachers them-But the Government had not seen their way to give to this council or to any other their way to give to this council or to any other council wide statutory powers. I hey recognised, however, that the advice of educational experts might be of great value to the Board of Education, and they had taken power to authorise the President of the Board of Education to appoint an educational committee to advise the Board on such matters as might be referred to it Such a committee in all probability would be largely tounded on the registration council. The Earl of Kimberley expressed regret that so small a change was to be made as to the powers of the Charity Commissioners, but added that his satisfaction would be great if it should be found that there was a general approval of the scope of the measures which the noble duke had proposed.

measures which the nonle-ruke had proposed. Bills read a first time (=)

Evidence in Criminal Cases Bill (see sect. 49).

[53] *Ex-Officio Justices of the Peace (Sootland)

Act, '98 (for & 62 Vict., ch 29—r a. July 25th), enacts that any ex-officio justice of the peace in Scotland who has been re-elected to the office in respect of which he became a justice of the peace on the expiration of other determination of a pievious term of office, and who has taken the oaths required by law to be taken by a justice of the peace, may continue to act as a justice of the peace without again taking such

oaths.

[54] *Factories and Workshops Emergency Processes Bill. The object of this measure was explained to be to meet the difficulties which have arisen in connection with exemptions granted by the Factory and Workshop Acts to trades which deal with perishable goods. These difficulties have arisen chiefly in the fish curing trade and in creameries. It was pioposed by the Bill to repeal all the existing exemptions, and to enable the Secretary of State to grant, subject to certain provisions, such exemptions as seemed necessary from the provisions of the Factories and Workshops Acts with respect to the times of employment of women and young persons. The measure was introduced June 20th, but indications of rather strong opposition were manifested to it, and later on the Home Secretary stated that he had no intention of pressing the Bill unduly on the House, though he hoped it would be regarded as a non-contentious measure. With-

drawn July 15th [55] *Finance Act, '98 (61 &62 Vict, ch. 10a. July 14th, gives effect to the reduction of the tobacco duty and the alteration in the standard of moisture proposed in his Budget (see article Firanct, National) by the Chancellor of the Exchequer, continues the tea duty at 4d per lb, and enacts that a person shall not subject any cask to any process for the purpose of extracting any spirits absorbed in the wood thereof [""grogging"], or have on his premises any cask which is being subjected to any such process, or any spirits extracted from the wood of any cask. The provisions of the Stamp Act in reference to the composition for stamp duty chargeable on transfers of certain colonial stocks are exten ed to the stock of any British protectorate or protected state to which the Colonial Sock Acts are applied. Though Though continuing the income tax at 8d, the Act gives telief by a new graduation where the income does not exceed £700, and exempts from land tax an owner in possession who has been allowed a total exemption from meome tax by reason of his income not exceeding £100, 10-mitting one-half of the amount of the land tax where an acatement of meome tax has been allowed by reason of the income not exceeding Afoo. With regard to estate duties, an addition is made to sect. 5, sub-sect. 2, of the Finance Act, '94, and it is also enacted that, where in the case of a death occurring after the commencement of this Act settlement estate duty is paid in respect of any property con-tingently settled, and it is thereafter shown that the contingency has not arisen and cannot arise, the said duty paid in respect of such property shall be repaid. When the Bill was before the Commons, Col. Milward, on second reading, moved an amendment declaring that any readjustment of taxation should include a remission in favour of clergymen whose income is wholly or in part derived from tithe, and in whose case it should be shown that they are contributing more than their due share to local taxation. This was seconded by Viscount Crantaxation. Init was seconded by Viscount Clair borne, and supported by Major Rasch, among others. The Chancellor of the Exchequer re-plied that the matter so caused formed part of the great question of local taxation now before the Royal Commission, and if any proposal were made by the commission which might alleviate the position of the clergy, the Government would give it their best attention. Leave to withdraw it having been refused, the amendment was negatived by 215 to 27. In course of further proceedings on the Bill, Sir William Harcourt approved on the whole of the proposal regarding the income tax, but thought that with the present administration there had been too little remission of taxation and too great an increase of expenditure. The Chan cellor of the Exchequer, in reply, admitted that the expenditure on the Army and Navy was very large, but maintained that the increase was due, not so the Government, but to the practically unanimous demand of the people. The motion for second reading was agreed to In committee Mr. J. A. Pease (June 13th) moved the omission of the clause for the teduction of the duty on tobacco, expressing himself in favour alternatively of a reduction of the duty on tea, but after some conversation the clause was agreed to. Mr. Pease later on proposed to reduce the tea duty from 4d to 2d, but this amendment was negatived by 230 to 103. Third reading of the Bill was (June 2.th) carried by 150 to 39.

carried by 150 to 30. [56] "Greek Loan Act, '98 (61 Vict, ch. 4-ra. April 1st), enables her Majesty to carry into effect a convention entered into with the Governments of France, Ru sia, and Greece containing atticles guaranteeing a loan of £6,80,000 to be issued by the Government of Giecece. The Chancellor of the Excheque, in moving (March 24th) the financial resolution on which the Bill was based, said Greece was unable to pay the war indemnity to Turkey without a loan, and this the Powers had guaranteed, recognising the importance of the exacutation of The salv by Turkey. Of the total amount of the loan £3,800,000 would be required for the indemnity and for compensation to persons injured during the war by Greek troops, and £1,200,000 was needed to meet the deficit for '97-8. £1,000,000 was needed to meet the deficit for '97-8. £1,000,000 was needed to meet the deficit for '07-8. £1,000,000 was needed to meet the deficit for '07-8. £1,000,000 was needed to meet the deficit for '07-8. £1,000,000 was needed to meet the deficit for '07-8. £1,000,000 was needed to meet the dense for the floating debt of Circere, and £800,000 would be resured as might be necessary for deficit's expected to anise subsequently to '98. For the first five years Greece will pay a nannuity of 25 per cent of the nominal amount of the loan resurd, and thereafter will pay a fixed annuity of 30 per cent of the nominal capital, the balance between interest and annuity providing for the gradual amortisation

of the loan [57] Industries (Ireland) Bill. The Farl of Mayo moved (June 21st) second reading of a Bill the object of which was to facilitate the establishment of electrical industries in Ireland by the employment of unused water-power in that county. After a discussion the measure was withdrawn, Loid Mayo agreeing to a suggestion of Loid Craphicok that the question involved in the Bill should be investigated by a wheel committee.

a select committee [58] Inebrates Mi Knowles moved (March 8th), and it was resolved, "That, masmuch as the present condition of the law relating to habitual inebilates, both criminal and non-criminal, is unsatisfactory, it is desirable that the Government should introduce legislation dealing with the subject, and amend and extend in particular the Habitual Drunkards Act, '89, and the Inebrates Act, '88" "The Home Secretary stated in course of the evening that he proposed to introduce a measure before very long Bill brought in, and duly became law—"Inebriates Act, '98 (6r & 62 Vict., ch. 60—ra. Aug. 12th, commences Jan 12t, '99). Where a person is convicted on indictment of

an offence punishable with imprisonment or penal servitude, if the court is satisfied from the evidence that the offence was committed under the influence of drink or that drunkenness was a contributing cause of the offence. and the offender admits that he is or is found by the jury to be a habitual drunkaid, the court may, in addition to or in substitution for any other sentence, order that he be detained for a term not exceeding three years in any State mebriate reformatory of any certified mebriate reformatory the managers of which are willing to receive him. Any person who commits any of certain offences specified in the Act, and who within the twelve months preceding the date of the commission of the offence has been convicted summarily at least three times of any offences so mentioned, and who is a habitual drunkard, shall be liable upon conviction on indictment, or if he consents to be dealt with summarily on summary conviction, to be detained for a term not exceeding three years in any certified mebriate reformatory the managers of which are willing to receive him The offences in question include being found drunk in a highway or other public place, whether a building or not, or on licensed opicmises, being drunk while in charge, in any public place, of any carriage, horse, cattle, or steam engine, being drunk while in possession of any loaded frearms, refusing or failing when drunk to guit licensed premises when

requested, etc., etc.

The Secretary of State may establish State. inebriate reformatories, and may make regulations for their rule and management, and, subject to any adaptations, alterations, and exceptions made by such regulations, the Prison Acts (including the penal provisions thereof) are to apply to every such reformatory, but no regulation shall authorise the infliction of corporal punishment in any such State establish-The Secretary of State, on the application of the council of any county or borough or of any persons desirous of establishing an inchriate reformatory, may, if satisfied as to the fitness of the reformatory and of the persons proposing to maintain it, certify it as an inchriate re-formatory, he may make regulations as to the establishment, management, maintenance, and inspection of such institutions, the classification, treatment, etc., of the inmates, and the application of their entrings, and the transfer of inmates from one reformatory, State or otherwise, to another A county or borough council may contribute such sums as they may think fit towards or may themselves undertake the establishment of a reformatory certified or intended to be certified under the Act Officers of these establishments are to have all the powers, protection, and privileges of a constable, and persons escaping from the reforma-tories may be arrested without was ant and brought back. Power is given to recover expenses against an inchinate's estate if he has property more than sufficient to maintain his family, if any Licensing powers under the Inchinates Acts, as amended by this Act, are transferred to the borough council in boroughs, and elsewhere to the county council, and any such council may contribute towards the establishment of maintenance of a retreat under these Acts In sect. 10 of the Habitual Drunkards Act, '79, a term not exceeding two years is substituted for a term not exceeding

substituted for two justices as the attesting authority to the signature of an applicant; and a person who is or has at any time been detained in a retreat may have his term of detention extended, or be readmitted. Regulations made under the Act are not to come into effect until they have lain before each House of Parliament. The Act is adapted to Scotland and Ireland

[59] Irish Surnames. Mr. MacAleese introduced a Bill to enable any person of Irish birth or extraction to adopt and use the prefix "O" or "Mac" before their surnames. It consisted before their surnames. It consisted of three clauses (1) permitting such use of the prefix on the person making known in writing his intention in Great Britain to the Home Secretary and in Ireland to the Chief Secretary, (2) enacting that proof that such intention was duly communicated should be held to satisfy icvising barristers, registrars, and all others that the prefix was a legal portion of the surname, and (3) repealing all ancient statutes prohibiting the use of either prefix. The Attorney-General for Ireland (March 30th) moved to omit clause i on the ground that, as there was really no law to prevent the use of either prefix, the clause was unnecessary. The clause was struck out, and clause 2 was on the motion of the right hon and learned gentleman also omitted. The Attorney-General for Ireland next moved to omit clause 3, and to meert, "So much of any statute as prohibits the use of O' or 'Mac before any surname is hereby repealed" Mr. MacAletse asked whether, if there was no law against the use of "O's" "Mac's, "Mac's," it was necessary to propose the clause at all. He complained of the attitude of the Attorney-General, and moved to report progress Dispped
[60] *Land Charges. A Bill of the Lord Chan-

[60] *Land Charges. A Bill of the lord Chancellor to amend the law relating to charges on land, by the substitution of a charging order for a writ of elegit, and to matters connected therewith, passed the first House, but was withdrawn in the Commons

[61] Land Law (Ireland) Acts Amendment. Mr. Havin (March 30th) moved second reading of a Bill to amend the Irish Land Acts in certain important respects, including a reduction of the statutory term of a judicial rent from 15 to 10 years, and a provision for the restoration of exited tenants in Ireland to their holdings. Mr. Dillon, Mr. W. Redmond, and other Irish representatives supported the Bill. Mr. Johnston, Conservative member for South Belfast, proposed the rejection of the measure, and the Chief Secretary for Ireland, in also opposing, said the land law in Ireland was more favourable to the tenant than the land law in any other country in the world. Bill rejected by 24; to 1.8

(62) Libraries Offences Act, '98 (61 & 62 Vict, ch 53-1 a Aug 12th-E), renders any person who in any public library or reading-room, to the annovance or disturbance of any person using the same, behaves in a disorderly manner, uses violent, abusive, or obseene language, bets or gambles, or who after proper warning persists in remaining after closing hours, liable on summary conviction to a penalty. Was introduced by Mr. Ha wood

'LOCAL GOVERNMENT (TRELAND) ACT. '98.

years is substituted for a term not exceeding [63] (61 & 62 Vict., ch. 37-r.a. Aug. 12th), twelve months, and one justice shall be 15, in each administrative county, to come into

operation as to rural district councils and guardians on March 25th, '99, and as to county councils and urban districts April 18t, '99, and as to all other matters on April 1st, '99, or on such other day, not more than twelve months such other day, not more than twelve months carlier or later, as in any case the Local Government Board (but after the election of county councilors for such county and on the application of the county council) may appoint, either generally or with reference to any particular provision of the Act; and different days may be appointed for different purposes and different provisions of the Act, but the enactments relating to the registration of local ments relating to the registration of local government electors, or to the elections, or to any matter required to be done for the purpose of bringing the Act into operation on the appointed day, came into effect on the passing of the Act. This measure, to quote Loid Ash-bourne (the Lord Chancelloi of Ireland), follows the main lines of the legislation adopted for England and Scotland, accompanied only by such variations as are necessary owing to the special circumstances of Ireland. Up to the special circumstances of Freiand. Opto the passing of this Act there was, as the term is understood in Great Britain, practically no system of free local self-government in Ireland Counties were ruled by a grand Jury, a county-at-large presentment sessions, and baiomal presentment sessions. Each county was divided into baronies, which was the smallest existing unit for administrative purposes. The grand jurois were selected by the High Sheriff mostly from among the larger landholders, the baronial sessions was composed of the local paronial sessions was composed of the local grand juro, the local magisti acy and a number of selected local cess (or rate) payers. For poor-law purposes the country was divided into unious, each board of guardians being composed, one half of magistiates, the other half being elected on a system which included the cumulative vote. The occupier paid the whole of the county rate or cess, and half the poor rate, the landford paying the other monety, but in the case of tenements valued at whole (A. The armount the landford and the under £4 per annum the landlord paid the whole of the poor rate

The new Act, as in England and Scotland, casts the duties of local government upon bodies popularly elected, but it does not provide for the establishment of parish councils, because never in that country has the parish been made the area of local administration. Henceforth the local administration will be in the hands of four bodies—(a) county councils, (b) urban district councils, (c) rural district councils, and district councils, (c) rural district councils, and cast of parish been may be narrowed down to three in the majority of cases, because members of the rural district councils will also represent the area for which they are elected as guardians, and where the union is within an administrative county the union will be coincident with the rural district, so that the boards of guardians will be really, as in England, the district councils

acting under another name.

The franchise in every case is the parliamentary franchise with the addition of peers and ratepaying women, which follows the Scotch precedent and also, as far as district councils and parish councils are concerned, the English precedent. The qualifications are the same as in England, save that ministers of any religious denomination are not entitled to sit on any of the bodies created under the Act. Baronies in Ireland will no longer be centres

of government. Although, as in Scotland, there are no alderman members of the county councils, each council may choose from persons qualified to be councillors one or two persons who are to be additional councillors during the term of office of the first council To the county councils are transferred the financial and administrative powers and duties at present enjoyed by the grand juries, and also those exercised by the county-at-large presentment sessions, also the business of the guardians as to making and levying the poor rate in so much of the county as is not comprised in an urban county district, and as to cattle diseases and explosives. grand jury business respecting compensation for malicious injuries is transferred to the county court, who may either refuse any application or make a decree against the county council, an appeal being given in certain cases to a judge of assize To the rural district councils are handed over the duties at present discharged by the baronial presentment sessions and the powers of rural sanitary authorities Fypenditure on roads and other public works payable by the rural district countils will be proposed by those councils, but will be subject to the veto of the county council: while as a further check upon extravagant expenditure, without the express consent of the Local Government Board no expenditure on roads in a rural district may receive the sanction of the county council, if it exceed by 25 per tent, the expenditure during the three years before the standard year. The expression tent. The expenditure during the time years before the standard year "The expression "standard year" means the twelve months ending, as 1 gards the poor rate Sept 29th, '97, and as 1 egards the county cess June 30th, '97. Chairmen of county and district councils and of town commissioners are to be ex-officio justices of the peace. The chairman of every rural district council will be an additional member of the county council, so that there will be a close connection between the two bodies. The county council will now provide and maintain sufficient accommodation for the lunatic poor and manage by a committee their asylums, though certain powers of control are reserved to the Lord Licutenant, and he also retains the power of approving the appointments or dismissals made by the county council of resident superintendent and assistant medical officers With regard to exceptional distress the county council may on the representation of the guar-dians of any union authorise the guardians, subject to certain conditions, to administer outrelief for any time not exceeding two months; and one-half of any expenditure incurred in pursuance of this provision is to be levied on the county at large, provided that the total amount so levied in any one year shall not exceed 3d. in the pound on the ratable value of the county, and the guardians may with the consent of the Local Government Board obtain temporary advances for the purposes of this enactment. This provision was framed with a view of obviating the necessity for special acts of parliament whenever there is a recurrence of exceptional distress; but it was stated both by the Lord Chancellor of Ireland and Mr. G. Balfour that it is possible there may be occasions when the powers of Parliament may have to be invoked. The county councils are also to appoint coroners, and have powers as to infirmaries and fever hospitals, and to oppose bills in par-liament. The tenure of office of county councillors is three years, and they are to retire

all together. The county electoral divisions are to be fixed by the Local Government Board, but the district electoral divisions will be the present poor-law divisions. Each rural electoral division will elect two councillors to the district council, who will also be the guardians district council, who will also be the guardians for that division. Rural district councils may choose not more than three persons as additional members, and who are to be also additional guardians. The six titles of Dublin, Belfast, Cork, Lumerick, Londonderry, and Waterford are each made admistrative counties called county boroughs, but no substantial change has been made in the government or status of these towns, although the wider franchise set up by the Act is extended to them. The urban district councils become the road authorities, and levy all the rates. In rural areas the duty of collecting and levying the poor rate is transferred to the county council, and in urban areas to the urban council. The occupier is to be liable for both the county cess and the poor rate in both the rural districts and the towns, and they will both be collected in one consolidated rate. If any decrease of the one consolidate rate in any decrease of the occupiers, and any increase will of course equally be paid by them. The agricultural rating grant is made on the same principle as in England (though there is no limit to its duration, as there is in the case of the English and Scottish grants), and is estimated to amount to £730,000, being a sum equal to hall the county cess and half the poor rate, taken for the purposes of the Act to have been paid in respect of agricultural land in the standard year. The benefit of the grant is intended for the rural occupier as regards the county cess, and for the owner as regards poor rate. The owner thus becomes relieved of his share of the poor rate, the State paying his half, while the other moiety, subject to any decrease by economy or increase by additional expenditure, is to be paid by the occupier. The first payments under this provision to the Local I axation Account are to be made during the six months ending March 31st, '99, so as to meet the half-yearly payments on account of the six months next ensuing. There are included in the Act provisions for the temporary adjust-ment of rent by the Land Commission arising out of these changes. The charges for extra police, compensation for malicious injuries. iailways, harbours, navigation, and public health are excluded from the calculation of the standard rate. In addition to the £730,000 Exchequer grant, the proceeds of the Local Taxation licence duties collected in Ireland, and amounting to £200,000, are to be handed over to the local authorities, and as certain grants in aid are to be abolished when the duties are handed over, an additional sum of \$79,000 is given in heu thereof. These grants in aid were mainly grants for lunatics and exceptional grants for poor-law charges which are now thrown on the new governing bodics. Half the cost of a trained nurse in every union in Ireland is to be defrayed by the Government. The first election under the Act of county and rural district councillors and guardians is to be held on March 25th, '99, or on such day fourteen days before or after that day as the Local Government Board may appoint. The first elections under the Act of aldermen and councillors in county boroughs and urban districts by the Government, but carried by 67 to 62; an are to take place on Jan. 15th, '99. Provision amendment of Lord Clonbrock, by which each

was duly made with respect to the registration of electors for the purposes of the above Act by the "Registration Ireland Act, '98 (for Vict. ch. 2—r. a March 29th). The provisions of the Bill were explained by

the Chief Secretary for Ireland and it was read a first time (Feb. 1st). On the motion for second leading (March 21st) Mr. Lambert moved an amendment disapproving any scheme of Irish local government "which necessarily involves a large permanent grant out of the Imperial funds for the relief of one class alone" This was seconded by Mr. Logan, but rejected by 167 to 20. Second reading was agreed to. The clauses of the Bill were under consideration at sixteen sittings of the House, and in course of the proceedings Mi. Dillon (May 4th) took objection to the clause giving county councils certain powers as to exceptional distress, contending that its effect would be to transfer the responsibility of relieving such distress from the British Government to the Irish ratepayers. The Chief Secretary said it might be an incidental consequence of the proposal that some expenditure now defrayed by the taxpayers of the United Kingdom would be thrown on the county council, but it was not intended to exempt the Freasury in bearing its share where exceptional relief appeared necessary. He agreed to limit the amount the county council might contribute in any one year. The clause was carried by 179 to 104 Mr Strachey moved an amendment limiting the duration of the agricultural rating grant to five years, but this was (May 16th) negatived by 258 to 107 An amendment by Mr Lambert for the omission of the provision for the payment of the landlord's share of the poor-rate was defeated by 235 to 70; an amendment by Mr. McKenna illocating the relief from the poorrate to the occupier instead of to the landlord was rejected by 251 to 78, and an amendment by Si C Dilke for the omission of the provision disabling clergy men from serving as county or district councillors was (May 23rd) negatived by 146 to 68 Among the amendments brought forward on the report stage was one by Sir J. Willox (July 6th) proposing that at all meetings, other than committee meetings, of county or district councils, accredited representatives of the newspaper press should be permitted to attend, and should receive reasonable facilities for obtaining reports of the proceedings, but this was rejected by 288 to 77. An amendment by Mr. H. Plunkett, providing that two coun-cillors instead of one should be returned for each county electoral division, was negatived, though the Chief Secretary said that if the question were raised in another place, and a very strong opinion was expressed by those who were specially entitled to be heard on the matter, the Government would not resist the change Bill reported July 14th, third reading agreed to July 18th. Read a first time in the Lords (July 19th), and discussed on second reading (July 21st), when Earl Spencer remarked that, although he would have preferred another line of action in regard to Irish local government, he hailed with pleasure and satis-faction the broad and liberal lines on which this Bill had been drawn. Considered in committee (July 25th) and amendments made. An amendment of Lord Morris for including Galway City in the list of county boroughs was objected to

electoral division in a rural district would return two members instead of one, was reluctantly assented to by Lord Salisbury, and carried by 78 to 15; but a proposal of the Earl of Dunraven, to omit the provision disabling clergymen from being eligible as members of county or district councils, was defeated by 62 to 26. On the Bill being returned to the Commons, the Galway amendment was disallowed by the Speaker on the ground that its insertion by the Lords infringed the privileges of the Commons, and the double-member constituency amendment was agreed to by 16 to 64.

stituency amendment was agreed to by 116 to 64 [64] "Local Taxation Account (Scotland) Act, '98 (61 & 62 Viet., ch. 56-1 a. Aug. 12th) The additional sums granted under this Act, in consideration of the large grant made to Ireland under the Local Government Act, are to be applied—in distributing \$L^2\$,000 among county councils and parish councils in Scotland as an addition to, and in the same proportion as, the amounts distributed to them under the principal Act of '96; \$L^2\$,000 among the police authorities for pay and clothing, in addition to the amount already distributed \$L^2\$, \$L^2\$,000 in manne superintend-cince and otherwise for the enforcement of the Sea Fisheries laws, the balance to be applied for purposes of secondary or technical (including agricultural) education

[85] Loomotives Act, 98 (61 & 62 Vict, ch. 2)
-1.a. Aug. 2nd -commences Jan. 1st, '99-E),
introduced by Mi. Griffith Boscawen, amends
the law with respect to the use of locomotives
on highways, and with respect to extraordinary
traffit. The Bill was based on the report of
the Select Committee on Traction Engines on
Roads, '90, and its object is to remove vexatious
restrictions on the use of traction engines,
while at the same time giving ample protection
to the ratepayers and others interested in the
maintenance and use of public highways. It is
concerned with heavy engines only, and does
not affect in any way light locomotives known

as motor cars [66] London Bills. The London Municipalities Bill promised in the Queen's Speech was never introduced, but Mr Baltour assured Mr W F D Smith (June 10th) that it should be brought n at the earliest possible date next session. The Commons discussed (May 4th) a Bill of the L.C.C. for making a transway over Westminster Bridge and along the Victoria Embankment to Blackfriars Bridge, it being stated in the discussion that it would be left to the committee to which the Bill might be referred to say how The tar the line should be actually carried measure was thrown out by 248 to 129 General Powers Act of the Council enables them to make a new street in continuation of Roe-hampton Street, Westminster, a widening of York Road (Battersea and Wandsworth), a widening of the Albert Embankment (Vauxhall), and to reconstruct Rosemary Branch Bridge (Hoxton) over the Regent's Canal. Another Act of the Council has reference to the recep-tion of sewage into the main dramage system from Acton, and provides for payments therefore by the Acton Council in respect of such future use. A third statute amends the Building Act in various respects, including the service of summonses and orders relating to dangerous or neglected structures. The Monty Act of the Council enables them to raise on capital account during the manicial period April 181, [98, 198]. to Sept. 30th, '99, the sum of £9,427,750, but

in this total there are included re-grants of borrowing powers previously granted to the amount of £5,034,328, so that the net aggregate new borrowing powers amount to £4,393,422, o which £2,364,507 are for the purposes of the Council, and £2,028,915 for loans to other bodies. The Council were empowered to increase the possible outlay on the Gfeenwich tunnel to A Bill was brought forward by private under-takers for extending the Thames Embankment from the Victoria Tower Gardens to Lambeth Bridge, and giving powers to acquire property and largely reconstruct the neighbourhood westward, but the measure was rejected (April 25th) by 336 to 84. It was stated that when the new Vauxhall and Lambeth Bridges were completed the County Council itself would be prepared to extend the Embankment. A Bill for the election of a new bridge at Kew, in heu of the existing structure, with approaches, became law A measure for authorising the of the existing satisfacts, and the section of buildings in extension of King's Bench Walk upon a portion of the land which had been reclaimed from the foreshore of the Ihames and thrown into the Iemple Gardens was 'strongly opposed and thrown out by a was strongly opposed and thrown out by a Lords' Committee. A private Act, which became law, authorises the Southwark and Vauxhall Water Co to acquire lands, construct additional water from the Thames, and raise additional capital, but if the undertaking be purchased within ten years of the passing of the Act by any public body, no additional value shall be deemed to be given to the undertaking by the powers conferred by the measure other than actual expenditure The Middlesex County Council obtained further powers for improving the condition of the Brent and other streams. Second reading of a Bill providing for the conversion of the stock of the Gaslight and Coke to was carried by 171 to 89 (March 19th), and duly considered by a committee. Mr Pickersgill, on the consideration of the Bill, moved (lune 9th) a new clause providing that the conversions of stock authorised by the measure should not take effect until the Company had reduced the price of their gas to 2s 6d. per thousand cubic teet, and that it should not be lawful for the Company to raise the price so reduced except by order of the Board of Trade. Mi Johnson-Ferguson, who was chairman of the committee which considered the Bill, opposed the clause, which was, in the result, negatived by 214 to 100 (see sect. 104). Among other measures which also became law was one to; the reconstruction of the capital of the Crystal Palace Co.

Lystal Falace Co.

London University Commission Bill (see sect. 96).

(87) *Lunacy Bill, introduced by the Lord Chancellor, the object of the measure being mainly to safeguard the urgency-order part of the lunacy system. Withdrawn in Commons [68] Marriage Act, '98 (61 & 62 Vict., ch. 58—r a Aug 12th—commences April 1st, '99—E), was introduced by Mi. Perks. The object of this measure is to enable marriage to be

[68] Marriage Act, '98 (61 & 62 Vict., ch. 58—r a Aug 11th-tommences April 1st, '99—E), was introduced by M1. Perks. The object of this measure is to enable marriages to be solemined in Nonconformist places of worship without the attendance of the registrar, should the persons intending to be married so desire. There are provisions in the Act enabling parties who prefer a registrar to attend to require such attendance. The Attorney-General, in assenting to the second reading (March 237d), observed that there were matters of principle

involved which must require consideration later on. The hon. and learned gentleman afterwards proposed amendments, which were afterwards proposed anisciantic, and duly made in the measure before it became law; and the Government afforded in facilities for passing through the Commons. Where a for passing through the Commons. Where a marriage is solemnised under this Act, each of the parties contracting the marriage is required in some part of the ceremony to make the following declarations, in the presence of the clergyman authorised to solemnise the marriage and of two or more witnesses marriage and of two or more witnesses "I do solemnly declare that I know not of any lawful impediment why I, A.B., may not be joined in matrimony to CD". And each of the parties shall say to the other the words following "I call upon these persons here present to witness that I, A.B., do take thee, C.D., to be my lawful wedded wife for husband]," or in heur thereof the words following "I, A.B., do take thee, C.D. to be my wedded wife for the sole of the sol do take thee, CD, to be my wedded wife [or husband]

for nusband]
[69] Merchant Shipping (Liability of Shipowners) Act, '98 (61 & 62 Vict, ch. 14—1 a. July 25th), introduced by Mr. W. Allan. The Merchant Shipping Act, '94, limits the hability of the owners of a ship, British of foreign, in respect of damages and occurrences happening or taking place without their actual fault or privity in the manner and to the extent set forth in the Act A ship owned by British subjects is, however, not recognised under the Act as a British ship until registration, and the owners thereof cannot therefore claim the benefit of the limitation of liability in respect of anything happening previous to registration. This Act extends the limitation of liability from and including launching of a ship until the registration thereof, provided that the owners, builders, or others interested are not to benefit for more than three months after the launching

[70] *Merchant Shipping (Mercantile Marine Fund Act, '98 (61 & 62 Vict, ch. 44—r.a. Aug 12th—commences April 1-st, '99), solis-hes the Mercantile Marine Fund and constitutes a General Lighthouse Fund to which is transfer destroy both dues not showers. ferred certain light dues and charges. Such fees are to be paid in respect of the registration, translet, and mottgage of Bittish ships as the Board of Frade, with the consent of the Treasury, determine, not exceeding those specified in the Act. The general lighthouse authorities are to levy light dues with respect to the vegore, made but have as the vegor. to the voyages made by ships or by way of periodical payment, and not with respect to periodical payment, and not with respect to the lights which a ship passes or from which it derives benefit, and the dues so levied are to take the place of the dues now levied by those authorities. A scale of light dues is set out in the Act. On proof that the vessel has carried, in accordance with the scale and regulations to be made by the Board of Irade, boys between the ages of fifteen and numerice, there shall be paid to the owner out. nineteen, there shall be paid to the owner out of moneys to be provided by Parliament, an allowance not exceeding one-fifth of the light dues paid during the year in respect of the ship, but no such payment is to be made in respect of any boy unless he have enrolled himself in the Royal Naval Reserve and agreed to present himself for service when called upon Mr. Ritchie (March 17th) explained on second reading that the complaint of the shipping industry, that money which was collected for the purpose of lights had been applied to the payment of certain establishment charges

having nothing to do with lights, would be removed by the passing of the measure. It was impossible altogether to abolish the light dues. Mr G. Bowles moved an amendment declaring that no measure dealing with lights would be satisfactory to this House which did not provide that the expenses of maintaining lights, buoys, and beacons on the coasts of the United Kingdom should be defrayed out of public revenue. This was opposed by Mr. Ritchie, and rejected by 184 to 35. The new clause relative to allowances for boys was inserted at the instance of Mi Ritchie (July 27th), who then stated that no less than 30 per cent. of the petty officers and seamen serving on British merchant vessels were foreigners. Government allowance would be equal to 20 per cent of the light dues in each year in tespect of a vessel carrying boy sailors on the following scale -Under 500 tons, one boy; between 500 and 1000, two, up to 2000, three; and an additional boy for every 100 time. The scale may be modified from time to time.

clause was carried by 189 to 37
[71] Militia Ballot Law Amendment Bill, was introduced by the Earl of Wemyss. clauses of the Bill were, he said, taken verbatim from those relating to the minta ballot that formed an integral part of Mr. Cardwell's "Army Regulation Bill" as introduced in '71, though they were alterwards dropped out of that measure. They were made to apply to the whole male population from the age of 18 to 35, but I ord Wennys, in moving second reading of his Bill (July 181), and he would propose in committee, should the Bill reach that stage, to limit its operation to makes of the age of 20 years only who are not at the time serving voiuntarily in some other force than the militia. The Marquis of Lansdowne, who had on a previous occasion described the machinery for setting the ballot in motion "as somewhat ancient, and as in all probability requiring revision, undertook to examine the machinery of the ballot during the autumn The Government saw no reason for introducing compulsion in any shape, but they recognised that the power of enforcing service in the militia at a time of emergency, when the security of the country was threatened, was avaluable one. Withdrawn.

Nonconformist Marriages (Attendance of Regis-

TATE) (Sec. Sect. 67)

[72] *Outdoor Relief (Ireland) Act, '98 (61 and 62 Vict, ch. 57--1 a Aug. 12th), makes temporary provision for relief of distress in Ireland by extending the power to grant outdoor relies in food and fuel, confirming expenditure previously incurred by the guardians, and indemnifying them
[73] *Parish Churches (Scotland) Bill.

principal object of this measure was to adapt the ecclesiastical arrangements of parishes in the eccessistical arrangements of parishes and Scotland to the changes which have taken, and are still taking, place from time to time owing to the large extension of towns, and to the migration of the population from one portion of a town or district to another. Introduced by Lord Balfour, passed Lords, with amend-ments, opposed on second reading in Commons, but second reading carried by 90 to 28. With-

drawn July 28th
[74] *Parish Fire Engines Act, '98 (61 and 62 Vict, ch 38-r.a Aug. 12th), enables a parish council to agree with the council of any neighbouring borough or district that any fire engines with their appurtenances and firemen provided by such borough or district council shall be used for extinguishing fires in the

parish.

[75] Pharmacy Acts Amendment Act, '98 (for and fee Vict., ch. 25—r.a. July 25th—E. and S.).

Introduced by Mr. W. F. D. Smith, the object of the measure being, among other things, to render every person whose name appears on the Register of Chemists and Druggists eligible to be elected a "member" of the Pharmaceutical Science (Capit Parish).

Society of Great Britain.
[76] *Poisons Bill, to regulate the sale of certain poisonous substances such as butter of antimony, carbolic acid, chloride of zinc and of artimony, caroone acta, chloride of File and atts solutions, hydrochloric, intric and sulphuric acid, unless diluted in manner prescribed by the Pharmacopeaa, and substances sold for poisoning insects or vermin. Introduced by the Duke of Devonshire, passed Lords, dropped

in Commons.

[77] *Poor Law (Scotland) Act, '98 (61 & 62 Vict., ch. 21—ra. July 25th—commenced Oct. 1st, '98). The objects are to reduce in Scotland the period for acquiring a residential settlement to three years, and to make English and Irish born paupers irremovable from Scotland after five years of residence, and in the case of other English and Irish paupers and all Scottish paupers to give an appeal against removal to the Local Government Board for Scotland

[78] Poor Law Unions Association (Expenses)
Act, '98 (61 & 62 Vict, ch. 19—r a July 25th),
was introduced by Mr. W. F. Lawrence It
provides for the establishment of a Poor Law
Unions Association in England and Wales for the purposes of consultation as to their common interests, and the discussion of matters relating to the poor law and otherwise to their powers and duties, and enables boards of guardians to contribute to the expenses of the Association. The guardians of any union may, when empowered by, and subject to any regulations made by the Local Government Board, pay any sum not exceeding £5 in any year as a sub-scription to the Association, as well as the reasonable expenses of the attendance of not more than two representatives at meetings of the Association.

[79] *Post Office Guarantee Acts, '98 (61 and 62 Vict, ch. 18 and 59-1 a July 25th and August 12th—L.) The first of these measures extends the exercise of the powers previously conferred upon a tutal district council, parish council, and parish meeting respectively of undertaking to pay any loss out of the provision of additional postal or other facilities provided by the Postmaster General within their own area to facilities provided outside their boundary it such council or meeting shall be of opinion that the additional facilities are for the benefit of the contributory place, while the other act extends to borough and urban district councils the guaranteeing powers already possessed by rural councils.

[80] 'Prisons Bill. Sir M W. Ridley, in moving second reading (March 24th), adverted to what had been done by the Prisons Commissioners on the recommendation of the committee of which Mr. H Gladstone was chairman (whose services and those of the committee he on behalf of the Government cordially acknow-ledged). The Bill was designed to make certain amendments in the laws relating to prisons.

As a preliminary to the general consideration, and as a first step towards consolidation, it was

proposed to give statutory recognition to the virtual amalgamation of the administration of convict prisons and local prisons. The principal amendment proposed concerned local or shortsentence prisons only. It was proposed that the Secretary of State should be invested in the case of local prisons, as he was already in the case of convict prisons, with the power of making the code of rules, subject only to the veto of Parliament. This power would include the regulation of the nature of the hard labour, with some regard to the varying characteristics and circumstances of prisoners. Proposals were also included for a better classification of prisoners, remission of sentences by way of reward for good behaviour, and allowing part payment of a fine to be equivalent to serving a proportionate part of the sentence of imprisonment in default Mr. Atherley Jones moved the rejection of the measure, and Sir C. Cameron seconded the amendment. Mr. H. Gladstone welcomed the Bill as an instalment. Mr. Dillon, Mr Davitt and others (March 28th) criticised the measure. Mr. T. P O'Connor (April 4th) condemned what he described as the starvation diet given in prisons. Mr. Asquith approved the clause of the Bill which enabled the principle of discrimination in the treatment of prisoners to be applied with far greater flexibility than at present, and suggested that the Home Secretary should make a special that the Home Secretary should make a special inquiry into the subject of starvation diet and into the allegations as to sleeplessness. The Home Secretary in reply said the Committee appointed by the last Government suggested many sweeping changes, and he thought he might fairly claim that a great proportion of them had been carried out. could not admit that there was starvation diet, but thought some dietary improvements might be made, and promised that an inquiry into the subject should be instituted. He also undertook to consider various other questions, including the diminution of the period of solitary confinement. The Bill was read a second time, and afterwards referred to the Standing Committee on Law. In the Grand Committee an amendment of Mr Davitt proposing that one of the Prisons Commissioners should be a medical man skilled in mental diseases was carried against the Government by 35 to 8. The Home Secretary in course of the proceedings made concessions on the question of the administration of corporal punishment On the report stage the Home Secretary moved to omit the words requiring that one of the Prisons Commissioners should be a medical man skilled in mental diseases, and the omis-Act, come into first rules made under the Act come into force—E) Makes the Prison Commissioners directors of convict prisons; enables the Secretary of State to make prison rules for the government of local prisons as well as of convict prisons, which are to be laid on the table and are subject to the veto of either House; provides for the appointment of boards of visitors for convict prisons; and enacts that the mode in which sentences of penal servitude or imprisonment with or without hard labour are to be carried out in prison may be regulated by prison rules, and that in making such rules regard shall be had to the

sex, age, health, industry, and conduct of the prisoners.

Prison rules shall not authorise the infliction of corporal punishment—(a) except in the case of a prisoner under sentence of penal servitude, or convicted of felony, or sentenced to haid albour; nor (b) except for mutiny or incitement to mutiny, or gross personal violence to an officer or servant of the prison; nor (c) except by order of the board of visitors or visiting committee of the prison, after inquiry on oatheld by them at a meeting specially summoned for the purpose, and consisting of not less than three persons, two of them being justices of the peace provided that the Secretary of Statemay, if he thinks fit, appoint a metropolitan police magnistrate or stipendary magnistrate to take the place of the board or committee, and the magnistrate shall in any such case have the same powers as the board or committee, and order under this section shall not be carried into effect until it has been confirmed by the Secretary of State, to whom a copy of the notes of evidence and a report of the sentence and of the grounds on which it was passed shall forthe with be furmished. Such report shall be embodied in the annual report of the Prisons Commissioners.

Prisoners not sentenced to penal servitude or hard labour are to be divided into three divisions. Where a person is sentenced to imprisonment without hard labour, the court may, if it thinks fit, having regard to the nature of the offence and the antecedents of the offender, direct that he be treated as an offender of the first division or as an offender of the second division, though if no direction is given the offender is to be treated as an offender of the third division. But any person imprisoned for default in payment of a debt, including a civil debt recoverable summarily, or in default or in heu of distress to satisfy a sum of money adjudged to be paid by order of a court of summary jurisdiction, when the imprisonment is to be without hard labour, is to be placed in a separate division and treated under special prison rules, and is not to be placed in association with criminal prisoners, nor to be com-pelled to wear prison diess unless his own clothing is unfit for use. Any person im-prisoned for default of entering into a recognisance or finding sureties for keeping the peace, or for being of good behaviour, is to be treated under the same rules as an offender of the second division, unless he is a convicted prisoner, or unless the court direct that he be treated under the same rules as an offender of the first division Provision may be made by prison rules for enabling a prisoner sentenced to imprisonment, whether by one sentence or cumulative sentences for a period prescribed by the rules, to earn by special industry and good conduct a remission of a portion of his imprisonment, and on his discharge his sentence shall be deemed to have expired. Under sect 9, where a person is committed to prison for non payment of a sum adjudged to be paid by the conviction of any court of summary jurisdiction, then, on payment to the governor of the prison, under conditions prescribed by prison rules, of any sum in part satisfaction of the sum so adjudged to be paid, and of any charges for which the prisoner is liable, the term of imprisonment shall be reduced by a number of days bearing as nearly as possible the same proportion to the total number of days for

which the prisoner is sentenced as the sum so paid bears to the sum for which he is so liable. [81] *Private Bill Procedure (Soctland) Bill. The

[81] **Private Bill Procedure (Boetland) Bill. The object of the measure was to provide for improving and extending the procedure for obtaining parliamentary powers by way of provisional orders in matters relating to Scotland Discussed on second reading (March 31st and April 4th), much sympathy being expressed with the object in view, but objection being taken to the method by which it was proposed to attain it Bill referred to a select committee, who reported the Bill with amendments, and made a special report in course of which they stated that, apart from matters of detail, there remained only one question of difficulty and importance. Viz., the constitution of the tribunal which was to conduct the local inquiry provided under the Bill. A substantial minority was of opinion that the tribunal should be composed of members of the two Houses, but various objections to this were put forward, and the disadvantages in the view of the majority made it expedient to prefer a tribunal composed of persons who are not necessarily members of either House.

persons who are not necessarily members on either House [82] *Public Buildings Expenses Act, '98 (6) Vict ch 5-ra April 181), provides for the application out of the realised surplus of the inancial veal 1897-98 (see afficile Finance, NATIONAL) of the sum of £4.550,000 towards deflaying the expenses of the purchase of iland and buildings, and the construction of buildings and works in connection with certain public departments, as follows—

Estimated Cost.

Public offices (Whitehall site), completion of purchase of site, and election of buildings and works con-

nected there with
Public offices (Westminster site),
completion of purchase of site,
and election of buildings and works
connected there with
700,000*

Science and Art Buildings at South Kensington Completion of Admiralty, including extension

Post Office buildings (Queen Victoria Street and West Kensington), purchase of buildings, election of buildings, and works connected therewith

d-'e-'£2,555,000

800,000

275,000

* This sum includes a sum of £100,000 for the purchase of the Westminster site, which is in addition to the sum of £450,000 authorised to be borrowed for the purchase of that site by the Public Offices (Acquisition of Site) Act, 1895. The Wai Office is to be erected on the Whitehall or Carrington House site, and the Board of Irade, Education Office, and Extension of the Local Government Board are to be housed on the Parliament Street site, as recommended by the select committee (see SESSION, sect. 131, 98 cd). The buildings in Queen Victoria Street now owned by the Post Office Savings Bank are to be appropriated to postal purposes, and a new Savings Bank erected at West Kensington. There, will ultimately be a very considerable set-off to the expenditure of £4,550,000 by the release and disposal of buildings and sites the estimated value of which, together with the capitalisation of rent now paid for temporary offices, will amount to over one million.

[83] *Public Works Loans Act '98 (61 and 62 Vict. ch. 54-r.a. Aug. 12th) authorises the (a) for the purpose of loans by the Public Works Loan Commissioners, of any sum or sums not exceeding in the whole £5,000,000, (b) for the purpose of loans by the Commissioners of Public Works in Ireland, any sum or sums not exceeding in the whole £80,000 Also authorises the Public Works Loans Commissioners to lend in Great Britain in respect of any work for which the managers of asylum districts or of school districts are respectively authorised to borrow under the Acts relating to the relief of the poor.

Registration (Ireland) Act (see sect 63)

[84] *Reserve Forces and Militia Act, '98 (61 & 62 Vict ch 9—ra July 1st) enacts that any man belonging to the first class of the army reserve, whose character on transfer to the army reserve is good, shall, if he so agrees in writing, be liable during the hist twelve months of his service in that reserve to be called out on permanent service without such proclamation or communication to or meeting of Parliament as is mentioned in and required by the Reserve Forces Act, but the number of the men so hable is not at any one time to exceed five thousand, and the power of so calling out men is not to be exercised except when they are required for service outside the United Kingdom when wathke operations are in preparation of in progress, a man so called out is not to be hable to serve for more than twelve months, any agreement under the section may be revoked by three months' notice in writing, and any exercise of the power of calling out the men is to be reported to Parliament as soon as may be. The Act also authorises the employment of any member of the militia volunteering to serve in any place outside the United Kingdom for a period not exceeding one year whether an order embodying the militia is in force or not at the time

[85] *Revenue Act, '98 (61 & 62 Vict, ch 46-1 a. Aug. 12th), makes numerous detailed amendments in the laws relating to customs detailed and inland revenue it, for instance, adds to the customs table of prohibitions and restrictions, fictitious stamps and instruments or materials for marking them, and advertisements or notices of foreign lotteries, and provides for the forfeiture of used stamps denoting the payment of Inland Revenue which are in the possession of any person who is a maker of seller of any dutiable article, and who might thus use them again.

[86] *Seed Supply and Potato Spraying (Ireland) Act, '98 (61 & 62 Vict, th 50-1, a Aug 12th), provides for the supply of seed potatoes, seed oats, and spraying machines and material to occupiers and cultivators of land in Ireland. and for the employment of instructors in the use of such machines and material.

[87] Service Franchise Bill. Mr Marks introduced this Bill, the object being explained to be to prevent large classes of person, such as constables and shop assistants, being deprived of the tranchise by reason of the restricted interpretation put on certain provisions of the Representation of the People Acts in some

expressed approval of it. Debate adjourned. Dropped.
[88] *Sheriff's Tenure of Office (Scotland) Act.

'98 (6i & 62 Vict., ch. 8—r.a | luly 1st), provides for the removal of a sheriff by order of the Secretary for Scotland upon a report prepared at his instance by the Lord President of the Court of Session and the Lord Justice Clerk declaring that the sheriff is by reason of inability or misbehaviour unit for his office. such order to be laid before Parliament and to be subject to veto by either House. If the sheliff is removed before he has completed ten years' service on ground of inability, an annuity may be granted him by the Treasury.

[89] Societies' Borrowing Powers Act, '98 (61 & [89] Societies Borrowing rowers Aug. 50 (or of 2 Vict, (h 15—1a July 25th), was introduced by Mi. Horace Plunkett, and empowers a society, as defined by this Act, by rule duly registered, to provide that it may receive deposits and borrow money at interest from its members, or from other persons. "Society means a specially authorised society registered, or seeking registration, under the Friendly Societies Act, 1896, having for its object the creation of funds to be lent out to the members of the society or for their benefit, and having m its rules provisions that no part of its funds shall be divided by way of profit, bonus, dividend, or otherwise among its members, and that all money lent to members shall be applied to such purpose as the society or its

committee of management may approve [90] Solicitors (Ireland) Act, '98 (or & 62 Vict., ch 17-1 a July 15th), was introduced by Mr. Hemphill, and amends and consolidates the laws relating to solicitors and to the services of indentured apprentices in Ireland measure seeks to place Irish solicitors and their apprentices and clerks in the same position as their English brethren

[91] Special Juries Act, '98, was introduced by Mi Waii (61 Vict, ch 6—1 a May 23rd), icpeals the provisions of a section of the Common Law Procedure Act, 1852, requiring the sheriff to summon a sufficient number of special jurymen "not exceeding forty-eight in ail," and enables the High Court to make rules

with respect to special juries, and thereby to repeal or alter any rules made under any previous act with respect to special juries.
[92] *Suffragan Bishops Act, '98 (61 & 62 Vict., ch 11-ra July 1st), by explanation of the Act of Henry VIII makes it lawful to appoint as suffragan bishop a person already consecrated

as a bishop, in which case the letters patent presenting him shall not require his consecration.

Teachers' Registration (see sect 52)

Teachers' Superannuation (see sect. 5t)
[93] *Telegraph (Money) Act, '98 (6t & 62 Vict.)
[93] *Telegraph (Money) Act, '98 (6t & 62 Vict.) ch 33-12 Aug. 2nd), provides for a grant of £1,000,000 (making £2,30,000 in all) for the development of the telephonic system [94] 'Union of Benedoes Act, '98 (61 & 62 Vict.,

ch 23-1 a. July 25th), enacts that a scheme for the removal of a church or parsonage under the Union of Benefices Act, 1800, may be made if it provides for the erection of another church

on parsonage for a benefice within or partly within the Metropolitan Police District.

[95] "Universities and College Estates Act, '98 (6i & 62 Vict, ch. 55—r.a. Aug 12th—commenced Oct. 12th, '98), extends the powers of sale, recent decisions. Discussed on second reading, March 2nd, when Mr. Knox, Sir C. Dilke, Oct. 12th, '98), extends the powers of sale, Mr. W. Allen, and Mr. McKenna opposed it, leasing, etc., exercise by universities and and Sir J. B. Maple and the Solicitor-General

not to be exercised without the consent of the Board of Agriculture; makes provision for the application of capital money; and in other respects amends the Universities and College Estates Acts, 1885 to 1880.

[96] "University of London Act, '98 (61 & 62 Vict., ch. 62—r.a Aug. 12th), makes provision for the reconstitution of the University of

London as a teaching as well as an examining body, and for the appointment of a statutory commission for the purpose. These commissioners are to consist in the first instance of 1 ord Davey (chairman), the Bishop of London (Dr. Creighton), Sir William Roberts, M.D. Fellow Univ. Lond., Sir Owen Roberts, D.C.L., Richard Claverhouse Jebb, Regius Professor of Greek, Univ. Camb. Michael Foster, M.D., F.R.S., Professor of Physiology, Univ. Camb., and Edward Henry Busk, M.A., Ll.B., Chairman of the Convocation, Univ. Lond Her Majesty may appoint a secretary to the Commissioners, and may appoint a person to London as a teaching as well as an examining Her Majesty may appoint a secretary to the Commissioners, and may appoint a person to fill any vacancy occurring among the Commissioners, but the name of every person so appointed a Commissioner is to be laid before Parliament. The Commissioners may, with the consent of the Treasury as to number, appoint or employ such persons as they may think necessary for the execution of their duties under this Act; and there shall be paid at the consentance of their consentance to the secretary and to any persons appointed or employed by the Commissioners such re-muneration as the Treasury may assign, which remuneration and all expenses of the Commissioners incurred with the sanction of the Treasury are to be paid by Parliament. The powers of the Commissioners are to continue until the end of the year 1899, but may be con-tinued, though not beyond the year 1900. The Commissioners are to make statutes and regulations for the University in general accordance with the scheme of the report of the Commissioners appointed to consider the draft charter for the proposed Gresham University, but subject to certain modifications specified or indicated in the schedule to this Act, and to any other modifications which may appear to them expedient after considering the changes which have taken place in London education of a university type since the date of that report, and any representations made to them by or on behalf of the Senate or Convocation or any fifty graduates of the University, or by or on behalf of any body or person directly affected. When any statute or regulation has been made by the Commissioners, a notice of its having been made, and of the place where copies of it can be obtained, is to be published in the London Gazette, and the statute or regulation is to be laid before Parliament; it is not to be valid until it has been approved by Her Majesty in Council, and if either House present an address praying the Queen to with-hold her assent from the statute or regulation, or any part thereof, no further proceedings shall be taken on it, or on the opposed part of it, though this shall be without prejudice to the making of a new statute or regulation. The Senate or Convocation of the University. or any other person or body directly affected by such statute or regulation, may petition Her Majesty in Council to withhold her approval, and Her Majesty in Council may refer any such petition to the Privy Council, a committee of tended to twelve, on the ground that all authorshich may hear the petitioner personally or by counsel and report on the matter. After the

expiration of the powers of the Commissioners the Senate of the University may make statutes and regulations for altering or supplementing any of the statutes or regulations made by the Commissioners, but this power is subject to the foregoing provisions, and any statute must be communicated in draft to Convocation. whose opinion thereon is to be taken into consideration. For the purposes of this Act the South-Eastern Agricultural College at West to have such privileges as it would have had if situated within the administrative county of London; nothing in the Act is to affect the rights or privileges of any of the Inns of Court or of the Incorporated Law Society, and existing fellows, though retaining their fellowship for life, are no longer to be, as such, members of the Senate The provisions of the schedule to the Act to which effect is to be given by the Commissioners in framing statutes and regulations have reference to, among other things, the constitution of the Schate, and are against the adoption or imposition of a religious test,

or the imposition of disability on ground of see.

[97] *Vaccination Bill. Mr Chaplin, in asking leave to introduce this measure (March 18th), remarked that one of the recommendations of the Vaccination Commission related to the kind of lymph which ought to be used in future. There had been some remarkable diswhich it was proved were obtained by the preservation of lymph taken from the call in glycerine, and if they took advantage of them they would go fai to revolutionise the whole of the present system of public vaccination. The inquiries of the Royal Commission had been inquiries of the Royal Commission had been stiengthened and confirmed by further investigations conducted by 511 Richard I horne and Di Copenan, on behalf of the Local Government Board, into the system in practice abroad. Those gentlemen found in the first place that when the lyingh was mixed with glycerine all extraneous organisms were destroyed: such as the microbes of tubercle, crysipelas, and diphtheria, secondly, that the lymph could be kept for long periods, and upon an emergency large quantities could with facility be supplied; and thirdly—which was a matter of the first importance—the necessity of arm-to-arm vaccination, and consequently all risk and possibility of inoculation with syphilis, whatever it may have been heretofore, wholly disappeared. While the Bill provided that vaccination would continue, as at present, to be obligatory, vaccina-tion by anything but call 13 mph would cease to be obligatory. And, as vaccination from arm to aim would cease to be compulsory, there would be no necessity for the attendance of children at the stations to provide the required lymph for others. On this point the Government adopted another recommendation of the Commission—viz that vaccination should be domiciliary, and accordingly the Bill provided that the vaccinator would be required to attend at the house of the child. In this way they would assimilate as nearly as possible the law and practice in England to what it is in Scotland, where vaccination has never been the difficulty that it is sometimes with us. In addition to this it was proposed that where

nation at twelve months than at three. He had been unable to accept the recommendation that any one objecting to vaccination might escape obligation by simply making a statutory de-claration to that effect. It seemed to him that this would make vaccination a dead-letter, and nothing could be more unfortunate or injurious to the community. He observed that the Commissioners themselves were not united on that point. Where they were agreed, and where the (sovernment were disposed to meet them. was in the recommendation that where people conscientiously objected they might be relieved from the imposition of repeated penalties. Bill dulvintroduced. On second reading (April 19th) Sii W. Foster said he regarded the proposed extension of the age limit, the regulation as to where vaccination was to be performed, and the use of a new form of lymph as valuable provisions, but he thought it would be advisable to abolish compulsion altogether and allow to abouse compuision altogether and allow parents with conscientious scruples to escape from penalties on making a formal declaration before a court that they objected to vaccination Mr. T. Bayley, in moving the rejection of the measure, expressed the belief that sanitation, measure, expressed the belief that samuation, isolation, and cleanliness would do more to prevent disease than vaccination. Mr Steadman seconded the amendment. The debate was resumed on May 9th, when Mr. Hazell said public opinion against compulsory vaccinations. nation in his constituency of Leicester was as nation in his constituency of Leicester was as strong as it had ever been. In course of further discussion Mr. Channing, Mi Labouchere and Mr Ascroft also expressed themselves as adverse to compulsion. The motion for second reading was carried by 277 to 23, and a further motion to refer the Bill to the Standing Committee on Low was adopted by core to 25. mittee on Law was adopted by 201 to 50. In Grand Committee the period within which the child was to be vaccinated was, on the motion of Mr. Carlile, shortened from the twelve months proposed in the Bill to six months. one sitting of the Committee on an amendment of Sir W. Foster similar in effect to that which he afterward's proposed in the House, only that it met the case of the conscientious objector by enabling him to merely make a statutory declaration and deliver it to the local registral of births. Several amendments to this amendment were moved. One of them, proposing that a declaration should be made before not less than two magistrates in petty sessions, or before any of the persons authorised by Act to administer oaths, was rejected by 28 to 15, and Sir W. Foster's proposal itself was defeated by 26 to 24 (June 21st). The sub-section relative to children in any infirmary or institution was inserted at the instance of Mr. Channing, and words were put in providing that the vaccinator should offer to vaccinate the child with glycerinated calf lymph, "or such other lymph as may be issued by the Local Government Board." The new clause as to the treatment of prisoners as first-class misdemeanants was added on the motion of Mr. Channing (July 181). Sir Wm. Priestley moved (July 5th) that no proceedings should be taken against any parent or person who had been convicted on account of the same child until after it had reached the age of five years, and no such parent or person should be liable to a penalty under the section

the clause, but it was carried against him by 20 to 11, the age of "four" being then substituted for "five." The clause as amended was tuted for "five." The clause as amended was added to the Bill. Bill considered by the Commons us amended July 19th, when Sir W. Foster moved the insertion of the following clause:—"Where a child is by this Act required to be vaccinated within six months from the birth of the child, the parent of person having the custody of the child may, not less than the months before the apparent. not less than twe months before the expiration of the six months from the birth of the child, make a statutory declaration and conscientious objection to the vaccination of the child before ond less than two magistrates in petty sessions, and if the statutory declaration is, within seven days after its date, delivered to the vaccination officer for the district in which the child resides, the vaccination officer shall register the same, and shall, if required, deliver to the parent or other person making the declaration a certificate of such registration, and thereupon an order shall not be made or proceedings taken with reference to the non-vaccination of the child

mentioned in the certificate. M1. Chaplin felt unable to accept this, but it was supported from his own side by Capt. Chaloner, Mr Wharton, Mr. Carlile, and others, and Mr Balfour at length suggested a compromise (offering at the same time to limit the operation of the Bill to five years), which Mr. Chaplin on the next day moved as follows:— "No parent or other person shall be liable to any penalty under sect. 29 or sect. 31 of the Vaccination Act of 1867 if within four months from the birth of the child he satisfies two justices in petty sessions that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers to the vaccination officer for the district a certificate by such justices of such conscientious objection. Sit W Foster proposed to substitute for the words "satisfies two justices," "makes a statutory declaration before two justices," but this was declaration before two justices," but this was rejected by 158 to 101, the ministerial clause being then agreed to (It was subsequently slightly amended) Mr. Balfour, in course of the proceedings on the clause, said it would not be the duty of the magistrate to cross-examine the paient as to the grounds of his objection to vaccination. The magistrate would have to be convinced, not whether a man's belief was well or ill founded, but whether as a matter of fact the belief existed and was a genuine one. All the words of Sir Wm. a matter of fact the benefit existed and was a genuine one. All the words of Sir Wm. Priestley's clause after "four years" were omitted, on the motion of the Solicitor-General, by 247 to 61. M1. Chaplin, replying to Mr. Labouchere (July 25th), stated that the obligation to satisfy two magistrates of conscientious objection to vaccination must be undertaken by the person in custody of the child, and if the father was prevented by unavoidable causes from performing the duty, its performance would naturally fall entirely on the mother. Mr. James Lowther, on third reading (July 30th), moved to re-commit the Bill in respect of clause 1 (vaccination within six months after birth). birth), clause 2 (provision against repeated penalties), and Mr. Chaplin's conscience clause. Mr. Vicary Gibbs seconded the motion, which should be liable to a penalty under the section if he satisfied the court that he conscientiously believed vaccination would be prejudicial to be prejudicial to the health of the child. Mr. Chaplin opposed and a Nationalists. Second reading of the Bill was agreed to in the House of Lords Aug. 2nd On the order for committee (Aug. 4th) the Marquis of Ailesbury proposed the rejection of the measure. Lord Lister contended generally that it would be better to pass the bill as sent to them from the Commercials that the them. to them from the Commons than to have no Bill at all. He, however, regarded the failure to deal in the measure with revaccination as a serious omission. Lord Harris said during the recess the Government would con-sider whether they were in a position to bring in a Bill next year on the subject of revaccination. The amendment for the rejection of the Bill being negatived, the House went into commoved to omit the conscience clause. After a debate, in which the Prime Minister spoke in defence of the course taken by the Government, the committee divided and struck out the clause by 40 votes to 38 Third reading was (Aug. 5th) agreed to, after Lord Feversham had observed that he still thought it a pity that some compromise could not be come to with respect to the conscience clause. Late in the same evening, on the Bill being returned to the Commons, Mr. Chaplin moved in effect to reinstate the conscience clause, and In the result the motion was carried by 129 to 34. On the Bill being again before the Peers (Aug 8th), Lord Harris moved that their lordships should not insist upon their amendment striking out the clause Lord Rookwood, Viscount Galway, Lord Zouche of Haryngworth, Lord Stanmoie Lord Glenesk, the Earl of Feversham, Lord Aldenham, and the Earl of Pottsmouth, who are all in the ordinary way supporters of the Government, successively joined in opposing the reinstatement of the clause. The Marquis of Salisbury strongly urged their lordships to agree with the Commons, and in the result the motion for reinstating the clause was

carried by 55 to 45.
[98] As the "Vaccination Act, '98 (61 & 62 Vict (1993) As the "Vaccination act, so (or to z z z, ch 49), the Bill received ra Aug zith, and it commences, except as specially provided, Jan 1st, 199, and remains in force until Jan 1st, 1904—E. The period within which the child is to be vaccinated is extended from three months. to six months from birth the requirement to take the child to a public vaccinator is repealed, and the public vaccinator shall, if the parent or other person having charge of the child so require, visit the home of the child for the purpose of vaccinating the child. If the child is not vaccinated within four months after birth, the public vaccinator, after at least 24 hours notice to the parent, shall visit the home of the child, and shall offer to vaccinate the child with allowering tell times he was the shall of the child with allowering the child times he was the shall of the was the shall of the child with allowering the child times he was the shall of the child with allowering the child times he was the shall of the child with allowering the child times he was the shall of the child with allowering the child times he was the child with allowering the child with allowering the child with the child w the child with glycerinated calf lymph, or such other lymph as may be issued by the Local Government Board I he public vaccinator shall not vaccinate a child if, in his opinion, the condition of the house in which it resides is such, or there is or has been such a recent prevalence of infectious disease in the district,

Vaccination Act of '67, if within four months from the birth of the child he satisfies two justices, or a stipendiary or metropolitan police magistrate, in petty sessions, that he conscien-tiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers to the vaccinajustices or magistrate of such conscientious objection. This section shall come into operation on the passing of this Act, but in its appli-cation to a child born before the passing of this Act there shall be substituted for the period of four months from the birth of the child the period of four months from the pass-ing of this Act." An older directing that a child be vaccinated shall not be made on any person who has previously been convicted of non-compliance with a similar order relating to the same child. No proceedings shall be taken against any parent or person who has been convicted on account of the same child, until it has reached the age of four years. Persons committed to prison on account of non-compliance with any order or non-payment of fines or costs under the Vaccination Acts shall be treated in the same way as first-class mis-demeanants. The Local Government Board may by order, in exceptional circumstances, require the guardians to provide vaccination stations for the vaccination of children with glycerinated calf lymph or such other lymph as may be issued by the Local Government Board, and modify as respects the area to which the order applies, and during the period for which it is in force, the provisions of this Act requiring the public vaccinator to visit the home of the child otherwise than on request of the parent The clerk of any sanitary authority which shall maintain a hospital for the treatment of small-pox patients shall keep a list of the names, addresses, ages, and condition as to vaccination of all small-pox patients treated in the hospital, and shall at all reasonable times allow searches to be made therein, and upon demand give a copy of every entry in the same on payment of a fee of 6d. for each search

and 3d for each copy
[99] *Vagrancy Act, '98 (61 & 62 Vict., ch. 39—
r a Aug. 12th—commenced Oct. 12th, '98: E), enacts that every male person who (a) knowingly lives wholly or in part on the earnings of prostitution, or (b) in any public place persistently solicits or importunce for immoral purposes, shall be deemed a rogue and vagabond within the meaning of the Vagrancy Act, '24, and may be dealt with accordingly. If it is made to appear to a court of summary jurisdiction by information on oath that there is reason to suspect that any house or any part of a house is used by a female for purposes of prostitution, and that any male person residing in or frequenting the house is living wholly or in part on the earnings of the prostitute, the court may issue a warrant authorising any constable valence of infectious disease in the district, that it cannot be safely vaccinated, and in that it cannot be safely vaccinated, and in that case shall give a certificate of postponement of vaccination, and shall forthwith give notice of any such certificate to the medical officer of health, for the district. No regulation of any infirmary or institution shall compel a parent to cause or permit the vaccination of a child at any time earlier than six months from birth.

"No parent or other person shall be liable to any penalty under sect. 29 or sect. 31 of the rises the punishment of whipping. This clause was struck out by the Lords, and on the return of the Bill to the Commons a motion of the Home Secretary agreeing with the action of

the Lords was carried by 117 to 40.
Colonel Dalbiac introduced (Feb. 11th) a
Criminal Law Amendment Bill whose object was to punish souteneurs and souteneuses, and there was a short discussion on it (Maich 11th).

Dropped.

[100] Working Men's Dwellings Bill, brought in by Sir A. Hickman "to provide facilities for in by Sir A. Hickman "to provide facilities for the acquisition by working men of their own dwellings" Sir H. Vincent having proposed second reading (June 8th), Mr. McKenna moved an amendment declaring that in any measure for facilitating the acquisition of dwellings for the working class by the use of public money, the freehold should be vested for jublic bodies and the state of the working that in the industrial. and not in the individual. After speeches by Mr. Burns, Mr. T. W. Russell (who on behalf of the Government agreed to the second reading with a view to the measure being sent to a Select Committee), Mr. Asquith, and others, the amendment was negatived by 181 to 82, Second reading was then agreed to, but, on objection being taken to the proposed reference to a select committee, the further proceedings stood adjourned. Dropped.

REPORTS OF COMMITTEES.

[101] Burial Grounds .- A committee on this subject which sat in the session of '97 and took evidence was reappointed March 14th, '98, the terms of reference being "to inquire into the subject of burial grounds provided by local authorities, under the Public Health (Interments) Act, '99, and other Acts, to inquire whether any alterations in the existing law are necessary, especially in regard o the consecration of the ground, the provision of chapels, the allocation of fees, and the appointment of chaplain, and to report thereon." Mi. Jebb was reappointed chairman The committee in their report (July 27th) state that they have taken evidence from 28 witnesses, including offic al representatives of the Local Government Board and the Home Office, ministers of religion, members of local authorities, and other persons. The committee give an outline of the provisions of the existing law an outline of the provisions of the existing law so far as they relate to the subject of this inquiry, and in course of their report set forth that the objection of Nonconforimists to the consecration of burnal grounds is to certain legal consequences which consecration carries with it. "It a Nonconformist is burned by a Nonconformist minister in the consecrated part of a cemeter y (under the Burial Acts), his friends must pay the fees to the incumbent, although must pay the lees to the incumpent, atmough the latter is not present, and renders no service of any kind. Before a Nonconformist burnal can take place in the consecrated part, forty-eight hours' notice must be given to the incumbent. These seem to be in practice the matters which cause most complaint." The committee express the opinion that the existing laws relating to burial should be consolidated, simplified, and amended, and that their ad-

to apply for the consecration of any part of a cemetery, and if a demand for consecrated ground should be made by a reasonable number of parishioners, then the Local Government Board should intervene, and apply for consecration. There should also be a right of appeal to the Local Government Board as to the extent and situation of the ground to be consecrated. In such cases the legal fees for consecration should be paid by those who have demanded it Consecration should not prevent the performance in the consecuated ground of such Christian and orderly services, other than the service of the Church of England, as may be desired by the relatives of the deceased, may be desired by the relatives of the deceased, in accordance with the Burial Laws Amendment Act of '80. Having regard to the proposals which the committee make in the interests of those who desire consecrated ground, they recommend, on the other hand, that in the unconsecrated ground the system of allor-ments under the Burial Acts should be con-tinued Under this enactment portions of the unconsecrated ground of cemeteries have frequently been allotted to a particular religious body, and the Home Office holds that such allotment confers an exclusive right on the religious body to which it is granted. In every cemetery the chapel or chapels which may hereafter be erected at the cost of the ratepayers should be unconsecrated, and be open to all. A religious body should have power, with the consent of the local authority, to eject at its own cost a chapel for services according to the rites of that body; and if the local authority should refuse consent, there should be an appeal to the Local Government Board, "All ecclesiastical fees, other than fees for services rendered, should be abolished in cemeteries which may hereafter be provided by local authorities. With regard to existing cometeries, we recommend that the present fees should be continued until the next vacancy, or for fifteen years, whichever period should be the longer; but if there should be a desire sooner to commute such fees by local agreement under proper sateguards, facilities to effect that object should be afforded. The fees chargeable should be of the same amount in the consecrated and the unconsecrated parts of a cemetery. The scale of fees to be paid for an unconsecrated parts of a cemetery. services rendered should be fixed by the local services rendered should be fixed by the local authorits, subject to an appeal to the Government Department, and such fees should be paid to the ministers of all religious bodies alike. Fees to clerks and other ecclesiastical officers should be abolished, but equitable compensation should be given to existing holders of those offices." The parochial clergy should be bound to officiate in consecrated ground where the service of the Church of England is required, subject to their statutory light to appoint a duly qualified substitute. right to appoint a duly qualified substitute. The local authority should have no power to appoint a chaplain. The forty-eight hours notice to incumbents, at present required under the Burial Laws (Amendment) Act, '85, should be abolished, and the local authority should have power to determine what notice ministration should be concentrated in a single Government depailment, which should be the Local Government Hoard. The committee and to unconsecrated ground. Subject to the suggest, among other things, that the local authority should have discretionary power to retained. The existing law, which secures apply for the consecration of part of a centery, and that if the local authority should decline to profane uses, should be retained; and equal protection should be given to uncon-secrated as to consecrated ground The existing inequalities in parochial rating for the provision of parochial cemeteries should be considered. Further provision should be made for the compulsory acquisition, when necessary, of land for parochal cometeres, and the exist-ing law should be simplified. In discussing the draft report in committee Viscount Cran-borne proposed the insertion of the words which appear in the report, recommending, with regard to existing cometeries, that the present fees should be continued until the next vacancy, "or for fitteen years, whichever period should be the longer," etc., whereupon Mr. Carvell Williams moved the omission of

the words quoted, but was defeated by 5 to 4 [102] Election Petitions A select committee was (March 22nd) appointed to inquire into the procedure and practice on Parliamentary election petitions, and to report if any changes were desirable therein The Solicitor-General was called to the chair, and the committee examined ten witnesses. In their report (Aug 2nd) the committee make a series of detailed recommendations and suggestions They think that in England, at all events, the rota of judges for the trial of petitions should be rather differently constituted, that all proceedings on a petition should be taken only before a judge of judges on the rota, and as far as possible before the same two of the rota judges The committee do not recommend that any alteration should be made in the amount required to be deposited or secured when a petition is presented-viz., £1000 This sum petition is presented—viz., £1000—11018 sum should be deposited before the petition is allowed to be filed. All sums required for security should be provided in each and not be recognisances, but power should be given to order the release of part of the original deposit if only a recount is claimed, or a short and mexpensive case is made, or whenever it appears that that sum is likely to be more than sufficient to cover those entitled to the benefit of it. Both in releasing part of the deposit and in ordering further security the possibility of securing the respondent should not be the only consequence to be regarded Consideration should also be given to the desirability in the public interest of encouraging attempts to secure purity of election, even at the occasional risk of individual loss. The sitting member should be at liberty to attend the inquiry without being made liable for costs, unless the conduct of himself or his agent forms part of the subject matter of the inquiry. Some doubt having arisen as to whether persons are en-titled to be heard by counsel before they are reported as being guilty of corrupt or illegal practices, the committee think that, if eresh legislation is deemed desirable, the Act should be so amended as to enable them to be heard either by themselves or by counsel, and to call The position of the Public Prosecutor evidence is, in the opinion of the committee, at present unsatisfactory, as he has not sufficient power to fulfil the functions he was intended to discharge, and the committee make suggestions on this point. The respondent or any person who may be entitled to be paid costs, charges, and expenses by the petitioner, should be entitled from time to time, until the trial has actually begun, to apply to the judge who has control of the case, to order such further sum to be the erection of a generating station outside the deposited in court as he may think right, in area of supply, powers may properly be given

order to secure the costs of such person; and it should be the duty of the judge, so far as he can, to order that adequate provision is made to secure payment of all costs likely to be awarded. In case of non-compliance with an order to further deposit cash as a security, not being the result of a corrupt or collusive arrangement, the judge should be enabled to order the petition to be removed from the file and proceedings to cease, and all money previously deposited to be applied to the payment of the respondent's costs already incurred or to be incurred, unless—(1) some other person who might have been a petitioner in respect of the election to which the petition relates, and who is able to find further security, applies to become substituted as a petitioner; or (2) the Public Prosecutor elects to continue the petition with all the liabilities of a petitioner as to costs, etc In either of these cases the sum in court held as security should be applicable to secure the costs of the respondent. Recriminatory charges should be placed exactly on the same tooting for all purposes as original charges, but the time for delivering particulars of them according to the present practice being only six days before trial, the committee think it should be extended. Under sect. 44 (1) of the Corrupt and Illegal Practices Prevention Act, '83, if it appears that the respondent was not personally appears that the respondent was not personally cognisant of corrupt practices, and took care to prevent them, but that corrupt practices extensively prevailed, the county or borough may be ordered to pay the costs, in whole or in part. It is conceived that such orders might be made more frecly, and the power might be extended to cases where illegal practices extensively prevailed. The relief obtainable under seed 22 of the 46 & 47 Vict, ch. 51, instead of being limited as at present to treating and undue influence, might be extended. treating and undue influence, might be extended to the cases of all corrupt and illegal practices committed without the cognisance of the candidate or his election agent. Finally the committee suggest a codification of the various statutes which relate to Parliamentary elections and corrupt practices and election petitions

[103] Electrical Energy (Generating Stations and Supply). A joint committee of Peers and Commons, appointed in March, considered several specified matters submitted to them in connection with this subject, and reported in Viscount Cross was chairman of the committee There were several Bills pending in Parliament in which effect was proposed to be given to new developments of the electrical industry, and these measures were brought to the notice of the committee, but the committee did not consider them in detail nor take any evidence upon them. The committee any evidence upon them. The committee consider that the proved public advantages of electrical energy in the generation of light and power warrant the granting to under-takers of compulsory powers for acquiring sites for generating stations and lands or easements for pipes and mains therefrom, and other works. They also think that compulsory powers for the acquisition of land for a generating station, and lands or easements for pipes and mains and other works to the area of supply, may also properly be given where the proposed site is not within the area of supply. In the case of powers being given for the erection of a generating station outside the

for laying the mains in streets leading from the generating station to the boundaries of the area of supply. In such case the local authority liable to maintain these streets should have the same option of themselves breaking up and reinstating the streets at the undertaker's expense as is now given within the area of supply. While it may be advisable to maintain the veto of local authorities as to the erection of overhead wires, now given by law in respect of other electric wires, it is not advisable that in the case of overhead wires for traction purposes the local authority, other than the London County Council and county boroughs, should have an absolute veto. Where sufficient public advantage is shown, powers may be given for the supply of electrical energy over an area including districts of numerous local authorities, and involving plant of exceptional dimensions and high voltage. Such under-takings may properly be authorised on conditions differing in some respects from those

imposed under existing Acts.

The committee think the provisions of the Electric Lighting Act, '88, enabling the local authority to purchase an undertaking after a term of years, mapplicable, as a general rule, to the case of an undertaker supplying energy in bulk at high voltage, but there may be special cases where it is desirable that the special cases where it is desirable that the local authorities should have the right to purchase reserved to them Exemption from liability to compulsory purchase would not pre-vent local authorities from applying for powers to purchase. In cases of the exemption from hability to purchase, it would be specially expedient in the interest of the consumers that some kind of sliding scale, as in the case of gas undertakings, should be imposed. In connection with this question of purchase under sect 2 of the Act of '88, evidence was given to the effect that, with a view to secure in London one and the same time for the execution of the powers, the Board of Frade have in some cases imposed upon undertakers a less term than 42 years within which they are hable to be purchased The committee suggest that if the full period of 42 years 15 not granted, and if a substantially shorter period 15 imposed by the Board of Trade, the terms of purchase should in each case be reconsidered. The committee consider that the provisions of the Electric Lighting Act, '88, which require the consent of the local authority as a condition precedent to the granting of a Provisional Order, should be amended. In their opinion the local authorits should be entitled to be heard before the Board of Irade, but should not have, so to speak, a provisional veto, only to be dispensed with in special cases by the Board of Irade.

Board of I rade [104] Gas Companies (Metropolitan Charges). On June 21st it was ordered that a select committee be appointed "to inquire into the powers of charge conferred by Parliament on the Metropolitan gas companies, and to report as to the method in which those powers have been exercised, having regard to the differences of price charged by the various companies." The committee was nominated Aug. 1st. At a formal meeting on Aug. 4th Sir John Dorington was chosen chairman, and the committee on the same day reported that the committee on the same day reported that it was not possible to commence the inquiry at that period of the session, and recommended

mencement of the next session. (See also

sect. 66.)
[105] Money-lending.—This committee, which [105] Money-issaung.—Inis committee, wincen first sat in '97, was reappointed Feb. 16th, '98, though with a slightly different and wider order of reference. In '91 it was directed 'inquire into the alleged evils attending money-lending transactions at high rates of interest, or under oppressive conditions as to repayment, between the poorer classes and pro-fessional money enders"; in '96 the order was "to inquire into the alleged evils attendant upon the system of money-lending by pro-fessional money-lenders, at high rates of interest, or under oppressive conditions as to repayment," and to report thereon The memrepayment, and to report thereon. The members of the committee were—Messrs. Ascroft, Thomas. Bayley, Caldwell, Captain Chaloner, Messrs, Garfit, Hazell, Jeffieys, Lloyd-George, A. K. Loyd, Dr. M'Donnell, Price, T.W. Russell, Warr, George Whiteley, and Yerburgh. On the reassembling of the committee Mr. T. W. Russell was re-elected chairman. In course of the inquiry upwards of forty witnesses were examined. The evidence shows, the committee say, in their report (June 29th), that money-lending transactions frequently owe their inception to misteptesentation of a fiaudulent character, they advert to well-known facts in character, they advert to well-known facts in this connection, give cases of high rates of interest, and allude to the steps taken to enforce the fulfilment of "unconscionable bargains." In course of further observations the committee say "After carefully considering the evidence which has been given in regard to particular transactions and the general expressions of opinion of persons so well qualified to form a judgment as Sir Henry Hawkins, Sir James Charles Mathew, Sir George Lewis, the Inspector General in Bankruptcy, and the county court judges, your committee have unhesitatingly come to the conclusion that the system of money-lending by professional money lenders at high rates of interest is productive of crime, bankruptcy, unfair advantage over other creditors of the borrower, extortion from the borrower's family and friends, and other serious injuries to the And although your committee are satisfied that the system is sometimes honestly conducted, they are of opinion that only in rare cases is a person benefited by a loan obtained from a professional money-lender, and that the evil attendant upon the system far out-weighs the good They their close consider that there is urgent need for the interposition of the Legislature with a view to removing the evil. Turning to the question of remedies, the committee regard it as of the utmost importance that no legislation should interfere with leg timate trading, and it has therefore been necessary for them to consider in what way transactions of professional money-lenders may be distinguished from ordinary commercial transactions. Their conclusion on this point is that the transactions will be sufficiently distinguished by the expression "transactions with persons carrying on the business of a money-lender in the course of such business."

The two fundamental proposals which were made to the committee are: (1) that Parliament should enact that any interest above a certain rate on loans advanced by professional moneylenders should be irrecoverable at law; or (2) that the courts should have power to go that the investigation be resumed at the com- behind any contract with a money-lender, to

inquire into all the circumstances of the original loan and of the subsequent transactions, and to make such order as may be considered reasonable. As regards the first suggestion the committee considered that a high suggestion the committee considerant a night rate of interest is not in itself incompatible with fair-dealing, and that no limit of interest could be prescribed which would be adapted to the widely different conditions under which these loans are contracted. For these and other reasons the do not recommend any statutory limitation of interest.

"After carefully considering the whole of the evidence and opinions, your committee have arrived at the conclusion that the only effective remedy for the evils attendant upon the system of money-lending by professional money-lenders is to give the court absolute and unfettered discretion in dealing with these transactions. They therefore recommend that all transactions, by whatever name they may be called, or whatever their form may be, which are, in substance, transactions with persons carrying on the business of a money lender, in the course of such business should be onen to complete judicial review. That in be open to complete judicial review. all legal proceedings to enforce, or in any relief in respect of, a claim arising out of such transactions the court should have power to inquire into all the circumstances of such transactions, from the first transaction up to the time of the judicial inquiry. That in such pioceedings the court should have power to reopen any account stated in the course of such transactions, to direct that an account be taken upon the basis of allowance of such a rate of interest as shall appear to be reasonable, having regard to all the cucumstances, and to make such order as the court may think fit. That, having regard especially to the fact that money-lenders frequently take from borrowers promissory notes or bills of exchange, which are negotiable, and to which, consequently, the boi rower will have no defence against the claims of a holder in due course, as well as to other considerations, it is necessary to provide, in order to do complete justice between the parties, that the court should have power to direct repayment by the money-lender to the borrower of any amount which, upon taking the account, may appear to have been paid by the borrower to such holder over and above the amount which the court may direct to be reasonably due to the money-lender under all the circumshould be enabled, notwithstanding any provision or agreement to the contrary, to apply to the court at any time to redeem any security, or for relief on the part of himself and any other percent who are a security. and any other person who acts as surety, or otherwise, upon payment of the principal sam advanced and such interest as the court may consider reasonable. That the discretion sugconsider reasonable. In the discretion sig-gested should be exercisable by any judge of the High Court or any judge of a county court. That from any decision given under these powers, by the judicial authority, there should be no right of appeal by either party except by leave of the court. That no transaction between a judgment debtor and a judgment creditor by way of a renewal of the loan should be valid so long as the judgment remains un-satisfied. Your committee are satisfied that money-lenders often take into consideration,

borrower of any publicity of the transactions with them, into which his misfortunes have led him. They are satisfied that borrowers will often submit to almost any degree of oppression in order to hide the consequences of their folly or misfortunes. The committee therefore consider that, to render the remedies proposed really effective, it is essential that wherever it may appear to the court desirable the court should have power to hear any money-lending case in private." In addition to the two fundamental remedies already dealt with, the commental remedies already dealt with, the committee had under their consideration proposals for the alteration of the law in regard to bills of sale, bankruptoy proceedings, and other matters connected with money-lending, and also certain suggestions as to the registration and licensing of money-lenders, and the described of the sales of the s snability of establishing co-operative banks. Among the recommendations of the committee with regard to the first point are that goods assigned under a bill of sale, made or given by way of security for the payment of money advanced by or through a person carrying on the business of a money-lender, should not be removed by the grantee without a county court judge's order; that every bill of sale should be attested, and fully explained by the registrar of the county court or the district in which the be handed over to the grantor in the presence of the registrar, or proof otherwise given to the satisfaction of the registrar that the whole amount secured by the bill of sale has been bond hde paid over to or on account of the grantor that every bill of sale made or given in consideration of any sum under £50 should be void, and that the instrument should also be void if the borrower does not actually receive and enjoy the use of the full sum stated to have been advanced. The evidence shows that been advanced. money-lending transactions are conducted by means of absolute bills of sale, accompanied by a hire-purchase agreement. In such cases the money-lender is in possession of the goods, and is enabled to seize them immediately default is made in the payment of any of the instalments under the hire-purchase agreement. The committee consider that, in the event of the system not being illegal, it should either be declared so, or the hire-purchase agreement should be registered with the bill of sale Warrants of attorney and cognovits have been and still may be instruments of oppression, and the committee recommend that the use of such documents should be abolished in connection with all loans advanced by persons carrying on the business of a money-lender in the course of such business. As to procedure, in all cases where proceedings are taken in the county court, the money-lender should sue only in the county court or the district where the borrower resides Statutory declarations in connection with money-lending transactions should in future be made only before the registrar of the county court, who should be required to fully explain their purport to those making them In bankruptcy proceedings the committee would give full power to review the whole transaction with the money-lender. In regard to Sootiah procedure under summary diligence, they think this process should not be applicable in connection with any transbe applicable in connection with any transactions with a person carrying on the business of a money-lender in the course of such business as part of their security for payment for unjust of a money-lender in the course of such business claims, the dread of the coasequences to the unless the borrower has a domicile in Scotland.

Evidence was submitted to the committee showing that the garnishee summons may be and is used by some money-lenders as an instrument of oppression against clerks and persons ment of oppression against clerks and persons in similar positions; and the committee re-commend that the protection granted by the Act of '70 to the wages of servants, labourers, andworkmen should be extended to any person whose wages or salary, together with any other income, does not exceed the sum of £200 per The committee make a series of annum. recommendations regarding the registration of money-lenders, suggesting among other things that it should be declared an offence for any money-lender, individually or in partnership, to carry on the business of a money-lender under the name of "bank," "trust," "corporation," or other misleading title, or to issue or publish any false or misleading prospectus, circular, or advertisement, and that it should be the duty of the registrar of each county court to report to the Public Prosecutor any such offence which may be brought to his knowledge or of which he may become cognisant; that on conviction for any of these offences it should be competent to the court to strike the name of such money-lender off the register for any period, and to impose a penalty to be prescribed by statute, that no money-lender should be capable of recovering any debts incurred in connection with money-lending transactions connection with money-lending transactions during the period for which he has been struck off the register. Any money-lender carrying on such business without being registered should be incapable of recovering any debt incurred in connection with money lending transactions. A further safeguard to which the committee attach some importance is that every person or company carrying on the to keep regular and strictly accurate accounts of each transaction, and to furnish to the borrower, on every date when an instalment falls due, a clear statement of his account up to date money lender should be required to furnish to the borrowers and to the sureties, if any, at the time each transaction is entered into, copies of every document signed by him or them, and any failure to do this should render the moneyany lattice to do this square rate the molecy lender liable to lose his right of recovery of any money lent. The committee received important evidence as to the operation of co-operative banks on the Continent and in some parts of the United Kingdom. It appears, they say, that the establishment of such banks has been of great use in abolishing or largely diminishing the trade of lending money at exorbitant rates of interest to the poorer classes. The committee were impressed with the extreme usefulness of these institutions, and are of opinion that they meet a real want, especially in agricultural districts. They do not, however, recommend any State intervention

in connection with them at the present time.

[106] Museums of the Science and Art Department. The committee which sat in '97 to inquire into and report upon the administration and cost of these museums, and presented reports with special reference to the protection of the South Kensington collections from fire, was reappointed March and, and presented a first report on April 26th. They were unanimously of opinion that the whole area on the east side of Exhibition Road (except that occupied by the Royal College of Science, which cannot be sacrificed except at great cost) should be exclusively

devoted to the Art Museum and the Art Library, with provision for the conduct of the business connected with loans of art objects and the art connected with loans of air objects and the as-schools, and that provision for the whole of the Science Collection, the Science Library, for loans of scientific objects, and for the science schools, should be made on the west side of the Exhibition Road. They also unanimously recommended that the Geological Museum in Jermyn Street be no longer occupied for the same purposes as now; and that the collections there exhibited be removed to the west side of Exhibition Road and made part of the Science Collections. The second report of the commutee, which was presented on luly 20th, appears to have been the subject of much detailed controversy. A draft report of Lord Balcarres was brought forward, but the motion that the draft of the chairman (Sir F. Powell) be read a second time was agreed to. The final question that the report as amended be the report of the committee to the House was carried by 7 to 3, Sir J. Gorst being one of the minority. As regaids the Bethnal Green Museum, the committee cannot say that as it stands it is of adequate use to the community Properly organised it would become an effective agen v for the improvement of technical in-struction in the East End The Edinburgh Museum suffers from the centralising tendency of South Kensington, and the head of the Edinburgh department should be allowed greater initiative. The same remarks apply equally to the Dublin director. Without making any definite recommendation, the committee are of opinion that a good case has been made out for extending the advantages of science and out for extending the advantages of science and art collections in the Principality, and in the event of the Bethnal Green Museum being removed from the control of the Department, the money so saved might be devoted advantageously to museum purposes in Wales. With a view to the efficient and economical management of the museums in London, to say nothing of other educational advantages not within the order of reference, the committee deem it of paramount importance that there be an Education Minister of Cabinet rank, having as seat in the Legislature, aided by a Par-hamentary secretary. They recommend that the Secretary for the Science and Art Department, like the Secretary of the Education Department, have his office at Whitchall, that there be advisers or visitors who would assist the Department by suggestions of information in matters affecting the museums, but would not lessen the responsibility to Parliament of the Parliamentary chiefs, that admission to all the museums be always free; that negotiations be carried forward with a view to transferring to some local authority the site and structure of the Bethnal Green Museum, the Dixon collection of pictures, and any other objects specially dedicated by donors under their wills or otherwise. They are of opinion that meanwhile more changes in the objects exhibited while more changes in the objects exhibited might be made with advantage to the district. The committee, however, call attention to the evidence of the difficulty, if not impossibility, of obtaining subscriptions from the ground landlords and industrial capitalists. They are of opinion that further gifts of public money should only be given to meet corresponding contributions from local sources, by way either of rates or of private subscriptions.
[107] Petroleum. The protracted inquiry into

the sufficiency of the law relating to the keeping, selling, using, and conveying of petroleum and other inflammable liquids, and petroleum and other inflammable liquids, and the precautions to be adopted for the pre-ention of accidents with petroleum lamps, was brought to a close, and the report of the committee presented on July 13th, the investigation having extended over four sessions, in course of which the committee held 53 sittings and examined 85 witnesses. The late Mr Mundella was chairman of the committee in these cours of the committee of the c in three sessions. Mr Jesse Collings, Under-Secretary for the Home Department, succeeded him when the committee reassembled in March '98. After the evidence had been concluded, the chairman in the ordinary course presented, on June 17th, a draft report, which was duly read a first time. After this a draft report pioposed by Mi Ure was also read a first time. The Charman's draft of 174 paid. graphs contained a paragraph recommending that a Bill be brought in to remedy the delects in the existing law, and expressing an opinion in layour of the adoption of the present flash point-viz, 73° (Abel)-as the dividing line between petroleum oil and petroleum spirit. The diaft also dealt with many other points, including the manufacture of lamps Mr. Ure's set forth, among other things, that practically, complete immunity from lamp accidents would be attained if only oil with a flash point above 100° Fahr were in common use as an illuminant. The question that the draft report proposed by the chan man be read draft report proposed by the chailman be read a second time paragraph by paragraph was carried by 8 to 5, Mr Uic's draft being accordingly set aside. Twenty paragraphs regarding "past legislation and Parliamentary inquiries" were omitted from the chailman's draft by 7 to 6. On June 24th Mr. Uie moved to leave out "32" from the paragraph in the chairman's draft relative to the flash point, and to insert "100"," and this was carried by 8 to 6 against the chairman Certain changes were also made as regards the proposed exemptions On a subsequent occasion Mr Fortescue On a subsequent occasion Mr Fortescue Flannery proposed to add a provision under which, subject to the exemptions which had been adopted, petroleum spirit flashing above 73° and below 100° might be kept on registered premises and otherwise specially regulated, but after the committee had struck out 73° from and declined to insert 85° in the amendment, the proviso was withdrawn, so that the previous decision of the committee in favour of raising the flash point to 1000 was upheld A series of modifications was afterwards made in the report. This document appresented sets forth the conclusion of the committee that in the interests of public safety legislation is necessary for the control and legislation is necessary for the control regulation of petroleum oil as far as storage, transport, and sale are concerned, and that, with regard to petroleum spirit, the present law is not adequate for the public safety, and law is not adequate for the public safety, and should be amended. The committee therefore recommend that a Bill be brought in to remedy the defects in the existing law. In order to carry out this recommendation, the committee are of opinion that it will be necessary to make the following provisions with respect to petioleum—(1) To secure legislative control for petroleum generally, and admixtures of the same with other substances, certain heavy oils being exempted. (2) To adopt a flash point—viz., roo (Abel close test)

-as the dividing line between petroleum oil and petroleum spirit. (3) To provide that, with the following exemptions, petroleum oil shall be kept only on premises registered or incensed under the Act, and petroleum spirit only on premises licensed under the Act. only on premises itemed under the Activities Spirit not exceeding 5 gallons; when oil and spirit kept together and not exceeding 5 gallons of spirit and 40 gallons of oil; oil (for private use only) not exceeding 130 gallons. The committee think it will be also necessary to make provisions that registered premises should be at a safe and suitable distance from "protected works", to limit the amount of oil (subject as above) on registered premises, and generally to make regulations for registered primises, to establish a system of licensing for the storage of petroleum spirit (subject as above) in all cases, and for the storage of petroleum oil in cases where it cannot be conveniently kept under registration, and generally to regulate licensed places, to make regulations as to conveyance or hawking of such oil and spirit, to regulate the keeping and use of petioleum for the purpose of motive power, to provide for an efficient system of testing, for adequate supervision and administration by local authorities; and that official inquiries be made into the causes of accidents arising from the storage, transport, or use of inflammable liquids. The committee find that there is a consensus of opinion, among nearly all the witnesses who gave evidence on the subject, that lamp accidents are mainly due the subject, that tamp accurates are mainly due to gross carelessness and recklessness on the part of a certain class of users of lamps, and ignorance as to the character of petroleum oil, and they are persuaded that no legislation is possible which can effectively guard against accidents which result from such careless and wilful acts as they describe. The committee came to the conclusions that the number of lamp accidents has not increased out of proportion to the vast increase in the number of lamps in use, and on account of the volatile character of petroleum it is necessary, in order to prevent accidents, that ordinary care should be taken in the use of it, whether the flash point be 73° or 100°, that to place such legislative restrictions on petroleum oil below 1000 (Abel close test) as are placed on petroleum spirit would have the effect of preventing the use of such oil for domestic and trade purposes. [This paragraph was inserted by the casting vote of the chairman], that it is in accordance with the evidence that if immunity from accidents is to be secured it will be necessary to prevent the use of all petroleum below 120° flash point (Abel close test), and that the effect of such legislation would be to materially increase the cost of petroleum to the consumer. The committee cannot, therefore, recommend tegrslation of this kind, but are of opinion that an effective remedy might be found in another direction. All or nearly all of the

statutory power should be given to the Secretary of State to issue an order for their Secretary of State to Issue an order for the enforcement, with power to vary the order from time to time, if found necessary, such order to affect the importation of lamps and parts of lamps. They also think that the dissemination of information as to the nature dissemination of information as to the nature of petroleum generally, and as to the filling, cleaning, and management of lamps, through the local authorities and school managers would tend to remove the ignorance which is the cause of so many accidents

[108] Shop Glubs, Compulsory. The Home Secretary placed on the paper, towards the end of the session, a notice for the appointment of a select committee to inquire into and report upon the alleged greevance of the Friendly.

upon the alleged grievance of the Friendly Societies in regard to the action of employers Societies in regard to the action of employers of labour in compelling their workpeople, as a condition of hiring, to join benefit clubs or societies established by the employers, and to cease their membership with any friendly society to which they may belong. Objections were taken to the points in the terms of reference. He afterwards announced that, having seen the representatives of the Friendly Societies and clearly ascertained their wishes, he proposed, especially in view of the late period of the session, not to proceed with his motion then; but, meanwhile he would do his best, by way of forming a departmental committee or otherwise, to make careful inquiry into the

or otherwise, to make carein inquiry measurementer during the recess.

[109] Telephones. Mr. Caldwell (April 181) called attention to the position of the Post Office with regard to telephone hiences, and moved, "That the continued refusal of the moved, "That the continued refusal of the Post Office to grant licences to and allow municipal corporations and other responsible bodies to compete with the National Telephone Company is contrary to the Freasury Minute of May 231d, 1892, 15 inconsistent with the letter and spirit of the agreement entered into with the telephone companies when the Post Office took over the trunk lines; and is calculated to prevent the establishment of a cheap, adequate, and efficient telephone service in the United Kingdom of Great Britain and Ireland, and to increase the difficulties and costliness of any arrangement for the assumption by the State of the whole telephone systems, should State of the whole telephone systems, should that step ultimately be considered desirable." Mr. Hanbury, as representing the Post Office, discountenanced any idea of buying out the company at its present market price, but stated that the company's licence would expire in 1911, and that in the meantime the Department was entitled to compete, with the same opportunity of canvassing for subscribers as was open to its tivals. On the question of municipal compe-tition he promised a select committee. It was duly ordered (May oth) that a select committee be appointed "to inquire and report whether the telephone service is or is calculated to become of such general benefit as to justify its being undertaken by municipal and other local authorities, regard being had to local finance, and if so, whether such local authorities should have power to undertake such service in the districts of other local authorities outside the area of their own jurisdiction, but comprised wholly or partially in the same telephone area,

they presented their report on Aug. 9th the committee had held twenty sittings and taken much evidence. In the opinion of the committee the telephone service "is not at present of general benefit, either in the United Kingdom at large, or even in those limited portions of it where exchanges exist; is not likely to become of general benefit, eithen, in the country as a whole, or in existing or future exchange areas, so long as the present practical monopoly in the hands of private company shall continue, and as it has already become of much more general benefit in other countries, affording less scope for its development than is afforded by the greater density of population and the greater wealth and commercial activity of the United Kingdom, so it is fitted to become in this country, if worked solely or mainly with a view to the public interest, a valuable instrument in further developing the trade and social life of the nation, towards which new means of communication have always hitherto so largely contributed." They think "that a service already so essential to commercial men, and so well calculated under other conditions to benefit directly or indirectly all classes of the community, ought no longer to be treated as the practical monopoly of a private company, a course for which no legal or moral necessity appears to exist, and especially ought not to be worked on a system and under conditions which confine its benefits to a limited class in charged, and allow a private licensee of a public monopoly to refuse the use of a business necessity to one tradesman and grant it to his competitor under similar circumstances, impose no limitation of charges, and leave the public at large dependent on a service which is in its turn wholly dependent upon innumerable way-leaves held upon very precarious tenure, and nearly all liable to be terminated after six of twelve months' notice." The committee had next to consider whether municipal and other local authorities should have power to undertake a telephone service, regard being had to local finance. They, however, felt bound, before dealing with this question, to fully satisfy them-selves that the Post Office is not prevented either by legal agreement or by good faith from limiting or ending the monopoly of the company. On the right of the Post Office to compete in any area, either itself or by means of licensees, the written agreement between the Post Office and the company is distinct and unmistak-able: and documents laid before the committee, in their view, placed beyond doubt the entire absence of any limitation, whether by verbal and any initiation, whether by verball understanding or otherwise, upon the unrestricted right of the Post Office to allow the Cullest competition. The right to compete being thus made clear, the committee had next to consider whether competition was expedient, and if so, whether local authorities should be empowered to undertake a telephone service. Competition appears to be both expedient and necessary, but competition by a local authority must differ in many ways from competition by a private company, it requires special provision to meet the special conditions of the case; and a local authority must also submit to conditions to which the company is not subjected. From and what powers, duties, and obligations ought to be conferred or imposed upon such local authorities." The committee met on May 12th; Mr. Hanbury was called to the chair, and before of gas, water, tramways, and electric light by

local authorities. So far, therefore, as the legal or equitable rights of the company, or the financial or other interests of the locality, are concerned, the committee see no reason why licences should not be granted to local authorities. On reviewing the whole of the evidence, the committee is strongly of opinion that general, immediate, and effective competition by either the Post Office or the local authority is necessary, and consider that a really efficient Post Office service affords the best means for securing such competition They further consider that when in an existing area in which there is an exchange the local authority demands a competing service, the Post Office ought either to start an efficient telephone system itself, or giant a licence to the local authority to do so. With regard to areas in which there is no exchange and districts which are not areas, they think some provision should be made beyond what is now offered by the National Telephone Company for giving a service when there is a reasonable local demand. In such cases the Post Office should either start a service of its own, or should grant licences to the local authorities to do so, subject to proper regulations committee in thus recommending a Post Office service assume that it will constitute a real and active competition, and that concessions to the company not required by the agreement will cease. Such a competition should, in their opinion, be carried on by a distinct and separate branch of the Department, and in future be conducted under strictly businesslike con-ditions, and by a staff specially qualified for such a duty.

ROYAL COMMISSIONS.

The following Royal Commissions have been appointed, and had not (Nov. 21st) presented reports — Indian Finance: see separate article Indian

Finance: see separate atticle indian

Licensing Laws: see separate article Licensing Laws.

Local Taxation: see separate article LOCAL GOVERNMENT

London University Commission. For names of the commissioners appointed under the Act of '98 see sect. 96 (supra) Since the passing of the Act Mi. T Bailey Saunders, barrister-at-law, has been appointed secretary to the Commissioners.

London Water Supply: see separate article London Water Supply

Sewage Disposal: see next article.

Sewage. Disposal of A Royal Commission was appointed during '98 to inquire and i port one—
(1) What method or methods of treating and disposing of sewage (including any liquid from any factory, or manufacturing process) may properly be adopted consistently with due regard for the requirements of the existing law, for the protection of the public health, and for the economical and efficient discharge of the duties of local authorities; and (2) if more than one method may be so adopted, by what rules, in relation to the nature of the volume of the sewage or the population to be served, or other varying circumstances or requirements, should the particular method of treatment and disposal to be adopted be determined; and (3) to make any recommendations which may be

deemed desirable with reference to the treatment and disposal of sewage. Earl of Iddesleigh, C.B., Sir Richard Thorne Thorne, K.C.B, Medical Officer of the Local Government Board, Major-General C. P. Carcey, C. P. Cotton, Esq., Michael Foster, Esq., M.A., Professor of Physiology, Cambridge, Col. T. W. Harding, T. W. Killick, Esq., W. Ramsey, Esq., Professor of Chemistry, University College, London, J. B. Russell, Esq., M.D., and Frederick I. Willis, Esq., Secretary.

Sevchelles Islands, or Mahe Archinelago

Beychelles Islands, or Mahé Archipelago are situated in the Indian Ocean, about 950 miles north of Mauritius, of which British colony they are politically a part. Pep. 16,500. The chief and largest island is Mahé, upon which is Port Viotoria, the capital, harbour, and headquarters of H.M. East Airican squadron. Government is administered by a Chief Civil Commissioner and a Board, subordinate to the Governor of Mauritius. Exports: coccanut, coccanut oil, sperm, vanilla, coffee, and cloves. For financial statistics see British Empire (table).

Shah of Persia. See Muzaffer-ed-Din. Sherborne School, Dorsetshire. Refounded by Edward VI. (the earliest school founded by that monarch), 1550, reorganised 1870. Accommodation for 350 pupils. An Exhibition to either Univ of £40 for four years falls vacant every year, pupils may also compete for Huish Exhibitions of £50 for four years; this privilege is allowed to three other public schools only. Incre are also numerous Foundation, House, and other Scholarships and Prizes. Head Master, Rev. F. B. Westcott, M., late Fellow Trin Coll. Camb. Clerkto Governors, Mr. James Douglas Motto (royal arms of Ed. VI.), Hons soit qui mal y pense. Some Alumni, Vice-Chancellor Knight-Bluce, Rt. Hon. Montague Bernsrd, Sir Lewis Morris, Dr. J. M. Neale, Sir D. Forsyth, Wm. Forsyth, Q.C., etc.

Shipbuilding. See Trade, '98.
Shipping. See Mercantill Marine, and Trade, '98.

Shipping of the United Kingdom, The Chamber of. This consists of twenty-five Shippowners' Associations, located in London and the chief ports of the United Kingdom. Its work is largely parliamentary, and consists in watching bills affecting shipping. The affairs of the Chamber are managed by an executive council, to which each affiliated association elects one member. This Council is presided over by a president and vice-president, annually elected at a meeting held in London in February. Fresident, Mr. Edward Pembroke, London; Vice-President, the Hon. James C. Buins, Glasgow; Secretary, Mr. W. H. Cooke. Offices, 5, Whitington Avenue, Leadenhall Street, E.C.

Shorthand. Recent educational legislation has given a remarkable impetus to shorthand teaching, especially in evening continuation schools. In many higher grade schools and colleges there are facilities for learning, and shorthand schools meet the needs of different classes of students. Shorthand is included in the subjects for both Oxford and Cambridge Junior Local Examinations, and for the College of Pieceptors' certificate examinations. The system almost universally taught is Pitman's shorthand, in which about 95,5000 students receive instruction annually. The system is

employed for nearly the whole of newspaper reporting—4300 reporters in the United King-dom using Pitman's system, and 100 twenty-three other systems—for the bulk of legal and commercial work, and by 34 of the shorthand writers in the law courts, Taylor's, Gurney's, Mavor's, Purton's, and Lewis's systems being employed by a total of 36 writers; while the system used by the historic house of Gurney is employed for official note-taking in parliamentary committees. In the autumn of 97 the Sexagenary of Phonography was celebrated in London, the system identified with his name having been introduced by the late Sir Isaac Pitman in '37. Of periodicals published in the interests of shorthand, the oldest extant is the weekly Phonetic Journal, established in '42 Throughout the country about 100 associations exist for the practice and propagation of Pitman's system, and shorthand writers are represented by the following societies—The Incorporated Phonographic Society, established '90, of which Mr Alfred Pitman is president, oo, of which Mr Alfred Pitman is president, has established districts in many large towns, and has examined and granted diplomas to 517 shorthand teachers. The secretary is Mr H. W. Harris, 100, Mattison Road, Finsbury Park, N. The Institute of Shorthand Writers, practising in the Supreme Court of Judicature (registered), established 82, has for its object the promotion of efficiency in note-taking in connection with legal proceedings, and admits members by examination The hon secretary members by examination The hon secretary is Mr. M. Levy, and the office 4, Seile Sticet, Lincoln's Inn, W C.

Shrewsbury School. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganiscd by the Public Schools Act in '68 The school was moved to a new site (covering an area of 50 acres) in 82. Since 82 its numbers have increased from 170 to 300. Head Master, Rev H. Whitehead Moss. M.A. Motto, Intus 5 recte, ne labora Distinguished alumni include, among others: Sir Philip Sidney, Lord Brooke, Marquis of Halifax, and, in the present century. was moved to a new site (covering an area of Marquis of Halifax, and, in the present century, Charles Darwin, Dr. Fiaser (Hishop of Man-chester), Professor B. H. Kennedy, Dr. Scott (Dean of Rochester), Dr. Thomson (Archbishop of York), the late Bishop of Wakefield, Sir D Lysons, Lord Thring, Sir C. T. Newton, Earl Cranbrook, and many others.

SIAM.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula Its territories have dwindled very much in recent years, through the action of France.
Agreements made between Siam and France in '93, and between Great Britain and France in '96, recognised as belonging to Siam all the region lying between Burma and Tenasserim on the west and the Mekong on the east, roughly speaking. Kiang Sen, on the Mekong, marks the northernmost point of Stamese territory, and from a point just below Stung-Treng the boundary leaves the river and passes in a S.W. direction to the coast. The two Powers agreed not to operate by their military or naval forces, except in concert for the maintenance of the independence of Siam, within that portion of Siam which is comprised within the drainage basin of the Menam, and of the coast streams of a corresponding longi-

within that area any privilege or commercial facilities which would not be extended to both of them. It was expressly stated that, though this portion of Siam was marked out for special treatment, no doubt was thrown upon the complete title and rights of the Siamese to the remainder of their kingdom, Area about 20,000 8q. miles; pop. estimated at 12,000,000, including Siamese 2,000,000, and Chinese and Malays about 3,000,000. Capital, Bangkok, pop. about 20,000, situated on the delta of the river Menam, the great natural and ecta to the tree of the kingdom. The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The ruling sovereign is Chulalongkorn. Executive power is exercised by the King in conjunction with a Council of Ministers The Legislative Council consists of the Ministers, certain members appointed by the King, and six princes of the royal house There are forty-one provinces, each administered by a governor. The country is very madequately developed, chiefly owing to the condition of the inhabitants, who are virtually seris, and to a system of debt-slavery which obtains Forcign trade centres at Bangkok, and is almost wholly in the hands of foreigners. The first railway in Siam-the Bangkok-Paknam line (narrow gauge), 25 miles longraknam line (narrow gauge), 25 miles long—was opened by the King in April '93. The Bangkok-Khorat railway, 16; miles in length, was inaugurated by the King, March 27th, '97, and is now making slow progress; the earth and rock work, it is hoped, will be finished by the end of '98. Chief exports. rice, teak-wood pepper, and fish. The King's revenue amounts to about '2 com on a year. The standing army to about £2,000,000 a year. The standing army is small, but there is a general enrolment of males as militia. Buddhism is the prevailing males as militia. Buddhism is the prevailing religion. Western ideas of civilisation are spreading to some extent, and a few of the Siamese youths are sent to Europe for their education. Imports, '97, £2,485,807; exports, £3,201,218 See DIPLOMATIC, and INDO-CHINA—History, '98 The King was received with an address of welcome on his return after his European tour, and replied (Jan. 3rd) that the development of the country would help to increase its prosperity, but that it would take time to get rid of existing abuses.

Siberia. A Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural hills, a slender barrier which is now being broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. A uniform system of public justice was instituted in July 97 by order of the Czar, in place of the existing arbitrary administration of autocratic officials arbitrary administration of autocratic officials Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as juges d'instruction. The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostock, and a Court of Appeal or Palace of Justice above these at Irkutsk. Area, 4,833,496; population, '95, 5,140,000 sq m. Valuable gold-fields have been discovered in the Government of Yeniseisk, and in the basins of the Obj. of Yeniseisk, and in the basins of the Obi, that portion of Siam which is comprised the drainage basin of the Menam, and coast streams of a corresponding longiThey also undertook not to acquire and nearly all the fertile soil free of forest

and outside the steppes has been occupied. A new sea route through the Kara Sea to Siberia has been lately opened up, chiefly by English enterprise, Captain J. Wiggins being the pioneer. The railway confection in a despatch from the British Ambassador at between Russia and Siberia forms the greatest railway scheme in the world. After consider able deliberation the Government Railway able deliberation the Government Railway Commission decided in favour of a complete railway, the length of which will be over 4700 miles. The total cost, including relling stock, etc., has been variously estimated between 53 and 55 millions sterling. The first sod was cut at Vladivostok, on May 24th, 701. Io facilitate the work of construction, the line was divided the three context. into three parts. The first starts from the European frontier in the Ural, and runs eastward; the second from Vladivostok, on the Pacific, running west; while the third is the middle section, near Lake Baikal, and is to join the other two. The opening of the line from Tchelvabinsk to the river Obi (889 miles). and the branch from Tchelyabinsk northward to Ekaterinburg (158 miles), took place Oct 27th, 96. A report of the United States Consulseneral at St. Petersburg (reproduced in this country in the summer of '07) gave a summary of the report of the committee which manages he construction of the railway as to the work ione in 'o6. The committee found is practicable o fix the cost of the Northern Ussuri line at \$\(\frac{\z_{2,21,80}}{\z_{0}} \); the second section of the Central siberian line at \$\xi_{5,160,200}\$; and the branch line of the city of Tomsk at \$\xi_{100,000}\$ Dictails are tiven as to the exploration and improvement of he rivers Shilka, Ussuri, Amur and Angara, ind the choice of the bay of Gold Horn on the 'acific for the establishment of a commercial port Lieut. General Duchoffskoi, on Oct. 14th, y, laid the foundation stone of the commercial ort which is to be built at Vladivottok. The Pravitel student Viesdink of Feb. 24th, '96, resorted that at a joint meeting of the Railway committee and the Financial Department of he State Council, held on Dec. 10th, '97 (old build). tyle), the Isar presiding, a detailed report of he Minister of Roads and Communications on he progress of the undertaking was presented, nd concluded "The general progress of the ork for the three years 95,7 can be expressed s follows —Earthwork executed, 100,000,000 bib yards; rails laid, 2059 versits; ballast eposited, 3051 versts." On April 1st, the first rans-Siberian express train left the Moscow tation at St. Petersburg for Tomsk. ain, which is unique in its accommodation, as timed to run the six days journey to omsk twice a month. A Times telegram from tenna, June 8th, contained a report of an iterview with M. de Walujeff, Director of the iberian Railway, who said that on its comple-on in 1904 it would be possible for a traveller o go round the world in thirty days. By that me they were confident they could complete le line from Tchelyabinsk to Vladivostok; it as already practically finished as far as Kras-oyarskoi, on the Yenisei river, a distance of xo versts, a bridge of 1000 mètres was being nit across the river, and on the other side out 650 versts were then complete. He spoke ery hopefully of a large export of Siberian corn.

Reuter's telegram from Tomsk, published ept. 15th, announced that a regular service of ains between that place and irkutsk had been med. As to the **Manchurian** deviation, we we details in our last edition of the concession

St. Petersburg, published early in '98. The Pekin correspondent of the Times on March 7th gave a long and elaborate description of the whole undertaking. Writing under date Dec. 20th, '97, he came to the conclusion that another season would be required before the final route could be decided upon. The short cut, which was the last proposed, was from Metrophanof (on the Trans-Siberian Railway, reached by to Vladivostok, it was estimated at 1440 miles, of which 68 miles had been constructed. According to news to hand in the autumn the line was being pushed on vigorously. The Siberian railway, it appears, is expected to reach Stretensk by the middle of '09, and thus a combined steamboat and rail route from the Baltic to the Pacific may be opened in five years —cutting down the journey from London to Shanghai to not more than twenty days. The Times of Oct. 20th contained a long article by Mr. Arnot Reid, of the Straits Times, Singapore, describing a journey from Irkutak to Moscow, which he carried out between Sept. 28th and Oct 6th—three hours less than twelve days and nights of continuous travel for the 3700 miles. He journeyed from Pekin by the tea-caravan route, and struck the railway works at Masova, on the castern side of Lake Baikal. On this side, he says, the alignment has been diverted. Although grading has been done for Stoomiles to Strelinsk, it is now proposed to turn off at Chital 500 miles from the lake, to Port Arthur, and thus the railway to Vladi-vostok will be to all intents and purposes a branch line Lietvenitchaia is the name of the station on the western side of the lake, and from here to Masova the ice-breaking ferryboat will run, but a railway route round the head of the lake will be begun next spring, to be worked in addition to the ferry. Mr. Reid got on the line at the likutsk station, which is on the opposite side of the river from the city. To Krasnoyarsk, 660 miles from Irkutsk, there no krasnoyarsk, ocomiles from Irkussk, there was no sifrst-class travelling, and the trains were not equal to the traffic; from that point to Moscow, 2600 miles (viii Tchelyabinsk), there was every comfort. For the former he paid, second-class fare, 30 roubles, and for the latter, first-class fare, 30 roubles. The rates come down to a fourth class. Within the last few months an order has been issued to lay a siding every seven versts, apparently to leave the main line clear for strategical purposes. Mr. Reid, who reached Moscow on the fiftieth day after leaving Pekin, observed a large influx of immigrants along the railway. See CHINA

Sierra Leone, a British colony on the West African coast, founded in 1807. It includes two districts called British Quiah and Sherbro, the Isles de Los and Mannah. Sierra Leone the isles de Los and mannan. Sierra Leone proper is a peninsula, containing about 300 square miles, but the colony has a coast-line of 180 miles in length. Area, 30,000 sq. m.; pop. about 350,000. It is bounded on the north by the Grand Scarcies river, which separates it from the French settlements, and on the south by Liberia. On the east the frontier was settled by an agreement made between Great

Britain and France in Jan. '95. All possibility | Britain and France in Jan. 55. All possibility of British extension to the east was by this agreement done away with; the colony relinquished all control of the head waters of the Niger, and became inclosed on every side. The interior is divided into 5 districts—Karene, Ronietto, Bandajuma, Koinadugu, Pangoma, each under a District Commissioner. The leading tribes are the Timmens in the parth each under a District Commissioner. The leading tribes are the Timmanis in the north, the Mendis in the south, and the Yonnis in the middle districts. In Nov. '95 a staff for the construction of a railway was sent out from England. Replying in the House of Commons on Feb. 1st, '97, Mr Chamberlain, Secretary for the Colonies, said that the terminal depot at Freetown, with landing-pier, etc., had been completed, 21 miles of the line surveyed, the earthworks and bridges for a length of 42 miles finished, and the permanent way put down for 3 miles. It was expected that a considerable section of the railway would be open for traffic in June '98 More recent reports show that the enterprise rativaly would be open for trame in june 38 More recent reports show that the enterprise is being pushed on. The capital is Freetown, with a population of over 40,000. The chief exports are palm oil, palm kernels, hides, and rubber. The colony is administered by a Governor, an Executive Council of six members, and a Legislative Council consisting of the Executive and four nominated members. See British Empire (table), and Diplomatic

-History, '98. Serious disturbances in the hinterland, arising from the collection of a hut tax of five shillings imposed on the natives, which came into operation on Jan. 1st, were reported (Feb. 24th). It was alleged, however, reported (res. 24th). It was alleged, however, that, beyond the objection to the tax, great discontent was caused by the resolute attempts made by the authorities to put down slavery and savage practices generally. The frontier police and the military force engaged in the repression of the disturbances were met with the stoutest resistance, especially by Bai Bureh, a chief in the Karene district, and disturbances spread southwards and coastdisturbances spread southwards and coast-wards; iactories were burned, traders and others were murdered in large numbers, and artical stage. The Governor's Council ordered the establishment of a volunteer force to protect the capital, and H.M. ships and men of the West India Regiment were brought in the stage of the translation of the capital, and the stage of the translation of the West India Regiment were brought to the desired of the translation of the translati of the West India Regiment were brought up to aid in the re-establishment of order. Sir David P. Chalmers was appointed by the Imperial Government as her Majestys Commissioner to inquire into the insurrection and the general affairs of the colony and protectorate (June 20th). He was given full powers, and was directed to specially inquire into the allegations that the insurrections it is commissioned by the tion at its commencement was caused by the imposition of a hut tax, which was peculiarly obnoxious to the customs and feelings of the natives, and by the brutal and insulting way in which the collection of the tax was carried on which the collection of the tax was carried out by the native police. As in the later phases of the insurrection, which were accompanied by murder and outrage, and which extended into the colony as well as the protectorate, the question of the hut tax was not prominently raised, he was directed to seek for other explanations of the simultaneous outbreak of savage violence over a large tract of country, and to inquire into the operations of secret has led an active literary life. Description of the published "Canada and the Canada". savage violence over a large tract of country, and to inquire into the operations of secret

tectorate. With regard to the colony and the protectorate, he was to inquire into the working of the scheme of administration which had been adopted, and especially the best methods of raising the revenue required for maintaining or raising the revenue required on maintaining peace, order, and good government in the protectorate, and the manner in which the land should be dealt with so as to promote the development of the country while preserving the rights of the natives, and protecting them from being derauded by speculators who have sought, or may seek, to acquire land from them on inequitable terms. The operations against the rebels were suspended during the rainy season, but were resumed in September, a West

season, but were resumed in September, a West African Regiment having by this time beer enrolled. The patrolling of the disturbed country soon had a good effect, and Bai Euret was captured in the Karene district (Nov. 13th). Silver Question, The See Bimetallism. Stating. The presiding body in this branch of sport is the National Skating Association founded in 1879 at Cambridge, and transferred in '44 to London. The Presidents are the Duke of Devonshire, the Earl of Leicester, and the Lord Lieutenant of Cambridgeshire; the Actua President, W Hayes Fisher, Esq., M.P.; and the Hon. Seoretary and Treasurer, Mr. H. Elling ton, London Rowing Club, Putney, S.W. Sladen, Douglas, the son of Mr Douglas Brooke Sladen, was b. in London, Feb. 5th 1856, and educated at Cheltenham College and Irinity College, Oxford, where he took a first

risto, and educated at Chelefenam College and Frinity College, Oxford, where he took a first class in history. He also holds the degrees of BA and Ll. B. from Melbourne University and has held the Chair of History at the University of Sydney, N.S.W. He is well known as an author and reviewer, and in hilterary work there are evidences of his extended. known as an author and reviewer, and in hiterary work there are evidences of his extensive travels in Japan, China, Australia, Canada the United States, and South Europe. He is constant contributor to the Queen, the Literar World, and other papers, and amongst himbooks are "The Admiral," On the Cars and Off," "The Japs at Home," "A Japanese Marrage," "Australian lyrics," "A Poetry c Exiles," "Edward the Black Prince," "Leste the Loyalist," "The Admiral," etc. He haedted "Australian Ballads and Rhymes, "A Century of Australian Song," "Younge American Foets," etc. He is hon. secretary of the Authors' Club, joint hon. secretary of the New Vagabonds Club, and editor o "Who's Who." Address. 32 and 34, Addison Mansions, Kensington, W.

Smith, Goldwin, D C.L., was b. at Reading Berks, 1823. Ed. at Eton and Oxford, graduatin first class in classics 45; Fellow of Univ. Col Oxford 46. He was Assistant Seo. of the Roy Commission of Inquiry into the condition of Univ. of Oxford 50, Secretary to a subseque Commission, under which important University feducation Commission, under which important University for the American Commission in 184. Question," "A Trip to England" in '92, a "History of the United States" in '93, "Oxford and her Colleges," "Bay Leaves: Translations from Latin Poets," "Specimens of Greek Tragedy," "Essays on Questions of the Day," in '94, and "Guesses at the Riddle of Existence" ('96).

Smith, Rev. Walter C., M.A., D.D., Ll.D., wasb. 1824 in Aberdeen. Educated at Aberdeen University and New College, Edinburgh, he was ordained in '50 minister of the English Presbyterian Church in Islington, London, and subsequently became minister of the Free Church of Scotland in Orwell (Kinross), Roxburgh (Edinburgh), Tron (Glasgow), '62, and High Church (Edinburgh), '76. In '67 he was tried for heresy, but the charge was dismissed by the General Assembly. The alleged heresy was contained in his lectures on "The Sermon on the Mount." In '93 he was appointed Moderator of the Assembly. He has now retired, and lives near Dunblane, Perthshire. Dr. Smith is best known as a devout and cultured poet. His chief works are "The Bishop's Walk" '(61), "Hymns of Christ and the Christian Life" ('67), "Olrig Grange" ('72), "Borland Hall" ('74), "Hilda" ('78), "Raban' ('84), "North-Country Folk" ('83), "Kildrostan' ('84), "Thoughts and Fancies for Sunday Evenings" ('87), and "A Heretic' ('91).

SOCIALISM.

Socialism, primarily and broadly, is the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessaries, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—i.e., of a complete readjustment of political, religious, and domestic relations, involving the abolition of their present forms. In the following article the Socialist organisations in England and abioad are briefly reviewed.

are briefly reviewed.

Essg lessed.—The English societies representative of Socialism are: the Social Democratio Federation, Sec., H. W. Lee, 337, Strand, W.C.; the Fabian Society (q.v.), Sec., E. R. Pease, 276, Strand, W.C.; and the Independent Labour Party, Sec. John Penny, 53, Fleet Street, E.C. The Social Democratic Federation had in '97 134 branches in existence, with a membership of 11,000. The Independent Labour Party was formed at a conference held in Bradford early in '93, and attended by delegates from various Independent Labour organisations already formed, from branches of the Social Democratic Federation, and from the Fabian Society. The ebject of the party is the realisation of an industrial commonwealth founded upon the socialisation of land and capital. "The true object of industry being the production of the requirements of life, the responsibility should reat with the community collectively. Therefore, the land, being the storehouse of all the necessaries of life, should be declared and treated as public property; the capital necessary for industrial operations should be wined and used collectively. Work and the

wealth resulting therefrom should be equitably distributed over the population. As a means to this end, we demand the enactment of the following measures:—(:) A maximum eight-hour working-day and a six-day week, with the retention of all the existing holidays and Labour Day, May 1st, secured by law. (2) The provision of work to all capable adult applicants at recognised trade-union rates, with a statutory minimum of 6d. per hour. In order to remuneratively employ the applicants, parish, district, borough, and county councils to be invested with powers to (a) organise and undertake such industries as they may con-sider desirable, (b) compulsorily acquire land, purchase, erect, or manufacture buildings, machinery, stock, or other articles for carrying on such industries; (c) levy rates on the rental values of the district and boirow money on the security of such rates for any of the above purposes. (3) State pensions for every person poses. (3) State pensions for every person over 50 Jears of age, and adequate provision for all widows, orphans, sick and disabled workers. (4) Free maintenance of children while at school or university; free primary, secondary, and university secular education. (5) The raising of the age of child labour with a view to its ultimate abolition. (6) Abolition of indirect taxation, and the gradual transference of all public burdens on to unearned incomes, with a view to their ultimate extincthe liquoi traffic. The Independent Labour party is in favour of every proposal for extending electoral rights to both men and women and democratising the system of government." and democratising the system of government. The political roed of the party is summed up in the single sentence, "The Independent Labour Party is in favour of every proposal for extend-ing electoral rights to both men and women and democratising the system of government." Stringent regulations have been drawn up for Stringent regulations have been drawn up for the guidance of candidates elected to the House of Commons, and also to guard the movement against being financed in the interests of any other party. Over the greater part of Lancashire and in other parts of the country branches have for part of their constitution a clause prohibiting members from voting for any candidate put forward by the Liberal, Liberal Unionist, or Conservative Parties. The organisation claims to have over soo branches and 12,000 members. Chairman, Mr. Keir Hardie; Treasurer, Mr. France Littlewood; General Beoretary, Mr. John Penny. The Federation have declared that there was no need for the separate existence of the Independent the separate existence of the Independent Labour Party, the proper place for conscientious Socialists being inside a revolutionary Socialist organisation like the Social Democratic Federation. Recent events seem to cratic Federation. Recent events seem to have brought both bodies more together, and the question of the fusion of the two organisations is now under discussion by their respective branches.

Germany ... The Socialists of Germany are known as the Social Democratis, and are led by Herren Liebknecht, Bebel, Vollmar, and Singer. They form the strongest political party in the empire, and their aim is avowedly to replace the existing capitalistic order of society by one in which land, capital, and all the means of production and distribution will be owned and worked by the community for the benefit of all its members. They polled 2,120,000 votes, 30 per cent. of the total votes recorded, at the '88

election, an advance of 334,000 since '93, and secured the return of 56 members to the Reichstag. The number of party organs is 76, 22 of which are dailies. They denounce the so-called State Socialism as a system of half measures dictated by fear, and aimed merely at undermining the hold of the Social Democracy over the working classes by means of netty over the working classes by means of petty concessions and palliatives. State Socialism, they say, is Conservative; Social Democracy essentially revolutionary. Therefore the two are irreconcilably opposed. At the 'gr Conservative, and a resolution reproductive the control of ress Herr Bebel carried a resolution repeating the party regulation which prohibited Social Democrats from taking part in elections for the Prussian Chamber, but it was plainly laid odown that no compromise or alliance with any other party should be made. See Germany, Political Parties of

France.—French Socialists are organised into at least four distinct bodies. The first of these is called the Workmen's party, and is led by M. Jules Guesde, who is an ardent follower of Marxist and collectivist theories. It took its rise from the National Workinen's Congress at Marseilles in '79, and its programme is "the political and economical expropriation of the capitalist bourgeoise and the socialisation of all the forces of production " In of at the Lille Congress this was put a little differently, thus: " The abolition of the capitalist system by means of the conquest of political power by the proletariat, the substitution of social for capitalist property, and the international agreement of working men " It recognises no national obligations that would interfere with its objects, and is at one with most of the Socialists on the Continent. It claims to Socialist on the Continent. It claims to include 450 associations, with about 300,000 members, and its strength has been proved in municipal and parliamentary elections. The Possibilist party derives its numbers almost entirely from Paris, and is practically a segment of the Workmen's party, from which it separated in '8s. The Blanquist party is also a Parisian society, and derives its title from the Parisian society, and derives its title from the old revolutionist Blanqui It professes itself "atheist, materialist, transformist, republican. revolutionist, communist, and finally internationalist." Its organ is the Parti Socialiste, and its members call themselves Communists, as a distinctive title from the collectivist Workmen's party. There are about 10,000 members. The Socialist Republican party consists of Radicals who have evolved into Socialists. MM. Millerand and Goblet are its most prominent members, and its organ is the

most prominent memory,

Petite Republique.

Austria the Socialist party
is strongly organised. There is a powerful
propaganda carried on through the Press,
and the influence of the party is very marked
in the elections. In Bohemia and Silesia the movement has made great way, but not so much in the Alpine districts, though in Feb. '98 it was reported that an anti-clerical and socialistic body, called the Styrian Peasants' Legue, had 10,000 members. The party is split up into two sections—one led by Dr. Adler, with the Gleichheit as its special organ, and the theories of Karl Marx as its creed; and the other led by Herr Hanser, with the Volkspresse as its organ. It should be said that a great incentive to the spread of Socialism is the determination

of the empire. Therefore Socialism in Austria is very much of a political force, rather than a theoretical adherence to Communistic principles

Belg in ... The grant of universal suffrage in Belgium brought the Socialists of the country in begium prought the Socialists of the country into great and unexpected prominence at the general elections in Oct. 9. No less than 29 Socialist and Radical candidates were returned, and between them and the Clericals the moderate Liberals and the Progressiats were almost annihilated. The Socialist victories were won chiefly amongst the Walloons. The Socialists have since well maintained their ground in spite of the efforts directed against them by the Clericals.

Denmark.-Socialism in Denmark is of the Marxist order; but here again, as in Austria, political discontent has driven many to join the Social Democratic Federation. These form the moderate section, and tend to join the Radicals, the extreme revolutionary section

being very small in numbers.

Sweden and Norway. - The Socialist movement has made little impression on these countries, but the party in Norway numbers about 56 unions, with a total membership private ownership of land and of the instru-ments of production. In the towns of Sweden the movement has made some little headway, but it languishes for lack of funds. A tacit alliance exists between the Socialists and the

Radicals of Norway.

Netherlands,—TheSocialist Revolutionary party is the leading body in this country. By a decree of the Cour de Cassation the Socialist

decree of the Cour de Cassation the Socialist League was dissolved in '94 as an illegal association; but 52 branches of it united to form the new body. An official organ was established in '95, with M. Domela-Nieuwenhuis as editor. Consult "Socialism An Examination of its Nature, its Strength, and its Weakness," by Prof Ely (Swan Sonnenschein & Co.); "The History of Socialism," by Thomas Kirkup; "Socialism, its Growth and Outcome," by W. Morris and E. Society of Oil Painters, The until '98 called the Institute of Painters in Oil Colours, has its headquarters in Piccadilly, W. Founded, 1883. The Exhibitions, which are held annually, commencing in November, are open to all artists, and the principle of selection is the same as at the Royal Academy (q v). President, Frank Walton, R.I., Yuoe-President, S. Melton Fisher, Secretary, W. T. Blackmore

Sociology. This is the science of the origin,

organisation and development of human society. Of individual workers in sociology Herbeit Spencer undoubtedly stands first in this country. The completion of his great systematic work was accomplished during of by the publication of the third volume of "Principles of Sociology" In America Major Powell, Lester Ward, Professor Giddings, and the Rev Samuel Dyke are active workers, and many of the American universities have organised separate schools or departments of sociology. Much valuable work on definite and specific problems (such as Railways, Trusts, Wages, etc.) is being done in the American schools, notably at lennsylvania University, under Mayo Smith Apart from individual workers and the teaching of the Positivist societies, respectively headed by Dr. Congreve and Mr Frederic Harrison in this country, and the special societies con-cerned with anthropology and economics—apart from these there are as yet few successful attempts to found schools of sociology. The Paris and the Edinburgh Schools were fully de-School at Hariford in '95 ed. (q v), and the American School at Hariford in '95 ed. (q v) The General Secretary of the International Institute of Sociology is Dr. Rene Worms, 35, Rue Quincampoix, Paris The third international concampoix, Paris The third international congress of Sociology in connection with the Paris Institute was held at Paris in July '97, under the presidency of Paul Lilienfeld, Russian senator. An institution bearing the title of The London School of Economics and Political Science was started in Oct. '95, with the co-operation of a number of the leading English economists, and with the aid of the Society of Arts and the London Chamber of Commerce. As a further development of the school an attempt is now being made to establish a great central Library of Political Science and Bureau of Statistical Information in connection with the School of Economics and Political Science (see Powers, and Egypt (map).

ECONOMICS AND POLITICAL SCIENCE, LONDON SCHOOL OF). The proposal is to set up in London an institution somewhat similar to the Musse Social of Paris. The library will include a systematic collection of all available material bearing on the structure and function of public administration, central and local, in all parts of the world. All communications, either in regard to the library or to the school, should be addressed to the Director, 9, John Street, Adelphi, London, W.C. A bibliography of contemporary productions in sociologic study and research is given each month in the Revue Internationale de Sociologie (price 20 fr. per annum), published in l'aris (10, Rue Soufflot), and in the American Journal of Sociology (pine 2s of pri number), published by the University of Chicago Press

Socotra. A large island lying 150 miles off Cape Guardafur, at the entrance of the Gulf of Aden Area, 1382 sq m., pop. 12,000.
Formally annexed by England ('76). Capital, Tamarida. Products: aloes, and also exports dragon's blood (a dye resin), dates, figs, etc. See British Empire (table)

Sodor and Man, Bishop of.

Solomon Islands The British Islands lie in the Western Pacific, between 7° 30′ and 13° S lat and 150° and 163° F long, and include Guadalcanat, San Christoval, Malatta, New Georgia, Gela and Tulage British protection

extends over all the islands between the Solomon and the lorres groups. Area about 8400 sq m The chief exports are copra, 1vory nuts, pearl shells, etc. The sage palm grows in vast numbers. The German Islands are the northern slands, and include Isabel, Bougainville, and other islands. Area, 9000 sq. m.; pop. 90,000 Administered from Kaiser Wil-

pop. 90,000 Adn helm's land (q v)

Somali Coast Protectorate. The British sphere of interest in Somaliland and on the coast of the Gulf of Aden, which has existed since '84, is known by this name. It is administered under the Bombay Government by a Political Agent and Consul It has about 400 miles of coast, and extends inland 200 miles, 400 miles of coast, and extends inland 200 miles, its total area being about 68,000 sq. miles. Within this territory he the ports Zeila, Bulhar, and Berbera The boundaries were fixed by agreements with Italy in '94, and with Abyssinia in '97. The chief town of the district is Berbera, which has about 20,000 inhabitants. The products are chiefly cattle, skins and hides, obtroh feathers, worve and skins and hides, ostrich feathers, ivory, and gum. See Egyri (map)

Somaliland. The country occupying the

eastern horn or promontory of Africa. The bulk of it is under the protection of Italy, according to the Anglo Italian agreement of '91, though there is a British Protectorate on the coast of the Gulf of Aden, and France has a footing at Obock. Italian Somaliland is separated by the river luba from the East Africa Protectorate (British), and has a coasthne extending from the Juba to Cape Guardafui, and then along the coast of the Gulf of Aden to the Somali Coast Protectorate (see article above), also British Inland it extends for a uniform distance of 180 miles from the coast The area of Italian Somailland is 100,000 sq. miles, and the population about 400,000 As to the French settlement see FRENCH SOMALI-LAND. See also Colonies, etc., of European

Somerville Hall. See Women, Higher Education of.

SOUDAN.

The Soudan is that section of Africa which lies immediately south of the Sahara. Its limits are immediately south of the Sahara. Its limits are variously defined. It may be said to be bounded by the Sahara on the N., by the Abyssmian highlands on the E., by the lands draining to the Congo basin on the S., and by French West Africa on the W. Within these limits it has an area of 2,000,000 sq. miles, and a pop estimated at from 80 to 90 millions. Lying mainly between 5° and 18° N lat, it is entirely within the tropics. Western and Central Soudan within the tropics. Western and Uentral Soudan are divided into the states of Gando, Sokoto, Adamawa, Bornu, Baghirmi, Wadai and Kanem These have mostly been absorbed into the provinces carved out by the European Powers Gando, Sokoto, and part of Boinu are included in Nigeria, under British rule Kuka, on the western shore of Lake Chad, is the capital of Bornu, and has a population of about 60,000. It is a great meeting-place of caravan routes. Adamawa falls in the Cameroons, a German territory, Baghirmi lies mostly within the limits of French Congo, but Wadai and Kanem are so far independent. Wadai extends from Darfur to Kanem, and from French Congo to the Sahara. It has an estimated area of about 150,000 sq. miles, and a pop. of about 1,000,000 The Mabas, a Mahomedan negro race, are the ruling tribe; but there are many Arabs also, Kanem and these carry on a wide commerce is a vassal state lying between Wadai and Lake Chad, with an area of about 30,000 sq m and a pop. of about 100,000 Rabeh, a former slave of Zebehr l'asha, has established himself as supreme in part of Bornu and Baghirmi His capital is Dikwa in Baghirmi

Eastern Soudan comprises Dartur, Kordofan, Senaar, the Equatorial Province, and the rich Bahr-ei-Ghazal Province. The whole territory, covering an area of 900,000 sq. miles, with a population of over 10,000,000, was under Egyptian rule more or less until '82, when the revolt of the Ma.d. alienated it, and broke it up into various districts. After the death of the Mihdi, one of his lieutenants, known as the Khalifa, succeeded to his power, and with Omduiman as his capital, has since ruled over the revolted provinces, though Darfur and other districts have asserted their independence of him. The Bahr-ei-Ghazal province consists of the entire district watered by the southern tributaries of the Bahr-ei-Araband Bahr-ei-Ghazal. It was subjugated for Egypt by Gessi Pa-ha, one of Gordon's lieutenants, in '78, and ruled by him till '81, and by Lupton Bey from that time till the Mahdist rebellion cut off the province from Khartoum and Egypt. It is said to be the inchest and most fertile province in the Soudan, ivory and rubber being abundant. Slaim Pasha has declared that the geographical and strategical position of the province renders its possession of the greatest importance. British influence, by agreements concluded with Germany and Italy in '90 and '01, and apart from her position in Egypt, extends over Darfur and the greater part of the Equatorial Province. Indeed, the Anglo German agreement of '90 recognised the British sphere as extending from Uganda as far as the confines of Egypt. In '96 and '97 the preparations which had long been made

for the reconquest of the revolted provinceswere in a sufficiently forward state to allow of expeditions into the districts under the Khalifa's power. The country as far as Berber was reocamped, and Kassala was taken over from Italy by the end of '97, and in '98 the power of the Khalifa was utterly broken, and Khartoum and Omdurman were recaptured. France, however, has for some time been credited with a desire to establish herself in the Eastern Soldan, and rumours were prevalent during 55 that from her possessions in Franch Courts and in the Franch Souden and French Congo and in the French Soudan an expedition was being pushed forward by her into the Nile valley. Such an expedition, said into the Nile valley. Such an expedition, said Spr Howard Grey, in the House of Commons in March '95, England would regard as an unfriendly act. However, in '97, from the Ubang; province of French Congo again, and from Obok on the Red Sea, expeditions were despatched towards the Nile, and it was arranged that they should meet at Fashoda, the root of Southern Kordein. The expension the port of Southern Kordofan. The expedition from Obok failed, but the other, led by Major Marchand, succeeded; and when the British forces beat the Khalifa a gunboat expedition, which was sent down the river, found Major Marchand precariously established at Fashoda. His retreat was cut off by a British force, which was at once posted there, and the settlement of the matter was left to the Governments of France and Great Britain For further details see Egypt and France A map showing the present state of affairs will be found on p 218.

French Soudan includes the whole hinterland of Senegal, and the countries to the north of the Niger Territories, while by an agreement made with Germany in '94 a line of communication with French Congo has been secured. The Niger Convention, which was signed in '98, finally settled the boundaries between French territory and the Gold Coast, Lagos, and Nigeria (For details see articles under those special headings) The territory is by no means organised, and consists chiefly of protectorates, covering an area of about 300,000 sq. m., with a pop. of 5,000,000. In '94 the French reached Timbuctoo, and established themselves there. The administration is in the hands of a Military Commandant, who is under the control of the Governor of Senegal. See Africa, Niger Territories, and French Congo.

South African Republic. See Transvaal.

SOUTH AUSTRALIA.

South Australia is a colony comprising the central section of Australia, and stretching agross the entire continent from north to south. The older portion, South Australia proper, lies between 120° and 121° E. long., and from the sea to 26° S. lat. To this was added in 1863, the Northern Territory, lying between 129° and 138° E. long., stretching up to the Indian Ocean, and containing an area of 523,620 sq. m. The capital is Palmerston, on the noble harbour of Port Darwin. The Ferritory possesses a coast-line, counting the chief inlets, of 2000 miles. Mineral and agricultural resources considerable. The population is estimated at about 1600 Europeans, 3400 Chinese, and 20,000 aborigines. Local administration is in the hands of a Resident and officials appointed by Government of the mother colony. The whole-

colony, thus constituted, contains 903,690 sq. m.; pop. 361,483. Capital, Adelaide, pop., with surrounding suburbs, 133,25s. The settled part in the south of the colony is divided into 44 counties, and 3 pastoral districts. About soo miles north of Adelaide begins a dry regrit on the farther north, which is subject to tropical rains. Three considerable mountain chains traverse this considerable mountain chains traverse this part. There is much fair pasture-land; but the soil and climate of the south are chiefly adapted for the growth of wheat, which has already made the colony the "granary of Australasia," and for vine and olive, both of which are now ex-tensively planted. The mulberry thrives, but sericulture has yet to be introduced. Climate of the south one of the most agrecable and healthy in Australia. The chief minerals are copper, gold, silver, and lead, copper being easily first. Executive, the Governor and responsable. sible Ministry. Parliament consists of Legisla tive Council and House of Assembly. Council consists of twenty-four members, who sit for four electoral districts, and are elected for o years, two from each district retiring every 3 years. L50 freehold or L20 annual leaseholds, or L25 annual rent with a 6 months' registration qualifies for the franchise. The Assembly contains 54 members, representing 27 electoral districts, and is elected triennially by adult suffrage. Members of both Council and Assembly are paid £200 per annum. The colony is represented in the Federal Council of Australasia The Church of England, the Roman Catholics, The Church of England, the Roman Catholics, and Wesleyans, are the principal denominations. Education is secular, free and compulsory. Wool is the staple export There are 1867 miles of railway and 14,280 miles of telegraph. Revenue, '97-8, £2,566,611, expenditure, £3,598,939, mports, '97-8, £6,444,218, exports, £6,513,347; public debt, £24,408,535 See Australia, British Empire (table), and Diplomatic. DIPLOMATIC

History, '98 .- The popular vote on the Federation question showed 25,659 votes for the Bill, and 15,121 against (June 4th) The Bill, and 15,121 against (June 4th). In Budget statement (Aug. 18th) showed that the revenue for the year was £2,649,899, and the expenditure £2,619,220. The public works, including railways, which tepresented half the public debt, were returning satisfactory interest and the outlook was encouraging

SPAIN.

Alfonso XII. of the House of Bourbon, the late monarch, died in '86, and his posthumous son, Alfonso XIII., born May 17th, '86, will, when he comes of age, be King. Meanwhile the kingdom is under the Queen Regent Maria Christina, who governs during the minority of her son. By the constitution of 1876, Spain is declared a constitutional monarchy, with executive power vested in the King, and the legislative power in the Cortes with the King Cortes consist of Senate and Congress. The Senate is composed of three classes those who sit by right of birth or official position, members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the largest taxpayers of the kingdom and certain corporate bodies. The Congress contains 431 deputies, elected by citizens of 25 years of age who have enjoyed time will be found. The Pope offered his full civil rights in any municipality for 2 years.

Each province has its own parliament, and each commune its own elected avuntamiento each commune its own ejected ayuntamiente presided over by the alcalde, for municipal and provincial administration. Religion, Roman Catholic. Public worship of any other creed forbidden. Education is free but inefficient. The principal products are wine, cereals, minerals, and cotton textiles. Area, including the Baleanic and Canary Isles, each considered a province, 197,670 sq m.; estimated pop. 17.650,2744. Estimated revenue, 197-8, £43,591,638; expenditure, £44,597,469; public debt, £369,678,700; importa, 97, £31,733,644, experta, £36,997,441. See Col.onies of European Powers, Cuba, Diplomatic, Foreign Armies, Foreign Diplomatic, Foreign Armies, Foreign Navies, and Philippine Islands.

Political Parties, Parties have been provided in the property of the provided in the prov

for years much broken up and intermingled. The Liberals under Schor Sagasta won the general election of 93, and held office for two years Their adherents numbered 322. Opposed to them were 48 Conservatives, led by by the late Señor Canovas del Castillo, 15 dissident Conservatives, 23 extreme Republicans, 16 moderate Republicans or Possibilists, led by Señor Castelar, and 6 Carlists. The Possibilists afterwards joined the Liberals, and soon after Señor Castelar gave up politics and retired into private life. Disagreements in Senor Sagasta's cabinet led to the accession to office of Señor Canovas del Castillo in '95 At the General Election in April '96, about 300 Conservatives, 100 Liberals, 10 Carlists, 10 Independents, 8 dissident Conservatives, and 3 Republicans, were returned Party distinctions were to a large extent obliterated afterwards by the difficulties in which the country found herself owing to ents in Cuba and the Philippines. cwing to exants in Cuba and the Philippines. On the death by assassination of Senor Canovas del Castillo in '97, there was considerable disagreement among the Conservative majority, and a Liberal (abinet under Schör Sagasta eventually took office. This Cabinet held office through the war, and conducted the peace negotiations, but was evidently weakened by the humiliations thus necessarily inflicted on the country. Senior Capraco retired from the the country Senor Gamazo retired from the Cabinet in Oct. '98, and formed a new division

Cabinet in Oct. 38, and formed a new division of the Liberal party

**History, '8%.—Much unrest was caused by the position of affairs in Cuba, and the possibility of American interference threatened by the Jingoes of the U.S.A. awoke great resentment. Matters, however, remained quiet till the Spanish ambassador at Washington, Senor Dupuy de Lome, had to resign, owing to the publication of an indiscret letter of his to the publication of an indiscreet letter of his reflecting on the President The Government officially disclaimed his letter, and he was succeeded by Schor Polo Bernabe (Feb. 14th). Immediately on this incident followed the disship Maine, lying in Havana harbour (15th), and the relations between the two countries distinctly worsened. The inquiry into the affair made by the Spanish Government resulted was not the the same of the countries. sulted in a report that the cause of the explosion lay inside the ship, but the American report was in direct opposition to this, though the

ties should be suspended. The great Powers ties should be suspended. The great Powers also intervened, recommending that hostilities in Cuba should cease (5th). To this the Government agreed, and telegraphed to General Blanco to proclaim a truce. Before anything effectual could be arranged, however, the President's message to Congress led to a demand from the United States Government that Spain should at once evacuate Cuba. The Spainish Government, before receiving this demand, which took the form of an ultimatum, broke off diplomatic relations, and a state of war forthwith took the form of an ultimatum, proce off diplomatic relations, and a state of war forthwith existed (21st). The Budget for '98-9 showed an estimated revenue of 866,014,869 pesetas, and expenditure estimated at 865,508,774 pesetas. In view of the war the Government were empowered to issue new currency notes up to 250,000,000 pesetas, and to take other means of raising money. The first serious blow of the war fell at Manila, where the Spanish squadron, having only obsolcte vessels and squadron, naving only obsolcte vessels and inefficient ordnance, was completely destroyed by Admiral Dewey. This caused much depression in the country and a Cabinet crisis, which ended (May 16th) in the reconstruction of his ministry by Senor Sagasta, who got rid of those of his colleagues who had desired peace, and replaced them by men who were professedly prepared to continue the war with energy. Spanish naval power in Cuban waters was crushed with the destruction of Admiral Cervera's fleet, which, after being shut up in Santiago for some time, made a gallant attempt Santago to some time, made a gainst attempt to escape—only, however, to be sunk or captured (July 3rd). A second fleet, destined for the l'hilippines, had passed through the Suc Canal by this time, but on receipt of this news was recalled (8th). These disasters naturally suggested the wisdom of peace enegotiations, but such differences of opinion prevailed in the Cabinet that Senor Sagasta and his colleagues presented their resignations (11th). They still continued, however, to exercise their functions, and a decree was published (15th) suspending the constitutional guarantees, and proclaiming military law. Meanwhile the invasion of Porto Rico by an American force under General Miles took place (25th). The landing was made at Guanica. Overtures for peace were then made at Washington by the Government through the French ambassador (26th), and were accepted The American terms were that Spain should relinquish and evacuate Cuba, and cede Porto Rico and the other Spanish islands in the West Indies, and certain islands in the Ladrones, to the United States. The United States, more-over, were to hold Manila city and bay pendover, were to note manife city and bay pending the conclusion of a treaty of peace, which should determine the control, disposition, and government of the Philippines (Aug. 2nd). The Government accepted these terms (10th), and a protocol embodying them was signed at Washington (12th). Hostilities were formally suspended by a proclamation from the President but before the proclamation from the President but before the proclamation from the President but before the proclamation from the President but he fore the proclamation from the President but he fore the proclamation from the President but the proclamation from the President for the proclamation for the proclamation for the proclamation for the proclamation for the president for the proclamation for dent, but before this proclamation could reach Manila it was bombarded and captured by the joint action of the sea and land forces under Admiral Dewey and General Merritt (13th). The Cortes reassembled (Sept. 5th), and Senor Sagasta read a decree empowering the Government to bring in a Bill authorising the renun-ciation by Spain of her sovereignty over her

the war, and declaring that the constitution had been infringed by the signing of the peace preliminaries without the previous consent of the Cortes (8th). This was discussed in secret session, and at the end of it the Republicans, Carlists, and followers of Señor Romero Robledo withdrew in a body as a protest against the action of the President of the Chamber. The Bill authorising the cession of territory was, however, passed by the Cortes (14th), and the session was then closed. The Peace Commissioners met at Paris early in Ootober, The American Commissioners declared that the United States refused to assume either the sovcreignty over Cuba, or responsibility for the Cuban debt in any form. They also demanded the absolute cession of the Philippine Archipelago Io the first declaration the Spanish Commissioners strongly demurred, but eventually accepted provisionally, and Jan. 1st, 39, was fixed as the limit of time for the evacuation of Cuba. They declined, however, to discuss the question of the cession of the Philippines, and, to avoid a rupture, suggested that the matter should be referred to arbitration (Nov 16th). To this, however, the American Commissioners declined to agree (18th).

Spanish Colonies. See Colonies, etc.,

of Luropean Powers.

Speaker. The title of the presiding officer of a legislative assembly. The Speaker may hold office until a dissolution. Should the office become vacant during a session, the new Speaker then elected is presented for the royal approbation, but does not claim the privileges of the House. This great officer has a residence in the Palace of Westminster, and receives a salary of £5000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4000 and a peerage. There was no contested election for Speaker from 1839 to 95. The following have filled the office since the meeting of the first reformed Parliament: Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9, Mr. C. Shaw-Lefevre (the late Viscount Eversley), '30-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the late Viscount Hampden), '72-84, Mr. A. W Peel, now Viscount Peel, '84-95, Mr. Gully since April '95. The Chairman of Ways and Means acts as deputy Speaker in the unavoidable absence of Mr. Speaker. The Speaker of the House of Lords is the Lord Chancellor for the time being. The Chairman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act. See Commons, House or, and Parliament and Parlia

Washington (121h). Hostilities were formally suspended by a proclamation from the President, but before this proclamation could reach Manila it was bombarded and captured by the joint action of the sea and land forces under Admiral Dewey and General Merritt (13th). The Cortes reassembled (Sept. 5th), and Senor Sagasta read a decree empowering the Government to bring in a Bill authorising the renunciation by Spain of her sovereignty over her colonial possessions in conformity with the terms arranged with the United States. The Republican party introduced a motion condemning the Government for its conduct of

into many languages. In '82 he visited the into many languages. In %2 he visited the United States. Among his other important works are: "First Principles"; "Principles of Biology," 2 vols.; "Principles of Education," 2 vols.; "The Study of Sociology," Essays," 3 vols.; "The Study of Sociology,"; "Essays," 3 vols.; "The Man versus The State." The third volume of the "Principles of Sociology," completing the scheme of the great philosophical work—a system of synthetic philosophis—which he had system of synthetic philosophs—which he had set himself, was published in Nov. '96, and a number of distinguished men of letters and of science combined to mark the occasion by requesting Mr. Spencer to sit for his portrait to Mr. Herkomer, with a view to its being placed in one of the national collections Mr Spencer consented to the request. The por-trait was exhibited at the Academy exhibition '98. Despite chronic ill-health, Mr Spencei is now devoting himself to the picparation of a revised and enlarged edition of his "Principles of Biology," of which the first volume has recently appeared Mr Spencei has always declined academic and other honours. Address The Athenæum, S.W., and 5, Percival Terrace, Brighton

The London Spiritualist Alli-Spiritualism ance, Ltd, was founded in 1884, in succession to other societies of the same nature, which had preceded it; and was incorporated in '96
The chief work of the society has been to
maintain and expound the principles of Spiritualism, viz, a belief in the existence and life of the spirit apart from, and independent of, the material organism, and in the reality and value of intelligent intercourse between spirits em-bodied and spirits disembodied. While it has listened to other investigators who expound other views, and has offered a free platform at its meetings to those whose opinions, however interesting, it does not feel able to accept, it has been the nucleus of old Spiritualists, who have proved their faith, and desire to maintain it. To their body has been added year by year agradually increasing number of new inquirers. The Offices of the Alliance are at 110, St Maitin's Lane, W.C. The organ of the Society is Light, founded in 1881, the recognised exponent of educated thought in this country on the subjects of which it treats. Circulating in every country, the world through, it conveys an impression, which nothing else can, of the rise and progress of Spiritualism. The first rise and progress of Spiritualism. The first President of the London Spiritualist Alliance and editor of Light was, until his decease, Mr. W. Stainton-Moses, M.A. (Oxon), whose writings, "Psychography," "Spirit Identity," "Spirit Teachings, etc., etc., are well known The present President of the Alliance, and editor of Light, is Mr. E. Dawson Rogess. A valuable labrary of works on psychic science is available at the offices at St. Martin's Lane Nicetings, are held for the discussion of Meetings are held for the discussion of inatters of interest to students of psychology, and information can always be obtained by inquirers In the United States, according to a recent census report, the number of Spiritualists has increased till there are now 334 organisations in the States, with 30 regular church edifices and 45,030 members. It is im-

England, being incorporated by royal charter in 1701. On the Society's list there are 744 ordained missionaries, including 11 bishops; and of these 249 are labouring in Asia, 171 in Africa, 29 in Australasia and the Pacific, 209 in North America, 48 in the West Indies and South America, and 38 (chaplains) in Europe—the number of languages in which the Gospel is preached being 54. In the Society's colleges there are about 3000 students; and 2900 lay teach is are employed in the various Missions. Neatly 40,000 children are receiving instruction in the Mission Schools in Asia and Africa. tion in the Mission Schools in Asia and Africa.

tion in the Mission Schools in Asia and Africa.
The income for '97 was £317,512. Offoe, 19,
Delahay St., Westminster. Secretary, Rev. H.
W. Fucker, M.A.
Sprigg, The Rt Hon Sir John Gordon,
P.C., K.C.M.G., D.C.L. (Oxon), is a son of the
late Rev James Sprigg, A M, of Ipswich, and
was born in 1830. After working in the House
of Commons as a member of Messars Curren's of Commons as a member of Messrs. Gurney's staff, he went for reasons of health to South Africa in 58 and settled there Elected in 69 to represent East London in the Cape Parliato represent the color in the Cape Parinament, he soon gained office, and has been three times Prime Minister of the colony. His second term of office closed in 50, when Mr. Rhodes succeeded him; but in '03 he became Finance Minister under Mr. Rhodes, on whose fall in Jan '90 he became Prime Minister for the third time He came to England as the representa-tive of the Cape at the Jubilee festivities in '97. He resigned with his fellow-Ministers after a vote of want of confidence had been carried by a majority of 2 votes by the House on reassembling afte, the general election (Oct. 17th), '98.

Stalker, Rev. James, D.D., was born in 1848 at Crieft, and educated at Edinburgh University, where he graduated M.A. His theological studies were carried on at the New College (Edin), and at Berlin and Halle. In 194 he was ordained minister of St. Brycedale Free Church, Kirkcaldy, and after a very successful pastorate was translated to Free St Matthew's, Glasgow, was translated to Free St Matthew's, Glasgow, 187 Dr Stalker is one of the most popular religious writers of the day His works are: "The New Song," "Life of Christ," "Life of St Paul," "Imago Christi," "The Preacher and his Models" (being the Yale Lectures on Preaching), "The Four Men," "The Frial and Death of Jesus Christ," and "The Two St. Johns." Address 6, Claremont Gardens, "Standard, The "First published in 1827. It is in the front rank of the political cournals."

It is in the front rank of the political journals that rose into importance almost immediately after the abolition of the Paper Duty ('61). Its political principles are Conservative; but it reserves, and often exercises, the right of sharply criticising the action of the Conser-vative party. During the American Civil War, the letters of its correspondent "Manhattan" the letters of its correspondent "Manhattan" were very popular. Among its war correspondents have been Mr. G. A. Henty and Mr. Cameron, the latter of whom was killed in the Bayouda desert. The present editor is Er. W. H. Eudford The Evening Standard (1857) is an evening edition of the morning paper.

Standing Committee. See Parliament AND Parliamentary Procedure.

Standing Orders This term was originally applied to certain Orders made by either house of parliament to regulate its own procedure.

possible to say how many Spiritualists there are in Great Britain, but there are local organisations in almost all towns of any importance.

"S. P. G." (Society for Propagation of the Gospel in Foreign Parts). The oldest Missionary Society connected with the Church of under three heads. (1) Standing Orders, which

are permanent regulations, although liable to be suspended upon extraordinary occasions—s.g., to secure the rapid passing of bills of a pressing nature. (2) Sessional Orders, which continue in force only during the session in which they were made, although they may be renewed from year to year. (3) Orders indefinite in their duration. Of these three classes the Standing Orders are the most important for purposes of procedure. The Roll of Standing Orders of the House of Lords has been regularly published at intervals. But until 1854 the Standing Orders of the House of Commons, with the exception of those relating to private bills, had never been published by authority. The Commons Standing Orders relative to public business were revised and reprinted in '88 (see Parliament and Parliamentary Procedure) and the Lords Standing Orders were considered and amended in '89.

"Star, The." A Radical evening paper, devoted to the interests of the advanced Democratic movement both in Great Britain and Ireland. It first appeared Jan. 17th, 88, and has attracted attention by its promptness in obtaining information, its outspoken articles, large size, and wide circulation. The daily sale was certified in June 16 to exceed 210,000 copies Office, Stonecutter Street, EC State Children's Aid Association. The

State Children's Aid Association The object of this Association is to obtain individual treatment for children under the guardianship of the State. It therefore seeks to obtain the dissolution of large aggregated schools, so that the children may be brought up, where possible, in families; to dissociate the children from all connection with the workhouse and the officials who have to do with pauper cases, and to obtain for the State further powers of control over neglected children. The Charman is Viscount Peel; the Hon. Sec., Mrs. Francis Rye; the Sec., Miss Pechey, and the Office 6. Old Broad Street F.

control over neglected children. The Charman is Viscount Peel; the Hon. Seo., Mrs. Francis Rye; the Seo., Miss Pechey, and the Office, 61, Old Broad Street, E (

State, Great Officers of (1) The Lord High Steward, (2) The Lord High Chancellor, (3) The Lord High Chancellor, (3) The Lord High Chancellor, (3) The Lord High Constable, (8) Earl Marshal, and (6) Lord Great Chamberlain, (7) Lord High Constable, (8) Earl Marshal, and (6) the Lord High Admiral. They are always of the Privy Council, and the first five take precedence of all dukes who are not of the blood royal, while the others have place of all peers of their own degree. Nos. 1 and 7 when existing, and Nos. 6 and 8, have no share in the government of the country, and the duties of Nos. 3 and 9 have long been performed by commission. See Chancellor, Treasury, and other articles.

State Pensions. For an exhaustive article on this subject, see eds. '93 and '94. See also OLD AGP PENSIONS

Stationery Office (Princes St., Westminster) provides the public offices and Parliament with books, stationery, etc., and arranges for the greater part of the printing required by them in Oct. 38 the Controller of the Stationery Office was appointed by Letters Patent, under the Great Seal, to exercise all rights and privileges in connection with copyright, the property of Her Majesty. Controller, T. D. Pigott, C.B. (£1500), Assistant Controller, E. P. Plowman (£700).

Stationery Office Publications. The vast number of papers issued to the public under the superintendence of Her Majesty's Stationery Office renders it impossible to enter much

into detail; but they comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyag; of H.M.S. Challenger calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade, the Education, and Science and Art Departments, and the Local Government Board, Explosive and Factory Books and Forms, Customs Forms, Survey publications, and numerous miscellaneous books. The following are a few of the most important books issued since our last edition: Vol. xiii. of The Revised Statutes, covering the years 1868 to 1871, and containing all the unrepealed Acts of that period; Statutory Rules and Orders of a public and general character issued during 1897; and the cheap edition of the Public General Acts passed in 1898. On Geology we have Memoirs on Berwick-on-Tweed, Bognor, Bournemouth, and on Soils and Subsoils Bournemouth, and on Soils and from a Sanitary Point of View. Papers and books of passing and permanent interest, from all departments, have been constantly appearing. The Board of Trade Journal (monthly) contains useful information for merchants and others, while the Kew Bulletin (monthly) ought to interest a large circle, containing as it does such valuable notes on Economic Produce and Plants, and the Journal of the Board of Agriculture and the Labour Gazette appear Agriculture and the Labour Gazette appear regulary. Of the Record Office publications we have Calendars of the Reign of William and Mary, vol. 11; State Papers on Venice, vol. 1x., Mary, vol. 11; State Papers on venice, vol. 1x., Treasury Papers, vol. v11, and several vols. of Patent and Close Rolls of Edward I, Fdward II, and Edward III., and Acts of the Privy Council of England, vol xv11. The publishers, who also supply all Parliamentary publications, including the Reports of the Historical Manuscripts Commission, are Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis & Co. 1.d., 104, Grafton Street, Dublin. Fice Public Libraries are supplied by these agents at a discount of 25 per cent from published prices The Admiralty Charts and other Hydrographic Publications are obtainable from Mr J D Potter (sole agent for the sale of the Admiralty Charts), 31, Poultry, E.C. The Geological Survey Haps are published by Mr. E. Stanford, Charing Cross, London, S. W. Messrs. Menzies & Co., 12, Hanover Street, Edinburgh, and Messrs. Hodges, Figgis, & Co., Ld., 104, Grafton Street, Dublin. Patent Specifications are only to be obtained at the Patent Sale Office, Cursitor Street, Chancery Lane, London, E.C.

Rtead, William Thomas, is the son of Rev. W. Stead, Congregational minister, Howdon-on-Tyne, and was b July 5th, 1849; married 73; ed privately and at Silcoates; apprenticed (63) to commercial house at Newcastle Quay. Appointed editor of the Northern Echo 71; and assistant-editor (80) to Mr. John Morley (then editor of the Pall Mall Gasstle); succeeded him as editor-in-chief '83; interviewed Gordon at Southampton (Jan. '84); wrote "The Truth about the Navy" (Oct. '84), "The Maiden Tribute to Modern Babylon" (July '85), "No Reduction so Rent," a record of a visit to Ireland in the autumn of '86, "The Langworthy Case" ('87), "Truth about Russia," written after a visit to that country in May and June '88, and "A Guide to the Paris Exhi.

bition" (89). Went in October to Rome, to gather material for a series of "Letters from the Vatican," published in book form under the title of "The Pope and the New Era," Resigned the editorship of the Pall Mall Gazette on his foundation of the Review of Reviews, of which he is the editor, and of which three independhe is the editor, and of which three independently edited editions are published in London, New York, and Melbourne. In July '93 he published a new periodical, Borderland, devoted to the subject of Psychical Research, but this was suspended in Oct. '97 In '95 he began the publication of the "Masterpiece" Library, with a weekly issue of the Penny Poets, of which in the first four months 2,000,000 copies were sold The Penny Popular Novelle of which were 2,000,000 copies were sold The Penny Popular Novels, of which more than 0,000,000 have been sold, followed His Christmas publications in '96 and '07 dealt with the Jameson Raid and the State of New York. In '98 he undertook the editing of "The Russian Library," No 1 being a translation of Pobedmostzeffs "Reflections of a Statesman," and in the autumn visited the capitals of Europe en route for Russia and afterwards published a volume Russia, and afterwards published a volume containing the results of his journey.

Steel. See TRADE, '08

STOCK EXCHANGE MOVEMENTS, '98

The year was a very trying one for the Stock Exchange-wars, rumours of wars, and prepa rations for war, strikes, and monetary disturbances following one another in continual succession. In the very early part of the year events in the Far East gave rise to a fear of international complications. During February and March the relations between the United States and Spain became very strained, but it was not till April 21st that war was actually declared, and curiously enough this was the signal for a recovery in American railway shares, which had fallen heavily on the prospect of war. Not was it Spanish and American stocks alone that were affected; for it was during April that Brazilian bonds, Mexicans, Italians, and indeed all classes of stocks, from consols downwards, were very much depressed, the Bank of England raising the minimum rate of discount on the 7th of the month from ; per cent, at which it had stood since the previous Cotober 14th, to 4 per cent, in order to check the drain of gold to America. Nearer home there were other troubles, such included the recovery from the worst, the prices of these, dispute with France about the delimitation of and indeed all first-class securities, were

frontier in West Africa-a trouble which was, however, got over through mutual concessions. This settlement, however, hardly improved the position of the markets, owing to the continuance of the struggle for supremacy in China; but some improvement occurred when the announcement was made that this Government had come to an understanding with Russia as to the pait each was to play, and the markets further took courage when it became known that England and Germany had come to a friendly agreement on certain points in South Africa, and for a time the markets were almost Aftica, and for a time the markets were almost buoyant, the Bank sate having in the meantime diopped to 3½ per cent on May 26th, to 3 per cent on June 30th. In September, however, the continued demand for gold from Berlin necessitated a fresh advance, and on Sept 22nd the rate was again raised to 3 per cent, followed by a further move to 4 per cent on Oct 30th, the banks and discount houses responding by nations their allowance on deposits at short notice to 2] per cent, a figure which had not been reached for several years. All these causes, monetary and political, tended to check speculative business on the Stock Exchange; yet, comparatively speaking, the prices of the good class of stocks were fairly well maintained, the demand for dividend-paying investments being more prominent than ever

Consols did not fluctuate more widely than usual, so far as regards the difference between the highest and the lowest points touched are concerned, but the changes were more sudden, though the tendency was downwards ever since the beginning of the year. During the depression of April the price went as low as 1004, but recovered to 112 during May, afterwards falling away again until the latter part of October, when, on the Fashoda incident reaching an acute stage, the price gave way from about 109 to 1.66, the latter figure being reached on the 25th of the month. This was followed by an immediate rally to 1072, and in a few days the price was again 100%, and afterwards 110, for although the political situation had not cleared, money became much easier as soon as November turned India stocks and Colonial bonds showed the same drooping tendency, for invariably the best prices were

Associated Gold Mines				6	- 3	5 1 6	July 28.

considering the great interests involved, such stocks as Russians, French, Egyptians, Turkish, and Hungarian kept very steady, the changes representing little more than the periodical deduction of the interest. One feating to be

distinctly easier Rupee paper was steady during the whole year, which is due to the first that the fluctuations in the price of silver has been comparatively slight, while the measures adopted by the India Government tended to keep the rate of exchange at about 18 dec.

Foreign Government stooks moved a good deal so far as the lower-priced lot are concerned, but, so far as the lower-priced lot are concerned, but, because it is the first many latest the first many latest price back to 50½, after which there was a slight recovery, but March saw the price down to 48½, and the actual outbreak of war in April sent it to 30½, the lowest quotation made being 20½ in May After that date there were many small fluctuations, but generally the price was noticed is the disappearance of the Turkish small fluctuations, but generally the price was "A' bonds, the senior of the grouped stocks maintained at from 40 to 42. The dividends were formed by the *radé* of 81, which airanged the Turkish debt and placed the control of the Minister made a distinction between bonds actually held by foreigners and those held at home, the interest on the former only being paid in gold; and these bonds had to be stamped for verification, and these only could be dealt in on the London Exchange. Portuguese, although in no way affected by the war, fell to 16½ in April, but September saw them up to nearly 25 upon a rumour that England had acquired from Portugal the territory of Delagoa Bay, and in consideration thereof would guarantee the Portuguese debt; but, in the absence of confirmation, the price soon gave way again Greeks were dull in the beginning of the year, but steadily improved, and touched the best on the successful issue of the new indemnity loan in May, the rise being pretty well maintained. Italians fell to 88½ in April, and were not strong at any time, and especially during the Milan rots in May, but thoughout the market has been supported artificially. Argentines fluctuated a good deal, but recovered from the depression of the early part of the vear, the gold premium falling to 138 in the beginning of November. Ohlians went very flat in April, and were rather affected by the boundary dispute with Argentina, but improved in August Brazils, after being flat with other stocks, improved on the publication of the funding scheme in June, and kept steady. The Chinese loan for £16,000,000 was very feebly subscribed, and the price went to a discount, but later on recovered to an extent, Japan loans also improving, after being easy.

proving, after being easy. In Home railways the year opened buoyantly, owing to the expectations formed from the large traffic increases during the second half of '97, but when it was found that these did little more than cover the extra cost of working prices began to give way, and although there was afterwards a recovery, in most instances the best prices were at the beginning of the year The great feature was the announcement that the South-Eastern and the Chatham companies had agreed to work together, pooling the traffics from certain places, and arranging a joint service in others-in fact, an amalgamation of sending Chatham ordinary stock up to 24, both the preference stocks also improving, the second especially, as the profit allowed a dividend at the rate of 22 per cent The advance was, however, to some extent lost, and it was to be noted that Dover "A" stock, instead of improving with Chathams, began to iecede, and after being 117, alowly fell away until it changed hands on Oct. 25th at 1013, though quickly recovering to 105. The coal strike in South Wales cost the format Western over £200,000 in the first six months, and reduced the dividend to 2½ per cent.; and for the first four months of the second half-year there was a further loss of £146,000, the Taff Vale road also suffering so severely that it and the Rhymney had to pass their dividend entryly. The other stocks call their dividend entirely The other stocks call for no special notice, although the fluctuations were rather wider than usual, especially when the fact is taken into account that there was very little speculation in those stocks | I raffic for coal on the Great Central was opened in July, and for passengers in the beginning of November, but it had but little effect on the price. The City and Waterloo electric railway was opened in August, but apparently it did not reduce the South-Eastern traffics. The dividend announcements for the first half of '86 were not at

being even more marked than in the second half of '97. The demand, however, for railway stocks for investment was so well maintained that the quotations did not recede very far, and in the early part of November this was so marked that those sellers who could not deliver the stock sold had to nay for the delay

the stock sold had to pay for the delay.

The year opened very hopefully as regards both Grand Trunk stocks and Canadian Pacific; and although there was in the early months commenced a cate war, traffics increased to such an extent that great hopes were entertained that Trunk first preference stock would receive a dividend. This was, however, not the case, because expenses were greater than anticipated, and Trunk firsts, after advancing to 763, fell away to a little over 60—from which, however, there was a quick recovery when traffics again began to show increases. Canadian Pacific had in the meantime, after rising to 93, fallen back to 74, in spite of a dividend of 23 per cent., but again recovered to 84, on the probability of an early settlement of the rate war. Aigentine rails moved with the harvest prospects of the country, although political movements were not entirely absent from the calculations, quotations fluctuating with the changes in the gold premium at Buenos Ayres.

Ottoman rails were very disappointing, the fall on the dividend announcement being very severe.

American railway shales to a great extent reflected the phases of the war with Spain. In the carly part of the year the tendency was buoyant, but soon the Spainsh, or rather the Cuban, question became active, and after a good deal of sensation war was declared on April 21st. But before this prices had fallen very severely, so that as soon as war was declared they began to recover, the improvement going on with slight interruptions until the final collapse of the Spainsh fleet at Santiago, when prices were generally above the quotations on January 1st, although below the best of the year. Business was fairly brisk throughout, until in November the market was really buoyant, prices showing a decided disposition to advance when the tenor of the speech of the Prime Minister, Lord Salisbury, at the Mansion House banquet on Nov 9th, was made known, and later on the result of the Congressional elections, which gave the Republicans a majority in both Houses.

majority in both Houses.

Mine shares were not a prominent feature at any time during the year. There were the usual ups and downs, but at no time was there any real buoyancy. A good deal of interest centred in Chartered shares when the crushing results of one or two mines in Rhodesia were expected, but they did not, when known, nave any effect on prices. Most mines advanced more or less, but on the whole the mining-market was very stagnant, nor do the alternations in prices call for much comment. Dealings in mine shares were not actually dead, but the public held aloof from the market, and indeed the stagnation was such as to prohibit fresh ventures to any extent.

coal on the Great Central was opened in July, and for passengers in the beginning of November, but it had but little effect on the price. The City and Waterloo electric railway was opened in August, but apparently it did not reduce the South-Eastern traffics. The dividend announcements for the first half of Yes were not all satisfactory, the growth of the working cost

leached. Cycles collapsed with Hooley, but afterwards recovered, though not to the extent of the collapse. Russian oil shares were a feature for a time, but failed to sustain interest. Altogether the stock markets were anything but active or good; but, considering all things, business was fairly active, and taking into account the adverse influences at work for account the adverse influences at work for nearly the whole of the year, prices sustained themselves remarkably well, for the extreme lowest prices were really more nominal than real.

Stonyhurst College, near Blackbuin. Directed by the Jesuit Fathers. First founded in 1592 at St. Omers in Flanders; transferred to Stonyhurst in 1794. Reotor, the Rev. J. Browne, S.J. The course of studies includes classics, mathematics, science, philosophy, modern languages, preparation for the Oxford and Cambridge Certificate Examinations, the London University degrees, and for the Army The Observatory attached to the College turns out excellent solar and other work. The cen-

out excellent solar and other work. The centenary of the College's existence at Stonyhurst was celebrated in July '94.

Straits Settlements. A British Crown colony in the Malay Peninsula, deriving its name from the Straits of Malacca, which separate the Malay Peninsula from Sumatra, and form the great trade route between India and China. Area about 1472 sq. m.; pop. 549,000 The capital of the colony and seat of government is Singapore. The Governor is assisted by Executive and Legislative Councils, the first consisting of nine official members, and the second, of these with seven non-official members, two of whom are nominated by the Chambers of Commerce of Singapore and Penang. The constituent parts are as follows Sungapore, an island off the southern extremity of the Malay Peninsula, area 206 sq m, pop 34,554. It is hilly and forested, fertile, and not unhealthy for Europeans. Chief local products, pepper and gambier The city of Singapore 15 a great commercial centre for the East a commodious harbour, protected by fortifica-tions. It is the headquarters of H M military and naval forces in these regions The usual garrison consists of a battalion of infantry and two batteries of artillery.-Penang, or Prince of Wales' Island, hes 360 miles north of Singapore, and about two miles off the coast of Province Wellesley. Area 107 sq m, pop. 123,886
The port and capital is Georgetown, better
known as Penang. A Resident Councillor controls the administration .- Province Wellesley is politically one with Penang. It stretches 45 miles along the coast of the mainland. Area 270 sq. m., pop. 108,117.—The Dindings, about 80 miles south of Penang, consist of the island of Pangkor and a small strip of territory on the mainland. Politically this settlement is a part of Penang.—Malacoa is a town and territory 240 miles south of Penang. Its coast, rocky and barren, extends 42 miles. Area 659 sq m., pop. 92,170. It is ruled by a Resident Councillor, subject to the Governor of the colony. Included in the administration of the Straits Settlements are the Cooos (or Keeling) Islands, a small coral group lying some 700 miles south-west of Java (area 9 sq. m., pop. 550), and Christmas Island, which hies 200 miles S.W. of Java.—The Protected States.

Governor. These countries are rich in natural resources, and for several years Persk and Selangor have exported the greater part of the Straits tin. The soil is fertile, and there are vast areas of forest land available for conversion into plantations; but mining at present makes agriculture a secondary consideration. Perak, on the western coast of the sideration. Teras, on the western coast of the pennisula; area 10,000 sq. m., pop 214,254. Capital Taiping. The ports are Taluk Anson and Port Weld Selangor; area 3500 sq. m., pop 81,592 The capital is Kwala Lumpur. Sungei Ujong and Jelebu, together with Negri Sembilan, the name given to a federation of nine small states lying to the north and east of Malacca, are administered by one Resident. Area 3000 sq m, pop. 68,000. Planting, especially of coffee, is progressing here. Pahang, the latest acquired of the Malay States, contains a lot of gold, but needs funds for its development Area 10,000 sq. m., pop 64,000 Johore is an independent Malay State under Sultan Ibiahim, at the southern extremity of the peninsula Area 9000 sq. m., pop about 200,000 Capital Johore Bharu. Perak, Sclangoi, Pathang and Negri Sembilan agreed to form one administrative federation under a British Resident-General in July 'o6. See BRITISH EMPIRE (table) and DIPLOMATIC.

Stubbs The Very Rev C. W., D D., Dean of Ely, comes of the same Yorkshire stock as his kinsman Bishop Stubbs, and was born at Liverkinsman Bishop Studds, and was dorn at Liverpool in '45 He was educated at the Liverpool Royal Institution School, and Sidney-Sussex College, Cambridge, of which he was an exhibitioner. He took his degice in Mathematical Honours in '68 He also took the Le Bas University prize for an English cssay He was ordaned in '68, and became a curate at St. Mary's Church, Sheffield In '71 he was appointed vicar of Gandborough, Bucks, in '84 vicar of Stokenham, Devon, and in '88 rector of Wavertree, near Liverpool. He was select preacher at Cambridge in '81, '94, and '96, Lady Margaret Preacher '96, select preacher at Oxford in '83 and '98, and has attracted much attention by his sympathy with the workers of the country and his sermons on social subjects. He is a Broad Churchman and a well known Liberal. His published works include "God and the People." a volume of selections from the writings of Mazzini, "Village Politics," "Land and the Labourers," "Christ and Democracy," "For Labouters, "Christ and Democracy," For Christ and City," "Christ and Economics," "Christus Imperator!" a "Creed for Chris-tian Socialists," "Historical Memorials of Ely Cathedral," and "Charles Kingsley and the Christian Social Movement"

Suez Canal (For history of the canal see previous eds) The report presented to the annual meeting held at Paris on June 7th, '98, when the Prince d'Arenberg presided, showed that the total receipts were 75,607,000 fr. (or over 6,500,000 fr. less than in '96), and the total expenses 36,291,000 fr, leaving a surplus of 39,315,000 fr. The sum of 708,095 fr. was 30,315,000 if the sum of 708,095 it. was taken from the reserve, leaving the fund still 2,679,837 fr. above the statutory amount, and a dividend of 90 fr. was declared. During the On the mainland there are several protected 2,679,837 fr. above the statutory amount, and Malay States which, though not part of the a dividend of 90 fr. was declared. During the colony, are subject to the supervision of the year 2,986 vessels passed through the canal

with 191,215 passengers. Of these 2103 were merchant ships, 727 mail steamers, 31 vessels in ballast, 112 war vessels and military transin ballast, 112 war vessels and military trans-ports, 3 steam yachts, 8 tugs, and 2 dredgers; 1905 vessels were English, 225 German, 206 flutch, 202 French, 78 Austrian, 71 Italian, 48 Spanish, 48 Norwegian, 44 Russian, 36 Japanese, 7 Turkish, 3 Chinese, 3 Egyptian, 3 American, 2 Danish, 2 Siamese, 1 Mexican, 1 Fortuguese, 2 Danish, 2 Stamese, I DEXICAL, I FORUGUESE, and I Swedish. The aggregate net tonnage was 7,899,373,841. In '96 the number of vessels was 3409, and the tonnage 8,560,283,609 The decline was attributed to commercial depression. The average duration of the transit was given at 15 hours 36 minutes, or a further reduction of 17 minutes. On behalf of what 18 known as "the Defence Committee," Baron Delort de Gleon denounced the London programme for the reduction of the rates, pointing out that the dividend had fallen from 1051 fr. in '91 to 92 ft 36 c. in '92, 96 ft. 37 c. in '93, 96 ft. in '94, 92 ft in '95 and '96, and now 96 ft after drawing on the reserve. The chairman, after stating that the widening of the canal was being carried out, said that the present year's receipts promised to show an increase of 8,000,000 or 9,000,000 fr. The four retining directors were re-elected.

Suffragans. See BISHOPS and CHURCH OF

ENGLAND.

Sugar. See Trade, '98, and West Indies, Sugar Commission

Sugar Steamission Seymour, was b. in

Sullivan, Sir Arthur Seymour, was b. in London, 1842. His father was a military bandmaster. As a choir-boy at the Chapel Royal he gained the "Mendelssohn Scholarship" at the Royal Academy of Music, in '56, and there continued his musical education He went to Leipzig from \$8 to 6f. His music to Shakespeare's "Tempest" at once attracted to Snakespeare's "Tempest" at once attracted public favour on his return in '62 Constantly writing cantatas ("Kenilworth," '64, etc.), oratorios ("Prodigal Son," '69; "Light of the World," '73), anthems, songs, etc., he yet remained without any specially extensive popuremained without any specially extensive popularity, till he hit upon a vein of burleague operetta, which he produced in conjunction with W. S. Gilbert, who wrote the librettos The first of these was "Trial by Jury" (75), followed by "The Sorcerer" (77); "H M > Pinafore" (78), which ran for 700 consecutive nights, and was undoubtedly the greatest success in England and in the United States of any work of the kind: "Pirates of Penzance" (80). cess in England and in the United States of any work of the kind; "Pirates of Penzance" (80), "Patience" (81); "Iolanthe" (82); "Princess Ida" (84); "Mikado" (85), revived in '88; "Ruddigore" (87); and "The Yeomen of the Guard" (88). For the Leeds Festival, in Oct '86, he wrote the "Golden Legend." "Ivanhoe" was produced in '91, and in Sept. '92 a new opera, "Haddon Hall," the libretto of which was written by Mr. S. Giundy, was brought out at the Savoy, and gained fresh distinction out at the Savoy, and gained fresh distinction for the great composer. The association with Mr. Gilbert was resumed in '93 with "Utopia Limited," and in '96 with "The Grand Duke." The Chieftain "was produced at the Savoy, the libretto being by Mr. F. C. Burnand, and in '98 "The Beauty Stone," the libretto by Messrs. Comyns Carr and A. W. Pinero. Sir Arthur was knighted in '83. he also nossesses the Legun of Honour, the House ossesses the Legion of Honour, the House of Coburg Royal Order, the Mediidieh, and the Royal Victorian Order. He received the honorary degree of Mus. Doc of Cambridge in '76 and of Oxford in '79,

"Sun, The," originally started as a Radical evening paper, changed hands in the early days of '97, and is now independent in politics, with strong Unionist leanings. The Editor is Mr. A. Clifton Kelway. It devotes much attenand political news, and its cricket and football editions have achieved much popularity.

editions have achieved much popularity. **Sunday School Association, The,** founded in 1833, exists a connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday-schools, and the promotion generally of Sunday-schools, and the promotion generally of Sunday-school distances. It seeks to such the university of the second that the second such as the secon school education It seeks to teach the young that the discoveries of modern science and the results of the best Biblical criticism are not foes to be resisted but friends to be welcomed. President, John Dendy; Hon. Secretary, Mr. Ion Pritchard; Business Manager, Mr. B. C. Hare. Office, Essex Hall, Essex Street, Strand, W.C. Sunday School Union. This Union was

founded in 1803, and its objects are to stimulate and encourage Sunday-school teachers, at home and abroad, to greater exertions in the promotion of religious education; by mutual communication to improve the methods of instruction; to ascertain those situations where Sunday schools are most needed, and promote their establishment, to supply the books and stationery suited for Sunday schools at reduced prices President for '99, Alexander J. Scrutton, Esq., Chairman of Council, F. F. Belsey, Becretaries, W. H. Groser, B.Sc., J. Edmunds, C. Robottom, and J. Tillett. Treasurer, Mr. S. Hope Morley Organ, Sunday School Chronich (Benevolent Department), 56, Old Bailey, E.C. (Publishing and Retail Departments), 57 and 59, Ludgate Hill Sunday Society, The, was founded in '75, to promote the opening of museums, art galleries, Ibraries, and gardens on Sundays. In '96 II M. Government arranged for the Sunday opening of the great National Museums and Galleries in the Metropolis. These instru Sunday schools are most needed, and promote

and Galleries in the Metropolis. These institutions continue to be opened on Sundays, and in addition there are now over a hundred museums, art galleries, libraries, and gardens opened every Sunday by the municipal authorities throughout the country. By the Sunday opening of the National Museums in London the first object of the Society has been secured, but as the Lord's Day Act of Geo III stands in the way of Science and Art collections being opened, or concerts being given, on Sundays by private enterprise, the Society is now advocating a repeal of this old statute, and the passing of a new Act that will give freedom for the of a new Act that will give freedom for the enjoyment of literature, science and art, whilst safeguarding Sunday from becoming an ordinary working day. President, Rev. Canon Barnett, M.A. Hon Secretary, Mark H. Judge, A R I.B.A., 7, Pall Mall, S.W. Supply. The sums necessary to defray the charges for the Army, Navy, Civil Services, Customs, Post Office, etc, are voted annually by the House of Commons in Committee of Supply. The sums required are granted for

Supply. The sums required are granted for the financial year ending on March 31st; and although a vote or votes on account are sometimes granted during the session for a part of the year, the whole sum voted during the ses-sion or in a case like that of '95 in the two consecutive sessions, for any service is for the full period of twelve months. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the

table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. Votes of credit for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the Army (Annual) Bill, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary. A new rule for discussions in Committee of Supply was adopted in the Session of '96, and was again adopted in '97 and '98. Supply is made the first order of the day on Friday, unless the House order otherwise, directly the Committee of Supply is appointed. I wenty-three days are allotted for the business of Supply, and if these have all been given and occupied by Aug 5th, all outstanding Votes are put Srithwith by the Chauman on the morning of the twenty-second day, and on the twenty-third day the Speaker puts all the outstanding reports of Supply. The great merit of the scheme is that it gives private members an opportunity during the effective parliamentary months of bringing important questions forward and having them discussed. For the Civil Service estimates for '98-9 see Finance,

Supreme Court of Judicature. The Supreme Court was formed by the consolidation of all the superior courts of the kingdom of England, excepting only the House of Lords and the Judicial Committee of the Privy Council. It replaces (a) the Courts of Common Law, the Queen's Bench, Exchequer and Common Pleas, together with the Court of Appeal known as the Court of Exchequer Chamber; (b) the Court of Chancery and the Court of Appeal in Chancery; (c) the Court of Admiralty, (d) the Court of Probate and Court for Divorce and Matrimonial Causes, which replaced the old ecclesiastical courts dealing with similar matters; (e) the London Court of Bankruptcy; (f) the Court of Common Pleas at Lancaster and the Court of Pleas at Durham. The Supreme Court replaces all these by a single court of appeal known as Her Majesty's High Court of Justice, and a single court of appeal known as Her Majesty's Court of Appeal. The High Court of Justice, again, is organised in three divisions—(a) the Queen's Bench Division, in which have been merged the Courts of Queen's Bench, Exchequer, and Common Pleas. It consists of the Lord Chief Justice of England, who is the president, and infeen puisne judges; (b) the Chancery Division, under the presidency of the Lord Chancellor of England, and having five puisne judges; (c) the Probate, Divorce, and Admiralty Division, consisting of two judges, the senior acting as president, and the junior ranking as a puisne judge. All puisne judges appointed since the foundation of the Supreme Court bear the same title and receive the same salary. Her Majesty's Court of Appeal consists of the Lord Chancellor as president, the Lord Chief Justice, president of the Probate Division and Master

of the Rolls, who are members ex officio, and of the Rolls, who are members ex officio, and of five ordinary members, known as the Lords Justices. As the three dignitaries first named are usually engaged elsewhere, the working Court of Appeal commonly consists of the Master of the Rolls and the five Lords Justices. The distribution of pusiness between the several divisions of the High Court rests on several divisions of the fight outr resist of the general principle that any action may be brought in any one of them. But this rule is modified by law and practice as follows:—

(a) The oriminal jurisdiction of the Court is exercised solely by the judges of the Queen's Bench Division. (b) Jurisdiction over causes of the following classes is exercised solely by judges of the Chancery Division (1.) actions for the administration of the estates of deceased persons; (ii) actions for the dissolution of partnerships, (iii) actions for redemption or ioreclosure of mortgages; (iv.) actions for the raising of portions or other charges upon land, or the sale of land subject to any charge; (v.) actions to enforce execution of trusts; (vi.) actions for the rectification, setting aside or cancelling of written instruments; (vii.) actions to enforce specific performance of contracts; (viii.) actions for the partition or sale of real estates; (ix) actions concerning infants and their estates (0) Jurisdiction over all such their estates (0) Surrautous over all sound causes as would have come before the old Courts of Admiralty, Probate, and Divorce is exclusively exercised by the judges of the Probate Division. To the above general rule there are other exceptions of less importance. the procedure of the High Court has been formed by a process of selection and improvement out o. the different forms of procedure observed by the old Courts which have been merged in it. The only differences of procedure now to be observed in the different divisions are such as have a practical value in the despatch of their different business. In all divisions every cause is as far as possible dealt with by a single judge, in whom are vested all the ordinary powers of the Court. The same forms of pleading are prescribed by the rules, although not adopted in practice by all the divisions alike. In all the divisions evidence is given by word of mouth or by affidavits, as may be most expedient. Irial by jury is becoming infrequent in all civil causes, although still most infrequent in the Chancery Division. The Court of Appeal is the same for all causes, and observes an absolutely uniform procedure, although for the more rapid despatch of business it is divided into two courts, each commonly consisting of three members. The procedure of the High Court and Court of Appeal is set out at large in the Rules of 1883. These, although irregular in form and incomplete in substance, constitute our nearest approach to a code of civil pro-cedure. In the year preceding, the various branches of the Supreme Court were for the first time housed in a single building. See also Judess, and Law, '98.

Surinam, or Dutch Guiana, is a colony on

of England, and having five pursue judges; (c) the Frobate, Divorce, and Admiralty Division, the north coast of South America, bounded consisting of two judges, the senior acting as to the north coast of South America, bounded on the east by French Guiana, on the west president, and the junior ranking as a puisue by Bruish Guiana, and on the south by the judges. All puisue judges appointed is since the mountains which separate it from Brazil. It foundation of the Supreme Court bear the mountains which separate it from Brazil. It same title and receive the same salary. Her imembers, all appointed by the sovereign. Majesty's Court of Appeal consists of the Lord There is a representative body called the Chancellor as president, the Lord Chief Justice, Colonial States, partly elected. A modification in the government and financial arrangements

was announced by Queen Wilhelmina in opening the States-general Sept. 20th, '98. The capital is Paramaribo. The chief products are sugar, cacao, fruits, coffee, rice, etc. Some gold mining is carried on also. Area, 46,060 sq. miles. Pop, about 65,000. See COLONIES OF EUROPEAN POWERS.

Surveyors Institution, The, incorporated by royal charter to secure the advancement and facilitate the acquisition of that knowledge which constitutes the profession of a surveyor—viz., the art of determining the value of all descriptions of landed and house property, and of the various interests therein, the practice of managing and developing estates; and the science of admeasuring and delineating the physical features of the earth and of measuring and estimating artificers' work. The Institution has about 3c00 members, and consists of fellows (F.S.I.), professional associates (P.A.S.I.), associates, honorary members, and Colonial fellows, with a class of students attached. The annual subscriptions are Students, £1 1.5.; associates and professional associates, £2 25.; and fellows, £3 35. An entrance fee of £3 36. Is paid by both classes of associates, and one of £5 55. by fellows President, Mr. Robert Vigers, Secretary, Mr Julian C. Rogers. Offices, 12, Great George Street, Westminster, S.W. Temporary Offices (during rebuilding), Savoy Street, Victoria Embankment, W.C.

Swaziland. A small native state in South Africa, almost surrounded by the Transvaal on the north, west, and south, but bounded on the east by the Delagoa Bay territory of Portuguese East Africa and Tongaland, which intervene between it and the coast. Area, 8,500 sq m; pop. 60,000. It is a mountainous tract stretching along the Limpopo range, with richly fertile valleys, and its mineral wealth is great, valuable fields of gold and coal being included in it, while its agricultural and pastoral resources are also great. The Swazi are a section of the Zulu race At the conclusion of the war with the Transvaal Boers, their boundary was with the Iranswall boers, their boundary was carefully delimited, and the independence of Swaziland agreed to. The Transwal, however, claimed that the country was theirs by a convention made in 81, whereby it was ceded to them in consideration of their preventing all Boer trees into Mashonaland. Ultimately, by the convention of Dec. '94, the Transvaal Government was secured "in all rights and powers of protection, legislation, jurisdiction, and administration over Swaziland and the inhabitants thereof," and a Special Commissioner was appointed to superintend the administration. The young King Bunu, however, was recognised as paramount Chief, and it was agreed that the management of the internal affairs of the natives should be administered by the native chiefs in accordance with their own laws and customs, and the natives were guaranteed in their continued use and possession of their land and of all their grazing and agricultural rights. Provision was also made against the imposition of any excessive hut tax, and against the sale or supply of intoxicating liquors to the natives. The capital is Embekelwin. A proclamation was issued (Feb. 20th, '98) repealing all former laws with two small exceptions, and applying the Transvaal laws, except as to customs, to the country. See Transvaal (map).

SWEDEN AND NORWAY.

Under Oscar II., of the house of Bernadotte, in Under Oscar II., of the house of Bernadotte, in 1815, the kingdom of Sweden was indissolubly united with the kingdom of Norway without prejudice to separate constitution, government, and the laws of either. If the throne become vacant, the Diets of both kingdoms elect, and in default of agreement an equal number of Swede and Norse deputies make an absolute nomination. Affairs common to both kingdoms are administered by a Council of State on which both nations are represented. State, on which both nations are represented. -Sweden. Under the Swedish Constitution of 1809 the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in other respects such power is exercised jointly by the Diet, which possesses a veto on all legislation, and the sole right of taxation. Diet consists of two chambers, the first of 150 members (elected by provinces and municipalities for nine years), the second of 230 members (150 representing rural and 80 urban constituencies), elected directly on a property qualification for three years. Local affairs are administered through representative bodies elected in the communes and in the 24 governments into which the country is divided. The State religion is Lutheran; all others, except the Jesuits, are tolerated. Elementary education is compulsory, free, and well organised. The chief exports are timber, cattle, minerals, and corn Area, 172,876 sq. m.; estimated pop. 4,919,260; estimated revenue and expenditure, '97, £6,212,300; debt, £10,20,000; imports, '94, £19,510,000; exports, £16,500,000 —Norway. The Norse Constitution of 1814, several times modified since, vests the legislative power in the Storthing, which has 114 members, who are elected indirectly, the people choosing delegates who elect the Storthing For business purposes it is divided into the Odelsthing, composed of three-fourths of the members, and the Lagthing, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. The King has the right of vetong the laws passed by the Storthing, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the King with a Council of State For local government the country is divided into twenty counties, and these into urban and rural communes, all with representative government. The State Church is Lutheran. Education is compulsory, the towns chiefly providing the cost, with subsidies from the state. Of the total area, 26,320 sq. miles are under forest, and only 3 per cent. is cultitivated. Timber, animal per cent., is cultitivated. Timber, animal produce, skins, and tallow are the chief exports. Area, 124,405 sq. m; estimated pop. 2,000,000.
Estimated revenue, 07, £3,504,450; expenditure, 4,594,450; debt. £8,500,000; imports, 95, £12,350,500; exports, £7,627,000 See Diplomatic, Foreign Armies, Foreign Navies, and Norwegian Political Parties.

Political Parties.—A grave constitutional struggle has arisen between the two countries, from the demand for greater independence for Norway in her foreign policy, which is energetically backed by the Liberals, led by M. Steen. In June '92 the Storthing passed a resolution in favour of independent consulates,

which King Oscar refused to sanction, and the ministry in consequence resigned. A deadlock ensued, and in July a resolution was passed asking M. Steen to remain in office, and deferring the consulate question sine ties. In '93 M. Steen resigned, and M. Stang, the Conservative leader, succeeded him, although he was in a minority. The general election of '77 resulted in the return of 79 Radicals and 35 Conservatives and Moderates, as against 59 Radicals and 55 Conservatives, in the former Storthing. In Sweden there are three parties—the Conservatives, the Radicals, and the Moderates, who incline to the Conservative side and strongly oppose the Norwegian demands History, '98.—Sweden. The Swedish

History, section of the Committee on the union with Norway reported in favour of a common Foreign Minister, residing at Stockholm, with a Council of State for Foreign Affairs consisting of two Councillors from each country The Foreign Minister should not be a member of the Riksdag nor of the Storthing, but might be impeached before a tribunal consisting of six Senior Judges of the Supreme Courts of both countries, and 12 members each of the Riksdag and Storthing Aminority report was also presented, mainly as to the responsibility also presented, mainly as to the responsibility of the Foreign Minister to the legislatures.

Norway The Norwegian Ministry resigned office (Feb. 12th), and M. Steen was given the task of forming a new Cabinet, which he accomplished (17th). The Norwegian section of the Committee on the union with Sweden reported to the Storthing (March 7th) The majority recommended that the contibution from each country for Foreign Office expenditure should be in proportion to population. ture should be in proportion to population, and that the Consular representation should be common for 15 years; after that time being dissolved, if either country so demanded. The Swedish proposals as to common defence were flatly rejected. A minority of the Committee, however, recommended separate Foreign Ministers, with diplomatic and consular representatives, for each country. A motion to introduce a purely Norwegian flag, without the symbol of union with Sweden, was carried by the Storthing (Nov. 11th).

Swimming, '98. The swimming contests

Swimming, '98. The swimming contests were as numerous as usual, and the Water Polo matches greatly increased, and are evidently much more popular than they were. The Cliristmas morning 100 yards Handicap on the Serpentine had to be put off owing to the ice until Jan. 1st, on which morning E. Hawkins won a very good race. The Boxing-Day 100 Yards All-England Handicap of the N.S.A. had to be postponed, but was held a few days afterwards at the same place in a dense fog, when W. Harrisons won in 1 min. 35 sec. In the matches between Oxford and Cambridge, the distances being 50 yards, 120 yards, and 1-mile, each University scored 5 points in each race, and consequently the result was a tie. In the 1000-Yards Championship of the Northern Counties, at Rochdale, J. H. Derbyshire, the holder, was beaten by P. H. Lister in 15 min. 388 sec. On July 8th J. H. Welsh won the 150-Yards Breast-swimming Championship in 2 min. 1 sec. and C. Martin won the Back-swimming the control of the Rochampionship in 2 min. 1 sec. and C. Martin won the Back-swimming the same and control of the Rochampionship in 2 min.

Championship at the same time. The annual display of the Life-Saving Society at the West India Docks was abandoned this year; but on July oth a display was given at Highgate Bathing Pond, in addition to which the National Graceful Diving Championship was decided, when H. S. Martin, St. James' S.C., who won in '95, defeated last year's winner, V. Sounemans, of Brussels, the diving took place from three heights, 3 ft., 15 ft., and 30 ft. On July oth J. H. Derbyshire won the National 100-Yards Championship in the world's record time of 60 sec, beating Iyer's previous record of 61g sec, and on July 16th Tyer's record for one mile was reduced by J. A. Jarvis, who won the Mile Amateur Championship in 26 min. 37g sec. The Long-Distance Amateur Championship was decided over a course measuring 5 miles was decided over a course measuring 5 miles 60 yards, from Kew Bildge to Putney, on July 23rd, when J. A larvis won in 1 h. 7 min. 58 sec. Cavill swam this same course in 1 min. 23 sec. shorter time. Jarvis also won the Amateur 2 Mile Championship at Leicester in the new record time of 12 min 52 sec. In the team race between England and Ireland, held at Blackrock, co. Down, England woo easily.
The Ulph Challenge Cup, over 1000 yards in the sea at Great Yarmouth, was won by S. T. Pugh, Otter S C, who beat Jarvis, the long-distance champion At Weymouth Jarvis won the 1-Mile Salt Water Championship in 6 min 32 sec. Mr Frank Holmes, the well-known swimmer, essayed to swim across the Channel on Sept. 8th, but owing to fog and wind he was obliged to relinquish the attempt when only 6 miles from the French coast, he was not the least exhausted when he left the water. On Sept 17th the Professional Long-Distance Championshup in the Thames, over a course of 5 miles 60 yards, was won by Greasley in 1 h. 16 min. 30 sec The Mersey 1 Mile Championió min. 30 sec The Mersey i Mile Championship was won on the same day by N Pottertime 33 min. 30 sec. J H. Jarvis won the 500-Yards Championship of England. The following were the principal Water Pole Match results England beat Scotland, Wales, and Ireland; Ireland and Wales drawn; Cambridge beat Oxlord, Surrey beat Kent, North v South drawn, Midlands beat the South of England; the Palace and the Manchester. Osbornes tied in the final for the English Club Championship; and Lancashire beat leicester. Championship; and Lancashire beat Leicester-shire for the County Championship.

shire for the County Championship.

Swinburne, Algernon Charles, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol Coll., Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('61). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy." "William Blake, a critical essay"; "Songs before Sunrise" ('71), in which he glorifies Pantheism and Republicanism; "Studies in Song" ('81); "A Century of Rondels" ('83); "Life of Victor Hugo" ('86); a poem on "The Armada" ('88); "A Study of Ben Jonson" ('90); "Astrophel, and other Poems." "Studies in Prose and Poetry" ('94), and "The Tale of Balen" ('96).

Switzerland. A Confederation of nineteen

Switzerland. A Confederation of nineteen 188 sec. On July 8th J. H. Welsh won the 150-rate and six half cantons, which have been 1848. The 3 sec., and C. Martin won the Back-swimming constitution of 1874 vests supreme legislative

and executive authority in two chambers-viz. (1) a State Council of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a National Council of 147 delegates of the Swiss people, chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population. The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are the first magistrates of the republic. The principles of the Referendum (q.v.) and of the initiative are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. Complete liberty of conscience prevails. Education is free and compulsory. The neutrality of the country is guaranteed by the Treaty of Vienna as indispensable to the general interest of Europe The Swiss agree to this, but yet claim the right to make

alliances, and even to declare war. The chief occupation is agriculture, though there is much manufacturing industry. The principal exports are textiles, silk, clocks and watches, and food produce. Area, 15,976 sq. m.; pop., '95, 2,86,848. Revenue, '97, £3,38,800; expenditure, £3,356,200. The various cantons have their own budgets of revenue and expenditure, and their own debts, the latter always covered by cantonal property, chiefly in land. The agreeath eantonal debts amounted, in '97, to £3,234,830. Imports '96, £39,719,846; exports, £27,531,591, See Foreign Armies; and for Council see Diplomatic —History, '98. M. Ruffy was elected President of the Confederation, and M. Müller Vice-President (Dec. 15th, '97). The nation was moved to deep grief and indignation by the assassination of the Empress of Austria at Geneva (Sept. 17th) by an Italian anarchist. The murderer confessed that his intention was to kill Prince Henry of Orleans, but as he could not find him, he chose the Empress as his victim. He was condemned to penal servitude for life (Nov 10th). By 260,000 votes to 100,000 the Federal Government were authorised to decree the unification of the civil and penal codes (13th)

T

Tasmania. An island south of Australia, separated from it by Bass's Straits, 160 miles across. Formerly called Van Diemen's Land Extends 210 miles north to south, and 200 miles west to east, containing 26,375 sq. m, with a pop. of 175,000. Capital, Hobart, pop. 29,375, in the south. Second city, Launceston, pop. 20,172. Several groups of islands are looked upon as being within the colony, including the Furneaux group, King Island, and Bruce Islands As to religion, the Church of England, Roman Catholic and Wesleyan Methodist are the chief denominations, numbering respectively 30,810,87,448, and 11,630 adherents Education is unsectainan, and compulsory for all children between 7 and 14 Small fees are levied upon those able to pay. Tasmania is divided into 18 counties, within which are electoral districts, parishes, and municipalities. Ruled by a Governor and responsible Ministry. There are also a Legislative Council of 18 members elected for a term of six years, and a House of Assembly of 37 members elected for three years. Members are paid £100 per annum The colony is represented in the Federal Council of Australasia, and a popular vote on the question of Federation showed 13,496 votes for the Federation bill and 2900 against it (June 4th, '98). The climate is most healthy and temperate. The minerals found are gold, tin, coal, and silver Wheat, oats, and hay are largely produced, and agriculturists are beginning to turn their attention to fruit and hops. Revenue, '97, £4,507,608; exports, £1,744,461; public debt, £7,776,320. See Barrish Empire (table); and for Ministry, etc., see Diplomatic.

Tea See Trade, '98
Teachers' Guild, The, was established as a registered society in 1885. The members of the Guild number about 4250, of whom about 1800 are in the Central Guild and the rest in the 30 local branches. The work upon which the Council are at present especially engaged is the attempt to raise teaching to the rank of a learned profession through registration, and the establishment of an efficient test of teaching power, and to provide for the organisation of Secondary Education in harmony with the views of teachers. Chairman, The Rev. the Hon. Canon F. Lyttelton, M. A., Head Master of Haileybury College; General Secretary, H. B. Garrod, M.A.; Women's Agency, Miss Cooper. Offices, 74, Gower Street, W.C.

Telegraphs. See Post Office Statistics,

Telephones. Under the provisions of the Telegraph Act, '92, the Post Office authorities have acquired the ownership and control of ail the trunk wires throughout the kingdom. They also have the sole right of constructing new ones, and the intention is ultimately to provide a complete system of communication between all the important towns in the kingdom, leaving the telephonic communication in the towns themselves to the National Telephone Company, which has gradually absorbed all other telephone companies into itself. The Company holds a licence which expires in 1911. The Company now has 819 exchanges and 1429 call offices in the United Kingdom, with upwards of 113,000 subscribers, transmitting annually some 450,000,000 messages over its wires. Considerable pressure has of late been brought to bear upon the Government in order

to induce them to grant licences to municipal authorities to set up services competing with the Company, and Glasgow has actually obtained such a licence. The Postmaster-General said (Oct. 30th, '98) that under no circumstances would a licence be granted to any other new company, nor would an extension of any licence be granted beyond the year 1911. See also Post Office Statistics, '98, and Session, sect 109, for the report of the Select Committee on Telephones.

The following table gives the telephone rates in the different countries of Europe, and states whether the telephones are in the hands of private companies or of the state:—

Country.	Whether Private or State	Price of yearly subscription
	State State State State State State State and private State and private Private Private Private State and private Private Private State and Private State and Private Private Private Nostly State	L8 to £14. £12 £4 160, with limit of 400 calls per annum. £16. £6 145 to £0. Tenniel, Sir John, artist, was b 1820. Showing the possession of artistic taste at an early age, he may be considered as entirely self-taught. He was a successful candidate in one of the cartoon competitions for the decoration of Westminster Hall ('45), and painted a fresco for the Palace at Westminster. His illustrations of books, although not comprising many, have always been characterised by great taste. When "Alice in Wonderland" made its appearance, some portion of the notice it obtained may fairly be attributed to Mr. Tenniel's illustrations. In '51 he joined the staff of Punch, with which newspaper he has ever since beging connected, and for which he draws the cartoon Knighted in '93. He lives at 10, Portsdown Road, Marda Hill, W.

Ternina, Milka, the celebrated dramatic sopiano, is a native of Croatia. After studying under Dr. Josef Gansbacher, of Vienna, she acquired experience in Leipzig, Graz, and Bremen. In '90 she became prima donna in Munich, where her success was great. Her talents have been recognised throughout Germany, and she is a favourite in Russia and America. She first appeared in England at Covent Garden Opera House as Isolde in '88, and further attracted attention by exceptionally fine impersonations of Brünnhilde and Fidelio.

Terry, Miss Kilen, was b. at Coventry, Feb. 27th, 1848, and made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamillius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Miss Kate Terry, Mr. William Rignold, Mr. George Rignold, Mr. Charles Coghlan, Mrs. Kendel Mrs. Laburcher Kate Rehoo, and Kendal, Mrs. Labouchere, Kate Bishop, and several other now prominent members of the several other now prominent members of the profession. She reappeared in London March 63, as Gertrude in "The Little Treasure," and until Jan. 64, played Hero in "Much Ado about Nothing," Mary Meredith in "Our American Cousin," and other secondary parts. In that year she married and left the stage, but reappeared again in Oct. '67, in "The Double Marriage" at the New Queen's, Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and has since, in conjunction with Mr. Irving, she made her first appearance at the Lyceum, and has since, in conjunction with Mr. Irving, played in the longest runs ever known of "Hamlet," "The Merchant of Venice," "Romeo and Juliet," and "Much Ado about Nothing." She has also appeared as Viola in "Twelfth Night," Henrietta Maria in "Charles I.," Camma in Iennyson's tragedy of "The Cup," Ruth Meadows in "Eugene Aram," as Marguerite in W. G. Wills' "Faust" (revived in '94), as Lady Macbeth in "Macbeth," as Lucy Ashton in "Ravenswood," as Queen Catherine in "Henry VIII.," as Coidelia in "King Lear," as Rosamonde in "Becket" ('93), as Imogen in "Cymbolit 2" ('96), as Madame Sans-Gene ('97), and in "Peter the Great" ('98) She accompanied Mr. Lyving on his American tours in 87, 93, '94, and '95 Miss Terry's son plays under the name of Gordon Craig, and her daughter under that of Edith Craig Thamses Conservancy. The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers extended by various Acts from

their powers extended by various Acts from time to time. In '94 an Act was passed to amend the constitution of, and consolidate, amend, and extend the statutory powers of the Conservators, to make further provision for the preservation and improvement of the tiver for purposes of navigation for profit and pleasure, and as a source of water supply for the Metropolis and the suburbs thereof, and for other purposes. The Act increases their powers in several respects, especially with a view to the prevention of pollution. The Conservators have now for this purpose juris-diction over all the tributaries of the river within its catchment area (extending over 3820 square miles) except a part of the river Lea, and may board and inspect vessels on the river. All the provisions of the existing law as to rights of navigation, removal of obstructions, piers, and landing-places, beacons and lights, pleasure boats, steam launches, house boats, etc., are re-enacted, and in some cases strengthened, and power to dredge as far as the Nore is conand power to dredge as as as the Adre scottered. No further powers of taking water from the Thames than might previously be legally exercised are given by the Act to the water companies; but they are to contribute an additional amount to the sums formerly paid by them. The constitution of the Conservators consists of the following thirty-eight members: The County Councils of Middlesex, Surrey, Kent, Essex, Oxfordshire, Berks, Bucks, and Herts each appoint one Conservator; the Gloucestershire and Wilts County Councils jointly appoint one; the County Boroughs of Oxford, Reading and West Ham each appoint one, and the Metropolitan Water Companies, one, the Admiralty two, the Board of Trade two, Trinity House two, ship-owners three, owners of sailing barges, lighters, and steam tugs two, dock-owners one, wharfingers one, Corporation of London six, and London County Council six. The offices of the Conser-vancy are on the Victoria Embankment, near Blackfriars Bridge, E.C.

THEOLOGY, '98.

As a rule there are few theological movements or discussions at the present time that excite interest in other than purely ecclesiastical circles. This is not because the intelligent laity care nothing for such subjects; it is rather owing to their belief that the great doctrines of the Christian faith are securely based and perfectly defined, and that discussions on other points are of little practical importance During the year, however, a ritual controversy has affected the whole body of the people to an extent to which we can of late years find no parallel save in the earlier stages of the Oxford movement. The newspapers have been flooded with letters on the subject, numerous pamphlets published, public meetings held, and in several ritualistic churches Divine service has several intualistic churches Divine service has been violently interrupted by Protestant de-monstrators, and the clergy have had to seek police piotection. Even Parliament has been moved by the agritation, as the discussion on the Renefices Bill has amply proved. The controversy has shown that English Churchmen controversy has snown that Engiss Churchines as a body are profoundly appreciative of the service rendered by the High Church party in raising the standard of worship throughout the Chuich and in adding new dignity and beauty to her services. The majority of Churchmen have no objection to a moderate ritual or to the use of symbolism in worship, and many of them cordially approve of the main principles of the Catholic revival But if the controversy has brought out anything with clearness, it is the fact that the laity of the Church are at heart soundly Protestant, and view with suspicion and even abhorrence any practices in the Church that are contrary to the Book of Common Prayer and the teaching of the English Reformers. But it is not a little suggestive to find that in this controversy the real crux of the whole question has very seldom been clearly seen. The usual subject of discussion has been the lawfulness of certain ritual actssuch as the eastward position in Communion; the use of altar lights and ornaments, inceise and vestments; the observance of feasts and ceremonies unauthorised by the Book of Common Prayer (e.g Corpus Christi and the Adora-tion of the Cross) and the reservation of the sacrament Such ritual acts, however, are in themselves trifling matters, on which liberty of action may be granted, or which might be settled in case of dispute by an Anglican College of Rites, as the Archbeshop of York suggested in his sermon to the Church Congress at Bradford. It is otherwise with the doctrines of advanced ritualists, especially with their assertiotal theories of the priesthood. Such their assertiotal theories of the priesthood. Such theories are condemned by the so-called Black every certainty that the Union itself will be

Rubric in the Prayer Book, and their adoption by the Church would go far to undo the work of the English Reformation. The crux of the whole question lies here. This has been whole question lies here. This has been brought out with great clearness in the reply of Cardinal Vaughan and fifteen Roman Catholic bishops of the Province of Westminster. to the Archbishops of Canterbury and York's reply to the Papal Bull on Anglican Orders. The Roman bishops assert that a priest is such in their communion solely because he has the "power of effecting the Real Objective Presence on the altar of the True Body and Blood of Jesus Christ, and thereby offering Him up in sacrifice." They point out that no such power is conferred upon Anglican priests in ordina-tion, nor hitherto has such power been claimed by them.

An attempt is being made to revive Broad-Churchism, and to give to its adherents that discipline and esprit de corps in which they have hitherto been lacking. For some time past a scheme has been under discussion in Broad-Church circles, and at the recent Church Congress in Bradford it has been matured. The new organisation is styled "The Churchmen's Union for the Advancement of Liberal Religious Thought," and its objects are the reform of abuses within the Church, the assertion of the right of lavmen to an adequate share in Church government, a conciliatory attitude towards Nonconformists with a view to make the Church of England inclusive and truly national, and the frank acceptance of ascertained truth though affecting dogmatic interpretations. The official organ of the party is.

The Church Gazette. The inaugural meeting of the Union was held at the Church House, Westminster, on Oct. 31st.

Desire for the reunion of Christendom is one of the characteristics of our time, and is the hope of the best minds in every section of the Christian Church. Repulsed in her overtures to Rome by the Papal decision anent the "nullity" of Anglican Orders, the Church of "nullity" of Anglican Orders, the Charles England has turned with renewed expectation to the Orthodox Greek Church, and especially to that branch of it located in Russia. It is understood that many pielates of the Russian Church are favourably disposed to the Church of England, and that a deputation of these is about to visit this country with a view to confer with the Anglican bishops Following the recommendation of the Lambeth Conference of '97, a committee of Anglican bishops is at present inquiring into the validity of the orders of ministers of the Moravian Church and the history of the episcopate in the Lutheran Church of Sweden, with a view to see if the friendly recognition of these churches by the Church of England is possible. In Scotland an important step towards the union of the Presbyterian Churches has been taken by the publication of *The Church Hymnary*. This book has been compiled by committees representing the Established, Free, and United Presbyterian Churches in Scotland, and the Presbyterian Church in Ireland. Several of the Colonial Churches have also intimated their intention of adopting the book, which seems destined to form a bond of union amongst all English-speaking Presbyterians. The union consummated in the beginning of the coming

century.

The Dootrine of the Immortality of the Soul has been the occasion of a lively controversy in the Wesleyan Methodist Church, and has brought about a surprising result. Professor Agar Beet, one of the best known of Wesleyan theologians, had published a book in which he asserted that the immortality of the soul was not a Christian but a pagan belief, that the doctrine of everlasting punishment was not supported by Scripture, and that the teaching of his own and other orthodox churches on these points was unbiblical and misleading The ministers of the Wesleyan Church as-sembled in their Conference have contented themselves with inducing Professor Beet to withdraw his book from circulation and to promise that he will say nothing further on the matter. This attempt to stille free theo-logical inquiry is foredoomed to failure, and may have most serious consequences for the Wesleyan Connexion. The laity are protesting against the action of their ministers, and the doctrine itself is being subjected by them to vigorous and uninstructed criticism. It is already evident that Professor Beet's views have many sympathisers both within and without his own Church; but it is very doubtful if such persons are prepared to accept the serious consequences that mevitably follow the demal of this great doctrine

Apart from the foregoing, there is little else in the theology of the year that calls for special comment. In Biblical criticism, that on the Old Testament continues to be radical, while that on the New is conservative, if not reactionary Of the criticism generally, it may be said that it is too much concerned with minutiae and too little with principles, it seizes on facts, but does not always distinguish their bearings and relations. In theology proper there is one tendency that is growing more marked of late years. It was long a reproach to theology that it was built, as a mathematician might handle his formulæ and symbols, with no reference to the actualities and facts of life. This reproach is no longer deserved, for theologians of our day (including in that term preachers and religious teachers) have constantly before them the instincts of morality, the needs of humanity, and the realities of life. Every doctrine is tested to see if it harmonises with what is best in human life and thought. This tendency is already modifying certain doctrines, chiefly by giving prominence to their ethical aspects, and it promises to exert a greater influence in the near future.

Theosophy. The chief agent in founding the Theosophical Society was Madame H. P. Blavatsky, who, with Col. H. S. Olcott, Mr. W. Q. Judge, and others, established it in New York in 75. The headquarters was in 79 transferred to Madras, and much arduous but successful work was accomplished in India. In 87 the movement received a fresh stimulus from the presence of Madame Blavatsky in London, from which epoch dates the great literary activity that has recently characterised it. There are now over 300 branches in Europe, India, America, and the colonies, and a large literature. The Society has three declared ebjects: viz.,—(1) To form a nucleus of the universal brotherhood of humanity,

without distinction of race, creed, sex, caste, or colour; (3) to encourage the study of comparative religion, philosophy, and science; (3) to investigate unexplained laws of nature, and the powers latent in man. The society is therefore quite unsectarian, and no articles of faith need be subscribed to by an adherent, the only condition of membership being an assent to the first object. No dogmas are forced upon members, as is the case with religions, and the teachings which are promulgated are merely propositions which can be verified by the student in the course of his progress in the study of occultism. Any individual member has a right to make any declaration of personal belief he pleases, on the understanding that the Society is not implicated. Some of the more important teachings of the Society will be found summarised in eds. '95 and '96. The chief books on Theosophy are 'The Secret Doctime,' "Isls Unveiled," "The Key to Theosophy," by H. P. Blavatsky; "Esoteric Buddhism," "The Occult World," and "The Growth of the Soul," by A. P. Sinnett, "Theosophical Manuals" Nos 1., 11, 111, 114 and VII., "The Ancient Wisdom," "The Sell and its Sheaths," "The Building of the Kosmos," and "The Besant; "Theosophical Manuals" Nos 1., 11, 111, 114 and VII., "The Ancient Wisdom," "The Sell and its Sheaths," "Theosophical Manuals" Nos. Thibst is an Asiatic country, which, in spite of all explorers efforts, still remains practically unknown to Europeans, and unexplored by them. It lies on the slopes of the Himalayas, between Kashmir and the Chinese province of Sze-chuch It is a dependency of China. Its area is 650,000 sq m, and its population about 6,000,000. The capital of the country is Lhasa. The people are of the mildest character, but they obstinately icfuse to allow travellers to explore their country, which—by reason of its physical characteristics alone, its great mountains, and its height above the level of the sea, which has caused it to be called the roof of the world—is of extreme interest. The country is under the rule of the lamas or priesty, and the religion is that of Buddha. There are two Chinese Residents at Lhasa, who represent the Chinese Government in the country. with Chibet carly in '94, Yatung, a town on the Indian-Thibet frontier, was opened for trade, with an Indian Government official and a Chinese official stationed there By the terms of the treaty, all articles, except munitions of war, drugs, and intoxicating liquors, are to pass free of duty for the first five years. The import free of duty for the first five years. The import of tea from India is prohibited for the same period. A considerable export of wool from Thibet is anticipated in due course. The chief imports are cotton and woollen goods, metals, maize, and tobacco. For books on Thibet published in '58 see Literaturf (Travel). Thistle. The most ancient and most noble Order of the. Originally established in 1340, and remodelled in 1687, and again Queen Anne's reign (1703). It was by the statute of 1827 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and its badge a green ribbon, with motto Nemo me impune lacessit. There are at present twenty-one K.T.s. including the Sovereign and princes of the blood. the subjoined being a list of them :-

The Sovereign.

D of Connaught. D. of York. Prince of Wales Duke of Saxe-Coburg and Gotha (D. of Edinburgh). D. of Cambridge.

D. of Argyll. D. of Buccleuch. L. Napier and Ettrick. E. of Stair. M. of Lothian. D. of Montrose. D. of Athole. E. of Southesk. D. of Fife. E. of Galloway. E. of Crawford and Balcarres. E. of Rosebery M. of Lorne. L. Colville of Culross. M. of Bute. M of Tweeddale.

Dean of the Order, Very Rev James Cameron Lees, D D.; Scoretary, Sir Duncan Alexander Campbell, Rart, Lyon King of Arms, J Balfour Paul; Gentleman Usher of the Green Rod, Hon Alan David Murray

Thun, Count Franz, is a member of a Tyrolese family which has been settled in Bohemia ever since the Thirty Years' War, and is one of the principal large landowners in that province. He was b. in 1848, and is married to a daughter of Prince Charles Schwarzen-berg. After his education had been completed, he took up the study of the law, served for a time in the army, and then was elected to the Bohemian Diet, where he joined the Conserva tive and Czech large landed proprietors. At first he was in great favour with the Czechs, but in '89 he was appointed Governor of Bohemia, and in that position had to deal with the disturbances which followed the attempt at what was called the Czecho-German compiomise in '90 He resigned his position when Count Badeni became Prime Minister in '95 after the fall of the Kielmansegg Ministry, and accepted the post of Grand Master of the Court of the Archduke Franz Ferdinand, heir to the throne. He presided at the '97 session of the Delegations, and at that time regained the good opinion of the Czechs. When Baron Gautsch tesign d office in March '98, he was entrusted with the formation of a Ministry, and the details of his attempts to deal with the very difficult state of affairs in the Reichsrath will be found under Austria Hungary.

"Times, The." The chief English political "Times, The." The chief English political daily paper (price 3d.). First published under the title of The Daily Universal Register, Jan 1st, 1785, at 2½d., which name was changed to The Times Jan. 1st, 1788. Editors have been:—Dr. Stoddart, Thomas Barnes, J. F. Delane, Prof. Thomas Chenery, G. E. Buckle (q.v.) (present editor), 1884. The Centenary of The Times occurred in Jan. '88. The Mail (2d.), published three times such week turnshes. published three times each week, furnishes a summary of the contents of *The Times* for two

an International Literary Journal (6d.), edited by H. D. Traill, is a weekly literary review. In connection with *The Times* are issued, in a convenient form, the *Times* law reports, and separate reports of commercial cases, and occaseparate reports of commercial cases, and occasional summaries of subjects of special public interest. During o5 an admirable Atlas, known as "The Times Atlas," was ssued in 15 weekly parts, and during '98 The Times reprint of the inith edition of the "Encyclopædia Britannica," Palmer's "Index to The Times" provides a convenient means of identifying any particular subject or event.

Tobago, a small island in the British West Indies, now attached to Trinidad, from which it is distant only is miles, but formerly connected with the Windward Islands. Area. 114 sq. m., pop. 19,534. Scarborough is the chief town, and the staple crop is sugar, though the cocoanut palm, coffee, and cocoa are also being cultivated. The island is administered by a Commissioner appointed by the Governor of Trinidad, and its financial arrangements are kept separate. For statistics see British EMPIRE (table).

Togoland. A German protectorate on the Slave Coast in Upper Guinea, between the Gold Coast Colony on the west and Dahomey on the east, proclaimed in 1884. The protectorate includes Little Popo and Porto Seguro. The coast-line is only 32 miles long, but inland it bloadens considerably Area, 23,160 sq. m; pop. 2,500,000. It is administered by an Imperial Commissioner. Capital is Lome, but Togo is the chief native town, and has 800 inhabitants. Chief exports palm oil and ivory. A Convention with France, signed in July '97, gave to Togoland the fertile country of Sansanne Mangu, in the hinterland, and a geographical frontier in the neighbourhood of the coast; and to France the vast country of Gurna, the chief advantage of which was that it established communication between French Soudan and Dahomey. See NIGFRIA (map).

Tolstoi, Count Lyof Nikolaivitch, usually called Count Leon I olstoi, the most eminent living Russian novelist, was b Aug. 28th, 1828, at Yasnaia Poliana, in the government of Toula, where he still lives Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "War and Peace," a tale of the invasion of Russia by Napoleon in 1812, is regarded by Russians as his masterpiece; but his "Anna Karenina," which appeared in '76, is better appreciated abroad. "The Cossacks" is another admirable abroad. "The Cossacks" is another admirable work. He has written much on education, and published many short tales and reminiscences of childhood and youth. Latterly he has devoted himself to religious teaching. He makes "Resist not evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "Christ's Christianity" and "My Re-ligion." Translations of his "Kreutzer Sonata" appeared in '90. In Oct. '92 he deposited his Memoirs and Diaries with the Curator of the Rumyanzoff Museum on the condition that they should not be published till ten years after his days, the Times Weskly Edition (2d.) contains death. In November he legally made over his a summary of the week's news; and Literature, whole fortune, including his real and personal

estate, to his wife and children. He married in '61, and has nine children living. During '93 he wrote "The Kingdom of God Within Us," an important work on the social question; in '94 a powerful criticism of the Franco-Russian alliance, entitled "Patriotism and Christianity," appeared; and in '95 he published "The Four Gospels Harmonised and Translated" by himself.

Tonbridge School was founded 1553, and was reorganised '80. The new buildings were opened in Oct. '95. Governors: the Worshipful Company of Skinners. Four exhibitions from 190 to 160 for four years fall vacant annually, and are tenable at any place of higher education that the Governors may approve of; four others are tenable only at Oxford or Cambridge Pupils, 450. Head Master, Rev. Joseph Wood, D.D. Motto, Deus dat incrementum.

Tonga Isles, The, in the Friendly Islands, are governed by an hereditary monarch and a legislative assembly of two orders—viz, 31 nobles, and 31 elected representatives of the people, with an executive consisting of a ministry nominated by the King. Three groups of islands, called Tonga, Haapai, and Vavai, constitute the kingdom The British Deputy Commissioner for the Western Pacific is Vice-Consul in Tonga Area 385 sq. m.; pop. 23,000. Capital, Tongatabu.

Tonquin. A country of Indo-China, which was itemerly a province of Annam, but was made a French colony in 1884. The name is also spelled Tong-king It is situated to the north of Annam, and lies to the east of the Shan States of Burmah, and to the south of the Chinese province of Yunnan. Area, 122,000 sq. m; pop. 12,000,000. Capital, Hanoi, on the Hanoi or Song-koi river, pop 150,000. Principal port and chief seat of trade, Hai-phong. At Hongay, near Hai-phong, and at Kebao, there are coal mines worked by French companies. The chief products of the country is ruled by a Resident under the French Council of Indo-China The army of occupation is about 19,000 strong. See Annam, China (map), Colonies, etc., of European Powers, and Indo-China.

Tortola. A West Indian island of the Virgii group, and chief of the Presidency of the Virgin Islands, in the British federal colony of the Leeward Islands. Area, 26 sq. m.

Tower Bridge, London. See Engineering.

TRADE, '98.

In this article the trade of the year is dealt with under its principal divisions. To enable a broad summary to be made of the position, the following figures, showing imports and exports month by month, are useful. It will be seen that on the whole the year has presented similar features to its priedecessor. The effects of the Dingley tariff in the United States are still acutely felt by British producers, and political unrest in various parts of the world has checked enterprise and induced a feeling of caution and hesitation. This was particularly the case in the spring months, but latterly there has been a better tendency. The import figures are hardly so favourable as they appear at first sight, owing to the rise in price of foodstuffs, and particularly wheat (q.v.). The figures are as follows:—

Month.	Impe	Imports.				
	'98-7.	97-8.				
November . December . January February . March . April . May . June . July . August . September . October .	£42,492,369 43,618,81 39,775,668 77,745,164 4',655,114 35,136,55 36,3246,346 36,321,869 36,121,523 33,371,485 35,170,693 39,044,763	£41,161,871 41,332,284 39,916,491 35,770,874 43,412,829 40,246,716 37,706,378 39,932,395 35,993,039 37,216,527 35,605,281 38,601,673				
	£455, 312, 182	£465,966,268				

Month	Exports of Ho	Exports of Home Products.					
	'96-7.	'97-8.					
November December	£18,570,877	£19,773,594					
January February	19,780,230	19,231,404					
March April	21,647,209 19,700,122	20,837,865 17,496,011					
May june	19,322,146 19,059,997	17,891,3 54 19,413,696					
July August September.	21,501,452 18,773,997 18,305,275	20,089,878 20,186,016 19,945,085					
October	19,283,052	19,863,019					
	£234,162,804	£431,607,952					

The outlook for the coming year is fairly satisfactor, and there is no evidence of any very marked change

Butter—I hat less than a third of the butter

Butter—I hat less than a third of the butter consumed in this country should be of home production is an impatisfactory feature to which we have previously called attention. The value of our imports of this product in '197 was only a fittle under £10,000,000, about one-third coming from our colonies and two thirds from foreign countries, principally France and Denmark. During the first ten months of the year there was a slightly falling off in the imports as compared with the same period in '96-7, the total being 2,087,888 cwts, as compared with 4,714,580 cwts. in the previous year. It is by the method of co-operative production, which has been so successful in Denmark, that the British farmer must attempt to improve his present position. So long as butter is made in small churns instead of in lactories, it is impossible for the British farmer to obtain his due share of this important trade.

Coal—Prices have shown but little variation during the past year, as during the summer months the south Wales coal strike tended to check the usual fail. In addition to this the effect of the new Workmen's Compensation Act was in the same direction. The whotesale quotation for best Walissend in the early part of November' 97 was 16s od., the price advanced early in December to 17s., and remained at that rate until March, when a fall to 16s took place. In April 15s., the lowest price of the year, was touched, the rate rising to 16s, and then to 17s. towards the close of the month.

From the middle of May until the middle of August the quotation remained steady at 16s. After that it rose to 17s., and in the early part of November it stood at the last-named figure. Apart from the South Wales dispute there have been no striking features in the trade. Our exports for the first tem months of the year were slightly higher than during the same period of '97. France is still our largest customer, and bought an increased quantity during '98. Italy comes second and Germany third. There has been an increase of about 10 per cent, in the shapment to Sweden and Norway.

cent. in the shipments to Sweden and Norway. *Copper:—We pointed out last year that circumstances were favourable to a rise in the price of copper, and during the last twelve months a distinctly upward movement has taken place. In the early part of Nov. '97 the price for G.M.B. was £47 155, per ton, it had risen by the end of the year to £48 55, per ton, and by the beginning of March the quotation was over £50. In April it stood at £52 35, receding somewhat during the summer months and falling as low as £49 155 in the middle of July. Since then the upward movement has been resumed, and the price in the early part of Nov. '98 was £56 2s. The statistical position of copper is very strong. Both in England and on the Continent the demand for engineering and shipbuilding purposes is rapidly growing, while the extended use of electricity involves an increased demand for that purpose Stocks are extremely low, only amounting to £5,797,000 tons at the end of O.1 '98, while the rate of production does not increase nearly as rapidly as the demand. Under all these circumstances the prospect is that a further increase in price will take place.

Cotton.-During the past year the cotton industry has been considerably depressed, though the demand from In a chas shown an improvement. The course of prices has been a good deal influenced by the prevalence of political uncertainty and by the prospect (now realised) of an unusually large crop, considerably exceeding that of any of the previous eight years. In the early part of Nov '97 Middling Upland stood at 332, but by the close of the year it had fallen to 3.72. In February and March firmer rates prevailed, and by the middle of the latter month 310, the highest point of the year, was touched. Thereafter there was a slight decline until the middle of April, when the price stood at 31th. In June and July the markets were very mactive, and at the end of the latter month the quotation was only $3\frac{5}{10}$. After that there was a little recovery, but in the early part of October the price was down to $3\frac{1}{10}$. and in the early part of November it stood at 3. Below will be found particulars of the American and Canadian crops, the former season ending on Sept 1st and the latter on June 30th.

Year.	United States.	India.
	Bales.	Bales.
'90-1	8,655,518	3,020,000
'91-8	9,038,707	2,867,000
'99-8	6,717,142	2,841,732
'93-4	7,527,211	2,950,000
'94-5	9,892,766	2,008,000
'96-6	7,162,473	3,296,000
'96-7	8,714,111	2,999,000
'97-8	11,180,060	3,100,000

As regards the distribution of the American crop, the proportion taken by Great Britain continues to decrease, and that taken in the United States shows a very large increase, indicating a considerable development in cotton manufactures there. The figures given below show five-year averages except in the last three lines.

Proportional Distribution of American Cotton Grops.

	Great Britain.	C	ontine	nt.	United States
	%		%		%
'80-5 .	 42.83		25 53		31'64
'85-90	. 41'23		25'94		32.83
'90-5 .	. 37.28		29.67		33'05
'95-6	31 54		31 52		36'94
' 96 -7	32 90		33.2		33.28
'97 8	31.35		36 go		31.75

As regards our exports there is a slight improvement in cotton yain and twist, the figures for the first ten months of '98 being 205,982,800 b, as compared with 203,796,900 lb. during the same period in '97 Germany is still our the same period in '97 Germany is still our larges customer, taking nearly 4th of the total export on the actual figures, and really considerably more, as shipments coming under the head of Holland are made to a great extent for German consumption There has been a slight increase in Indian requirements and also in shipments to China, but a falling off in the case of Japan In piece goods there has been an the previous year, the total shipments being 4,489,106,600 yds . as compared with 3 941,903,600 yds during the same period of the preceding year. India is still our most important customer and shipments thither showed a decided increase during the year. China, our second best customer, took less, but there was a marked improvement in the case of lapan a marked improvement in the case of japan lurker still buys from us, though there is a slight diminution as compared with '97 Shipments to the United States were about 28 per very cent less than during the previous year little has been done in the way of developing new markets.

Iron and Steel—The engineering strike, after lasting six months, came to an end in the early pair of '98, and the year has been one of steady prosperity with few drawbacks. Early in Nov '97 Stotch warrants were quoted at 45° 6d have remained pretty steady in the neighbourhood of that price until the end of that year and through Jan and Feb. '98. Through March and April the quotation was about 46° 6d', rising in the middle of May to 47°s. This last price, however, was not maintained, and during June and July the quotation was in the meighbourhood of 46°. In August a rise to 47°s again took place, and atthe end of September as high as a rate as 48° 6d had been reached. The quotation in the early part of November was 49°s of. The statistical position is a very lavourable one, stocks at the end of September being less than half as much as at the same date of '97, and there is no present prospect of material decline. Shipments of hardware and cutlery for the first ten months of '88 show a decline as compared with the previous year, this being particularly marked in the case of the United States, which took a little more than one-tenth as much as in '97. Germany and France were also poorer customers, and the

demand from all parts of South America fell off considerably Increased shipments to South Africa were very marked, and poorer orders were placed by India and Australia. The only notable increase occurred in the case of Russia. Pig-iron shipments have shown a decline of about 0 per cent., the total for the first ten months of the year being 889,672 tons as compared with 1,039,064 tons in the first ten months of or. Here again shipments to Russia have increased, but those to Germany, Holland and Belgium have fallen off considerably. In railway material there has been a drop of about 20 per cent. as compared with '97, shipments to Japan, Mexico, and ports of the East Indies and Australasia having notably declined. There was a slight improvement in the case of Russia, and in that of Sweden and Norway exports of hoops, sheets, etc., are also poorer, but galvanised sheets registered a slight advance In tin plates there was a slight decline, and it is notable that at the present time the United States, which used to be the main market for these goods, now takes less than 25 per cent. of our exports. As regards locomotives there has again been a marked increase, especially in the case of India and Australasia, which are our best customers In machinery and mill work there was a slight improvement as compared with '97, but the export of cycles fell oil very considerably, and is now little more than half as much as it was in '96.

Juste —Pinces of jute have been very steady during the past year. In the early part of Nov. 39 medium jute stood at £14, declining to £13 tos towards the end of the year. Early in Jan '98 a rise to £13 15; took place, at which rate pinces were steady until May, when £14 became the quotation, and this was maintained during the following five months. In the early part of November the pince stood at £12. The following are the figures of the shipments of jute from Calcutta for Europe during the past six years—

Year.	Bales
'92 -3	2,443,000
'93- 4	2,210,000
' 94 -5	2,017,000
'95- 6	2,990,000
'96-7	2,780,000
'97-8	3,550,000

There appears to be some prospect of a shortage of supplies, as the forecast for the season is only 4,500,000 bales as compared with 6,800,000 last year. The consumption in India is expected to be about 3,000,000 bales, and it approbable therefore that the amount available for Europe will be very small. Our exports of jute yearn showed a slight improvement in '98, being 41,246,700 lb as compared with 40,618,000 lb. during the first ten months of '97

Shipments to Germany have fallen off considerably after the great increase of last year, and there has been a great diminution as regards Spain, but in other directions increases have taken place. The export of piece goods has considerably declined, mainly owing to a great diminution in shipments to the United States. Those to South America and British North America show an improvement.

Linen and Flax.—The flax market has been quiet during the year, and prices have shown comparatively little deviation Exports of yains are about the same as in '97, but in linen piece goods there has been a considerable diminution, the figures for the first ten months of the year being only 14,354,000 yds., as compared with 15,001,700 yds. in the same period of 97 There has been a great falling off in shipments to the United States, but the Continental and Indian demand has been slightly larger.

Satt.—Exports this year have again shown improvement, for which a larges demand from India is in the main responsible. The trade is, however, very much smaller than it was ten years ago, before the Salt Union was founded, as will be seen from the following table:

First ten months.			Tons	
I mat tell months.	rust ten montus.			
'88 .			738,000	
'90			638,758	
'95			630,457	
'96			544,958	
'97			572,604	
'98			008,440	

Shipping and Shipbuilding .- Freights have been 10 during the year, but on the whole rather better during '97. Black Sea whole rather better during '97. Black Sea quotations have varied between 85 6d. and 123. 6d, the former piece being touched in March and the latter in May, In the middle of October the late was 125. The Bombay home-October the rate was 125 ward rate has been subject to considerable variations, but in no case has it fallen below 155, at times being over 205. The quotation in October was 185 of Grain 14 es from the United States were at their lowest point in August, when 25 6d was reached, mainly they have stood between 3s and 4s, and the quotation in the middle of October was 4s. 3d. As regards shipbuilding, the output during the present year has been very considerable, and the vessels under construction at the end of September were, as the following table will show, very much larger than at the same period of '97, though that in its turn had shown a considerable increase over '90 Shipbuilding in the United States is also very active, and it appears clear that before long there will be considerable competition for freights from that quarter. On the whole, therefore, there is no prospect at the present time of any material increase in freight rates

Vessels under	1	Sept. 20th, '96.	1	Sept. 30th, '97.	1	Sept. 30th, '98.

Steam Sail	313 42	633,232 26,409	420 35	8 ₇₇ ,38 ₇ 6,949	572 26	1,361,557 2,693		
Total	355	659,641	455	884,336	598	1,364,250		

Sugar.—Mainly in consequence of a sound statistical position, sugar prices have been much steadier in '98 than during the previous year, though they are still at a very low level. A conference was held at Brussels during the year for the purpose of negotiating for the abolition of the bounties. It came to nothing, however, owing to the opposition of France and the condition of the West Indian sugar industry. It is, therefore, very unsatisfactory, in spite of the grants in aid proposed by Mr Chamberlain The price of 88 per cent. beet in the early part of Nov. '97 was about 88 6d', and it lose steadily until the end of that year, standing at about 98.6d. on Jan 1st Fluctuations since then have been only a few pence either way, the quotation in the early part of November being 9.8 3d The most trustworthy estimates of the coming beetroot crop are as follows, the actual results for last year being given in the first column for compari-

son						
			1.	ast Year's	5	Economist

France				821,235	740,000	695,000
Russia				735,000	790,000	735,000
Other cor	ın	trı	es	540,658	510,000	475,000
				4,775,578	4,500,000	4, 375,000

Tea.—Tea has been fairly steady in price during the past twelve months. Both the quality and quantity of the Indian output for 1978 proved poorer than usual, and this accounts for a slight falling off in our imports from there during the first ten months of the year as compared with the same period of '97 We append a table which shows how very nearly Indian and Ceylon teas now monopolise the British market. It is satisfactory to find that efforts are being made successfully to cultivate trade with other parts of the world. Irade is being steadily developed with Australia, North Ame ica, Russia, and elsewhere, and the danger, therefore, of production being in excess of consumptive requirements seems to be lessented.

Timber.—We noted last year a very considerable increase in the imports of timber, owing to the activity of the building trades, and to the special demand for jubilec celebrations. In '96 builders have been less busy than they were in '97, with the result that the demand has considerably fallen off, especially for hewn

tumber, of which 1,994,271 loads were imported, as compared with 2,4c6,942 loads during the same period of '97; while as regards sawn tumber the figures were 5,6r8,920 loads as compared with 6,182,606 loads. The imports of mahogany were about on the same level in '98 as in the preceding year, which had shown a great increase on its predecessors. The following are the London stocks of plain timb.r at the eng of September in each year:—

at the ch	K or seb	CIM	oci ili caci
Year.	,		Pieces.
'9 4			12,622,000
'95			12,270,000
'96			14,949,000
'97			17,565,000
'98			20, 215,000

The demand for West Australia, Jarrah and Karii wood for street paving purposes continues to grow steadily, and by the operations of limited companies and otherwise the import of this class of timber is increasing, and is likely to increase much more rapidly within the next few years.

Wool .- The sixth and last series of London Colonial wool sales in '97 opened on Nov. 25th, Closing on Dec 17th Values showed a slight decline as compared with the previous series, amounting to about 5 per cent., mainly owing to the fact that home buyers, were less in evidence than usual, owing to the lessened American demands for piece goods and to the engineering strike. The first series of '98 opened on Jan. 18th and closed on Feb. 2nd. The available total for disposal was only small, and the tendency of the sales on the whole were favourable—an advance of fully to per cent upon Australian merino wools having been obtained in the early portion of the auctions. This rise in price was due to no improvement in the manufacturing position, but to a scarcity of supply. The second series took place in March, when supplies were again short, and a further advance of 5 per cent, in merinos and finer wools generally took place. At this sale South African sorts attracted more attention than usual. The third series opened on the May 31d, and was characterised by a somewhat weak tone, quotations showing a decline of about 5 per cent as compared with the previous series. Most buying was done in the home trade section, Continental operators showing a good deal of reserve. The fourth series opened on 28th June, and was marked by a considerable animation, there being an average advance of 5 per cent on the May rates, while British merinos rose as much as 72 per cent The fifth series began on Sept 20th, closing on Oct 7th. In the interval since the p evious sales there had been a general expectation of an advance in price owing to the statistical position, and this was realised in so far that a rise of about 5 per cent for good class wools took place at the opening. As the sale progressed, however, it was found that Continental buyers were operating separately, and that the competition from the home section tell off, while Americans were hardly in evidence at all, so that before the close prices had receded to the level of July rates. Practically the position throughout the year has been that short supplies have been concurrent with a limited consumptive demand, and that prices have fluctuated up or down as opinion has been impressed by the lack of

^{*} Ten months only.

the former or of the latter. We append our usual table showing the imports of wool into the United Kingdom during a series of years.

Woollens and Worsteds. - Exports during '98 have not on the whole been of a satisfactory character. Woollen yarn shows a slight diminution, and worsted yarn a slight improvement during the first ten months, but the variations as regards individual countries are not every important. In woollen piece goods not every important. In woolien piece goods there was a marked decline, the total for the ten months being 39,361,500 yds as compared with 45,152,100 yds, in the same period of '97 That in its turn was greatly inferior to '90 A great decline took place in exports to the United States, which took only about one-sixth as much as in the previous year An improve-ment was shown in the case of British North America owing to the Canadian tariff and in that of South Africa, but shipments to Australia were on a smaller scale. In worsted piece goods the decline during '98 was even more marked than in the case of woollen goods, the total for the ten months being 80,726,600 \ds as compared with 115,017,400 yds and 117,291,200 vds in the same periods of '07 and '96 respectively. Here again the shipments to the United States were only about one fourth of what they were in '97, and though this was to a certain extent compensated for by an improvement of about 50 per cent, in the deliveres to Britth India, the trade with most countries was barely main-tained of showed a decrease. Carpets were exported in rather larger quantities than in '97, but there was a great falling off in the shipments of blankets, which were very little more than half as much as in the corresponding period of '96 On the whole this brain hot trade, always liable to considerable fluctuations, is going through one of its adverse periods, and its future is in many respects very uncertain.

TRADE, BOARD OF.

The work of this Department is done by a President (Mr Ritchie, M P), a Parliamentary Secretary (the Earl of Dudley), a Permanent Secretary (Sir Courtenay Boyle, K.C.B.), four assistant secretaries, in connection with as many departments relating to mercantile marine, finance, railways, fisheries and harbours, a Comptroller-General for commerce, labour, and statistics, and a large staff of inspectors, surveyors, clerks, etc. Two separate Councils, for Trade and Foreign Plantations, were first established in 1660, and were consolidated into one Department in 1672, but this lasted for three years only. It was, however, revived in 1695. The present Department

owes its origin to an Order in Council of 1786; but its work has enormously increased since then, and every year sees some new administrative burdens thrown upon its shoulders. Two important additions were made in 183 and 188. The control of the Patent Office was transferred to it under an Act passed in the former year for granting patents, registering designs and trade marks; it was placed under the immediate control of an officer (the Comptiollei-General), who acts under the superintendence and direction of the Board, and was opened for business on Jan. 181, 184. The other new branch of departmental work which was added by the legislation of 83 was in regard to Bankruptoy. The powers of the Board under both these Acts have been explained and summarised under other headings in previous editions of this work. See separate article on Bankruptoy. By the Patents, Designs and Trade Marks Act, 188 (51 & 52 Vict., ch. 50), it was enacted that after July 181, 180, a person should not be entitled to describe himself as a patent agent unless registered under the Act by the Board of Itade, who were to make rules required for giving effect to this provision; but every person who proved to the satisfaction of the Board that prior to the passing of the Act he had been bona fide piactising as a patent agent was to be entitled to be registered in pursuance of the Act. Any person knowingly describing himself as a patent agent in contravention of the section, was to be liable on summary conviction to a fine not exceeding \$20\$ "Patent agent" is defined to mean exclusively an agent for obtaining patents in the United Kingdom. A number of #mendrients of great importance to those interested were made in the Act of the soliton to the situation to the situation of great importance to those interested were made in the Act of the section to those interested were made in the Act of the section to those interested were made in the Act of the section to those interested were made in the Act of the section to those interested were made in

fecs were made in '92 See Parints At the commencement of each session the At the commencement of each session the Department reports to Parliament upon all railway, oanal, tramway, subway, gas and water bills which have been deposited by promoters, and upon applications made to it for provisional orders for tramways, electric lighting. When the construction of a railway has been sanctioned by Parliament, the line cannot be opened until an inspector of the Board has certified as to its fitness. Railway bye-laws must be approved by the Board, and its inspectors inquire into and report upon all important railway accidents. It may order a railway company to make certain provisions for the public safety, including the adoption of the block system on all or any of their railways open for the public conveyance of passengers. Under the Railway and Canal Iraffic Act, '88, the two new Railway and Canal Commissioners were to be appointed by Her Majesty on the recommendations of the President of the Board of Irade. The same measure enacted that every railway company should submit to the Board a revised classification of merchandise traffic, and a revised schedule of maximum rates and charges applicable thereto; that the Board should consider the same and any objections which might be urged thereunto, and endeavour to arrange differences between the company and objectors; and that if after hearing all the parties the Board were unable to come to an agreement with the company, the Board might determine the classification which in their opinion ought to be adopted, and the schedule

'83 Changes in the amount of patent renewal

which in their opinion would be just and reasonable, and report upon the same to Parliament; such classification and schedule to be subsequently embodied in a provisional order confirmation bill, upon which the railway company might be heard. It was under this Act that the Board made the provisional orders which formed the subject of prolonged inquiries before a joint committee of the two Houses, presided over by the Duke of Richmond, and which orders, being amended by the committee and subsequently by the House of Commons, settled the rates and charges of the principal railway and canal companies. Under section 31 of the Act the Board of Trade was empowered to endeavour to settle amicably disputes as to railway rates, and further powers in this connection were bestowed upon the Board in the session of '94 with regard to rates increased since Dec '92 New powers with respect to the construction of Light Railways in Great Britain were conferred upon the Board by statute in '96.

Tramways, upo. construction, are subject to its inspection, and the use of electric, steam, or any mechanical power upon them is subject to its onspent or supervision.

The rights of the Crown to foreshores are vested in it, and it has statutory powers as to pilotage, lighthouses and their maintenance, the inspection of salmon and fresh-water fisheries in England and Wales, and under the Sea Fisheries Acts in regard to oyster, mussel, crab, lobster, and other fisheries It musser, crab, noister, and other issolites may, on the application of a county or borough council, create a sea-fisheries district and local fisheries committee, whose byelaws are subject to its confirmation. The Board of Trade also administers important Acts for the enforcement of international regulations con-trolling the fisheries pursued in common by British and foreign fishering in the seas surrounding the British Isles. It is the guardian of the coasts, tidal waters, navigable rivers, harbour works, and tidal lands, when any works affecting any of them are projected by local authorities or railway or other companies. The harbours of Holyhead and Ramsgate are directly under it, and the President is a commissioner of the Mersey Conservancy. The Board supervises all matters relating to the mercantile marine (q v). Its officers may board vessels, inspect documents, muster crews, inquire into the cause of any accident or damage to vessels, see whether ships are in good condition, and take action for their detention if they be overladen or unseaworthy It manages the Mercantile Marine Fund, which is derived from various sources, including light dues; and is applied to the maintenance of lighthouses and beacons, the expenses con-nected with local marine boards and officers, engagement of seamen, etc. The subordinate department of the General Register and Record Office of Shipping and Seamen, London, is under the Board, and exists mainly for the purposes of the Merchant Shipping Acts in their relation to the title of ships and to the registration of seamen; also for the purposes of the Naval Reserve Act. It has the custody of records and returns relating to ships and seamen, and the registration and tabulation of particulars abstracted from these records and returns; and it is the duty of the Department to see that those documents which they receive give the which is to be particulars which they ought to give, and to in open court.

call for explanations of any apparent breach of Acts of Parliament or instructions of the Board which an examination of them may disclose. The Registrar issues certificates to masters, mates, and others who have complied with the required conditions as to service and the necessary technical knowledge. The Maval Reserve is, as regards enrolment and the fulfilment of conditions as to service, under the Registrar.

The Standard Department was transferred to the Board from the Exchequer in '66, and in '77 the Permanent Secretary of the Board was appointed warden of the standards, with-out salary. It has the custody of the primary standards of length and weight, and its principal duty is the verification of local standards. The Board is empowered to cause such new denominations of standards for the measurement of electricity, temperature, pressure, or gravities, as appear to it to be required for use for trade to be duly made and verified. It may order a local inquiry with respect to the administration of the law relating to weights and measures within the jurisdiction of any local authority, and it may examine and grant certificates, to inspectors of weights and measures Under the Companies Act, '62, the Board may in certain cases, on the requisition of a sufficient proportion of shareholders, appoint an inspector to examine into the affairs of a company. Certain applications for charters of incorporation are referred to the Board by the Privy Council It verifies the apparatus used under the Petroleum Act to test the flashing point of inflammable mineral oils. Under the Metropolitan Gas Acts, the Board of Irade appoint the gas referees, chief gas examiner, and official auditor for the Metropolis, and the accounts of the companies are presented to Parliament The Board has its own legal branch. When commercial treaties are in course of negotiation, it is generally consulted by the Foreign Office. It publishes monthly returns regarding trade and naviga-tion, in addition to a mass of statistical information as to the commerce, shipping railways, fisheries, taxation, population, and progress of the United Kingdom, the colonies, and many foreign countries Its Labour Department collects and disseminates information as to the state of the labour market at home and abroad The Board of Trade also publishes the Board of Trade Journal, containing much that is interesting to commercial men, and a labour gazette. By the Conciliation Act, '96, the Board is empowered to take certain action. either on application from one of the parties or otherwise, to promote the settlement of labour disputes—It also registers (onciliation Boards, By, an Act of the session of or the Board may undertake a prosecution under the Merchandise Marks Act of '87 in cases appearing to affect the general interests of the country, or of a section of the community, or of a trade; though this power has since, in cases which appear to ielate to agricultural or horticultural produce, been vested in the Board of Agriculture. Notice of accidents taking place in certain specified employments is, under an Act of '04, to be given to the Board of Trade, and the Board may by order schedule other employments, and may, in cases which appear to them to be of sufficient importance to require it, direct a formal investigation to be held. which is to be conducted by competent persons

TRADE UNIONS.

TRADE UNIONS.

The growth of Trade Unionism in recent years can be to some extent measured by the membership represented at the annual gathering of Unionists known as the Trade Union Congress. At the first congress, in '68, 118,367 were represented; in '78, 623,957; in '88, 674,634; in '90, 1,470,195; in '92, 1,219,934, in '94, 1,080,545, in '96, 1,076,000; and in '93, 1,176,896. From '68 to '94 the number of members represented included the members of Irades Councils, but since then the real representation of fully-paid-up members of Trade Unions has been insisted upon. Accurate statistical data of all the unions of the United Kingdom are not, however, even now obtainable. The figures given below, which have been revised and corrected to date as far as possible, relate only to the principal Irade Unions throughout the kingdom; and it must not be forgotten that there is a very large number of smaller Unions with less than five hundred members. Consult Reports of Trades Union Congresses, published by the Trades Union Parliamentary Committee

TRADE MARKS.

By the Trade Marks Registration Acts, '75, '76 and '77, the trade mark, and even certain trade names, might be registered, and for the first time, and upon such registration, the right to the mark or name became the property of the inventor. All the last-mentioned statutes have been repealed; but their provisions are re-enacted with amendments in the Patents, Designs and Trade Marks Acts, '83 By sect.' 76 of this statute, it is provided that the registration of a person as proprietor of a trade mark shall be prima facte cyldence of his right to the exclusive use of this symbol, and shall, at the end of five years from the date of the registration, be conclusive evidence of his title to the sole use of the mark. This mark, however, is only to be registered for particular goods or classes of goods, and is assignable and transferable only in relation to the goodwill of the business concerned with these goods, and ends with that goodwill. A register of trade marks 7 established, and by an amending Act, '88, a corresponding register has been established in Sheffield for Sheffield ware. By this same Act it is provided that for a trade mark to be registered thereunder, it must consist of, or contain certain essential particulars, which are mentioned in detail in this statute. The proprietor of a trade mark or trade name duly registered may now without proof of fraud obtain an injunction and damages for the unauthorised use of his trade mark or trade name, but the registration of such a mark when it has but the legistation of standard a man been registated without sufficient cause may be ordered to be expunged on the application of any person aggrieved thereby. I rade marks remain in force the same time as patents—viz 14 years; but the former may be renewed, as a matter of course, at the end of every 14 years on the payment of certain fees. By the Merchandise Marks Act, '87, it is provided that the forging of any registered trade mark or its false application to goods like those in regard to which the mark has been registered, as well as several other incidental acts of a similar false and fraudulent character, are punishable as criminal offences, unless it was shown that there was no intention to defraud Every article or thing by means of, or in connection with which, the offence has been committed is to be forfeited to the Crown, and these may be ordered to be destroyed or otherwise disposed of as the Court thinks fit By the Merchandise Marks Act, or, the customs entry respecting inspected goods is for the purposes of the Merchandise Marks Act, 87, to be deemed to be a trade description applied to the goods. Again, the Board of Trade is empowered to prosecute offenders under this statute in cases affecting the general interests of the country or of a section of the com-munity or of a trade. By the **Merchandise Marks** (Prosecutions), Act 94, the Board of Agriculture is empowered to prosecute offences under the '89 Act, relating to agricultural and horticultural produce. Much important evidence was recently taken by a Select Committee of the House of Commons on Merchandise Marks This testimony, and the report of the Committee on such, was published in October 'o7. According to this report, the instantant Marks Act of '87 has stopped to a great extent the fraudulent practices against which it was directed. Although the competition of im-According to this report, the Merchandise

properly marked foreign goods is sometimes injurious, "the balance of the evidence is in favour of retaining the greater portion of the Act." Many of the objections brought against thave been from persons engaged in the transit business, who allege that their trade is injured by the opening of packages, and the examination of their contents sometimes results on their permanent damage, and that such goods are there'y diverted to routes which do not pass through the United Kingdom The Committee state that it would be misleading to attribute such a result entirely to the operation of the last-named statute, and add that the examination refeired to "is ineffectual to prevent the fiaudulent use of British trade marks in goods passing from foreign ports to other countries or to British colonies, masmuch as besides, those cairied direct in foreign vessels, it has become a regular practice for both British and foreign steamships to take a part of their cargo abroad, and to complete their loading in a British poit. The cargo loaded abroad thereby escapes examination here." The Committee recommend that goods in transit shall be exempted from the operation of the Act, but they consider it to be a most necessary condition that the Board of Customs should bring to the notice of the authorities in India or the Colonies that certain goods on board had been transhipped or loaded abroad, so that on arrival they might be challenged In '96 olders were given to detain foreign goods only when they bore marks raising a direct claim to British origin, or bearing a name or trade mark of some one known firm having its principal place of business in the United Kingdom without "qualification." These orders have given great relief. The Committee think that the practice of the Customs should require the excision of offending marks rather than that of adding a "qualifying nather than that of adding a "qualifying mark, which in many cases is a gratuitous, unnecessary, and undesirable advertisement of our foreign competitors. A great business has sprung up whereby atticles of general consumption are collected by commercial firms, who mark them with their own names whether they have been manufactured in this country or elsewhere But such marking or imported goods is held to be a violation of the Act. These firms state that their names are accepted as a guarantee of quality, and that the requirement of the name of the country of origin tends to deprive them of their business in respect of articles manufactured abroad, and this country generally of a profitable trade. The Committee are of opinion that it should not be unlawful for these traders to stamp goods, wherever purchased, with their own names and business addresses, provided that some such words as "sold by" be added. Much testimony has also been received of the advertisement of the merchandise and products of foreign countries on account of the present requirement of the specification of the particular country of origin, and of the disadvantage caused to British merchants and dealers by the consequent disclosure of trade secrets, and the loss and discouragement of British business enterprise The Committee think that this grievance would be substantially got rid of by substituting for the specification of the country of origin the words "made abroad." Foreign goods are exported direct to other countries than the United Kingdom bearing British trade

THE TRANSVAAL AND ITS NEIGHBOURS.

marks or indications of British origin. The Committee recommend that foreign Governments should be induced to legislate on the lines of the Merchandise Marks Act, and in the spirit of the Industrial Property Convention. Important statements are annually published from the Comptroller-General of patents, designs and trade marks concerning these symbols. According to the Report of this officer respecting them for '97, the total number of applications for the registration of trade marks during that year (including 188 applications to the Culters' Company of Sheffield) was 10,624, as compared with 9466 in the previous year 111 '97, 3695 trade marks were advertised and 3358 were registered. The number of hearings which took place during the year was 2124, 120 notices of opposition to the registration of trade marks were lodged, and 46 cases of opposition were heard. In six of these there were appeals to the Board of Trade, all of which were referred by the Board to the court, and remain undecided During the same year 58 appeals were made to the Board from decisions of the Comptroller. Of these 19 were heard by the Board of Trade, all of which were referred by the Board to the court, and one has not yet been dealt with. Of the 19 appeals heard by the Board, 3 were allowed, 11 were dismissed, and 3 were not decided. Of the 38 appeals referred by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the court, 9 were abandoned by the Board to the total Government receipts from various sources amounted to £10,397 55. 7d, including £2365 on account of renewed fees See LAw, 98

Transcaspia. A province in Central Asia, maiked out by Russia as a Russian province, and including the Furkoman region between the Caspian and the Oxus. Area, 214,237 sq.m., pop. 360,000 The administrative centre is Askabad. The Franscaspian Railway (see Enginlering) traverses the country, connecting Samarcand with the Caspian. See Turkestan.

TRANSVAAL

The Transvaal is officially known as the South African Republic It lies N of the Vaal river and S. of the Limpopo river. It is bounded W. by Bechuanaland; E. by Portuguese East Africa and Zululand; S. by Natal and Orange Free State. Swaziland, on the south-east, is a protectorate of the Republic A map clearly showing its position is given opposite. Area, 110,139 sq. m.; pop. about \$50,000, of whom some 250,000 only are whites The relations of the Republic to Great Britain are regulated by the Convention of London, 84, by which it was laid down that, although independent with regard to its internal administration, the State should conclude no treaty or engagement with any state or nation, except the Orange Free State, nor with any native tribe lying to the east or west, without the approval of H.M. the Queen. The Transvaal is ruled by a President (Mr. Kruger) elected for five years, with a Council of five members Legislation is effected by a Parliament of two Chambers, each of 27 members, called the First and Second Volksraad. Bills passed by the Second Chamber must be approved by the First before becoming law. The members of the First are elected for four years from and by first-class

burghers—i.e., all male whites resident in the Iransvaal before '76, or who fought in the war of independence in '81, or various campaigns since, including the Raid, and their children from the age of sixteen. The members of the Second Volksraad are elected for 4 years by and from the first and second class burghers -1 c, the naturalised alien males and their children from the age of sixteen Naturalisation can be obtained after two years' residence. Second class burghers can become first class by resolution of the first Volksraad twelve years after naturalisation. The country is divided into twenty districts. The capital is Pretoria. In '97 the average number of children attending Government schools of all kinds was 11,436. In '86 gold was discovered on the Witwatersrand range of hills, and these are now, after a first rush and the collapse that inevitably followed, proving of immense value. (See GOLD FIELDS AND PRODUCTION) The centre of the gold tion of over 100,000, including over 50,000 whites, most of whom are debarred from the franchise, although the revenue of the State is almost entirely derived from them. The political discontent amongst the Uitlanders reached a crisis in Dec. '96 The National Union of Johannesburg issued a manifesto setting forth the Uitlanders' grievances, and claiming an equitable franchise and fair representation for all residents in the Fransvaal, with other administrative reforms lt was pointed out that, though the Uitlanders constituted the majority of the state, owning more than half the land and at least nine-tenths of the property, yet in all matters affecting their lives, liberties and properties they had absolutely no voice. The Administration was charged with the grossest extravagance, bribery and corruption, and with an intense hostility to the English. The leaders of the Union were prepared to fight for their rights, and, as it appeared that the Boers were about to attack the town, the central committee of the National Union constituted themselves a provisional government pledged to reform, and men were enlisted in large numbers, while an appeal for interven-tion was also sent to the Imperial Commissioner At this juncture came Dr. Jameson's raid from British Bechuanaland, and his subsequent defeat, followed by the disarmament of Johannesburg The members of the National Reform Committee were arrested, but afterwards released on the payment of heavy fines. wards i cleased on the payment of heavy fines. A claim was made in respect of the Raid for material damage £677,938 is. 3d; and for moral or intellectual damage £1,000,000, which the British Government were asked to pay or to cause to be paid (Feb. 17th, '97). Estimated revenue, '96, £4,462,193; expenditure. £3,582,606; exports of wool, cattle, hides, grain, ostrich feathers, ivory, butter, gold, etc. imports, '95, £4,9816,304 See Diplomatic and Swaziland. History. '88,—Chief Justice Kotze sent a letter to the President (Feb. 5th), complaining that nothing had been done to carry out the compromise arrived at in the previous March. The Grondwet had not been amended, and the The Grondwet had not been amended, and the guarantee for the independence of the Judiciary had been infiringed by the passing of Law No. 1, '97. He therefore regarded the compro-mise as at an end. The result of the Presiden-

tial election was declared (oth), showing 12,858 votes for Kruger, 3753 for Schalk Burger, and 2001 for General Joubert. Chief Justice Kotze

was discharged from his office by the President (16th), and replaced by State-Attorney Grego-(10th), and replaced by State-Attolney Grego-rowski. He at once protested against his dismissal as being illegal, and a breach of the Convention. Judge Ameshoff, as a protest against the dismissal of the Chief Justice, resigned his position (March 8th). The Government published (**May** 24th) the text of the reply which it had made to a despatch from Mr. Chamberlain in the previous October. The reply declared that the Government could not acknowledge the existence of British suzerainty since the '84 Convention, by the stipulations of which, however, it was prepared to abide. It pointed out that in the process of settling the form of the Convention all references to suzerainty were deleted by Lord Derby It was urged, moreover, that any questions as to the infringement of the Convention should be left to arbitration. Hostilities broke out in October between the Transvaal forces and the Kaffir chief Mpefu, who had about 20,000 men under his control, in the mountainous country in the north-west part of the Republic The cause of the quarrel was the refusal of Mpefu to pay taxes to the Government, or even to acknowledge their claims to sovereignty over him. Aftersome preliminary encounters, the burghers made a combined attack on Magato's Mountain (Nov. 16th), and captured it after heavy fighting

Treasury. The Lord High Treasure, who, when existing, is the third great officer of Btate, had of old the appointment of all officers employed in collecting the revenues of the Crown, the nomination of all escheaters, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Board; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management collector. the management, collection, and expenditure of the public revenue (see FINANCE), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters of revenue are referred to it, and it settles all questions regarding the amount of compensaduestions regarding the amount of component tions, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of civil service votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppres-sion of the slave trade, subsidies to telegraph companies, and for temporary commissions.

Since the days of George I, the powers and duties of the office of L. H. T. have been nuvariably executed by commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gift, and he is an ex-officeo trustee of the National Gallery and British Museum. For nearly eight, years prior to 1885 the office of First Lord was invariably held by

the Prime Minister (q,v) of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government whip (see The commissioners forming the COMMONS) Treasury Board seldom if ever meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its effective head, aided in matters of detail by the Financial Secretary, and the Permanent Secretary. The Charcellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his budget, appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the National Debt, and the best methods of reducing it, and the advances made by the National Debt Commissioners for local loans are all matters within his special cognisance (see FINANCE). He is master of the Mint, and he presides at the nomination of sheriffs. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In connection with the Treasury there is a Parlia-mentary counsel who drafts Government Bills. and a solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when Her Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also Queen's Proctor for Divorce Interventions and Director of Public Prosecutions.

Trevelyan Right Hon Sir G. O., Bart.

Trinidad. An island of rectangular shape, with an area of about 1754 sq. m, pop. 248,404, separated from the mainland of Venezuela by the Gulf of Paria. In '89 the island of Tobago was separated from the Windward Islands and joined with Trinidad. The capital is Port-of-Spain, in the north-eastern corner of the island, which possesses the best harbour in the West Indies The products are sugar, cacao, asphalte, cocoanuts, and fibre. The asphalte output, which is the product of the Pitch Lake, the property of the Crown, is about 100,000 tons per annum, on which the payment to the Government is about £30,000. The Government consists of a Governor, an Executive Council of 7 members, and a Legislature composed of the Governor, 9 official and 11 unofficial members, all appointed by the Crown. See BRITISH EMPIRE (table), DIPLOMATIC, and WEST INDIA SUGAR COMMISSION

Tripoli. A Furkish province in Africa on the Mediterranean coast, bounded on the west by-Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated area, with Bengazi, is about 400,000 sq. miles, and the population about 1,300,000. Tripoli is the chief town, with a population of 30,000. The trade of the province practically all passes through Tripoli and

Truck Act, '96. This Act (59 & 60 Vict., ch. 44) received the royal assent Aug. 14th, '06, and came into operation Jan. 1st, '97. Sect. 1 enacts that an employer shall not make any contract with any workman for any deduction from the sum contracted to be paid by the employer to the workman, or for any payment to the employer by the workman,

or or in respect of any fine, unless the terms of the contract are contained in a notice kept constantly affixed where it can be easily seen, . read, and copied; or the contract is in writing signed by the workman; and tile contract specifies the acts or omissions in respect of which the fine may be imposed, and the amount of the fine or the particulars from which that amount may be ascertained; and the fine imposed is in respect of some act or omission which causes, or is likely to cause, damage or loss to the employer, or interruption or hindrance to his business; and the amount of the fine is fair and reasonable, having regard to all the circumstances of the case. His employer is not to make any such deduction or receive any such payment unless written particulars showing the acts or omissions and the amount of the fine are supplied to the workmen when a deduc-tion or payment is made. This section of the Act applies to the case of a shop assistant in like manner as it applies to the case of a workman. Sect. 2 enacts that an employer shall not make any contract for any deduction, or payment to him, in respect of bad or negligent work, or injury to the materials or other property of the employer, unless the terms of the contract are exhibited as in the previous section, or the contract is in writing signed by the workman; and the deduction or payment does not exceed the actual or estimated damage or loss occasioned by the act or omission of the workman, or of some persons over whom he has control, or for whom he has by the contract agreed to be responsible, and the amount of the deduction is fair and reasonable, having regard to all the circumstances of the case The deduction or payment is not to be made or received unless written particulars are supplied as in the previous section Sect. 3 makes similar provisions in respect of the use of supply of materials, tools, or machines, standing toom, light, heat, or in respect of any other thing to be done or provided in relation to the work or labour of the workman. Any workman or shop assistant may recover any um deducted or paid to his employer contrary to the Act, provided that the proceedings are commenced within six months from the date of the deduction or payment, and that where he has consented to or acquiesced in the payment or deduction he shall only recover the excess which has been deducted or paid over the amount, if any, which the court may find to be fair and reasonable having legald to all the circumstances of the case. A register of deductions or payments made under sect. 1 of the Act is to be kept, and is to be open to inspection by one of her Majesty's inspectors of factories or of mines tracts under the Act are not liable to Stamp Duty. The Secretary of State, it satisfied that the provisions of the Act are unnecessary for the protection of the workmen employed in any trade or business, may, by order under sect. 9 of the Act, exempt them from provisions of the Act; but every such order is to be laid before Parliament, and may, within forty days thereafter, be annulled by resolution of either House. The duties of inspectors to enforce the provisions of the fermer Truck Acts are by sect. To of this Act extended to the case of a laundry, and to places where work is given out by the occupier of a factory or workshop, or by a contractor or sub-contractor.

Tuberculosis. See Report of Royal Com-mission given in MEDICAL SUMMARY, '98. Tunis. One of the Barbary States of Northern

Africa, lying east of Algeria, and bounded on the north and east by the Mediterranean, and on the south by the Sahara. Area, 51,000 sq. on the south by the Sahara. Area, 51,000 sq. miles; pop. 1,002,000, including 102,000 Europeans and 1,800,000 natives. Capital, Tunis, pop. 133,000. Bedouin Arabs and Kabyles form the majority of the population, the French numbering at the outside 27,000. The French roops invaded the country in '81, and established a protectorate '82. There is a French Resident, who practically carries on the administration, and the military maintained in ministration, and the military maintained in the country number 10,000 men An agreement was concluded in Sept. 97 between Great Britain and France, whereby the British Government renounced for its consuls, its subjects, and its establishments in Tunis other rights and privileges than those secured for it in France. The most-favoured-nation treatment and the reciprocal enjoyment of the lowest customs tariff were mutually guaranteed for a period of years. I was provided, however, that cotton goods, the produce of the United Kingdom and of British colonies and possessions, should not be subject to import duties higher than 5 per cent ad valoring from Dec 11st, 197, until Dec. 31st, 1912, and after that date until the expiration of six months from the day on which one of the contracting parties shall have notified to the other its intention of terminating its operation. other its internal of terminating its operation. Other products are wheat, barley and olive oil. Revenue, 97, £902,450; expenditure, £962,42c; public de t, £5,702,000; imports, 96, £1,857,620; exports, £1,901,030. See Colonies, £1C., of EUROPEAN POWERS, and DIPLOMATIC.

Turkestan. From Central Asia, or what was formerly known as Independent fartary, Russia has formed two provinces-Turkestan and Transcaspia (q.v.). The former comprises the khanates and deserts annexed by Generals Tchernaieff and Kaufmann between '60 and '75. Area about and Kalinian between 50 and 75.
400,500 sq. miles, with 3,800,000 inhabitants.
The principal town is Tashkent, pop. 100,000;
Bokhara and Khiva are under the control of
a governor-general. The old military road from
Orenburg to Tashkent is now abandoned, reinforcements and stores being sent to Turkestan from the Caspian to Samarcand by railway.

—Turkestan, Afghan. Is an Afghan province
north of the Hindoo Koosh, consisting of
70,000 5q m., and a population, mostly nonAfghan (Uzbeg), of nearly 1,000,000. Principal
town, Mazari-Shentf, pop. 25,000, near the
ruins of ancient Balkh.—Turkestan, Eastern. China's westernmost province, formerly known also as Kashgaria, a state established by the rebel Mussulmans under Yakoob Beg, the Atalik Ghazi. Includes the towns of Yarkand, Kashgar, and Khoten.

TURKEY.

An empire possessing extensive territories in Europe, Asia, and Africa, governed by Sultan Abdul Hamid II. The Asian possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia, Syria, and Yemen and the Hedjaz in Arabia. In Africa Tripoli and Bengazi belong to Turkey. The commands of the Sultan are absolute, unless opposed to the express direction of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the Grand Vizier and the Sheik-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians. The Grand Vizier is assisted by the Medjliss-i-Hass or Cabinet of Ministers, and for administrative purposes the empire is divided into 31 vilayets or governments, subdivided further into provinces, districts and communities. Nominally subject to Turkey are Bulgaria, Bosnia-Herzegovina, Samos, and Egypt. It was also agreed, in '96, that Crete should be given autonomy, and by '88 the Turkish troops and Governor had been cleared out of the island. There are, it is estimated, about 16,000,000 Mahomedans and \$,000,000 Christians within the empire, besides those of other faiths. Agriculture is largely carried on, but in very primitive fashion. Iobacco, cereals, cotton, coffee, wine, silk and fruits are the chief productions. There are about 2500 miles of railway open. The argo. of Turkey, without the states nominally subject to it, is estimated at about 1,147,578 sq. m.; and the total population at about 2,3187,659. Revenue, £16,828,475; expenditure, £16,754,019. Consolidated public debt, 98, £92,007,610 Imports, '94, £21,800,410; exports, £12,403,452 See All-Annia, Ammenia, Crette, Diplomatic, Foreign Armies,

FORTION NAVIES, FRIPOIL etc.

History, 'DM.— The treaty of peace with
Greece was signed (Dec. 4th). Arrangements
having been made by Greece, with the help of Great Britain, France and Russia, for the issue of a loan to cover the was indemnity, a Collective Note was presented to the Porte (May 6th), notifying that the etacuation of Thessaly should begin Fhe last bodies of Turkish troops left Larissa (June 6th), and the province of Thessaly was then handed over to the Greek authorities Serious disturbances broke out in the Berane district, near the Montenegrin frontier, during June, owing apparently to blood feuds between Christian and Mahoriedan Albanians It was said that 40 villages had been burned to ashes, and the Christians fled over the frontier and took refuge in Montenegrin territory. A rebellion was also going on at this time in Yemen. The French and Italian Governments laid claim to in Montenegrin territory 1,000,000 ft of the Greek war indemnity loan as satisfaction for the losses sustained by their subjects in the massacres at Constantinople (July 14th). They had endeavoured in vain to get satisfaction from the Porte, and so took this method of putting an embargo on the last instalment of the loan to the amount named. The British Ambassador also put in a claim for £33,000, representing losses sustained by British subjects. The Porte, in reply, absolutely repudiated all responsibility, and protested against the action of France and Italy

Following on the serious events which occurred in Crete (see Crete, Bistory, '98) the four Powers—Great Britain, Russia, France, and Italy—presented a Collective Note to the Sultan demanding the withdrawal of the Turkish troops within a month (Oct. 5th). The Sultan replied (10th) that the troops should be withdrawn, except from three fortified places, which would be held with garrisons sufficient to protect the Mahomedans. The Powers refused to recognise these conditions, and ultimately the Sultan agreed unconditionally to withdraw the troops (15th). The Emperor and Empress of Germany arrived in the Dardanelles (17th) en route for the Holy Land, and were received by the Sultan in person, and for some days entertained with great state (18th). They afterwards went on to Haifa, Jaffa, and Jerusalem, where the new Evangelical Church of the Redeemer was solemnly dedicated. The announcement was also made that the Emperor when in Constantinople had acquired the property known as "Le dormitoire de la Sainte Vierge," and this he presented to the German Catholic Society of the Holy Land. Berrut and Damascus were then visited, and the Imperial quadron sailed from Berrut (Nov. 12th). The Servian representative at Constantinople made urgent representations to the Porte during the month as to the outrages on Christians committed by Albanians in the Kossovo district.

Turkey, Sultan of. See ABDUL HAMID II.

Turner, Right Hon. Sir George, K.C.M.G., Premier of Victoria, is a Melbourne solicitor. He has only been in active political life since 1889, when he was elected to represent St. Kilda in the Legislative Assembly, and still represents that constituency. He took office as Commissioner of Customs and Minister of Health in '01, and held those portfolios in the Munro Ministry and that of Mr. Shiels. In '92 he became also Solicitor-General. He was chosen as the leader of the Opposition in '94, and it was on his motion that the Patterson Ministry was overthrown. At the general election of '94 his supporters secured a majority, and he was placed in power as Premier. His forte is organisation. He was one of the guests of the Imperial Government in London on the occasion of the lubilee festivities in '97, and was then made a Privy Councillor.

Typewriting. Most of the leading companies provide instruction in the use of their machines, with tuition in shorthand; and typewriter examinations to test efficiency are conducted by the Society of Arts, the National Union of Typists, and other bodies. The National Union of Typists (registered), 29, Old Queen Street, Westminster, S.W., has been established to promote the professional interests of typists. Secretary, Mr. F. D Pepper.

U

Uganda Protectorate, The, includes not only Uganda proper, but Unyoro, Usoga, and other countries westwards up to the boundary of the Congo Free State. Uganda itself is a large tract of country situated to the west and north-west of Lake Victoria Nyanza. Its area is about 90,000 sq. miles. An active missionary propaganda has been carried on in the country of late years, with the result that the people are divided into two parties, the Protestants and the Catholics, who each claim about 3000 and the Catholics, who each claim about 3000 baptised adherents. There are also, of course, the heathen and the Mahomedan sections of the population. The population is estimated at from 300,000 to 500,000. The capital of the country is Mengo. A military force under British officers holds the country, the Government having taken over the administration from the Imperial British East Africa Company whose and made the country a protectorate. in '94, and made the country a protectorate. I his force also in some degree looks after British interests on the west side of the Nile. and in the Eastern Soudan. The civil administrator resides at Port Alice on the Victoria Nyanza. The development of the country has progressed wonderfully in the last year or two, and will doubtless go on still faster when the and will doubtless go on still later when the railway from the coast is completed. This undertaking has made considerable progress, as to which see EASI APRICA PROTECTORIE. See also EGIPT (map) - History, '98.—Serious news reached Great Britain towards the end of It appeared that the Soudanese troops in the Uganda Riles, who were appointed to accompany Major Macdonald on a special mission into the Upper Nile region, had mutined, mainly because of the hard fighting they had been compelled for a long time to undergo, and of the smallness of their pay. They left Major Macdonald at Lake Baringo, and returned to Uganda via Nandi and Kavirondo, Major Macdonald and a number of troops that major macdonaid and a number of troops that remained loyal following. Lubwas, in Usoga, a fort commanding the Nile crossing, was then taken by the mutineers, who also made prisoners of Major Thruston and other Government officers, and eventually murdered them. Fighting followed and the nepert of affairs becoming cers, and eventually murdered them. Fighting followed, and the aspect of affairs becoming serious, Indian troops were ordered to the front, and the 27th Bombay Infantry were sent to the terminus of the railway. Lieut. Macdonald and others were said to have been been to be a considerable of the constant of the constan donald and others were said to have been killed in an engagement on Dec. 19th. The mutineers retired from Fort Lubwas (Jan. 9th) across the Victoria Nyanza, and were atonce pursued by a force under Captain Harrison They reached Uganda, however, and marched on Mkono (16th). Captain Harrison overtook them at Kabazambi, to the south of Mruli, and defeated them, after killing 60 and wounding 100 (Feb. 23rd). They were finally defeated and dispersed (Aug. 4th) The report of Mr. Berkeley, H.M. Commissioner in Uganda on the mutiny, was issued (Sept. 22nd), having Herkeley, H.M. Commissioner in Uganda on the mutiny, was issued (Sept. 22nd), having been dispatched from Kampala in May. He stated that the mutineers had been overworked, and had only just finished a campaign against Mwanga when they were ordered to join Major Macdonald's expedition. This gave rise to disaffection, and, once having mutinied, the men went from bad to worse.

Unification of London. For a report of the Royal Commission appointed in '93 to inquire into the conditions on which an amalgamation of the City and the County of London could take place, and to make specific and practical proposals for the purpose, see eds. '95, '96, and '97. See also separate article on LONDON LOCAL GOVERNMENI.

Unitarians. The name commonly given to Christians who do not accept the doctrine of the Trinity, or the Deity of Christ. Congrestions number about 250 in England, besides 20 mission stations, 251 m Wales, 10 in Sociland, 40 in Ireland. The British and Foreign Unitarian Association is not representative of the churches, but consists of independent subscribers desirous of promoting "the principles of Unitarian Christianity." The writings of Dr. W. E. Channing, Theodore Parker, Dr. James Martineau, and others, have made Unitarian thought familiar to many outside the limits of the denomination. The only technically Unitarian College is that of the Unitarian Home Missionary College in Manchester, which educates for the ministry students who are not able to enter Manchester College (g v), recently removed to Oxford, where most of the leading Unitarian ministers are trained. There is a triannial Conference of non-subscribing congregations, which consists almost entirely of Unitarians. The processedly Unitarian congregations of the United States number 350; of these 232 are in New England, many of them being old Puritan foundations. (See also SUNDAY SCHOOL ASSOCIATION.) The Inquire, which is a weekly newspaper (established 42), its described as a "Journal of Liberal Religious Thought and Life." The present editor is the Rev. V. D. Davis, B A. Office, Essex Hall, Essex Street, Strand, W.C.

UNITED STATES.

The United States are a confederation of forty-five North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the executive, the legislative, and the judicial. The first is vested in a Fresident elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress, but no senator or representative can be an elector. The President is commander of the national forces, and has a veto on all laws passed by Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted inder the immediate authority of the Preside is by eight ministers chosen by him, and noiding office at his pleasure, though con-

firmed by the Senate. A Vice-President is chosen in the same manner as the President; he is sx-office President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vicepresident. The legislative power is vested in Congress, which consists of (1) the Senate, of comembers—two chosen by each state legislature for six years—who ratify or reject all treaties made by the President, confirm or reject all appointments made by the President, and who constitute a court of impeachment, with power only to remove or disqualify from office; (3) the Rouse of Representatives, of 357 members, chosen every two years by all adult male citizens duly qualified according to the laws of their respective states, and apportuned among the states according to population. In addition to the representatives, delegates from "territories" (districts not organised into states) are entitled to debate on matters congress may a cose an amendment to the constitution if two-thirds of both houses deem it necessary; and such amendment shall be deemed to be incorporated in the constitution when ratified by the legislatures of three-fourths of the several states. All members of Congress are paid \$5000 per annum. The judicial power is confided to a Supreme Court (the members of which are nominated by the President for life) with power to interpret the constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc. The constitutions and modes of administration of the various states bear a close resemblance to each other-the executive being sonfided to a governor and the legislative to two elective chambers. Roughly speaking, each state has voluntarily surrendered to the central Governwould be the control of the control impose local taxes at its pleasure. of the United States not included within the boundaries of an individual state is divided into "territories," the districts of Columbia, Alaska, and three Indian territories, containing about 250,000 Indians. When duly qualified by population, etc., it is competent for the confideracy to form the territories into new "states" and admit them into the Union. The "district of Columbia" is a neutral territory "district of Columbia" is a neutral territory under the direct government of the confederacy, in which is aituated the capital, Washington. During '98 Hawaii (q.v.) was annexed and declared a territory, Porto Rico (q.v.) was also ceded by Spain, and the cession of the Philippine Islands was demanded of Spain. See History '98 below. Perfect equality is accorded to all religions. Education is free and general, although backward in some of the former slave states, the cost being met from sixta or local. states, the cost being met from state or local funds, and the Federal Government contributing a portion. Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. Cereals, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal and other minerals are the

traction lines, of which nearly 14,000 miles are worked by electricity. The total area of the Union is 3,501,409 sq. miles; the population, at the census of '90, was 6,654,302, of whom 32,067,880 were males, and 30,554,370 females. The whites numbered 54,983,890, and the coloured 7,658,360. The proportion of the foreign-born was 14'77. In '93 the population was computed to be about 68,00,000. The wealth of the country was estimated by the Census Office at, for real property, \$39,544,544,333; and for personal property at \$82,402,546,684, giving a total of \$65,037,091,197, or £13,000,000,000. Bevenue, '97-8, K84,273,150; expenditure, £02,369,870; experts, 97-8, £356,533,305; imports, £102,695,472. The national debt in '97 amounted to £373,681,800. For Ministry, etc., see Diplomatic; see also For Ministry, etc., see Diplomatic; see also Behring Sea Question, Foreign Armies, and FOREIGN NAVIES.

Political Parties. - Until '92 practically the only parties in American political life were the Republicans and the Democrats. In that year, however a third party, first known as the Farmers' Alliance and afterwards as the Populas or People's Party, was founded, and soon attracted the support of many working men The programme it has advocated is a simple and sweeping one. It includes public ownership and control of the railways and tramways of the country, and the direct issue of currency to the people by the Govern-ment without the intervention of any of the national banks. All its members are therefore silver men and bimetallists. They contend that the other parties are bound up with and support the three great monopolies of the country—the banking, speculating, and railway interests. At the '92 Presidential election the voting was as follows: Democrats 277, Republicans 145, Populists 22. The election was fought on two points mainly, the tariff and the silver question, the Democrats being for the repeal of the M'Kinley and the Sherman Acts, and the Republicans of course strongly upholding both Acts. The elections in Nov. 93, for the State governors, went very much in favour of the Republicans, and the general election in Nov. '94 resulted in a crushing defeat for the Democrats. During '05 and '06 important and startling changes took place in the relations of parties. The lines of division between Republicans and Democrats were bloken down in two ways. On the one hand there were men of both parties who sympathised with the Free Silver policy, which was energetically pushed during these two years; and on the other there was, as it proved, a majority, also made up of members of both parties, in favour of the preservation of a gold standard. In the Republican party the gold standard triumphed, and its preservation was adopted as a plank in the party platform, though they expressly pledged themselves to promote international bimetallism. The Democrats, on the contrary, were captured by Silverite and Populist influences, and adopted a platform which included the free coinage of silver, at the ratio of 16 to 1, and many points of the Populist programme. This was too much for the Democrats in favour of a gold standard, and with the explicit approval of President Cleveland, they split from the majority, and held a Convention and named a candidate of their own. There were in all no less than seven nominations chief products, and there are many large and and named a candidate of their own. There flourishing manufacturing industries. There were in all no less than seven nominations are over 182,000 miles of railway in operation, for the Presidency, but three of these nomina-and about 16,000 miles of street railways and tions, by the Democrats, the Populists, and

the Silverites, were of the same man, Mr. Bryan. The Republicans nominated Mr. M'Kinley, and the gold standard Democrate General Palmer, while two comparatively insignificant sections, the Prohibitionists and the Scotlets industed in sendidates of the significant sections, the Prohibitionists and the Socialists, indulged in candidates of their own. The real fight lay of course between Mr. M'Kinley and Mr. Bryan, or rather between the two policies as to the currency which they represented. The tariff issue was also involved, but very little was heard of it during the contest, the result of which was a victory for Mr. M'Kinley. Congress officially declared the nature to he as follows (Feb. 19th, 1921). Mr. the voting to be as follows (Feb. 10th, '97): Mr. M'Kınley 271, Mr. Bryan 176. The popular voting showed an aggregate of 7,123,234 votes for Mr. M'Kınley, and 6,499,365 for Mr. Bryan, while a small number of votes were cast for the other candidates, amounting in all to 276,203 Early in '98, before the war with Spain began, the Bryanites seemed to be gathering strength again, but the war brought a number of entirely new issues before the nation, particubut the war brought a number of larly those relating to a foreign policy, and in face of these, currency questions were, to a large extent, forgotten or lost sight of. The elections for the House of Representatives were held in Nov. '98, in many states simultaneously with the elections for State Governors and Legislatures. Prior to the elections there were in the House 202 Republicans, 125 Democrats, and 30 Populists and Silverites Although complete returns were not to hand, it was yet ascertained (Nov. 11th) that 185 "sound money Republicans had been elected, besides 3 Silver Republicans, 160 Democrats, and 4 Populists. Since the State Legislatures elect the Senate, it was also apparent that there would be 54 Republicans there. Thus the Silver party were placed in a hopeless minority in both Houses. The successful conduct of the war, in spite of the delects in administration complained of, no doubt operated in favour of the Republican party.

History, '98.—In his annual Message to

Congress the President urged the necessity of currency legislation, and, with regard to Cuba, declared that time should be given the Spanish Government to show that the new policy would bring about peace (Dec. 6th, '97).
This position was adhered to for some time, despite efforts by the lingoes to force on a more vigorous policy. A resolution declaring United States bonds to be payable either in gold or silver was carried by the Senate by a majority of 15 (Jan. 28th), but rejected by the House by a majority of 50; and the Republican majority thus showed their determination to follow the President's declared policy of sound money and currency reform. In February an indiscreet letter written by the Spanish Minister at Washington somehow got into print, and as it contained various reflections on the President, the resignation of the minister, Senor Dupuy de Lôme, followed as a matter of course (10th). Senor Polo Bernabe was appointed to succeed him. Before the excitement over this incident had subsided the United States 2nd-class battleship Maine, lying in Havana harbour, was destroyed by an explosion, 2 officers and 253 men being killed (Feb. 15th). An inquiry into the cause

cause lay outside the ship, and was probably a submarine mine (Warch 25th). The Spanish authorities, however, held that the cause of the explosion was inside the ship. President sent the American report to Congress (28th), together with a message in which he said that the report had been communicated to the Spanish Government, and he would advise Congress as to the result. Meanwhile General Woodford, the American representative at Madrid, telegraphed that the Spanish Government had revoked the Concentration decree in the western provinces of Cuba, had made a grant of money, and would accept any further assistance from the United States further assistance from the United States towards feeding and succouring the distressed country people. The preparation of terms of peace would be left to the Cuban Parliament, which would not meet till May 4th, but if the insurgents asked meanwhile for a suspension of hostilities it would be granted. This represented the Spanish leply to the American demand to a speedy settlement of affairs in the island, and it was considered very unsatisfactory, American opinion being firm and unanimous as to the necessity of making Cuba free, even at the cost of was with Spain. The Six great Powers joined in presenting an six great Powers joined in presenting an appeal to the President, which expressed the hope that an agreement might be come to, which would secure the maintenance of peace and afford all necessary guarantees for the re-establishment of order in Cuba (April 7th). The President replied that the Government appreciated the humanitarian and disinterested character of the appeal, and were confident that equal appreciation would be shown for their own earnest and unselfish endeavours to end a situation the indefinite prolongation of which had become intolerable. The President's long-delayed Message to Congress was sent (11th), asking it to authorise and empower him to take measures to secure the full and final termination of hostilities in Cuba, and the establishment there of a stable Government capable of maintaining order, and to use the military and naval forces of the United States for these purposes as might be necessary. He also recommended that the distribution of food supplies should be continued. Congress at supplies should be continued. Congress on once began to debate on this Message, and the Senate passed a resolution which included the recognition of the independence of the Cuban Republic This was in direct opposition to the President's Message, and the House of Representatives rejected it; but a conference between the two Houses led to the elimination of the clause as to independence, and the passing of concurrent resolutions demanding that Spain should at once withdraw from Cuba, and directing and empowering the President to use the land and naval forces of the United States to carry the resolutions into effect. An express disclaimer of any desire to annex Cuba was added (19th). The President then sent the resolutions as an ultimatum to Madrid, but before it could be delivered the! Spanish Government broke off diplomatic relations and handed the American Minister his passports. The Spanish Minister also left Washington. Orders were at once given to blockade Hawana (218t), 'and the President was authorised; to call out the Volunteers. War credits were of the explosion was commenced, and the call out the Volunteers. War credits were relations between the two countries got passed and an expeditionary force under steadily worse. The American report on the General Shafter was mobilised. Meanwhile Maine explosion was to the effect that the several Spanish vessels were captured, and a

heavy blow was struck at Spain by the de-struction of her squadron in Manula harbour (see PHILIPPINE ISLANDS), for which the American commander, Admiral Dewey, re-ceived the thanks of Congress. Transports carrying troops with supplies and ammunition were sent to Manila from San Francisco (26th). British sympathy with the objects aimed at by the Government was plainly shown, and a much more friendly feeling than had previously existed began to prevail towards Great Britain and Canada. One result of this was the agreement to refer the Behring Sea question and the Alaska boundary question, with other contro-Alaska boundary question, with other controversal matters, to a Commission for settlement (**May** 30th). Major-General Shafter left Key West with 15,000 men (June 13th), and opened the campaign in Cuba, which ended in the destruction of the Spanish fleet, and the surrender of Santiago and the whole of the eastern part of the island (for details see Cuba). After long consideration Hawaii was definitely annexed and attached to the Military dennitely annexed and attached to the Military Department of California (July 11th). An ex-pedition under General Miles left Cuba and effected a landing at Guanica in Porto Rico (a5th), easily dislodging the Spanish forces there. Overtures for peace were then made by the Spanish Government through the French Ambassador at Washington, and the following terms were laid down. the relinquishment and evacuation by Spain of Cuba, the cession to the United States of Porto Rico and all other Spainish possessions in the West Indies, and certain islands in the Ladrones, and the occupation by the United States of Manila till the conclusion of a treaty of peace determining the "control, disposition, and government of the Philippines" (Aug. 2nd) These terms the Philippines (Aug. 2nd) These terms were accepted by Spain, and embodied in a protocol which was signed at Washington (12th). The President then issued a proclama-(12th). The President then issued a proclama-tion suspending hostilities, but before the news could reach Manila the city was taken by the American army and navy there co-operating (12th). Much discussion then took place in the press as to the responsibility for the terribly insanitary condition of the American forces and the inadequacy of the commissariat arrangements not only in Cuba and Porto Rico, but in the health camps in the States them-selves. A sharp controversy between General Miles and Mr Alger ensued, and eventually a Commission was appointed to investigate the conduct of the War Department since the commencement of the war (Sept. 9th). During the arrangements for nominating the Com-missioners to arrange the peace treaty and the evacuation of ceded Spanish territory, opinions were divided as to what should be demanded measioners to arrange the peace treaty and the evacuation of ceded Spanish territory, opinions were divided as to what should be demanded in the Philippines, but gradually the view of the country and of the Government settled into a resolve to annex the islands. General Miles announced (aoth) that a force of 50,000 for Porto Rico, and 4000 for Honloulu. A sensation in domestic politics was caused when Senstor Quay, of Pennsylvania, the Republican "boss," was committed for trial before the Philiadelphia Criminal Court on a charge of conspiring to make a fraudulent use of the money in the People's Bank (Oct. 6th). The American Peace Commissioners, under the presidency of Mr. Day, met the Spanish Commissioners at Paris early in the month, and

began to discuss the terms of the final treaty of peace. Differences of opinion at once maniof peace. Dinerences of opinion at once manifested themselves, the Americans refusing to assume the sovereignty of Cuba, or responsibility in any form for the Cuban debt, and demanding the cession of the Philippine Archipelago. The Spanish Commissioners disputed both points, but eventually provisionally agreed to accept the article proposed as to Cuba. They, however, energetically protested against the claim to the Philippines, and declared that Spain had not renounced her sovereignty over those islands, nor was the question left open by the terms of the Protocol. Throughout the first two weeks in November the question was keenly discussed, and the Spanish representatives suggested that, to avoid a rupture, the matter should be referred to arbitration. The Americans refused this (21st) but offered to give Spain \$20,000,000 as an indemnity for the Philippines, and to admit Spanish imports for 5 years on equal terms with American goods.

United States, President of the. M'KINLEY, WILLIAM.

University College, London, founded 1826, was opened in '28 under the title of "The University of London." In '36 it was thought desirable to separate the College from the University of London." versity, and the former was incorporated in that year as "University College, London," by royal charter, which was annulled in '69, and the College re-incorporated with additional powers. College re-incorporated with additional powers. There are, therefore, two distinct institutions—the one a teaching body and the other an examining body. The curriculum includes courses in arts, law, science, engineering, theoretical and applied, medicine, and the fine arts. There is also University College Hospital, with upwards of 200 beds. President of the College, Rt. Hon. Lord Reay, G.C.S.I.; Vice-President, R. B. Haldane, Q.C., M.P. Deans: Professors J. A. Platt, M.A.; T. Hudson Beare; R.J. Godlee, M.S., M.B., F.R.C.S. Secretary, J. M. Horsburgh, M.A. The students number about 2000. about 2000.

University College of North Wales (Bangor). The, is one of the constituent colleges of the University of Wales. Opened 1884. It received a royal Charter in '85, and it is in receipt of a Government grant of £4000 per annum, besides an annual grant in aid of its Agricultural Department. There are a large number of entrance sobolarships connected with the institution. The College possesses a valuable hipervice outside the constitution of the co valuable library containing over 20,000 volumes Secretary, J. E. Lloyd.

colleges of the University of Wales. It was supported for many years by freewill offerings, but since '86 it has been in receipt of a Government grant of £4000 per annum. Besides the ordinary courses in Arts and Science, the College has a Department of Agriculture and College has a Department of Agriculture and a Normal Department. A department for the training of secondary teachers has also been organised. The total number of students during the session '97.8 was 407, of whom 174 were women, nearly all residing as a hostel under the superintendence of Miss E. A. Carpenter. President, Lord Rendel; Principal, T. F. Roberts, M.A. Oxon., Registrar, T. Mortimer Green. Green.

University College School, Gower Street, established 1832, is completely unsectarian—separate classification in all subjects—a modern separate classification in all subjects—a modern school with classical department. Prepaires for University College and London matriculation, as well as for Universities, Woolwich, etc Pupils, 330. Motto, Paulatim sed firmiter. Head Master, F. P. Barnard, M. A. Beoretary, J. M. Horsburgh, M.A. Amongstits alumniare the Rt. Hon. Joseph Chamberlain, Lord Leighton, Sir George Lewis, Professor Michael Foster, Mr. R. H. Hutton, Lord Justice Lindley, Mr Justice Charles, Rt. Hon. J. W. Mellor, Sir G. Faudel-Phillips, Bart, and Rt. Hon. W. C. Gully, Speaker of the House of Commons.

UNIVERSITY EXTENSION.

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in 72 with the University of Cambridge; about four years later Oxford took it up-abandoning it, however, until 85; and in 76 was formed the London Society for the Extension of University Teaching within the Metropolitan area. Durham University has been associated with Cambridge in forwarding the work in Northumberland and Durham , Victoria work in Northumberiand and Durnam, Victoria University is also in the field; and the Scotch Universities are making a similar plan for laying siege to the north. The University of Sydney, New South Wales, adopted the scheme in '87. An American Society for the Extension of University Teaching has been formed at Philadelphia and Chicago, and several other American universities have begun work on similar lines. Such is a general view of the present position of this movement; an insight into its working is afforded from the following details regarding the Cambridge, London, and Oxford schemes.

Cambridge.-The external work of the University-the Local Examinations and the Local Lectures (University Extension)-15 controlled by a syndicate of eighteen, appointed by the University Senate. The Preliminary, Junior, and Senior Local Examinations are intended for children of school age, and are held in December, while the Higher Local, for adults of both sexes, is held in June. Under the Local Lectures (University Extension) Scheme there are two principal terms in the year-September to December, and January to March—and a course of twelve lectures is given in each term. Lectures are also given less often in the summer term—April to July. At the end of each term a special examination is held and certaincates awarded on the joint report of examiner and lecturer. Sessional Certificates are awarded courses in Educational Sequence, and the Vice-Chancellor's Certificate of Systematic Study is awarded to students for four sessions' work, under certain conditions. Of the whole number of centres connected with Cambridge, eight are affiliated—viz, Derby, Exeter, Hull, New castle-on-Tyne, Norwich, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. (See previous eds. for the privileges given to affiliated students) A town may come under the operation of the old unary soleme by providing a place of meeting for the lectures and classes and an inclusive fee of \$\int_{50}\$ per course to the University. All the local expenses are met by the local committee, who also fix and receive the fees In connection with the Norfolk County Council courses on scientific subjects, bearing on agriculture, were given by lecturers of the Syndicate during the past five sessions followed in the summer by courses of practical work in the University Laboratory attended by Norfolk Teachers holding County Council variously modified to suit local needs. Full particulars as to the Local limitations may be obtained from the Secretary for Examinations of the Local Examinations and Lectures Syndicate, Syndicate Buildings, Cambridge, and as to the Local Lectures from the Secretary for

Lectures at the same address.

London. This organisation comprises a council of 34 members, President, the Rt. Hon, Sir John Lubbock, Bart, D.C.L., F.R.S., M.P., Chairman, the Rt. Rev the Loid Bishop of London Bedford College, Birkbeck Institution, City of London College, College for Mon and Women, Gilchrist Educational Trust, Joint Grand Gresham Committee, King's College, Fechincal Education Board of the London County County Conficil, London Insutution, Queen's College, Royal Institution, University College, University Extension Local Centre Association (London), and the Working Men's College, each nominate a member of the council; the remaining to are elected by members of the Society. Anyone may become a member of the Society by paying an annual subscription of £1 is, or £50 for a life membership. These subscriptions and voluntary subscriptions and constitutions and constitutions and constitutions. subscriptions and voluntary subscriptions constitute the Society's revenue. The council is assisted and advised on educational matters by assisted and advised on entrations infactors of the Universities Joint Board, which consists of three representatives from each of the Uni-versities of Oxford, Cambridge, and London; Chairman, James Stuart, MA, LL.D., M.P. The Joint Board nominates the lecturers and examiners and awards certificates. The scheme of work is as follows-two terms in the winter, each of ten weeks, weekly lectures followed by a conversational class, weekly papers for the lecturers, and final examinations. A summer course of five weeks completes the session of twenty-five weeks. Certificates are awarded for the work of a term, of a session, and of a period of four sessions. The Local Centres are managed by local committees, who fix and receive the students' fees. The Society provides lecturers and examiners, the charge bring the of twelve lecturers, to the being added in the case of ourses illustrated by experiments—chefly in Chemistry and Physics. The students dents' fees vary from 1s. to £1 1s., according to the locality and the discretion of the local committees. The total number of scudents in for a session's work consisting of two terminal '97-8 was 13,155, who attended 159 courses of

lectures at 57 centres. The Council submitted evidence to the Royal Commission on a University for London (g.v.), showing that the work done by the London organisation is worthy of recognition by the New University. Secretary to the Council, C. W. Kımmıns, M.A., D.Sc.; Assistant Secretary, Percy M. Wallace, M.A.; Office, Charterhouse, E.C. Consult University Extension Invend Councils & Co.

M.A.; Office, Charterhouse, E.C. Consult University Extension Journal (Constable & Co., 2, Whitehall Gardens, S.W.).

Oxford.— The University first took an active part in educating non-matriculated attidents by means of University Extension Courses in '78. In '85 the system was reorganised on its present lines. Local committees at 108 centres acted last year ('97-8) in concert with the Oxford University Delegates, and arranged 145 courses, at which the total average attendance was 18,242 students. The number of lecturers was 35, and of lectures given 1092. Much of the work hitherto done by University Extension Lectures has been of an experimental nature, but there are many gratifying signs that while the early enthusiasm of the movement is not spent, its edicational efficiency is steadily increasing. At Reading the University Ex-tension College (of which Mr. Mackinder, M.A., Student of Christ Church, is Principal) has 709 regular students (besides 2000 who attend occasional lectures) and over 20 teachers. Of 727 students who entered for final exami-Of 277 students who entered for final examinations, 268 candidates received certificates of distinction, and 402 satisfied the examiner. Though in these examinations they only write one paper, the standard for distinction is identical with that required (but on several papers) in the Final University Examinations for B.A. During the last ten years the local committees have spect on Oxford courses more committees have spent on Oxford courses more than £50,000. The method of University Extension work is (except in class work in languages or laboratory work in Natural Sciences) invariably the lecture, followed or preceded by a class supplemented by weekly exercises corrected by the lecturer. The ninth summer meeting will be held in Oxford in August '99. The main courses of s'udy pursued at the meeting of '97 will be continued in sequence. They will will be continued in sequence. They will include:—(1) the History and Literature of the Period 1837—1871; (2) the Science, Music, and Art of the Nineteenth Century; (3) Economic History and Theory; (4) the History and Theory of Education; (5) Hellenic Studies in the Nineteenth Century; (6) Architecture. Classes in Languages will also be held. All information can be obtained from the Secretary, Mr. I.A. R. Marriott M.A. Frannation. Mr. J. A. R. Marriott, M.A., Examination Schools, Oxford

University Settlements. It is the object of University settlements to bring together the large body of wage earners and the philosopher who is attacking social problems, and to make out of them an efficient instrument for national progress. Settlements were started, as Canon Barnett has explained, "without the equipment of an endowment, and without any sectarian or political object. They were to be simply club-houses, in which men and women of the University status should live their own lives in the midst of industrial districts. . . . The first political object. They were to be simply clubhouses, in which men and women of the University status should live their own lives in
the midst of industrial districts. . . The first
intention has been modified by circumstances.

Some settlements have now been attached to
missions, and some have become identified with
sectarian objects." The first of these settlements was Toyabee Hall (Canon Barnett, M.A.,
was Toyabee Hall (Canon Barnett, M.A.,
sasistant music masters, There is also a Lower
warden), opened in Commercial Street, White-

chapel, in '84. This was an Oxford movement, in which Balliol College took a leading part. The settlement was named after Arnold Toynbee, a Balliol tutor, who in '75 had taken rooms in Whitechapel, and had helped in parish work in St. Jude's for the purpose of studying economic problems. Oxford House, Bethnal Green is a Church of England movement. There is a Mission House and Settlement at Battersea a Mission House and Settlement at Battersea carried on by Gonville and Cause College, Cambridge, with headquarters at Caius House, Battersea Square (warden, Rev. W. B. L. Hopkins). Maasfield House, Barking Road, Canning Town, E. (Percy Alden, M.A., warden), commenced by students of Mansfield College, Oxford, works on religious (unsectarian) as well as on social and educational lines. A new residence, at 89, Barking Road, was opened in Dec. 2011 to contains Road, was opened in Dec. '97; it contains rooms for 17 men, besides offices and a reception hall. There are also a meeting hall and tion hall. There are also a meeting hall and men's club at 142-7, Barking Road; the "Fairbairn House" Lads' Club, at 310-12, Barking Road; and the "Wave" Lodging House, at 235, Victoria Dock Road, under the control of the Settlement The Bermondsey Settlement (Rev. I Scott Lidgett, M.A., warden) in Farncombe Street, Jamaica Road, the Women's Branch being at 149, Lower Road, Rotherhithe, S.E. is largely supported by Methodists (but S.E., is largely supported by Methodists (but is undenominational in general character), and "Browning Hall," York Road, Walworth (Rev. F. H. Stead, M.A., warden), by Congregationalists. Closely connected with Unigregationalists. Closely connected with University settlements are the settlements of women workers. Mayfield House (Miss Corbett, resident Head), started in Bethnal Green in the autumn of '89 (a settlement of old Cheltenham College girls), has now removed to Shoreditch. St. Margaret's House, Bethnal Gieen (Miss Harington, resident Head), a women's branch of Oxford House, at first worked temporarily in connection with Move worked temporarily in connection with Mayfield House, but separating in '92, and taking its name from St. Margaret of Scotland, has formed two branches, one at Stratford, E., under Mrs. Crossley and Miss Yatman, which works in conjunction with Oxford Trinity Colworks in conjunction with Oxford Frinity College Settlement, Tenby Road, Stratford (Rev. W. J. Roxburgh, B.A., warden), and another in the Isle of Dogs, E. (Miss A. M. Harington, iesident Head). The women's settlement in Canning Town, E. (Miss R. H. Cheetham, iesident Head), works upon a religious though unsectarian basis. Amongst its agencies is a medical mission and hospital, with a resident lady physician (Dr. Margaret Pearse). A committee elected by the women students of the Universities manage a well-arranged and thriving Settlement, known as the Women's University Settlement, at 44, 45, and 46, Nelson Square, Blackfriars Road, S.E.: Warden, Miss Sewell. Courses of training are arranged here in social work amongst the poor, and resident students are received. Fees from £30 to £35 per annum; for students, £50.

Uruguay. A republic on the east coast of South America, south of Brazil. Capital, Monte Video, pop. 245,000, at the mouth of the Rio della Plata. The Executive is vested in a president elected for four years. The legislature is composed of a Senate of 19 chosen for six years tomposed or a Senate of 19 chosen for six years by an electoral college, one-third retiring every two years, and a Chamber of 69 members elected for three years, one for each 3000 of population. In the recess a permanent committee of two senators and five deputies assume mittee of two senators and five deputies assume legislative power and control of general administration. State religion Roman Catholic, but all others tolerated. Education obligatory; cost partly borne by the State. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture. There are over 1000 miles; pop. 900,000. Revenue, '97, £3,300,000; expenditure, £3,191,000; debt, '98, £25,670,000; imports, '96, £5,105,947; exports, £6,077,820. For Ministry, etc., see Diptlomatic.—History, '98.—Ex-President Herrera and others of the Opposition were arrested on a charge of con-Opposition were arrested on a charge of con-

spiracy (Nov. 30th, '97) and condemned to exile. More disturbances followed, and President Cuestas proclaimed a dictatorship (Jan. 9th). decree dissolving the Chambers followed (Feb. 10th), and a provisional Government was formed to administer affairs until the elections formed to administer affairs until the elections in November, with Señor Cuestas as Governor. The popular approval of the action of Señor Cuestas was shown by public demonstrations in his honour; business revived, and the general outlook immensely improved. A revolt of two artillery regiments, led by officers who iavoured ex-President Herrera, was crushed (July 4th), the Blancos and the population generally supporting President Cuestas. The ringleaders were at once banished to Buenos Ayres. The Government decided (Sept. 4th) to suspend the issue of Treasury certificates, to resume the cash payment of its local monthly obligations, and to convert the outstanding certificates, amounting to about \$4,000,000, into 6-per-cent internal debt, guaranteed by a tax on the administrative salaries.

VACCINATION.

The enforcement of vaccination has for many years been a subject of much controversy The Boards of Guardians, the authorities empowered to enforce the Vaccination Acts, were most diverse in their action, and while some Boards rigorously enforced the law and prosecuted defaulters at every opportunity, others abstained altogether from taking proceedings against persons who did not have their children vaccinated. An anti-vaccination league aroused much opposition to the practice of vaccination, founding their objection chiefly on the risk of communication of diseases by means of vaccination. In the case of one Board of Guardians the Local Government Board endeavoured, by obtaining a mandamus to compel them to enforce vaccination, and some of the guardians were imprisoned; but the result was not satisfactory, and this method of compulsion was not again resorted to. Meanwhile, some Boards of Guardians were doing much harm to the cause of vaccination by repeated prosecutions of the same offenders. In '89 the Royal Commission on Vaccination was appointed. The members of the Commission were —Lord Herschell (Chairthe Commission were —Lord Herschell (Chairman); Sir James Paget, Bart., F.R.S.; Sir Charles Dalrymple, Bart., M.P.; Sir W. Guyer Hunter, M.P.; Sir Edwin H. Galsworthy; Sir William Savory, Bart.; John Syer Bristove, M.D.; Wm. Job Collins, M.D.; John S. Dugdale, Q.C., M.P.; Professor Michael Foster, M.D.; Jonathan Hutchinson; J. Allanson Picton, M.P.; Samuel Whitbread, M.P.; F. Meadows White, Q.C.; and J. A. Bright, M.P. The Commission submitted an interim report in '92, recommending that repeated penalties for non-vaccination should not be imposed. The final report was issued in

W. J. Collins and Mr. J. Allanson Picton. The Commissioners declared their opinion that vaccination has a piotective effect, diminishing the liability to attack and mitigating the severity of the disease; that this protection is greatest during the nine or ten years following vaccination—it then rapidly diminishes, but never altogether ceases, that re-vaccination restores the temporary protection against attack, and that the beneficial effects of vaccination are greatest in those cases in which it has been most thorough, that the diseases alleged to result from vaccination are undoubtedly real and not inconsiderable in gross amount, yet insignificant in relation to the extent of vaccination work done, and are diminishing under the better precautions of the present day. The principal recommendations of the Commission were as follows -1. Repeated penalties for non-vaccination should be abolished. 2. Calf lymph instead of humanised lymph should be used. 3. Calf lymph should be supplied by the State, and be within the reach of every vaccinator. 4. Vaccination should be performed at the child's home, as in Scotland. instead of at public vaccination stations.

5 Every medical man who performs vaccination successfully should be entitled to a fee in the same way as public vaccinators. 6. The period within which a child must be vaccinated should be extended to six months (instead of three months) from birth. 7. Persons having a conscientious objection to vaccination might be exempt from penalties for non-vaccination of their children if they satisfied the local authority of their objection, or made a statu-tory declaration before a magistrate or other authorised person. Any change of law to this effect was to be limited to five years in the first instance. 8. Persons imprisoned for non-vaccination of their children should not imposed. The final report was issued in first instance. 8. Persons imprisoned for Sept. '96. It was signed by 11 out of 13 non-vaccination of their children should not Commissioners, the dissentients being Dr. be treated as criminals. The Commission

attached great importance to re-vaccination, but did not recommend that it should be compulsory. Dr. Collins and Mr. Picton, the dissentient Commissioners, as well as Mr. Whitbread and Mr. J. A. Bright, recommended the abolition of compulsory vaccination. The statistics of vaccination show a great falling statistics of vaccination show a great failing off in the numbers vaccinated, and this is particularly the case since the period when the Royal Commission was appointed. In '95, the Royal Commission was appointed. In '95, out of 921,512 children whose births were registered, 624,690, or 678 per cent., were recorded as having been successfully vaccinated; while of the rest more than 20 per cent. of the total number born appear to have escaped vaccination. There is every reason to think that the returns for '96 and '97 will show a far larger proportion of unvaccinated children. In the Metropolis there has always been a greater proportion of unvaccinated been a greater proportion of unvaccinated children than in the rest of England. In the year ending Sept. '97, the vaccinations per-formed by public vaccinators at the cost of the poor rates bare the proportion of 32 per cent, to the births registered during the year. the United Parties of the State of the State

many of the recommendations of the Royal Commission. The most important changes related to the substitution of domiciliary vaccination for vaccination at public stations, the use of glycerinated calf lymph in all cases where required, and the exemption from penalties of conscientious objectors. For fuller details see Session, sects. 97 and 98. The Act does not deal with the subject of revaccination On Oct. 18th, '88, the Local Government Board issued an order regulating the duties, remuneration, etc., of public vaccinators and vaccination officers, and repealing all previous regulations as to vaccination. Vaccination officers and public vaccinators are appointed by the Boards of Guardians; the former have the duty of enforcing the Vaccination Acts they issue notices to parents, keep records as to vaccination of all the children in their district, and institute proceedings in cases of default. A vaccination officer is empowered to take proceedings of his own accord against persons in default, without any direction from the Board of Guardians (see the decision of the Queen's Bench Division in the case of Bramble v. Lowe ['97], I Q.B., 283) By the order of the Local Government Board, the guardians are to pay the reasonable expenses incurred by a vaccination officer in proceedings taken by him. Previously, vaccination officers and public vaccinators were remunerated chiefly by tees in respect of successful vaccinations, and owing to the diminishing number of vaccinations in recent years their remuneration was in many cases greatly reduced. Henceforth both public vaccinators and vaccination officers are to be paid by fees for every birth registered in their district in addition to fees for successful vaccinations. It may be useful to note that a public vaccinator is required to

vaccinate, free of charge, with glycerinated calf lymph issued by the Local Government

withm a period of ten years. If so requested, the public vaccinator is to visit the home of

Vagrancy Act. "98. See Session, sect. 99.
"Vanity air." This pioneer of the so-called "Vanity Fair." This pioneer of the so-called society journal was founded by Mr. T. Gibson Bowles (now M.P. for King's Lynn) in Nov. '68. It has always been noted for its literary pretensions, and for its weekly caricature, which is sui generis. The chief artist is Mr. Leslie Ward ("Spy"), who occupies the position so long held by the late Carlo Pellegrini ("Ape"). Its politics are old-fishioned Tow. It descent Its politics are old-fashioned Tory. It devotes considerable space to Service matters. Vanity Fair changed hands for the second time in its

Fair changed hands for the second time in its history in March '95, but the Editor and Manager is still Mr. Oliver A. Fry. Office, 7, Essex Street, Strand, W.C.

Van Rooy, Anton, baritone vocalist, was b. at Rotterdam, 1870. He adopted the musical profession in '92, as a pupil of Stockhausen, in Fiankfort Showing a predilection for Wagnerian paits, be was engaged at the Bayreuth Frankfort Showing a predilection for Wagnerian parts, he was engaged at the Bayreuth Festival in '97, and specially distinguished himself as Wotan in 'Der Ring des Nibelingen' Sang in London at Queen's Hall at close of same year. After playing Wotan in 'Die Walkure' at Covent Garden, in May'88, he sustained the same character there during the subsequent three cycles of the 'Ring,' Variety His Emisence Harbert Gardinal

Vaughan, His Eminence Herbert Cardinal, Roman Catholic Archbishop of Westminster, and successor of Cardinal Manning as head of the Roman Catholic Church in England. He was b. at Gloucester, April 15th, 1832, and 18 the eldest son of the late Lieut. Colonel Vaughan, of Courtfield, Herefordshire. He was educated at Stonyhurst College and in Belgium. Then, abandoning his first intention to enter the abandoning his first intention to enter the army, he went to Downside, and afterwards to Rome, where he entered the Accademia dei nobili Ecclesiastici, and studied for some time with the future Cardinal Manning. He was ordained priest at Lucca, Oct. 28th, '54, and alterwards, returning to England, he joined the oblates of St. Charles (a congregation of secular priests founded by the late Cardinal Manning at Rasyawater), and was sent to St. Manning at Bayswater), and was sent to St. Edmund's College, near Ware, of which he was Vice-President till '62. Having resolved to found a Missionary College, he went in '63 to North and South America to gather funds; and afterwards bought a house and land at Mill Hill, near London, where he began the College with only one student. The first stone College with only one student. The first stone of the present College at Mill Hill was laid in '69, and the College has now a large number of students. In spite of his entreaties to be of students. In spite of his entreaties to be allowed to remain simply a priest, he was appointed Bishop of Salford in 72. The work he didshere, the building of St. Bede's College for commercial education, his crusade against intemperance, his rescue work for children, and his pastoral letters and other writings, are well known. On the recommendation of the well known On the recommendation of the Propaganda he was elected by the Pope to the see of Westminster, April 8th, 92, took pos-session of the see May 12th, and received the pallium Aug. 16th. In Jan. 93 he was made a member of the Sacred College of Cardinals, with the title of Cardinal Priest. On June 29th, loard, any child resident in his district or any of the Westminster Cathedral, a vast and been vaccinated, and also to re-vaccinate any person who is ten years of age or over, and who has not been previously re-vaccinated took part in Sept. 57 in the great celebration

by the Roman Catholics of England, of the 13th Centenary of the landing of St. Augustine.

Vegetarian Federal Union, The, is an association of such Societies throughout the world as may be willing to unite together for mutual counsel and the promotion of Vegetarianism-i.e. abstinence from the flesh of animals (fish, flesh, and fowl) as food, and the encouragement of the use of cereals, pulses, seeds, grains, fruits, nuts, and all the wholesome products of the vegetable kingdom. The Vegetarian Society, which celebrated its jubilee year in '96-7, is the oldest Vegetarian Society in Great Britain. The Secretary is Mr. Alfred Broadbent, and the offices are at 16, Oxford Street, Chorlton-on-Medlock, Manchester. The official organs of the Federal Union are The Vegetarian (weekly), and The Vegetarian Messenger and Review (monthly) Literature and lecturers are sent free. There is a Vegetarian Hospital, with 20 beds in connection with it, at Loughton, Essex. Fresident, Mr. A. F. Hills, D.L.; Treasurer, Mr. T. Anderson Hanson; Secretary, Mr. Josiah Oldfield, M.A., B.C.L. Offices, Memorial Hall, 16, Farringdon Street, London, E.C.

Venezuela. A republic in South America, consisting of eight states or provinces, two ettlements, and a Federal District. It is governed by a President, who holds office for two years, assisted by a Federal Council of 19 members appointed by Congress every two years. Congress consists of a Senate of congress consists of a Senate of 24 members, three of whom are nominated by the legislature of each province, and a House of Representatives of 52 members, elected directly, one member to every 35,000 of population. The eight constituent states have each their own legislature and executive Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but is compulsory and fiee. La Guayra is the chief port of the Republic, and is connected with Caracas by a railway which is a marvel of engineering skill The chief products are coffee, cocoa, timber, cattle and hides. A long-standing boundary dispute between Great Britain representing British Guiana and Venezuela, attracted universal attention during '96, and led to some friction between Great Britain and the United States. Venezuela bases her claims on those states. Venezuela bases her claims on those put forward by Spain, to whose rights she succeeded on gaining her independence in 1821. The British, on the other hand, took over their claims from the Dutch, by whom the colony was ceded to them in 1814 in 39 the Schomburgk line was surveyed, and in 31 the Schomburgk line was surveyed, and in 32 the Schomburgk line was surveyed, and in 32 the Schomburgk line was surveyed, and in 32 the Schomburgk line was surveyed as the schomburgh of the schomburg marked out as a reasonable basis for a settle-ment of the dispute. This line was not meant as indicating the extreme limit of the terri-tory over which British rights extended, but simply as a reasonable compromise. However, Venezuela refused to accept it, and subsequent negotiations, including offers from both sides, came to nothing In 31 a modified Schomburgk line was drawn, including rather more territory than the original line. This was in response to an offer from Venezuela of a boundary line running from the coast at the mouth of the Maroco west to 60° W., and thence due south. Diplomatic relations were suspended in '87, and in '90 Great Britain declared that the modified Schomburgk line was the minimum of her demands. Aggressions by Venezuelan

troops in '94 and '95 on British officials at Uruan, in the Cuyuni district, led to more trouble, for the United States then took up the question, representing England's policy as one of unjustifiable aggrandisement. It was, however, agreed in Nov. 76 to settle the dispute on the principle that British Guiana should be treated as if it were an individual, and that fifty years' holding, whether by political control or actual settlement, should give a good title, all the other points being decided by arbitration. The Arbitration treaty was signed Feb. and, '97. Diplomatic relations with Great Britain were Diplomatic relations with Great Britain were restored, Señor Pietri being appointed Minister in London. Lord Herschell and Mr. Justice Collins were appointed arbitrators for Great Britain, and Chief Justice Fuller and Justice Brewer for the United States, with the light to choose a fifth arbitrator, failing which appointment, King Oscar of Sweden was to name the man for the position. The was to name the man for the position. Interesty further provided that the arbitral tribunal, so constituted, should investigate and ascertain the extent of the territories that might lawfully be claimed by the United Netherlands or by the kingdom of Spain respectively, at the time of the acquisition by Great Britain of the colony of British Guiana, and should determine the boundary line between the colony of British Guiana and the United States of Venezuela The arbitrators are to be governed by the following rule, and by such principles of international law, not inconsistent therewith, as they may determine to be applicable to the case:—"Adverse holding or prescription during a period of 50 years shall make a good title. The arbitrators may deem exclusive political control of a district as well as actual settlement thereof sufficient to constitute adverse holding or to make title by prescription. The printed case of each of the two parties, accompanied by the documents, the official correspondence, and other evidence on which each relies, must be delivered in duplicate to each of the arbitrators and to the agent of the other party within a period not exceeding eight months from the ratification of the treaty. Within from the ratification of the treaty. Within four months after such delivery either party may deliver a counter case and additional documents, correspondence, and evidence. The agent of each party must, within three months after the delivery of the counter-case, deliver a printed argument showing the points and referring to the cyidence upon which his Government relies, and either party may also support the same before the arbitrators by oral argument of counsel. The arbitrators must meet at Paris within sixty days after the delivery of the printed arguments, and examine and decide the questions laid before them. and decide the questions had before the Professor Macrtens was afterwards selected as the President of the Tribunal, which will meet at Paris in the spring of '99. Area, 594,165 sq. m.: pop. 2,44,816. Capital, Garaoas, meet at Paris in the spring of '99. Area, 594,165 sq. m.: pop. 3,444,816. Capital, Oareaas, pop. 72,420. Revenue, '95, £1,546,700; expenditure, £1,546,700; imports, '04, about £3,000,000; exports, £4,203,592; public debt. interior, £2,777,645; exterior, £2,279,435. Army about 5280, exclusive of milita (about 60,000 strong). For Ministry, etc., see Diplomatic.—History, '98. Mr. H. D. Haggard, the British Minister, was received by the President (Dec. 11th, '97), and diplomatic relations between the two countries diplomatic relations between the two countries were resumed. A new Cabinet was formed by Señor Andrade, with Señor Matos as Minister

During '97 Her Majesty completed the sixtieth year of her reign, and thus passed the longest limit previously attained by any English sovereign. (For a description of the Commemoration of the Jubilee see special article, JUBILEE CELEBRATIONS, 98 ed.) The usual visit to Nice took place in March and April '98, and President Faure paid a visit to Her Majesty while she was at the Villa Liserb.

Victoria and Albert, Royal Order of, was instituted in 1862, and enlarged in '64, '65 and '80; is for Ladies, and consists of four classes.

Registrar, Sir A. W. Woods.

Victoria Institute. This society, which has now been in existence for 31 years, was founded to associate together men of science and all interested and qualified persons in investigating "impartially and fully the most important questions of philosophy and science, especially those that bear upon the great truths revealed in Holy Scripture"; "to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of philosophy proper, based upon faith in the existence of one Eternal God"; and to bring together the results of such labours in the printed naionsciatts of the Society. All desirous of belonging to or supporting a society having these aims are admitted as associates. The number of members and associates is 1495, one-third of whom reside abroad and in the colonies. President, Sir George Stokes, Bart, Secretary, Captain F. Petrie, Adelphi Terrace, W.C.

Victorian Order, The Royal, was created and instituted by Her Majesty, by letters patent under the Great Seal, April '96. Phose admitted to the order are to be British subjects who may have rendered important or personal services to the Sovereign; or foreigners upon whom Her Majesty may think fit to confer the distinction, and who are to rank as honorary members. Members of the order are divided into five classes :

Knights Grand Cross G C.V O. . K C.V.O. . . C V.O. Knights Commanders . . . Commanders

Members of the Fourth Class Members of the Fifth Class

Members of the first and second classes receive the honour of Knighthood, and a list of those admitted Nov. '97—Nov. '98 will be found under Knights. The first three classes rank after ANIGHTS. The first three classes rank after the corresponding classes of the order of the Indian Empire. Chancery of the Order, St. James's Palace; Chancellor, The Lord Chamberlain for the time being; Scoretary, The Keeper of Her Majesty's Privy Purse for the time being.

of Her Majesty's Privy Purse for the time being.

Victoris University, founded and incorporated by royal charter 1880, grew out of Owens College, Manchester (q.v.), which was established 51. Besides Owens College it now comprises University College, Liverpool (84), at which the new Victoria buildings, erected at a cost of £53,000, were opened in Dec. '92, and the Yorkshire College, Leeds ('87); and consists of a federation of colleges, not necessarily situated in the same district, as at Oxford and Cambridge. Chancellor, Earl Spencer, K.G.; Yiee-Chancellor, Nathan Bodington, Litt.D. Registrar, Alfred Hughes, M.A. Undergraduates about 1100 in number. Grants technical, commercial and literary certificates to properly qualified candidates and certificates to women, and examines scheols. Its Degrees

are: B.A., M.A., B.So., M.So., LL.B., M.B. and Ch.B., Ch.M., Mus.B., Litt.D., D.So., LL.D., M.D., Mus.D.

Virgin Islands. An archipelago in the West Virgin Islands. An archipelago in the West Indies, lying immediately to the east of Fuerto Rico. Of the principal islands Spain holds Oulebra and Biseque, Denmark possesses Saratorus, St. Thomas, and St. John, and England owns Tortola, Virgin Gorda, and Anegada. The latter form a presidency of the British fedral colony of the Leeward Islands. Total area of the presidency, which embraces in all about 32 islands. St. Saratorus Virgin Gorda, Saratorus Virgin Company Co islands, 58 sq. m.; total pop. 4635. See British Empire (table).

VOLUNTEERS.

The Volunteer force maintains both its efficency and popularity, and progress continues to be made. Early in the year the returns presented to '97 gave the full total of 225,206 efficients. The men now pass a much more officients. The men now pass a much more severe muskery test than formerly. The force for the first time superior of the force for the first time superior of the force; for the first time superior of the superior of the first time superior of the superior of the

Organisation. - Volunteer corps are raised under the Volunteer Act 1863 (26 & 27 Vict., c. 65) I hey are subject to the provisions of that Act and any Acts amending it, and likewise to all regulations made with regard to volunteer corps by the authority of Her Majesty's principal Secretary of State for War. The Volunteer (Military Service) Act of '96 provides that "Whenever an order for the embodiment of the Militia is in force, any member of a Volunteer corps may offer himself for actual military service, and if the services of such numbers of any corps as, in the opinion of the Secretary of State, is sufficient to enable them to be separately organised are out either to be separately organised accepted, then those members may be called out either as a corps or as part of a corps."
The Volunteers, like the Militia, form junior battalions attached to the line regiments in their respective districts. Their own organises sation as a cohesive and independent fighting sation as a conceive and independent lighting force is still imperfect, for they have not the auxiliary services, and it is not possible to ensure that all trained volunteers shall go through, even once a year, the exercises necessary to make them really efficient soldiers. To give them greater cohesion they have been formed in 33 brigades, but the organisation is as yet rudimentary, for the officers commanding volunteer infantry brigades do not in all cases inspect the battalions in their command, and the scheme of mobilisation is imperfect. But an excellent spirit is shown by both officers and men, as is proved by the general efficiency the increase in the mounted and cyclist infantry, the energy shown by the Railway Volunteer

Staff Corps, and a movement recently set on foot to establish a Volunteer Reserve, composed of those who have been compelled to leave the ranks, but cherish their connection with the corps, and retain their devotion to its service. Constant efforts are being made to increase the efficiency of the force. It is hoped that the new grants to officers will bring a good class to the force. They are made contingent upon the attainment of proficiency.

The Latest Returns .- Arms were distri-

grant of 508.; 1605 officers have passed in tactics or artillery; 13 officers and 22 non commissioned officers have earned the gran for signalling; and 11 officers and 28 non-commissioned officers that for supply and transporduties. The number present at inspection 11

The number present an appear of year 307,645.

Expenditure.—The gross sum upon the estimates of '98-9 for the pay and allowance or volunteer corps was £614,200, as compare with £627,200 fth '97-8. The expenditure on the force is as follows: pay of adjutants, £76,200. buted thus: Light Horse, 220; Artillery, 42,324; force is as follows: pay of adjutants, £76,200 Engineers and Submarine Miners, 12,475; Rifles, 175,400; Medical Staff Corps, 1379. A grants to volunteer corps, £239,500; allowance total of 6306 officers and 13,629 sergeants are in aid of volunteer camps, £235,000; mis returned as having earned the Government cellaneous charges, £45,500.

Wakefield, Bishop of. See under PEERAGE. wales, HR H. Albert Edward, Prince of, was b. at Buckingham Palace, Nov. oth, 1841; created Prince of Wales and Earl of Chester, created Prince of Wales and Earl of Chester, by patent under the Great Seal, on Dec. 4th of the same year; baptised at St. George's Chapel, Windsor Castle, Jan. 2th, 42. Ed at Christ Church, Oxford (D.C.L. '68), and at Trin. Coll., Camb. (LL.D.), and Edin. Univ (LL.D.); also LL.D. Dublin ('68), and Calcutta ('74). Prince of the United Kingdom of Great Britain and Ireland, Prince of Wales, Duke of Saxony, Prince of Saxo-Coburg and Gotha, Great Steward of Scotland, Duke of Cornwall and Rothsay, Earl of Chester. He is personal A.D.C to Her Majesty the Queen, a field-marshal of the forces, colonel-in-chief of 1st and 2nd Life Guarda and Royal Marse Guarda and Lange of Royal Marse Guarda and Lange Character. Guards, and Royal Horse Guards, colonel 10th Hussars, hon. colonel of the Oxford and the Cambridge University Corps, of the Middlesex Civil Service Corps of Rifle Volunteers, of the 3rd Batt. Gordon Highlanders, and the Suther-land Highland Rifle Volunteers, hon. admiral of the Fleet. Holds the rank of field-marshal in the German army, and is colonel-inchief of in the German army, and is colonel-in-chief of the 5th Pomeranian Blücher Hussars. He is the sth Pomeranian Blücher Hussars. He is also colonel of the Austro-Hungarian 12th Regt. of Hussars. Admitted to the Middle Temple, called to the bar and to the bench of that Society (Oct. 31st, '61). H.R.H. is an Elder Brother of Trinity House; also Grand Master of the United Grand Lodge of Freemasons of England ('74); President of the Society of Arts and of St. Bartholomew's Hospital. Married (March voth, '63) H.R.H. the Princess Alexandra Caroline Mary Charlotte Louisa Julia. eldest dau. of Christian IX., King of Denmark, and sister of the Empress of Russia and the King of Greece. On her marriage the House of Com-Greece. On her marriage the House of Com-Greece. On her marriage the House of Commons voted her an annual allowance of £10,000, and £30,000 in the event of her surviving the Prince. The Prince and Princess celebrated their allows wedding, '88. In the winter of '71, while staying with his family at his country seat, Sandringham, Norfolk, the Prince was attacked with typhoid fever, which it was feared would prove fatal, but after several weeks, prostration he recovered.

and on Feb. 27th, '72, he attended a public thanksgiving in 8t. Paul's Cathedral. He visite Canada and the United States in '60, and the Holy Land in '62, and went on a tour through India in '75-6. In company with the Princes he made a tour through Ireland ('85), where he met with a cordial reception. He evinced as active interest in the promotion of the late series. active interest in the promotion of the late series of Exhibitions held at South Kensington, and despite not a little opposition succeeded it establishing the Imperial Institute (q.v.). It 193 he became a member of the Poor Law Com mission, and in '94 did important service to his country at St. Petersburg, whither he wen on the death of the Czar in November. During on the death of the Czar in November. During 66 H.R.H. won the Derby and the St. Leger the former victory exciting a scene of un paralleled enthusiasm at Epsom. In the lubilee Celebrations of '97 the Prince took prominent part, especially in regard to the Prince of Wales's Hospital Fund for London A somewhat serious accident befel him in '98

his knee being injured in a fall.

Wales, The University of, is a federal teach mg University. Its constituent colleges are the University College of Wales, Aberystwith the University College of North Wales, Bangor and the University College of South Wales and Monmouthshire, Cardiff, all of which will be found noticed under their separate headings It has powers to confer degrees in the faculties of Arts or Letters, Science, Technical or Applied Science, Law, Music, and Theology. The charter passed under the Great Seal on Nov. 30th eg, since which time the task of getting the machinery of the University into working order has been proceeded with. On Jan. 22th 704, a large and influential deputation of person interested in Welsh education waited upon the Chancellor of the Exchequer, with a view to secure the requisite funds. The demand for secure the requisite funds. The demand for the first year was for £3000, which Sir William Harcourt was able to grant. The first meeting of the supreme governing body, the University Court, was held in the Privy Council Chamber Downing Street, on April 6th, when the chair was taken by the Earl of Rosebery, as Lorc President of the Council. The Prime Minister in addressing the Court, referred to the democratic character of the new University at the angle of the court in the court of the security was the court of the security. after several weeks' prostration he recovered, At this and subsequent meetings, statutes

were adopted, a Theological Board was formed, nine Weish theological colleges were recog-nised as institutions in which candidates for theological degrees in the University might receive instruction, and the general work of organisation was proceeded with. The Univer-sity Senate, which is composed of the heads of departments in the three constituent colleges, has settled upon the courses of study for the initial degrees of the University in Arts and Science. The matriculation examinations are held each year in June. The chief officers of the University are: Chancellor, H.R.H. The Prince of Wales, K.G.; Senior Deputy Ohancellor, Dr. Isambard Owen; Vice-Chancellor, Principal Viriamu Jones, University College of South Wales and Monmouthshire; Registrar, Mr. Ivor James, Brecon.

Walfisch Bay is a dependency of Cape Colony situated on the west coast of Africa, in the middle of the coast line of German South-West Africa. Area, 430 sq. m.; pop. 768. See CAPE COLONY.

Wallace Collection. This famous collection Wallace Collection. In stamous collection of works of art, generously bequeathed to the nation by the late Lady Wallace, was dested in a body of trustees appointed by the Treasury, consisting of the Earl of Rosebery, Sir Edward Malet, Sir J. S. Maxwell, Sir Arthur Ellis, Mr. Freeman Mitford, Mr A C de Rothschild, and Mr. J. Murray Scott. Mr. Claude Phillips has been appointed keener of the collection. has been appointed keeper of the collection, and it is to be permanently housed in Hertford House, Manchester Square, in which very extensive alterations are being carried out for the purpose.

ward, Mrs. Humphry, is a daughter of Thomas Arnold, author of the well-known "Manual of English Literature," a niece of Matthew Arnold, and granddaughter of Dr. Arnold of Rugby. She married in 1872 Mr. Thomas Humphry Ward, at that time a tutor, of Brasenose Coll., Oxford, now a member of the staff of the Times, and editor of a well-known edition of the English poets. Mrs. Ward displayed deep interest in the establishment ('90) of University Hall, now merged in the Passmore Edwards Settlement, Tavistock Place, of which she is Hon. Sec. In '84 she published "Miss Bretherton," in '88 "Robert Elsmere," in '92 "David Grieve"; in '94 "Marcella" appeared, a short story, "Bessie Costrell," in '95, "Sir George Tressady," a sequel to "Marcella," in '96, and "Helbeck of Bannisdale" in '98. She has also published various literary and historical essays, and a translation of H. F. Amiel's "Journal." She resides at Stocks House, Aldbury, near Tring, Herts, and in London. Herts, and in London.

War Office. Under this Department are War Office. Under this Department are placed the military factories for the manufacture of arms, gunpowder, etc., and the army clothing depôt at Pimlico. The parliamentary chief of the Department is the Secretary for War, who is aided by a Farliamentary Under-Secretary, a Fernaneat Under-Secretary, and a Financial Secretary. Important changes in the organisation of the War Office were effected in Nov. '95, when Viscount Wolseley succeeded the Duke of Cambridge as Commander-in-Chief. The main features of the new system are described in the first army clothing depôt at Pimlico. The parliamentary chief of the Department is the Beuretary for War, who is aided by a Parliamentary Under-Secretary, a Permanent Underscheef of the Department is the Beuretary Tunder-Secretary, a Permanent Underscheef of the powers which have since ripened Secretary, and a Financial Secretary. Important changes in the organisation of the War Office were effected in Nov. '95, when Viscount Wolseley succeeded the Duke of Cambridge as Commander-in-Chief. The main features of the new system are described in the first action of the article Arms, The British. See also Secretary of State and Ministry.

Water Colours. See ROYAL SOCIETY and ROYAL INSTITUTE OF PAINTERS IN COLOURS.

Water Supply of London. See London WATER SUPPLY.

Waterworks Engineers, British Association of. Established in April 96. The objects of the Association are to promote the interchange of information and ideas amongst its members, to receive and discuss communications from members and others as to waterworks engineering, management and finance, to originate and promote improvements in the law relating to waterworks, and to promote the interests of members. Engineers or their assistants may become associates in Class A, and persons of become associates in class a, and persons changed professional knowledge or experience in Class B. There is also provision for hon, members and students. Members pay an in Class B There is also provision for hon-members and students. Members pay an entrance fee of £2 2s and an availal subscrip-tion of £1 1s.; and associates in Class A an entrance fee of £1 1s. and a subscription of 10s 6d., and in Class B an entrance fee of £2 2s. and subscription of £1 1s. The third annual meeting was held at Southampton, May 24th to 27th, '98 President, M1. W. Matthews, M Inst C.E., F.G.S., Waterworks Engineer, Borough of Southampton. The secretary and editor of Transactions is Mr W. H. Brothers. Offices. S.4. Parliament St. Westminster, S.W.

offices, 54, Parliament St., Westminster, S.W. Watkinson, Rev. W. L., ex-President of the Wesleyan Methodist Conference was b. in Hull, of Methodist parents. At an early age he displayed preaching talent of such high order that when, in '58, in his twentieth year, he offered himself for the ministry he was at once accepted, without preliminary college training lis first circuit was Oldbury. Succeeding circuits included, amongst others, Nottingham, Bolton, and Manchester. His first London circuit was New Barnet ('80). rapidly acquired fame as a preacher, and in every circuit was invited to remain for the longest period allowable under the rule of Methodism. In '83 he became a member of the Legal Hundred, and in '84 was the Fernley Lecturer. The subject of his lecture was "The Influence of Scepticism on Character." He was appointed Connexional Editor in '93, and was chosen by Conference in '94 to represent English Methodism in the Conference of the American Methodist Episcopal Church (North). Recently he has been appointed editor of the London Quarterly Review. Amongst his published works, in addition to the Fernley Lecture, are "Noonday Addresses" (4 vols.), delivered in the Central Hall, Manchester, and the Philosophical Hall, Leeds; also a volume of sermons entitled "The Transfigured Sackcloth," in the "Preachers of the Age," series. Address 29, Exeter Road, Brondesbury, N.W.

Tennyson, which was one of the finest tributes paid to the late Laureate. He has also published a collection of "Love Lyrics," and among his earlier efforts are "Epigrams of Art, Life, and Nature," and "The Prince's Quest." Early in '93 "The Eloping Angels," a poetical caprice, and an admirable volume of essays, "Excursions in Criticism," were published. His most important volume, thus far, entitled "Odes, and Other Poems," was published in Dec. '94, "The Father of the Forest" in '95, a volume of sonnets on the Armenian question entitled "The Year of Shame" in '96, and "The Hope of the World, and Other Poems," in '97. A Civil List pension of £100 a year was conferred upon him in '95. Address Devonshire Club. Devonshire Club.

Watts, George Prederick, R.A., was b. 1817
In '43 his cartoon of "Caractacus led in Triumph through the Streets of Rome" ob-Triumph through the Streets or Rome of chained one of the three highest-class prizes of 6300 at Westminster Hall. Three years later, in a similar competition, his colossal oil pictures, "Echo" and CAlfred inciting the Saxons to prevent the landing of the Danes," secured him one of the three highest-class prizes of £500. Mr. Watts executed one of the frescoss in the Poets' Hall of the Houses of Parliament, and painted in freeso the west end of Lincoln's lan Hall. He became a full member of the Royal Academy in '67, but retired in '96. His paintings of ideal subjects, such as "Love and Death," "Hope," "Orpheus and Eurydice," have justly given him a world-wide fame. A baronetcy was offered to, but refused by, him in '86, and the offer was renewed by Mi. Gladstone in '94, but again declined. In '95 he gave to the National Portrait Gallery fifteen oil portraits and two drawings. On his 8oth birthday (Feb. 23rd, '97) a handsomely illumi-nated address of congratulation was presented

to him by many of his friends and admirers.

Ways and Means. The Committee of Ways
and Means of the House of Commons (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer (see FINANCE), and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. Thus, in 1885 Mr. Childers' Budget resolutions increasing the way. Childer's bugget resolutions increasing the apririt duties were agreed to in Committee of Ways and Means, and the higher duties were collected on the following day, and until the bill embodying the resolutions, and the Government which had framed them, were defeated, when the old duties were resoluted to Athletical Control of the when the old duties were reverted to. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to Her Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance ment appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the Appropriation Bill. See CHAIRMAN OF WAYS AND MEANS.

Webster, Sir Richard, M.P. See under

east of Chefoo, and lies nearly opposite Port Arthur, which is situated on the northern side of the entrance to the Gulf of Pechili. Weihai-wei Harbour is sheltered, and can accom-modate a large number of vessels. The city of Wei-hai-wei is in the north-west corner of the bay, and is walled in. Forts command the entrances to the harbour. With the city and harbour there passed under British jurisdiction the island of Liu-Kung, on the north side of the bay, and all Jther islands and waters in the bay, together with a belt of land 10 miles wide along the entire coast-line of the bay, the Chinese population of which is about 350,000. The enrolment of a battalion of Chinese, 1000 strong, for service under British officers at Wei-hai-wei, was ordered (Nov. 18th). CHINA (map).

Weingartner, Felix, composer, conductor, and writer on musical subjects, was b. at Zara, Dalmatia, June and, 1863. At Graz studied under Dr. W. Mayer, and at Leipzig, in '81, obtained a scholarship from the Austrian Government. At Franz Liszt's instigation his opera, "Sakuntala," was brought out at Weiman on March 23rd, '84. From '84 to '89 was conductor at Konigsberg, Danzig, and Hamburg, and in '91 was appointed Court conductor at Berlin. He has composed several symphonic at Berlin. He has composed several symphonic poems, a second opera ("Malawika," produced in Munich in '86). and many songs. Conducted in Munich in '86), and many songs. a concert at Queen's Hall, London, May 17th, '98.

Welldon, Rev. James Edward Cowell, 18 the son of the Rev. Edward Welldon, master the son of the Rev. Edward Welldon, master of Tonbidge School, and was born at Tonbidge in 1854, and ed. at Eton and King's Coll. Cambridge. He was Senior Classic and Senior Chancellor's medallast '77, and in '78 was elected a Fellow of King's. After taking his M.A. in '80, he was ordained deacon in 83 and priest '85, Master of Dulwich College '83-85, and elected Headmaster of Harrow School '85. He was the aleast pracher of Cambridge in '85. yas the select preacher at Cambridge in '85, '38, and '93, and at Oxford in '86-87, Hulsean Lecturer at Cambridge '97. He was Honorary Chaplain to the Queen '80-92, and since then has been one of H.M's Chaplains in Ordinary. Among his publications are: "Translation of the Politics of Aristotle," '85; the lation of the Politics of Aristotle," '85; the "Rhetoric of Aristotle, with Analysis and Notes," '86; "The Nicomachean Ethics, with Analysis and Notes," '92; "Sermon' 85; '86, to Harrow Boys," '87, a second series '91; "The Spiritual Life," '88; and 'Gerald Eversley's Friendship," '95. In '98 he was appointed Bishop of Calcutta and Metropolitan of India and Cevilon. and Ceylon.

Wellington College (Wokingham, Berks). Founded in 1853, in memory of the great Duke of Wellington. The foundation consists of ninety scholarships for the sons of deceased officers, who are educated for £10 a year. There are, as a rule, ten open scholarships, and a limited number of officers' sons are educated at £95 a year. Sons of civilians are also received at a charge of £120 it boarded in the principal building, of £123 if boarded in a master's house. There is a classical school, in which which boys are prepared for the Universities, COMMONS.

COMMONS.

Wel-hai-wel, which was leased to Great cated for the universities, which by China by a Convention signed at Peking in July '96, is a city situated in a deep bay about 18 miles in circumference. The city master, Rev. Bett-am Pollock, M.A.

Bursar, is on the Shantung promontory, about 40 miles

Weish Calvinistic Methodist (or Presby-terian) Church. History. This is the largest Nonconformist Church in Wales, and the only one of native origin. It begas through a purely spiritual movement. In the middle a purely spiritual movement. In the middle of the eighteenth century three clergymen of the Established Church named Howell Harris, Daniel Rowlands, and Howell Davies, led the way in a great revival of religion in North Wales. They formed their converts into societies on Methodist lines, but as they rejected Wesley's Arminian doctrines, they leant more and more towards the practices of the Deschitages of Thurches In 1829 a Confesthe Presbyterian Churches. In 1823 a Confession of Faith was adopted embodying the theological principles of the founders of the Church. Since that date the Presbyterian system has been more fully adopted, and Methodist and Congregational elements have been eliminated from the constitution of the Church. It is now a member of the Presbyterian Alliance, and is in federal union with the Presbyterian Church of England. The Welsh tongue is still used in all the courts and official transactions of the Church, and in the worship of most of the congregations, but the use of English is steadily increasing.—Statistics. the Presbyterian Churches. In 1823 a Confesuse of English is steadily increasing .- Statistics. Synods, 2; presbyteries, 24; churches, 1330, chapels and preaching stations, 1536; ministers, 771; local preachers, 395; deacons, 5434; communicants, 145,000; income, £230,000. There are two theological colleges, one at Trevecca and one at Bala, and mission work is carried on in Brittany and India. Moderator for '98, Rev. J. M. Jones, Cardiff.

WESLEYAN METHODIST CHURCHES.

Wesleyan Methodists are the followers of John and Charles Wesley. The first Society sentatives to Conference—were asked for, and of the Methodist Church was formed in a petition signed by 50,000 Methodists was 1739. The official returns show that there are of forwarded to Conference itself. The petition in Great Britain 2135 ministers and 474,253 class-members of the Weslevan Methodist persuasion; in Ireland 242 ministers and 27,955 members. The Foreign Missions of the Church employ 358 ministers, and number 55,901 members. The French Conference has 37 ministers and 1906 members; the South African Conference, 1990 members; the South Arrical Conte-ence, 199 ministers and 74,483 members; the West Indian Conferences have 98 ministers and 48,270 members; and the Australasian Con-ferences 667 ministers and 99,585 members. The Wesleyan Conference was held in July '98 at Hull. The Prasident is the Rev. Hugh Price Hughes, and the Secretary the Rev. Marshall Hughes, and the Secretary the Rev. Marshall Hurtley. (For foreign mission statistics see Missionary Societies.) The London Wesleyan Mission is the outcome of the interest aroused by "The Bitter Cry of Outcast London," issued in '85 by the Congregational Union. Work is now going on vigorously at St. George's-in-the-East under the Rev. Peter Thompson; at the Leysian Hall, Errol Street, E.C., under the Rev. J. Ash Parsons, at St. John's Square, Clerkenwell, under the Rev. John E. Wakerley; in the West End at St. James's Hall and other piaces under the Rev. Hugh Price Hughes, Mark Guy Pearse, and other ministers; and in the South under the Rev. J. H. Hopkins. The General Secretary is the Rev. W. D. Walters, 58, Cromwell Avenue, Archway Road, London, N. • In 1797—six years after Mr. Wesley's death-

the Methodist New Connexion was formed. Alexander Kilham had headed a movement which sought to place the governing power in the hands of the members instead of in the hands of ministers. In the heat of controversy names of ministers. In the neat of controversy he made statements respecting ministers which could not be sustained, and for this he was ostensibly expelled by the Conference of 1796. He was followed by 5000 seceders, who formed themselves into the new body. In numerical strength this Connexion now ranks third amongst the denominations that have sprung out of the parent body. It has 206 ministers, 1203 lay preachers, and nearly 40,000 church members.

In 1834 a serious division took place on the proposal of Conference to open a training college for ministerial students. Other questions, however, were at issue also. Protest was made against the power wielded by the ministers. Dr. Samuel Warren and Mr. Robert Eckett led the movement. Dr. Warren was excluded in 35, and 20,000 members followed him, forming the Wesleyan Methodist Association Serious as was Wesleyan Methodist Associations Strious as was this division, another, much more serious still, commenced in '44. "Fly Sheets," unagned, but probably written by the Rev J. Everett (the fact was not actually proved), were sent to every Wesleyan minister. The outcry was against "centralisation," and Dr. Bunting, who had for a generation been a leader in the denomination, was especially attacked. In '47 Conference required every minister who had not taken part in the dissemination of the "Fly Sheets" to sign a document to that effect. Two hundred and fifty-six ministers refused. Two years later, Everett, with two fellow-workers pears later, Everett, with two fellow-workers— the Rev. Samuel Dunn and the Rev. William Griffith — were excluded from Conference. Meetings of sympathisers followed, concessions—especially the admission of lay reprewas not received, and concessions were refused. In that year alone ('50-51) 56,000 communicants left the idenomination, and in five years the number of seceders had increased to 100,000. They took the name of "Reformers."
This was the latest as well as the most serious of the divisions in the ranks of Methodism.

Attempts at reunion have been numerous, and not without success. The suggestions that the Old Connexion should be absorbed into the Church of England have not led to the result desired, nor has the wish-often expressedthat the denominations which have sprung trat the denominations which have spring from the Old Body should rejoin it, been realised. In September '81, however, an Œcumenical Methodist Conference—intended Counterneal methodist Conference—intendeg to be the first of a series—was held in Wesley's Chapel, City Road, London. The Methodist Episcopal Church of the United States had made the suggestion. There were 400 dele-gates, representing 28 branches of Methodism and 5,000,000 Church members. Ten years and 5,000,000 Church members. Ten years later a second Conference was held in America, and in 100 a third is to be held in Wesley's Chapel, City Road. A remarkable instance of reunion is seen in the case of the United Methodist Free Churches. First, the Protestant Methodists united in '36 with the Wesleyan Association. Next year a small body in the Midlands (the Arminian Methodists) was absorbed, and in the following year the Independent Methodists of North Wales. In '57 these

amalgamated bodies (with a membership of 21,000) were joined by 19,000 Reformers, and the name United Methodist Free Churches was adopted. The Reformers who refused to amalgamate became The Wesleyan Reform Union the membership of which is now only between seven and eight thousand—about a thousand less than the membership of the Independent Esthedists. With regard to the United Methodist Free Churches, a different denomination from the smaller body just named, it stands, with respect to numbers, next to the Primitive Methodists. At home and abroad there are 397 ministers and 41 supernumeraries, with 3020 local preachers and 91,423 church members. The "foreign districts" are in China, East and West Africa, Jamaica, New Zealand, Australia, and Tasmana. Attempts have been Australia, and Tasmania. Attempts have been made to carry the union of churches still further by the amalgamation of the United Methodist by the analogameton of the Onter Methods body with the New Connexion. These attempts have not yet succeeded. In '92 the United Methodists held their annual assembly, on an invitation from the parent body, in Wesley's Chapel, City Road, London. At the close of the chapel, City Road, London. At the close of the sittings a special resolution was passed, expressing satisfaction at the general feeling existing in the different Methodist bodies in favour of in the different Methodist bodies in favour of closer union, and adding that "it is much to be desired that the question of union, which has been for so many years before the churches, may, at an early period, be mutually and permanently settled by the holding of a Federal Conference at fixed periods; and in other ways making manifest a happy union of all the branches of the great Methodist family."

After the Conference a member of the Livied After the Conference a member of the United Methodist Free Churches presented a stained glass window to the chapel to commemorate the gathering. At the present time the Bible Christians and the Primitive Methodists are discussing the question of amalgamation. It has been suggested that if the amalgamation should take place, the new body should be called "The Presbyterian Methodist Church." or "The Methodist Union Church." The Primitive Methodists took steps, in connection with this movement, to ascertain the views of the New Connexion, and of the United Methodist Free Church denominations, with metadast Free Church denominations, wire reference to an amalgamation of all the minor Methodist bodies. In Australasia the United Methodist Free Churches have joined with other branches of the Methodist family to form one church. They are all at one with each other, and with the parent body, in doctrine. The differences refer almost entirely to the The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The Primitive Methodists, on the other hand, place power in a Conference in which there are two laymen to one minister. The New Connexion and the Bible Christians take a middle course—one layman to one minister. The New Connexion and the Bible Christians take a middle course—one layman to one minister. The New Connexion and the Bible Christians take a middle course—one flayman to one minister. The New Connexion and the Bible Christians take a middle course—one flayman to one minister. The New Connexion and the Bible Christians take a middle course—one flayman to one minister. The New Connexion and the Bible Christians take a middle course—one flayman to one minister. The New Connexion and the Bible Christians take a middle course—one flayman to one minister. The New Connexion and the Bible Christians (Fervalla, 1978) and 1979 an

that its churches enjoy the freedom of Congregationalism whilst the whole body has the cohesion of Methodism.

The greatest development of Methodism has been in the United States of America, where it is now the leading denomination, numerically and financially. The Methodist Episcopal Church of the Northern States has a member-Church of the Northern States has a membership of 2,675,035, and 16,248 ministers. The Methodist Episcopal Church South has 1,442,665 members and 1837 ministers. Other Methodist bodies in America are the African Methodist Episcopal Church, with 615,854 members and 4680 ministers; the African Methodist Episcopal Zion Church, 492,888 members and 2561 ministers; the Methodist Protestant Church, 183,418 members and 2100 ministers; the Coloured Methodist Episcopal Church, 164,308 members and 1680 ministers; the Free Methodist Church, 26,038 members and 938 ministers; and some few smaller churches with about 200,000 more members. In Canada the Methodist Church has 280,537 members and 2031 ministers. figures being added to the number of Methodists in the United Kingdom and in the Colonies, give a total of 7,100,601 members, mostly heads of £milies, from which it is computed that the total number of persons attending Methodist churches throughout the world is about

churches throughout the world is about 30,000,000.

Primitive Methodism is sometimes referred to as a "growth" rather than a "secession," because the first "class" formed was composed of persons who had not previously belonged to any church. Mr. Hugh Bourne, who had been a local preacher amongst the Wesleyans, took charge of this class, and proceeded to form other classes. This was in Staffordshire in 1810. Two years before this, Mr. Bourne had been excluded from the Mr. Bourne had been excluded from the Mr. Bourne had been excluded from the Methodist body because he would not conform to the regulations of Conference respecting Camp Meetings. The Conference of 1807 had decided against Camp Meetings; but Mr. Bourne, and afterwards William Clowes, refusing to be ruled on this question, were excluded. The first Conference of this body man hald in 1802. It is now the largest of was held in 1820. It is now the largest of all the bodies that have sprung from the Methodists. It has missions in Southern, Western, and Central Africa; in South Aus tralia, New Zealand, and Queensland. It has a training college for ministers at Manchester and colleges for youths at York and Birming ham, also an orphanage at Alresford. It has too, a training school for native evangelists in South Africa. Latest statistics: Members

gelistic work in such thoroughgoing fashion that he was declared to be "irregular." Upon that he was declared to be "irregular." Upon this the new denomination was formed. The preachers at first did not take the title of "Reverend." They, however, (like the Primitive Methodists) license women to preach as well as men. In England the denomination is strongest in Conwall and in the Western counties. Numerically it as almost as large and the strongest in the strongest with the strongest in the stronge counties. Numerically it is almost as large as the New Connexion, having nearly 35,000 mem-bers, and ranking, in this particular, fourth amongst the minor bodies of Methodists. The Protestant Methodists were organised in 1829, when more than 1000 members separated from the Leeds societies, because the trustees of Brunswick Chapel (with the consent of Conference) placed an organ in that building in opposition to the wishes of the class leaders. LAGOS, NIGERIA, SIERRA LEONE, etc.

WESTERN AUSTRALIA.

WESTERN AUSTRALIA.

Western Australia is a colony comprising all the western half of Australia beyond the raoth meridian of E. long. It is 1480 miles N. to S., and roos E. to W., and has a coastline of 3000 miles. Area, 975,920 sq. m.; pep., '98, 179,021. Divided into 31 magisterial districts. Capital, Perth, pop. 43,000; chief port Fremantie, pop. 15,000. Representative government was first given to the colony in 70 in a limited form; but in '90 the Imperial Parliament gave a new constitution, vesting the administration in a Governor and Parliament. The Legislative Council, or Upper ment. The Legislative Council, or Upper House, contains 24 members elected for six years; the Legislative Assembly, or Lower House, contains 44 members elected for four years. Electors to the Council must by the Constitution Act of Oct. '93 have resided in the colony for 12 months, and possess Lious freshold or for per annum lessabled or be freehold or £25 per annum leasehold, or be householders to the value of £25, or occupy or mine Crown lands rented at £10 per annum. The qualifications of electors to the Assembly are 6 months' residence in the dis-Assembly are o months residence in the dis-trict; or the possession of £50 freehold or £50 leasehold, or holding a house of the value of £50, or leasing Crown lands at £5 per annum Education is compulsory, though not free Grants in aid are given to denominational schools. The climate varies considerably, for the colony stretches over twenty degrees of the colony stretches over twenty degrees of latitude, but the inhabitants laud it as the healthiest in the world. The products of the colony are gold, wool, pearl shells, pearls, timber, sandal wood, and guano. The gold is found at Kimberley, in the N.W., Yilgarn, in the S.W., and at several points between these two districts. The chief fields are the Murchison, the Ashburton, and the Pilbarra, but the rest extend for shout year miles. The Murchison, the Ashburton, and the Filoarra, but the reefs extend for about 1200 miles. The Coolgardie field, in the S.W., became famous during '95. The export in '90 was only £86,000, but in '93 it amounted to £427,385, and in '97 to £2,56,976. There are 1301 miles of railway open and 276 under construction; 6948 open, 260 under construction of telegraph. Ureat efforts are hairs under to promote the construction of are being made to promote the construction of railways on a grand scale on the "land-grant system," and so to open up back country.

**Revenue, 97, £3,754,747; expenditure, £3,325,912; imports, '97, £6,418,565; experts, £3,040,098; debt, '98, £9,833,100. See Augrralia, British Empire (table), and Diplomatic.

WEST INDIES.

The name given by Columbus to the islands surrounding the Caribbean Sea. They are divisible into the Bahamas, the Greater Antilles, and the Lesser Antilles. The last are also divided into Windward and Leeward are also divided into windward and Leewaru groups; and to them may be added the islands off the Venezuelan coast. The total area is estimated at upwards of 00,000 aq. m., and the total pop. at 5,000,000, of whom two-thirds are negroes. Those of the islands which are important enough will be found which are important enough will be found treated separately under their respective alphabetical headings. A terrible hurricane occurred (Sept. 10th, '98), which did enormous damage, especially in St. Vincent, St. Lucia, Barbados, the Grenadines, St. Kitt's-Nevis, Montserrat, Anguilla, and Barbuda. It was estimated that several hundred people perished and many thousands were rendered homeless and destitute of food. The coasts were strewn with wrecks, and whole towns were destroyed. In Barbados, for instance, 11,426 labourers' houses were swept away, and 4918 damaged. It was computed that there alone £40,000 was required immediately to re-house destitute persons. The Lord Mayor of London at once opened a relief fund, and aid was promptly rendered by the Imperial authorities. The Lord Mayor's Fund on Nov. 18th amounted to £42,800.

During '97 a Royal Commission, consisting of Sir Henry Norman, Sir David Barbour and Sir Edward Grey, was occupied in investigating the condition of the sugar industry in the West Indian colonies, and specially the causes of the present depression. The report of the Commission was published as a bluebook, Oct. 2nd, '97, and the conclusions of the Commissioners may be summarised as follows:—The sugar industry in the West Indies is in danger of great reduction, which in some colonies may be equivalent, or almost equivalent, to extinction. The depression of the industry is due to the competition of other sugar-producing countries, and in a special degree to the comcountries, and in a special degree to the com-petition of beet sugar produced under a system of bounties. It is also affected by high pro-tective tariffs. The causes of the depression are permanent, inasmuch as they are largely due to the policy of foreign countries, and there is no indication that that policy is likely to be abandoned in the immediate future. It is not due in any considerable degree to extravagance in management, to imperfection in the process of manufacture, or to inadequate supervision consequent on absentee ownership, and the removal of these causes, wherever they exist, would not enable it, generally, to be profitably carried on under present conditions of competition. The depression is increasingly causing estates to be abandoned, and such abandonment is causing, and will cause, distress among the labouring population, including a a large number of East Indian immigrants, and will seriously affect for a considerable time the general prosperity of the sugar-producing colonies, and will render it impossible for some, and perhaps the greater number of them, to provide, without external aid, for their own government and administration. There is no industry or industries that could completely replace, in such islands as Barbados, Antigua, and St. Kitts, the sugar industry. In Jamaica, in Trinidad, in British Guiana, in St. Lucia, in

St. Vincent, and to some extent in Montserrat and Nevis, the sugar industry may in time be replaced by other industries, but only after the lapse of a considerable period and at the cost of much displacement of labour and consequent suffering in Dominica the sugar industry is

not at the present day of great importance.
Coming to the question of remedies, the Commissioners had to dismiss the best remedy, the abandonment of the bounty system by Continental nations, as quite improbable. They were divided in opinion as to the imposition of countervailing duties on bounty-fed sugar imported into the United Kingdom, the chair-man, Sir Henry Norman, supporting, and his two colleagues opposing, such a course, Various special remedies or measures of relief were, however, recommended as follows: (1)
The settlement of the labouring population on
small plots of land as peasant proprietors;
(2) the establishment of minor agricultural
industries and the improvement of the system of cultivation, especially in the case of small proprietors, (2) the improvement of the means of communication between the different islands; (4) the encouragement of a trade in fruit with New York, and possibly, at a future time, with London; (s) the grant of a loan of £120,000 from the Imperial Exchequer for the establishment of central factories in Barbados. expenditure which these measures would involve was estimated as follows (1) A grant of £27,000 a year for ten years, to carry out the special remedies i ecommended in (a), (3), and (4); (2) a grant of £20,000 a year for five years for the smaller islands; (3) immediate grants of £60,000 and £30,000, or £90,000 in all, to clear off the floating debt in some of the smaller islands, and to make roads and settle smaller islands, and to make roads and settle the labouring population on the land in Dominica and St. Vincent, (4) a loan of £120,000 to Barbados for the establishment of central factories. As to the expenditure which might be necessary for relieving distress (especially in British Guiana and Barbados), in promoting emigration, and in supporting and repatriating East Indian immigrants, the Commissioners were unable to form any estimate. missioners were unable to form any estimate, but it might be very great, if there occurred a sudden and general failure of the sugar indus-try in Barbados and British Guiana. In such a contingency neither British Guisna nor Barbados would be able to meet the necessary cost of administration for probably a considerable number of years. The action taken by the Imperial Parliament in the direction of grants imperial Farnament in the direction of grants in aid will be found described under SESSION, sect. 31. A Sugar Bounties Conference was held, on the invitation of the Belgam Government, at Brussels, in June '98, Austria, Belgium, France, Germany, Great Britain, Holland, Russia, Spain and Sweden being represented. France, Germany, Great Britain, Holland, Russia, Spain and Sweden being represented. It soon appeared that France would not consent to the complete suppression of all export bounties on sugar, whether direct or indirect, and that Russia declined to discuss the question of her internal legislation, contending that her system did not amount to a bounty on the exportation of sugar. Austria and Hungary, however, with Germany, Belgium and Holland, were ready to abolish their bounties, and Spain and Sweden would offer no opposition to such a course. But no action could be expected from these countries in face of the attitude of France and Russia, and so the conference separated without any practical results. The British without any practical results. The British

delegates reported that, failing any arrangement for modifying the French and Russian systems acceptably to other countries, the only course would be for those other sugar-producing countries to conclude a convention, suppressing bounties within their dominions, and engaging to impose countervailing duties on, or prohibit the entry of, bounty-fed sugar coming from states not included in the convention. The West Indian, planters then reiterated their demand for countervailing duties, and a conference of their representatives was held in Barbados in September '98. A resolution was adopted, in which appreciation of the Imperial grants was expressed, but also the opinion that the Imperial Government should, as a matter of right and as the only possible remedy, exclude bounty-fed sugar from the English market or impose countervalling duties. This latter course was taken by the United States during the year.

during the year.

Westminster Abbey. A Commission was appointed, April '90, to inquire into the facilities offered by the Abbey for providing for the interment, and of otherwise preserving the memory of Her Majesty's subjects, in the mainer which has been customary for many centuries; and to hear evidence, and to consider plans for providing at the Abbey, or elsewhere, an additional place for memorials, should such a provision appear necessary. The Commission-ers reported in '91 that of the various schemes which had been brought before them, there were two which they commended as specially suited to the purpose. The one proposed to clear an area then occupied by certain houses in Old Palace Yard, and to erect upon a portion of the ground so cleared a monumental chapel connected with the Abbey at Poet's Corner. ventured to recommend, whether the latter ventured to recommend, whether the latter part of this proposal were adopted or not, that no time should be lost in removing the houses in Old Palace Yard referred to, which not only concealed, to a great extent, the architecture of the Chapel of Henry VII. and the ancient Chapter-house, but were also a constant source of danger to the Abbey from fire. This has since been done, and the result is that a most striking view of the Abbey and of Henry VII.'s Chapel is opened up. The other plan contemplated the erection of a monumental contemplated the striking view of the Abbey and of the plan contemplated the erection of a monumental contemplated the striking view of the striking vi plan contemplated the erection of a monumental chapel on a vacant piece of ground, the site of the old Refectory, in possession of Westminster School, lying immediately south of the Great Cloister and parallel to the nave of the Abbey. After a careful review of the arguments, they recommended that of the two schemes the latter should be adopted. A dissentient report, signed by the late Lord Leighton, Sir A. B. Layard, and Dean Bradley, advised that preference should be given to the site at the south-east of the Abbey.

Weyman, Stanley John, was b. at Ludlow, hropshire, Aug. 7th, 1852, and ed. at Shrewsaury School and Christ Church, Oxford, taking is B.A. degree in '77. He decided to follow in legal profession, and was called to the bar the Inner Temple in Jan. '81, joining the xford Circuit. On this circuit he practised il '80, when his first work, "The House of the Wolf," a romance of French history, was published. His health then giving him considerable trouble, he was compelled to spend some ime abroad, and this led him to abandon his ractice. In '90 "The New Rector" appeared, book of a totally different style from his rist book. It is a modern novel of the school of Anthony Trollope. "The Story of Francis Dudde" followed; and then came, in '93, the book which has made him such a favourite with all lovers of romance, "A Gentleman of France." This novel has been translated into French, German, and Swedish, and has proved one of the most successful of recent novels. In '94 hep published "Under the Red Robe," and "My Lady Rotha." The former is a tale of the time of Richelieu, and the latter a stirring story of Germany during the Thirty Years' War. In '96 appeared "The Red Cockade," which was followed in '98 by "Shrewsbury." Mr. Weyman is married, and lives at Llanrhydd, near Ruthin, Denbighshire.

Wheat. The crop for the year '97 was an unusually poor one, especially in view of the growing requirements of the world. Coupled with this was the fact that what is known as the visible supply—that is, practically, the public stocks—were considerably below the average for the time of year, being less than half as large on Aug. 1st, '97, as on the same date in '95. All these facts pointed to shortness of supply, the only uncertain factor being the amounts of the visible supplies or stocks held in private hands. From the following table it will be seen that during the last three months of '97 and the first four months of '98 prices were firm, with a slightly upward tendency. The statistical position led to the formation of a corner in the United States, by which a certain Mr. Letter endeavoured to secure all the stocks in his own hands, and was for a time largely successful in doing so. This rushed prices up in May to an abnormal extent in comparison with those ruling in late years. By June, however, there were signs that the maintenance of the corner had become a matter of extreme difficulty, and by the end of the month it had practically broken down with disastrous results to its author. It had mean-while become increasingly evident that the crop for '98 would be an unusually large one, and all these circumstances combined to bring prices in the autimn months down to rates below those ruling at the same time in '97.

The following table will give a rough view of the course of the market.

	English Wheat.		Califo Wh		Fle	Flour.		
'97-8.	Price p	-	Price p	er qı	Price 280 lb.	e per sack.		
	8	d.	•	d.	s.	d.		
Oct.	32	3	38	71	29	0		
Nov.	33	9	39	o	29	1		
Dec.	34	1	39	6	20	0		
Jan.	34	10	38	o	. 29	0		
Feb	35	1	39	I	30	•		
March		6	. 39	44	30	0		
Aprıl	36	3	41	6	31	3		
May	46	0	51	2	39	7		
June	42	7	44	8	35	0		
July	37	3	3-2	6	20)	6		
Aug	. 28	6	30	0	27	6		
Sept	. 29	0	,1	0	27	6		

At the same time the important fact has to be borne in mind that visible stocks have been undoubtedly depleted to an unusual extent, and that they are still at a very lowlevel. The position is shown in the following table. There seems, therefore, a fair prospect that for some time to come prices will remain moderately steady in the absence of any new factors

	Visible	Supply,	Aug. 1st
Year			Qrs.
'91			11,450,000

'98	301,000,000
'97	280,000,000
'98	330,000,000

The danger of a famine 11 om lack of supplies of wheat was dealt with at the meeting of the British Association in the presidential address, in which it was pointed out that the population was increasing much more rapidly than production, and that within 30 years something like a wheat famine would become chronic if in the meantime no remedy could be devised. The President regarded the question as mainly a chemical one, and principally resting in the utilisation of the free nitrogen which is known to exist in the atmosphere. Into the chemical aspect of the question we do not here enter, but it may be pointed out that Sir William Crookes underestimated the amount of the actual produce, and hardly took sufficient account that there are still large areas of the world where wheat could advantageously be cultivated which are not utilised. Asia Minor,

the Danubian provinces, and Queensland (in which latter country alone it is computed that which latter country alone it is computed that there are 50,00,000 acres of virgin soil suitable for wheat) may be cited as examples. Further, the methods of cultivation in many parts of the world, notably in America and India, are capable of immense improvement.

White, Sir George Stuart, G.C.B., G.C.S.I., G.C.I.E., V.C., was b. in 1835, and entered the army in '53. He has had a brilliant career, and won his V.C. at Charasiab in '79, and at Vindars Sart' '80, where consequences are record.

K mdahar Sept. 80, by his conspicuous personal bravery. He served in the mutiny, in the Afghan campaign '79-80, in the Nile expedition '85, and in the Burmese expedition '85-7 as commander of the forces there, when he gained his promotion to the rank of Major-General. In '89 he was appointed to the command of a first-class district in India, and in '93 he succeeded Lord Roberts as Commander-in-Chief in India. He was appointed Quartermaster-General of the Army in '98, following Sir Evelyn Wood in that office. He is a D.L. and J.P. for the county of Antrim. Address: Whitehall, Broughshane, co. Antrim.

co. Antrim.

Whyte, Rev. Alexander, M.A., D.D., was b. at Kirriemuir, Forfarshire, 1837; ed. at Aberdeen University (M.A. '62) and Free Church College, and ordained at Glasgow in '66. Four years later he became minister of Free St, George's, Edinburgh, the premier Presbyterian church in Scotland, and this position he still holds. He is a D.D. of Edinburgh University. In '98 he was elected Moderator of the Free Chutch George's Assembly. Works. 'Com.

In '98 he was elected Moderator of the Free Church General Assembly. Works "Commentary on the Shorter Catechism," "The Four Temperaments," "Bunyan Characters" (3 vols), "Samuel Rutherford's Correspondents," "Bible Wilberforce, Canon Albert Basil Orme, is the youngest son of the late Bishop Wilberforce of Oxford and afterwards of Winchester, and was ed. at Exeter College, Oxford, where he graduated B.A. in '65, M.A. in '66, D.D in '94. He was curate of Cuddesdon' '66-70, chaplain to the Bishop of Oxford '66-70, curate of St. Jude. Southses. '61-71, and rector of St. Mary's. Jude, Southsea, 61-71, and rector of St. Mary's, Southampton, 71-94. In 94 he was given the living of St. John's, Westminster, and made a Canon of Westminster. The Speaker appointed him as his chaplain in Jan. '96. He is famous for his eloquence in the pulpit and

as a temperance advocate. Address. 20, Dean's Yard, Westminster Abbey.
Withelmas I., Queen of the Netherlands, was b. 1880. She is the daughter of William III., was b. 1880. She is the daughter of William III., of the Netherlands, by his second wife, the Princess Emma Adelaide Wilhelmina Theress. Her mother is sister of H.R.H. the Duchess of Albany, being daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, in Nov. 50, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31st, 78), and, amidst the enthusiasm of her people, was installed as Sovereign.

William II. King of Prussia and German Emperor, is the eldest son of the late Emperor Frederick III., by Victoria, Princess Royal of England, and was b. Jan. 27th, 1850. He succeeded his father June 15th, 38. Ed. at the gymnasium of Cassel, and submitted to the ordinary discipline of that establishment until '77, when he entered the University of Bonn.

77, when he entered the University of Bonn. He married on his twenty-second birthday, in 81, the Princess Augusta Victoria, of Schleswig-Holstein - Augustenburg, a niece of Prince

Christian. An International Labour Conference was inaugurated by the Emperor in '90. ence was inaugurated by the Emperor in 90. A state visit to Heligoland and to Amsterdam in 91 preceded his Majesty's arrival in England, accompanied by the Empress, in July. They were entertained at a series of splendid festivities, and the Emperer was presented with the freedom of the City of London. His Majesty sent a congratulatory telegram to President Krugrr when Dr. Jameson's force was defeated in Dec. '95, an act which caused considerable surprise in Great Britain, though it was afterwards explained that His Majesty had no unfriendly intent towards this country. He was equally prompt in sending his congratulations to the Sirdar on his victory at Omdurman in '98. In October and November Omdurman in '98. In October and November of that year he paid a visit, with the Empress, to Constantinople, where their Majesties stayed some time as the Sultan's guests, afterwards going on to Palestine and Jerusalem. See Turkfy. See also Germany and Yachting.

Wills. It should be borne in mind that the object of making a will is to make provision for the personal estate and effects of the person to whom they belong going to people

for the personal estate and effects of the person to whom they belong going to people other than those amongst whom they would be distributed by law in the event of no will being made. A will may be quite simple—couched in ordinary language; and though the intention of the testator is always sought for intention of the testator is always sought for in construing the meaning of the will, yet if he make use of technical or legal terms, those terms will be taken in their legal sense, which may be quite contrary to the testator's intention. A will must be in writing, and must be signed, or, if already signed, must be acknowledged, by the testator in the presence of two witnesses who must each sign the will acknowledged, by the testator in the presence of two witnesses, who must each sign the will in the presence of the testator and in the presence of each other. If a witness be a legatee he will lose the gift left to him, and his legacy will fall into the residuary estate; But the fact of a witness being a legatee will not invalidate the will. Property acquired after the date of the will passes under it, as the will is said to speak from the date of the testator's death and not from the date of the will. The last will in point of date is the one which will be admitted to probate. A will may be revoked in the following ways: (1) By the marriage of the testator; (2) By destruction of the will; (3) By a subsequent will, or portions of a former will by a codicil. The testator must appoint an executor or executors testator must appoint an executor or executors to carry out the provisions of the will, or it will be necessary for the Probate Court to appoint an administrator cum testamento annexo (with the will annexed) in order to do so. Impediately upon the testator's death the executor becomes entitled to all the testator's executor becomes entitled to all the testator's personal property. He is bound first of all to bury the deceased and prove his will, then to pay out of it any debts due by the testator; and then to distribute the property, so far as it will go, in accordance with the will. Wills may be proved either at the Principal Registry, Somerset House, or at the District Registry of the district in which the testator had his permanent should at the time of his death. Execut the district in which the testator had his per-manent abode at the time of his death. Execu-tors may prove the will personally without the aid of a solicitor. (For the Legacy and Succession duties payable, see DEATH DUTIES.) Should there be more than one executor, each can exercise All the powers of the office, except that all must join in bringing any

action respecting the estate. The office continues to the survivors or survivor. Should the executor renounce, or die, before taking out probate, or not appear when cited to take probate, his rights of executorship cease entirely. But when the last surviving executor dies, then his executors are also executors of the original teststor. If the executor is an infant, the Probate, Divorce, and Admiralty Division of the High Court will grant adminibriston of the right count with grant admini-stration to his guardian or some other person who becomes administrator durante minors atate ("during the minority"). An executor merely in virtue of his appointment is released from any debts due from him to the testator, and may retain out of the assets any debt due from the testator to him in priority to all other debts of the same degree; but this provi-sion is so guarded in equity as to be practi-cally of no effect. Any person who takes upon himself to be executor without cally of no effect. Any person who takes upon himself to be executor without having been appointed, is said to be an executor de son tort ("of his own wrong"), and is not allowed to derive any benefit from the office. Should no executor be available, the Court will grant letters of administration cum testamento annexo ("with the will supported") as distinct from the ordinary letters annexed"), as distinct from the ordinary letters of administration granted when a person dies without making a will.—Letters of Administrawithout making a win.—Betees of a dammins of them. In the event of a person having personal property dying without a will, application is made, generally by the deceased's relatives, or sometimes by a creditor, to the District Registrar of the Probate Court, who thereupon grants letters of administration to the person proposed for the office, who will have to make affidavits of the assets and debts, and sign the prescribed oath. He will then pay the debts owing by the testator, and distribute the remainder of the estate in accordance with the remainder of the estate in accordance with the various Acts dealing with the property of intestates. Copies of all wills that have been proved can be seen at Somerset House by any one on payment of the fee of is. See Law, '98' Winchester, Bishop of. See under Peer-

Minchester College, the oldest of our public schools, founded (1367) by William of Wykeham. as a nursery for the "New College" he had recently founded at Oxford. It is certain, however, that some years before that date Wykeham was maintaining and educating poor scholars, and the actual date of the opening of the College was March 26th, 1393. About a dozen vacancies yearly occur for foundationers, who are elected by the governors after open competition. Her Majesty gives two gold and two silver medals to be competed for Tenable at the Universities are four exhibitions of £50 for four years, and at New College. Oxford, six scholarships. The quingentenary of the College, its 500th anniversary, was observed on "Domum Day," July 25th, '93.

Windward Islands, The, so called in distinction from the Leeward Islands (q.v.), with reference to the trade winds, form part of the Lesser Antilles. They include Grenada, the Grenadines, St. Vincent, and St. Lucia (all of which see under their respective alphabetical headings). Barbados and Tobago, which formerly belonged to the group, were separated formerly belonged to the group, were separated in '85 and '80. All the islands are under one governor, but each has its own administrator June. The income from the Pfeiffer Bequest

and separate constitution. See British Empire (table), Diplomatic, and, as to the disastrous hurricane of '98, West Indies.

Wolseley, Lord. See under Peerage.

WOMEN, HIGHER EDUCATION OF.

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '22 the Girls' Public Day School Company, which, with the Church Day School Company, which, with the Church Day School Company, which, with the Hand, and prepared the way for the Higher—that is, University and College—Education of Women. These two Companies have now 64 schools and 10,000 pupils, entirely taught and officered by women, many of whom have had a college training. The National Union founded, in '77, the Teachers' Training and Registriano Society, out of which has grown the Earis Grey Training Oollege, Salusbury Road, Brondeabury (Principal, Miss Alice Woods), and, indirectly, the Cambridge Training College for Women, incorporated Jan. '93 (Principal, Miss Hughes), and the St. George's Training Oollege, S, Melville Street, Edinburgh (Principal, Miss M. R. Walker), opened '86. St. Leonard's School, St. Andrews; Roedean School, Brighton; and wytombe Abbey, Bucks, are large reaidential establishments founded to give to girls similar advantages '22 those open to boys in our great public schools.

public schools.

Oxford and Cambridge now offer many facilities to women desiring advanced education. At Cambridge the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, instory, mediæval and modern languages law, Semitic languages, Indian languages and theology, have, since '81, been open to women. The conditions of entrance are (1) residence for a specified number of terms (five to thirteen, according to circumstances) either at Girton or Newnham College, or within the precincts of the University, under the regulation of one or other of these colleges; (2) a pass gained at either (a) certain parts of the higher local examination, or (b) the University Previous examination ("Little Go"), or any examination which ordinarily excuses a member of the University from this. To all women who pass any one or more of these triposes, certificates are formally granted by the University, declaring that they have attained the standard of a first, second, or third class in an honour sexamination for the B.A. degree; but this degree, for various reasons, is not conferred upon them. Candidates who attain a standard equivalent to that required for the ordinary B.A. (or "Poll") degree, receive a certificate to this effect. Girbar Gollege (Mistress, Miss Welsh) was tounded at Hitchin in '60, removed to Cambridge in connection with the Association for Women's Lectures in Cambridge, and incorporated in '72. It now numbers about 115 students, with seven resident women lecturers, a vice-mistress, a junior bursar, and a librarian. Entrance and scholarship examinations are held in London in the months of March and

of £5000 is devoted to scholarships. Students can attend University lectures in Cambridge, in addition to those provided by the bridge, in addition to those provided by the college. The college fees (inclusive of both university and college charges) are £105 per annum. The South Hall, Newnhâm College, Cambridge (Principal, Mrs. Sidgwick), was opened in '75, and incorporated in '80. North Hall (Vice-Principal, Miss B. A. Clough) followed in '80, Clough Hall in '88, and the Pfeiffer building in '22; res students and re Pfeisier building in '93; 158 students and 12 resident tutors form the collegate body. A small isolation hospital is built to receive any cases of infectious illness that may arise. any cases of infectious filters that may arise.

An entrance examination is neld annually in March at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Fees, inclusive of board, lodging, and teaching, are from £25 to £32 per term. Women are admitted by the Council at out-students of the college by the Council at out-students of the courge if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are bond fide students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. Out-students' fees are about £9 per term. Application for admission as out-students should be made to Miss M. G. Kennedy, Shenstone, Cambridge, before Sept. 1st in each year. A scheme of our respondence teaching was mangurated in '70 by Mrs. Peile, and numbers students in all parts of the world. Information respecting it can be obtained from Miss M. Bateson, 74, Huntingdon Road, Cambridge.

In Oxford the principal final honour examina-tions of the University (in classics, natural tions of the University (in classics, natural science, history, mathematics, jurisprudence, theology, Oriental studies, the degree of B.C.L., and the examinations for the degrees of Bachelor and Doctor of Music), are open to women. In modern languages, where no final honour examination for the B.A. degree is as yet provided by the University, a special women's honour examination is held, with a standard equivalent to that of the University honour degree examinations. second public examination (pass degree) of the University is open to women, as well as Pass Moderations. Before a candidate can enter for either pass or honours, Responsions must be taken, unless some equivalent (as the first examination for women at Oxford, the Cambridge "Previous," the higher examination of the Oxford and Cambridge board, the London matriculation, the final pass of the University of Ireland, the Victoria University entrance examination, the Cambridge higher local in two languages of group B and group C, or the Oxford senior local in two languages, and mathematics) has been passed. Graduates of Colleges which are admitted to membership in the Association of Collegiste Alumnse (U.S.A.) econd public examination (pass degree) of the the Association of Collegiate Alumnæ (U.S.A.) are excused this examination if they become candidates for honours at the second examination. Certificates are awarded as the result or the examinations, and in the case of honours the names are entered in the *University Gasette*; but

the B.A. degree is not conferred upon women. Communications should be addressed to the Secretary, H. J. Gerrans, Esq., Clarendon Buildings, Broad Street, Oxford. The Univer-sity, in ox, established in Oxford a professtonal examination for teachers, and arranged a course of Training in Theory and Practice of Teaching. To both of these women are of Teaching. To both of these women are admitted on precisely the same terms as men (apply to Miss A. J. Cooper). Somerville College, Oxford, (Principal, Miss Maitland), founded in '79, incorporated '81, the name changed from "Hall" to "College" '94, has yo students and 4 resident tutors. There is no entrance examination, but all students are examinations, but all students are examinations, but all students are expected to pass "Responsions" before entering the college, unless they have passed one of the examinations accepted as equivalent. Fees, inclusive of board, lodging and teaching, vary from £86 to £92, according to the rooms selected. The college is undenominational in principle. The Council confers certificates showing all the examinations passed by the student, recording the term of residence, and stating that the student has qualified for the Degree. Students who have resided three years and taken honours become members of the college (on payment of a small fee, and by keeping their names on the books) with right of voting at general meetings and elections of Council. Lady Margaret Hall, Oxford (Principal, Miss Wordsworth), was also of voting at general meetings and elections of Council. Lady Margaret Hall, Oxford (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 47 students and 3 resident tutors. Candidates for entrance, who have not yet passed the Oxford first examination, or an equivalent, are expected to pass an entrance examination in two foreign languages and elementary mathematics. Scholarships are offered each June. St. Hugh's Hall, Oxford (Principal, Miss Moberley), founded in '86, is intended sys students unable to bear the expenses Miss Moberley), founded in 80, is intended for students unable to bear the expenses of Lady Margaret Hall, and has about 25 students and x tutor. The fees for board and lodging, exclusive of tutton, are from £45 to £65 a year. The conditions of entrance are the same as for Lady Margaret Hall. Lecture arrangements for women in Oxford are under the management of a joint association under the management of a joint association for educational purposes, consisting of representatives of the women's college or halls of residence, and of the home students, with the tutors in the principal subjects, and others interested in education. A member of the Hebdomadal Board sits as a member of this association (Secretary, Miss A. M. A. H. Rogers). Unattached students are allowed, under certain Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of Mrs. A. H. Johnson, 8, Merton Street. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in 83, and a scheme of teachers' training is under the management of Mrs. Scott, Merton College. "St. Hilda's" (Lady Resident, Mrs. Burrows), is a Hall of Residence for old Cheltonians and others who may desire a final year, or more others who may desire a final year or more of study before entering on professional work. Twenty-one students are now in residence. The charges are similar to those at Somerville College and Lady Margaret Hall.

The University of London confers its degrees equally upon men and women. Women students are received at the Royal Eclieway

Gollsge, Egham, opened in '87 (Principal, Miss Emily Penrose). The object of the college is to provide the instruction necessary for the London degrees in science and arts, the pre-liminary M.B., the examinations of the Uni-versity of Oxford, and for the Royal University of Ireland. Instruction in music, drawing, and painting is provided. The entrance examina-tion, held in September, includes English, tion, neld in September, includes English, foreign languages, and arithmetic. Scholar-ahips are competed for in Jely. All scholars must read for honours. Other students are under no such restriction. There are 113 students, 8 resident women lecturers, and 10 non-resident professors and teachers. Terms, inclusive of board, lodging, and instruction, are 490 per annum. No student may enter for less than one year, or reside for more than four years, without special leave. Bedford College, London, incorporated '49 (Principal, Miss Ethel Hurlbatt) offers scholarships, prepares resident and non-resident students for the London degrees in arts and science, with special classes in chemistry for the first M.B. examination, and has college courses for students wishing to pursue continuous study without seeking a degree. Students are also admitted to separate classes. It receives an annual sum of £1200 from the "Grant to the University Colleges of Great Britain." £4000 has also fallen to its share from the Pfeisser Bequest to be expended in scholarships, and an annual grant of £500 from the Technical Education Board is used for the equipment of the laboratories. Fees for board and residence from £58 to £68 per annum. Tuition fees for the London examinations from £27 to £44 a session. Students are not admitted underseventeen except in special circumstances, and, if necessary, have their acquirements tested by preliminary examination. An art school (Visitor, Hubert Herkomer, R.A. Professor, E. Borough Johnson), with teaching based on the method of Professor Herkomer, as trached to the College as well as a Teachers'. is attached to the College as well as a Teacher's Training Department (Head, Miss H. Robert-son, B.A.). With the session of '05-6 there was instituted a complete and scientific course was instituted a complete and scientific course of instruction in Hygrene, under Dr. T. M. Legge, M.D., to enable women to qualify for the various professional posts in Hygrene now open. Queen's College, Harley Street, and the ladies' department of King's College, Kensington Square (Lady Superintendent, Miss L. M Fathfull), provide lectures and classes as preparation for the London and Oxford examination for the London for t raunuily, provide lectures and classes as preparation for the London and Oxford examinations. A residence for students is under the charge of Miss E. Fauthfull. Westfield Cellege, Hampstead, founded in '82 (Mistress, Miss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, fros per annum. Students of University College, London, or of the London School of Medicine for Women, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square (Principal, Miss Grove). Victoria University follows the example of London in conferring its degrees upon women. Houses of residence for them are recommended at Manchester, Liverpool, and Leeds in connections with the service of the se

the Women's Department, Miss Edith Wilson, 223, Brunswick Street, Manchester.) A hall of residence for women in Liverpool is now (Oct. 38) open to students. Fees for residence, £40 to £55 per annum. College tuition fees, £20 to £25 per annum. Particulars from Miss Roberts, 163, Edge Lane, Liverpool. The provincial colleges of Birmingham, Bristol, and Nottingham also provide for women. The University of Durham, since '95, by special Supplementary Charter, grants degrees to women except only in Divinity. A women's hall of residence is in contemplation for Durham. Scholarships for women students are offered in October of each year. Apply to the Censor of Women Students, Mrs. Ellershaw, 46, North Bailey, Durham. The Durham College of Science at Newcastle-on-1 yne (Sccretary, H. F. Stockdale), represents the faculties of science, medicine, and engineering in the University of Durham, and is open to students of either sex. in Divinity. A women's hall of residence is Durham, and is open to students of either sex.

A University Hostel for women is open at
Eslington Tower, Jesmond, Newcastle-on-Tyne
(Mistress, Miss Perry). Fees for board and
residence from foo to foo per session. In Ireland the Royal University of Ireland (Dublin) offers degrees to women, and also exhibitions and scholarships. In Scotland the University and scholarships. In sociand the University of St. Andrews grants the degree of LL.A. to women on the result of examination in the subjects taught in the University, together with history, music, fine arts, sesthetics, modern languages, and the natural sciences. University Hall (Warden, Miss L. I. Lumsden), opened Sept. '96, accommodates 24 students. Fees for board and residence about £60 per annum. Scholarships, value from Lao to Lrs, are competed for in October. At Edinburgh University (a.v.) women are admitted to the Arts classes with the men, and on the same Arts classes with the men, and on the same terms as regards academic privilege. The Burns' House, University Hall, 457, Lawnmarket, Edinburgh, inaugurated June '94, is intended for the accommodation of women students of the University, artists, teachers, and others. All particulars of Mrs. Salmon, 8, Ramsay Garden, Edinburgh. Queen Margaret College. Glassow (Hon. Secretary, Miss garet College, Glasgow (Hon. Secretary, Miss T. A. Galloway), by recent incorporation is now the women's department of the Univernow the women's department of the University of Glasgow as a non-resident college for women governed by the University Court and Senate. Women are there prepared for all degrees in arts and medicine of Glasgow. Matriculated students are entitled to vote for the Lord Rector of the University, and women graduates become members of the General Coursel of the University. For a small feast. nations. A residence for students is under the charge of Miss E. Faithfull. Westfield College, Hampstead, founded in '82 (Mistress, Miss Maynard), receives about 40 students; but they are not compelled to take the entire course, or to enter for any University, but they are not compelled to take the examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic, and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, £105 per annum. Students of University College, London, or of the London School of Medicine for Women, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square (Principal, Miss Grove).

Victoria University follows the example of London in conferring its degrees upon women. Houses of residence for them university for the University, and women and council of the University. For a small fee students council of the University. For a small fee students can be university founts and the university of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University museum and chapel, and, in part, the use of the University with access to the University museum and chapel, and, in part, the use of the laborary with two dents can have theuse of the University in the cases to the University museum and chapel, and, in part, the use of the Coulents are selected to the College in '95, erected with mean and t 49 98. per annum. Residence fee, Li 15. to

Ag 98. per annum. Residence fee, £1 10. to £1 60. per week. The Hall is near to the King's College, the seat of the arts classes. In South Walss the classes of University College, Cardiff, in arts, science, and medicine are open to students, men and women alike, with scholarships. Women students are received at Aberdare Hall (Principal, Miss Kate Hurlbatt). Terms for board and residence from £30 to £40 per annum. "Normal" students in school management, etc., may reside in Aberdare Hall, and spend the necessary time in teaching in the Board Schools of the town. A school of cookery and a Teachers' Training Department is attached to the College. Scholarships are competed for in September. The University College of North Walss (Bangor) gives the same advantages to women as to men in preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh and Glasgow. A new University Hall for Women Students (Lady Superintendent, Missel M. Maude) was open of Oct. 87. Open entrance Scholarships (from £30 to £10 in value) are offered to men and women alike. University College, Aberystwith, prepares for the requirements of the London and Welsh examinations for B.A., M.A., B.Sc., for degrees in medicine, and the entrance examinations of the older universities. Entrance scholarships, open to open to universities. Entrance scholarships, open to women, are competed for annually. Alexandra Hall of Residence (Principal, Miss E. A

Carpenter) has rooms for 147 students.

For the special study of medicine, women are eligible for the medical degrees of the University of London (Burlington Gardens, W.), the Royal University of Ireland (Earlsfort Terrace, Dublin), the conjoint examination of the Royal College of Physicians and the Royal the Royal College of Physicians and the Koyal College of Surgeons in Ireland (Dawson Street, Dublin), the Colleges of Physicians and Surgeons, Blainburgh, the Faculty of Physicians and Surgeons, Glasgow (conjoint), the Society of Apothecaries, London, and the University of Durham. It is easier, and takes a shorter time, to pass the colleges than the Universities, but by the new regulations (22) five verse instead of four is the required five verse instead of four is the required five years instead of four is the required period for which a student must be registered as such. Students are not admitted under the age of eighteen, and, unless matriculation has been taken, a preliminary examination in English, Latin, and one other matriculation has been taken, a preliminary examination in English, Latin, and one other language, elementary mathematics, and arithmetic, has to be passed before registration. The necessary hospital work in the case of London can be done at the New Hospital for Women, 144, Euston Road, or at the Royal Free Hospital. In Scotland and Ireland women atudents are admitted to the local hospitals. At the Royal Infirmary of Edinburgh arrangements are made for the clinical education of women, giving accommodation according to the demands of the Triple Qualification Board, 4300 having been raised and presented to the Infirmary in recognition of the "fact that women students have been admitted to qualifying instruction in its wards." All particulars and details of study are obtainable from the Secretary, Miss Heaton, Landon School in September. In addition to College Hall (see above) there are boarding houses for medical.

students (women) at 3, Endsleigh Gardens, W.C. (Mrs. Greene), at 5, Endsleigh Street, W.C. (Mrs. Clarke Kerr), and at 23, Mecklenburgh Square, W.C. (Mrs. Lamborn Cock). As has been mentioned above, instruction in medicine is given to women by the faculties of the University Colleges at Cardiff, Bangor, Aberystwith, and Newcastle-upon-Tyne.

Women, Organisations for Young. See Young Women, Qaganisations for Roung Women's Clubs. See Clubs. Women's Industrial Council, The, is a

Central Council established to organise special and systematic inquiry into the conditions of working women, to provide accurate informa-tion concerning these conditions, and to promote such action as may seem conducive to their improvement. The Council is conducted on lines strictly non-sectarian and independent of party, and endeavours to avoid encroaching upon the special province of work of any societies which may affiliate themselves to it. A General Purposes Committee, and Finance, A General Purposes Committee, and Finance, Investigation, Educational, Statistical, Organisation, and Parliamentary and Legal Committees carry out the details of the work, which Has included exhaustive inquiries into Home-work industries, wage-earning of children of school age, the typing profession, and other women's industries; the establishment of a Central Circulating Library for London Girls' Clubs; and the promotion of better bathing accommodation for working women. Attached to the Council is a large staff of voluntary lecturers upon industrial questions, and free legal advice is given to women and girls on matters connected with industrial law. The Council meets quarterly, the committees The Council meets quarterly, the committees generally monthly. Membership is by election of the Council on nomination of two members. The funds are provided by a small income from a trust fund, and by subscriptions and donations. The Women's Industrial and donations. The Women's Industrial News (quarterly) is the official organ of the Council President, Mr R. B. Haldane, Q.C., M.P.; Vice-Presidents, Miss Clementina Black, Mrs. Creighton, Mrs. Hicks, Mrs. Hogg, Mrs. R. Phillimore, Mrs. Percy Thompson, Lady Henry Somerset, Mr. Stephen N. Fox, and Mr. Herbert Burrows; Treasurer, Mr. Sydney Buxton, M.P.; Financial Secretary, Mr. Robert S. Garnett, British Museum, W.C.; General Secretary, Miss Catherine Webb. Office, 12, Buckingham Street, Strand, W.C.; Grosvenor Crescent, Hyde Park, was founded in the spring of or. It is non-political, and is specially intended as a place of re-union for workers. Under its roof various important departments of work are carried on, the prin-

hygiene, etc., are also sent out from the Institute, societies of various philanthropic natures meet within its walls, and an artists' circle and debating society have been organised. Men as well as women are eligible for membership, provided they are engaged in literature, art, science, or philanthropy.

Women's Suffrage. The Women's Liberal Federation is the body which in this country

most authoritatively supports amongst organi women to the suffrage. In May '92, at the annual meeting of the Federation, a resolution was carried instructing the executive committee to promote the parliamentary enfranchisement of women among the other Liberal reforms then before the country. A divergence of opinion occurred over this question, and Mrs. Gladstone, the President, decided not to stand for stone, the President, decided not to stand for election again, Lady Aberdeen being chosen in her place. Ultimately the Women's National Liberal Association was formed for the promotion of the official Liberal programme simply, Women's Suffrage not being put prominently in the front of the programme. The Women's Liberal Federation, however, proceeded to emphasise their position at the annual meeting in May '93 by making Object II, of their Constitution read thus —"To promote just legislation for women, including the local and par tion for women, including the local and par-liamentary franchise for all women, married, single, or widowed, who possess any of the legal qualifications which entitle men to vote, and the removal of all their disabilities are citizens." There are about 501 associations citizens." There are about 501 associations connected with the Federation, with an aggregate membership of 80,000. In the autumn of 97 a reorganisation of the Women's Suffrage Societies took place. They now all form one National Union of Women's Suffrage Societies, with a representative executive meeting at one or other of the Central Offices in London, viz or other of the Central Offices in London, viz The Central and East of England Society, 20, Great College Street, Westminster, of which Miss Edith Palliser is Secretary, and the Central and Western Society, 3, Queen Victoria Street, of which Mrs. Charles Baxter is Secretary. The Union, which is strictly on a non-party basis, aims at placing Women's Suffrage in such a position that no Government of whatever party shall be able to touch ques-tions relating to representation without at the tions relating to representation without at the same time removing the electoral disabilities of women. The recent parliamentary history of the movement is as follows:—Sir A. K. Rollit brought in a Bill during the '92 session (see ed. '93, SESSION, sect. 80), which was severely criticised in a pamphlet written by Er. Glastone. There can be no doubt that this pamphlet wrecked the Bill, which was alternated the services countries. ultimately thrown out by 175 votes against 152. In '93 Viscount Wolmer undertook the charge of the movement in the House of Commons; on his elevation to the peerage Mr. George Wyndham consented to watch its interests. A bill was down for second reading in the name of Mr. Faithfull Begg, M.P., on May 20th, '06, but was frustrated by the pressure of Government measures. The operative clause of the proposed Bill read as follows: "On and after the passing of this Act every woman who is the inhabitant occupier as owner or tenant

borough or county in which she is so qualified as aforesaid, and, when registered, to vote for a member or members to serve in Parliament. Provided always that such woman is not subject to any legal incapacity which would disqualify a male voter." The Bill was again brought in by Mr. Faithfull, Begg, M.P., on Feb. 3rd, '97, and passed its second reading in the House of Commons, 230 members of the House voting in its favour. June 23rd was fixed for the full discussion of the measure as the first order of the day; but the 22nd being the date of the Queen's Jubblee rejoicings, the consideration of the Bill was postponed till July 7th. On the 6th a petition signed by 86 men and women, among whom were some of the oldest workers on the Suffrage platform, was presented to the House of Commons by Mr. Courtney. In it the petitioners begged that the procedure of Parliament might be so amended that further delays in the fair consideration of the just claims of women to citzenship might be impossible. However, in consequence of the amendments left over for consideration from the day preceding of another bill, the Suffrage Bill was held over and finally thrown out. The advocates of Women's Suffrage were consequently once more disappointed. Mr. J. T. Firbank, M.P., had charge of a similar Bill in '98. In the Oclasies the movement has made considerable progress, and in New Zealand and South Australia the goal has been reached. In the former the parliamentary franchise was conferred on women Sept 9th, '93, the municipal franchise being already theirs. In South Australia the Parliamentiry vote was extended to women

Wood, General Sir Evelyn, V.C., G.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the Navy in '52. Served in the Crimea, and was severely wounded at the assault on the Redan In '55 he joined the Army as cornet of the 13th Light Dragoons. Served in India in 17th Lancers, and, while commanding the 1st Regt. of Beatson's Irregular Horse, was the Vistoria Cross, '59 Served throughout the Ashantse war. Previous to the Zulu war he joined the Middle Temple, and was called to the bar '74. After defeating the Zulus at Kambula, he became brigadier-general, and was present at Ulundi. In '79 he met with a triumphant reception in England, and became K.O.B. Served through the Transval war as major-general, and was one of H.M.'s Commissioners for settling the Transval limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Egyptian expedition, receiving the thanks of Parliament in '82. Raised the Egyptian From '83 to '93 he commanded the Aldershot district, from '93 till '97 he was Quartermaster-General, and was in Oct.' 97 appointed Adjutant-General. He has published a book on his reminiscences of the Crimea, "Cavalry in the Waterloo Campaign," and "Cavalry Achievements." Clubs, Army and Navy, United Service. Address, 23, Devonshire Place, W.

proposed Bill read as follows: "On and after the passing of this Act every woman who is the inhabitant occupier as owner or tenant of any dwelling-house, tenement, or building within the borough or county where such occupations around Leicester, in which town his father was a Congregational pation exists, shall be entitled to be registered minister, and received ministerial training as a voter in the list of voters for such at New College, London, '68-74. He took his

B.A. in '72, and on the completion of his college course became pastor of the influential Congregational Church at Spencer Street, Leamington, removing in '81 to Cavendish Chapel, Manchester, one of the largest Congregational Churches in the North of England, and from '88 to '69 the sphere of Dr. Joseph Parker's ministry. While there a temporary breakdown in his health necessitated a voyage to Australia. On his return he published "A Visit to Victoria." In '87 he became pastor of Clapton Park Congregational Church, London, which position he held until, in '92, he succeeded the late Rev. Alexander Hannay, D.D., in his present office. Address: Memorial Hall, in his present office. Address: Memorial Hall. Farringdon Street.

WORKMEN'S COMPENSATION ACT. '97.

I. THE LEGAL ASPECT.

The Workmen's Compensation Act, '97, is a bold attempt to deal in a large and liberal spirit with the vextd question of Employer's Liability to an injured workman. It has not only wrought extensive changes in the law as it existed prior to the passing of the Act, but it has also introduced principles which are novel in the law of England. There are three periods in the history of the law regulating the hability of an employer to his injured workmen; and the law as it stands to-day is best understood by seeing what the law was in each one of those periods, and by tracing the steps which were taken to alter it. The first period was the period prior to '80, when the liability of an employer to his injured workmen was regulated by the common law of the land alone, and by no statute. The second period was the period between '80 and July 1st, 98, when the liability of an employer to his injured workmen was regulated by the Employers' Liability Act '80, in addition to the common law. And the third period is the present, in which, in addition to the common law and the Employers' Liability Act '80, there has come into force the Workmen's Comeriod was the period prior to '80, when the there has come into force the Workmen's Compensation Act '07.

Period of the Common Law.

Under the common law, as under every law, the employer is liable to an injured workman if the injury is caused by the employer's own personal negligence—which negligence may be either in the active conduct of the work or in the choice of servants to perform the work. In modern conditions of industry it raiely happens that an accident is caused by the personal negligence of an employer while does so happen, the employer is usually so amail a man financially that a judgment against him is of no practical value to the injured workman. Equally rarely does it happen that an employer is negligent in the choice of his servants, or in the choice of those to whom he delegates his authority and to whom he leaves the duty of superintendence. Self interest prevents it. It has, in consequence, almost invariably happened that the negligence upon which the injured workman must base his claim is the negligence not of the employer

the defence which is known as the Defence of Common Employment. This defence is based in principle upon the old Roman doctrine, Volcula non fit injuria. It is a well-established rule of law that an employer, or any other individual, is liable for damage arising from the negligence of his servants if the servants when guilty of of his servants it the servants when guiny or negligence are about their master's business; because a master is bound to guarantee the public against all damages arising from the negligent acts of his servants, on the ground that it is the master's duty to choose servants who will not be negligent, and to ensure that his business is carried on in a careful manner. It is an equally well-established rule of law that when any individual knows the risks of injury which he is incurring, and nevertheless with that knowledge chooses to incur those risks, he must be presumed to have taken those risks upon himself, and he cannot, if he is injused, secover compensation for his injury. This is the foundation of the doctrine that a man is not liable to his workman for injury caused to that workman through the negligence of a fellow-workman It is easy to see how much hardship to injured workmen this doctrine entailed, and consequently there sprang up in the country a strong and wide-spread desire to find some remedy. It was spread desire to find some tenedy. It was definitely held that this doctrine was the rule of law in '58 by the House of Lords, in the case of Bartonshill Coal Co v. Reid; and almost immediately efforts were made to amend the law, and from '72 onwards the various attempts to abolish the defence of common employment were almost annual. In '79 a Bill was introduced by Lord (then Mr.) Brassey, which was not proceeded with, but which was the foundation of the Bill which, in the following year, became the

Employers' Liability Act, '80.

The principal change wrought by this Act wes, that in certain cases an injured workman was put upon the same footing as an injured stranger, and to that extent at least the doctrine of common employment was abolished. The Act enacts that an injured workman shall have the same rights against the employer as an injured stranger would have if his injury has been caused—(i) by any defect in the ways, works, machinery or plant which has not been discovered or remedied owing to the negligence of the employer, or of some person in the service of the employer who is entrusted by the employer with the duty of seeing that the ways, works, machinery and plant were in proper condition, (2) by the negligence of any person in the service of the employer who has any superintendence entrusted to him whilst in the exercise of that superintendence; (3) by the negligence of any person in the service of the employer to whose orders or directions the workman was bound to conform, and did conform, and where the injury resulted from his having so conformed; (4) by reason of the act or omission of any person in the service of the employer done or made in obedience to any improper or defective rules, bye-laws, or instructions of the employer; (5) by the negliinvariably happened that the negligence upon which the injured workman must base his claim is the negligence not of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer who has the charge or control of any least in the service of the employer. nor does it apply to domestic or menial servants or to seamen. The amount of compensation recoverable is limited in amount; and there is no provision in the Act prohibiting employers and workmen from contracting themselves out of the Act. As may well be imagined, the Act was greeted on the one hand by a storm of opposition from the employers, and on the other hand by support, coupled with strongly expressed discontent at its limited scope, from the leaders of labour. Like all measures of progress, it bore in the eyes of some individuals the appearance of a measure of plunder; but it has been tried for eighteen years, and experience has shown that it has not brought ruin upon employers nor disaster upon the trade of the country. It has proved all the more beneficial in that it was partial and tentative in its scope, and was treated as an experiment which, it proved successful, would lead to still greater reforms. It was not long before the representatives of the workmen began to agitate for an extension of the principle of the Act. Then principal demands were that the defence of common employment should be wholly instead of partially abolished; that the amount of compensation which might be awarded to an injured workman should be unlimited; that the Act should be extended to domestic and menial servants and to seamen, that the liability of the employer to compensate the workmen should extend to injuries to health as well as to bodily injuries; and that contracting out of the provisions of the Act should be entirely prohibited. The result of the agitation was prohibited. The result of the agitation was that in '86 a Special Commuttee was appointed to inquire into the working of the Act. After a searching inquiry the Committee reported, embodying in their report suggestions for future legislation. The Conservative Government, which was then in power, introduced a Bill to give effect to the resolutions of the Committee, but it was abandoned. The first serious attempt to extend the scope of the act of '80 was the Bill introduced by Mr. Asquith

In '03.

Mr. Asquith's Bill of '93 proposed to make nine very material alterations in the law as it then stood. He proposed—(i) that the defence of common employment should be entirely abolished; (2) that the liability of the employer should extend to workmen employed by a subcontractor of the employer, (3) that the liability of the employer should extend to injury to health as well as to bodily injuries; (4) that the provisions of the Act should be extended so as to include clerks, domestic servants, and seamen; (5) that the injured workmen's knowledge of the existence of the defect in the ways, works, machinery or plant by which his injury was caused should not be available to the employer as a defence; (6) that there should be no limit to the amount of compensation which might be awarded to an injured workman; (7) that no notice of the accident should be required; (8) that the limit of time within which an action might be brought should be extended from six months, or twelve months in case of death, to six years in all cases; (9) that contracting out of the provisions of the Act should be absolutely prohibited. The Bill met with great opposition; in the House of Commons from Mr. Chamberlain, who advocated the lines which were afterwards followed in his own Act of ago,7, and in the House of Lords from Lord Dudley and others on

account of the total prohibition of "contracting out." In consequence of the opposition of the Lords, who in that respect adopted the resolution of the Committee of '86, approving of "contracting out." with proper safeguards, the Bill had to be withdrawn. In the meantime the General Election 8f '55 intervened, and with the return of a Unionist Government to power the agitation for the extension of the Act of '80 revived. The question was taken in hand by Mt. Chamberlain, than whom no one could have been better fitted to undertake the task, and the result was the

Workmen's Compensation Act, '97.

The most important changes in the existing law effected by the Act are the total instead of the partial abolition of the defence of common employment, and the elimination of "negli-gence" from the elements necessary to create the liability of the employer. The Act, being an experiment of very considerable magnitude and importance, has very properly been limited in its application to certain epecified trades and industries; but in those trades and industries it applies to every one in the service of the employer, manager, clerk, or manual labourer. The Act makes the employer liable for injury caused to those in his employment by any accident arising out of and in the course of the employment, only excepting those which are due to the serious and wilful misconduct of the injured workman himself. Not only is no negligence necessary to constitute the liability, but even where the greatest possible care has been taken by those concerned the employer is still liable for the results of an unavoidable accident, if it arises results of an unavoidable accident, it is alress out of and in the course of the employment, Moreover, although "contracting out" is allowed under certain conditions, the effect of those conditions is such as to practically prohibit "contracting out "altogether. No scheme for "contracting out" is legal unless passed by the Registrar of Friendly Societies as being as beneficial to the workmen as are the provisions of the Act, the scheme is liable to revision at the termination of limited periods; the scheme and its administration by the em-ployer may be at any time attacked by discontented or ill-disposed workmen, who will thereby cause the employer an infinity of trouble; and no scheme is legal which makes it a condition of the employment that the scheme should be adopted. Moreover the employer is liable for the injuries caused to workmen employed by a snb-contractor, and for injuries caused to his workmen by the act of a stranger; while the employer has a remedy over against the sub-contractor or the remedy over against the sub-contractor of me stranger, for what that remedy may be worth. The amount of compensation for which the employer is liable is as follows: (a) where death results from the injury a sum varying from £150 to £300 where dependants are left who were wholly dependent upon the dead workman, and any sum up to £300 where dependents are left who were partially dependent upon the dead workman; and if there pendent upon the dead workman; and if there are no dependants left, a sum not exceeding flo for medical and funeral expenses; (b) where total or partial incapacity for work results from the injury, a weekly payment not exceeding for per week. The great principle underlying the provisions of the Act, as Mr. Chamberlain pointed out, was that the trades and industries of the county should be chargeable with the maintenance of those workmen
who were injured in the carrying on of those
trades and industries, and with the maintenance of those who were dependent upon the
earnings of the injured workmen. To a certain
extent, no doubt, the Act has achieved its
object. But if the principle underlying the
Act is to be carried to its logical conclusion,
the provisions of the Act must be extended to
all accidents, whether caused by misconduct
or not, and to all trades and industries. So
far as the Act is concerned the trades and
industries of the country are only vinade chargeable through the instrumentality of the individual employer, because it is the individual
employer who is personally responsible to
the injured workman. But it remains for the
individual employers to devise some means by
which the burden of liability may be shifted
from their individual shoulders to that of the
whole trade or industry.

II. THE INSURANCE ASPECT.

Throughout the debates in the House of Commons it was generally assumed that this liability would be met by some system of insurance, and the insurance offices, taking the same view, anticipated that it would lead to a large amount of business. Companies that had formerly insured against employers' liability in many cases increased their capital in view of the anticipated extension, and several old and wealthy life offices started departments for accident business in general and employers' liability insurance in particular. The managers of many of the principal offices met together and arranged for a careful analysis of all available statistics bearing upon the question, and as a result of their deliberations a tariff of rates was prepared by which many of the principal offices agreed to abide. A comparison of the premiums charged for insurance against liability under the Act of '80 and under common law to the extent of three years' wages, with the rates for these liabilities and for those under the Workmen's Compensation Act in addition, is given below for some of the principal trades

These rates were very greatly in excess of the premiums that had been anticipated; and Mr. Chamberlain, in an important speech at Birmingham, went so far as to say that he regarded them as absolutely preposterous, and as exceeding his own calculations threefold, fivefold, and even tenfold. He urged employers to insure themselves rather than pay these rates, adding that in a very short time competition would bring matters to a satis-factory level. With the latter sentiment everybody will agree, and experience of the working of the Act will doubtless prove in the course of a year or two the extent of the liabilities involved and the appropriate rates to be charged. Up to the present many employers have acted upon Mr. Chamberlain's advice, and are retaining their own risks, while some of the insurance companies also consider it feasible to issue policies at premiums very much below the tariff rates published by the combination among some of the offices. It must, however, be acknowledged that the weightiest expert opinion—the opinion of men with the most extensive insurance experience and those most familiar with the calculations of premiums of kindred rates—is strongly to the effect that the new liabilities will prove financially very great, and that the tariff rates are below rather than above what experience will ultimately show to be required.

all the face of such differences of opinion, and such uncertainty as to the liability involved, a very natural suggestion was that return to the employers of any excess that they had paid over and above the claims incurred, and a fixed percentage to the insurance companies for working expenses and deduct 15 per cent. of the premiums for working expenses, in per cent. for profit to the companies, and hand over the balance to the employers. When these figures are compared with the expenses and profits on fire insurance and other classes of accident insurance, it is found that they are rather less favourable to the insurance companies than other classes of insurance business the average expenses for the past ten years have been 32 per cent. of the premiums, and the average claims 60 per cent., leaving 8 per cent. This means that the fire offices have had 40 per cent. of the premiums for expenses and profits, while in connection with accident. This means that the fire offices have had 40 per cent. of the premiums for expenses and profits, while the profit-sharing scheme for employers liability insurance only gives them 15 per cent. for expenses and 10 per cent. for profits, making 35 per cent. in all. The expenses to be covered by this 15 per cent. do not, however, include the cost of settling claims or of medical examinations in connection with accidents. It thus appears that, whether the opinions of the most

important insurance companies as to the extent i of the liabilities involved are right or wrong, they are not aiming at excessive profits.

Mutual Combinations of Employers.

Certain employers who, rightly or wrongly, formed the opinion that the premiums asked by the insurance companies were excessive, but who felt that the liabilities were too great to be retained at their own risk, sought another solution of the difficulty in combination among themselves. Such mutual combinations have often been tried in connection with fire in surance among particular trades, or in certain limited areas, and experience of these com-binations goes to show that they have seldom been attended with much success. There are certain aspects of employers' liability under the new Act which suggest that this class of risk is even less satisfactorily provided against by mutual combination than are the risks of fire. One most important feature of the Act of '97 is the permanent character of the compensa-tion payable to injured workmen, and one of tion payable to injured workmen, and one of the essential weaknesses in mutual combina-tions is the absence of any guarantee of permanent stability. It is scarcely possible to insure the permanent adherence of any firm to a mutual combination, while unless in-surance operations are conducted on an extensive scale so as to secure average results, a run of ill luck involving many cases of permanent disablement or death might easily occur, and cause either the failure of the combination or such excessive rates in order to meet the liabilities as to lead to dissatisfaction with, and dissolution of, the comfaction with, and dissolution of, the com-bination. In such an event it is is only too probable that individual employers would be left to meet out of their own resources the annual payments to permanently injured work-men arising from accidents during the exist-ence of the combination. The permanent character of workmen's compensation under the new Act makes it especially importants for employers to be thoroughly satisfied that the company or the combination by which they are indemnified is not only financially sound now, but that it shows adequate assurance of now, but that it shows adequate assurance of permanent stability. For these and other reasons it is improbable that mutual combinations will meet with any considerable measure of success.

Rate-cutting Offices.

Similar considerations as to the necessity of permanent stability apply to insurance companies that are willing to undertake the companies that are wining to undertake risks at much lower premiums than those usually quoted. In the event of the high premiums being justified, the low premiums will involve considerable loss, and may endanger the solvency of the companies quoting danger the solvency of the companies quoting them, or may cause the insurance companies quoting inadequate premiums to cavi over the settlement of claims, so producing friction between employers and employed and dissatisfaction all round. If, on the other hand, low premiums are justified, an employer who paid a high premium to a first-class company for the first year or so would have his premium reduced as soon as experience showed this to be practicable. The claims of workmen would be met in a liberal spirit, thereby conducing to good relations between employer and employed, and directly or indirectly the excess in the premiums paid.

would be recouped to him if, as there is every reason to believe would be the case, the insurance companies felt it to be to their interest to deal with their policy-holders with the same liberality that characterises their dealings in connection with fire insurance when they are satisfied that they themselves are being honestly dealt with.

The retention of the risk by the employers themselves is a course that will scarcely commend itself to the majority of business men. The compensation provided for by the Act may amount to as much as £1 per week through the whole after lifetime of the injured workman, or in the event of death, to a sum workman, or in the event of death, to a sum not exceeding £300. The possibility of being suddenly called upon to compensate several workmen on this scale is one that no employer would care to permanently incur. The payment of death claims might prove financially inconvenient, and it is by no means unlikely that in the event of an accident happening in the works of an employer known to be unthe works of an employer known to be un-insured, his credit might be selected in maintain just at a time when he norded it most, for his creditors would be well aware that the claims creditors would be well aware that the claims of workmen constitute a first charge upon the assets of an employer. So again in the case of permanent disablement, the profits of a business for many years to come would be appreciably decreased by the payment of several annuities of £52 each. Thus, even if an employer feels that the rates charged by the majority of the best offices are excessive it majority of the best offices are excessive, it would still be his best course to pay those would still be his best course to pay those rates, knowing that thereby he procures insurance hat really insures, that accidents in the past will involve him in no liabilities in the future, that competition will bring rates to their right level whether by increasing or decreasing them, and that though for a time the payment of insurance premiums may seem the payment of insurance premiums may seem to involve a heavy tax on the employer, yet the builden will in the natural course of things be transferred to the purchasers of the things he sells. In this way the Act will accomplish the beneficial object of protecting the workmen against injury at the expense of the whole body of consumers, to whom the cost of doing so will be quite inappreciable.

Wyndham, Charles, was b. in 1837, and ed. for the medical profession. His debut as an actor was at the Royalty Theatie in '62, with Miss Ellen Terry and David James. He then went to America and played at Washington, in conjunction with John Wilkes Booth. He afterwards fought in the Civil War, but returned to England and met with great success. His first London appearance was in '66, and after another

Y

YACHTING, '98.

In the Mediterranean Races Gloria won the principal contest at Marseilles, and the Coupe de France at Cannes, but she had the mis-fortune to lose her mast on March 22nd, which prevented her sailing again, and she was sent home to England. Bona beat Salanita for the chief prize at Mentone. There was more stir among the clubs on the river and round the mouth of the Thames than has been noticed for some years, and the London Saling Club and the Burnham Y C. opened the season in April The Castle Y C. opened at the end of May. The racing on the Thames, under the auspices of the New Thames Y.C, took place in squally weather, on June 1st, when Cares beat
Bona and Ailsa—Pentlent winning the 52-rater
prize. In the R+London Y.C. races Senta, a new
boat, beat Isolde and Giora, the second prize boat, beat resona and cirria, the second prize being taken by Penileni. The R. Thames Y.C. were to have had a great race on June 2nd, but unfortunately Ailsa, which is now rigged as a yawl, came to grief, and, not being ready in time, Bona sailed over. Senta won a drifting match from Isolde, and Geisha won the smaller class prize. The Harwich match, from Southclass prize. The Harwich match, from Southend to Harwich, under the auspices this year of the R. Harwich Y.C., on June 4th, was won by Bona, Astrild making her first appearance in this contest. On June 6th and 7th the Harwich Club held their regatta, Bona winning Harwich Club held their regatta, Bona winning the Queen's Cup, Isolde being second Bona also won the principal race on the second day, Astrild winning the smaller craft prize. The Channel Match, on June 11th, from the Nore to Dover, was won by Bona in the first match, Isolde in the second. In the Cinque Ports regatta the principal match was won by Ailsa over Bona. Penitent beating Gloria. At the R. Southein Y.C. Regatta, Isolde won from Clarge on the first day Cares on the second Glorsa on the first day, Caress on the second day. On June 20th started the great race for the Emperor's Cup, from Dover to Heligoland, over a course of 316 miles, which was won by Merry Thought first, Latorna second, Castanet third. At the R. Cork Y.C. Regatta, on June and, Bong won a match against Allsa, the latter having had an accident; the same bad luck attended Astrild, who was beaten by Isolde. attended Astrila, who was beaten by Isolde. On the 23rd Bona sailed over the course, Aslsa being still under repair. Isolde beat Astrild, who had to retire from the race. The Kiel Regatta began on June 24th. the Emperor's race for the North Sea Cup was won by Mary Morn, Nan being second. Rainbow won the match on the second day, 71 yachts competing, the Emperor's amongst them. The Olyde fortnight opened on June 25th with the R. Largs Club, when Aslsa won the buy wacht parze. night opened on June 29th with the R. Largs Club, when Ailsa won the big yacht prize, Isolde the smaller, and Viera the smallest boat prize. On the second day, under the R. Western Y.C. of Scotland, Hester won the race for yachts exceeding 60 feet linear rating. Peniteni won the race for those above 43. At Greenock, under the direction of the West of Scotland Y. C., Astrild easily beat Isolde, and Forsa, in the race for the smaller craft, beat Viera, Senga, and Peniteni. On July and the principal contest was for the Queen's Cup.

which was won by Bona, Isolde being in front of Aslaa. On the following day Bona again beat Aslaa for the 5:00 race, and Astrild beat Isolde Namara beat Isolde Namara beat Isolde Marion, and Sc. ga won from the smaller boats. The Clyde Cornthian Club took over boats. Ine Clyde Corintinan Club took over the direction on July 5th. There was no match for the first-class yachts, nor for the 52-footers, but in the 65-feet rating match Isolde beat Astrold with ease. On July 6th Hesier and Penitent were the winners. The Mudhook Regatta was favoured with fine racing weather regatta was tayoured with nice racing weather on the first day, when Ailsa beat Bonn, Isolde beat Astrild, and Eldred beat Senga and Viera; but on the second day, with unreliable winds, the races were won by Isolde and Viera. July of the weather being almost a calm. Ailsa won the 70weather being almost a calm. Assa won the 79-rating race, Isolde that for those above 52, and Senga for the smaller rating. On the 11th, the second day of the R. Nothern Y C.'s racing, Bona, Isolde, and Forsa were the winners The Campeltown Regatta brought the Clyde fortnight to a close on July 13th, in splendid weather, Aslsa, Isolde, and Viera winning their respective races, after which the larger yachts crossed over to Ireland for the regattas there. At the R Cinque Ports Regatta, held on July 15th and 16th, Maid Marson and Dorcen were the principal winners and in the race to Boulogne and back Maid Marion won. Fa Ulster Y.C Regatta began on July 15th, in scorching weather, with no wind; the County Down Cup was won by Bona, Astrild winning the 52-raters race The second day was favoured with splendid weather, when Ailsa beat Bona, and Isolde beat Astrild. In the race from Dover to Ostend, on July 18th, Lorna was first, Maid M 1101 second. On July 20th the racing at the Kingston Regatta, under the R. St. George's Y.C., took place in beautiful weather. Bona won her third Queen's Cup this season; Penistri won the Jameson Cup; Ailsa won on the second day; and, on the last day, Senga won the Champion Cup. At Ostend the principal race was won by Namara. The Cowes week commenced on Aug. 18t, on which day, in not very good racing weather, Bona, Senia, and Penistri won the races for their different ratings. The Queen's Cup in the R.Y.S. Regatta was sailed for in moderate weather, and resulted in the victory of Betly. The Cowes Town Cup was carried off by Bona. The Australian Cup was won by Senia, the German Emperor's Cup by Latona, Rosensath and vertrude being second and third; for those not above 30 rating, Penistri won. The Prince of Wales' Cup was won by Tangerine. At the Portsmouth Corinthana Y.C. Regatta, on Aug. 8th, Ailsa, Kommodore, and Latona won. The Ryde week began with the R. Victoria Y.C., on Aug. 8th, Ailsa, Kommodore, and Carrest the seton race. On the second day Ailsa won, Sense winning the 52-footer race. The Ryde Town with splendid weather, when Ailsa beat Bona, and Isolde beat Astrila. In the race from Dover race. On the second day Ailsa won, Souga winning the 52-footer race. The Ryde Town Cup was won by Maid Marion, Creols being

second. The Commodore's Trophy was won by Bona on the 12th. Astrild won the race for the forties. Maid Marion won the race round the Isle of Wight at the R. Portsmouth Y.C. Regatta on a day of tropical heat, with hardly any wind. Bona, too, won the Albert Cup of the R. Albert Y.C. at Southeea, on a day when the westly were accordingly but the weather was scorchingly hot, with no wind; the same weather prevailed on the second day, when Bona was again successful for the large class, Astrild Finning amongst the 65-raters. On the 17th Eldred won a race for the 55-feet raters, on a day as hot and airless as the previous ones. The R Dorset Regatta took place at Weymouth on Aug. 20th, Regatta took place at Weymouth on Aug. 20th, when drifting races were won by Atlsa, Senta, and Eldred under their respective ratings. On Aug. 22nd, at the Torbay Regatta, Atlsa won the prize for yachts exceeding 65, rating, Senta that for those exceeding 52, and Cases and Penitent the smaller races. On the second day Bona won among the large yachts, Astrild Amongst those exceeding 52, rating. At Datiday Bona wen among the large yachts, Astriuc amongst those exceeding 52 rating At Daitmouth, on the 26th, Bona again won, Eldred winning the prize for small boats In the Start Bay Y C Regatta, owing to a man on board the Asisa falling overboard and being drowned, all the yachts gave up the race The smaller races were won by Isolde and Eldred On Aug. 30th, at Plymouth, under the auspices of the R. Western Y.C., neither Bona nor Ailsa appeared, Astrild won the 52-rater prize, and Eldred the smaller yacht race. On the following day the Port of Plymouth R Regatta was held, when Senta beat Astrild At the R. Plymouth Corinthian Y C Regatta, on Sept 1st, Eldred won the race for yachts above A service of section and the sacron yearns above 42 rating, and also on Sept. 2nd, at the R South-Western Y C. regatta, on the final day, at Plymouth, which last regatta brought the yachting season to a close A series of races took place in August on Lake St Louis, for the Scawanhaka Cup, between the Dominion and the American yacht Challenger. Canada having won three races in succession, retains the Cup won three races in succession, retains the Culp On Sept. 17th began a series of three races between the Australian yacht Irex, owned by Mr Mark Foy, and the English boat the Maid of Kent. The course of the first 1ace was about 12 knots on the Medway, and it resulted in a victory for the Maid of Kent The second race, over a circular course, was also won by the Maid of Kent, as well as the third, over a straight course Mrs Wyllie, the wife of Mr. W. L. Wyllie, steered the English boat in each match in the most admirable manner Bong has won 20 putzes this season—a very Bona has won 39 prizes this season—a very satisfactory record, and one that should please Thomas Lipton sent a challenge to the New York Y.C. for the American Cup for '99, which was accepted.

Yemen. A province of Arabia, which, with the province of Hedjaz, is under Turkish rule It is bounded on the N. by the Hedjaz, on the N.E. by the Arabian desert, on the S. by the Gulf of Aden, and on the W. by the Red Sea. Area about 77,000 g. m.; pop. about 3,000,000. The capital of the province is Sana, and other important towns are Mocha and Hosleidah, the coffee of the district finding its outlet at the former town. The chiaf products are coffee, lentils, wheat, grapes, and fruit, and the country is very fertile. See Arabia.

YEOMANRY.

The Yeomanry cavalry are raised and serve under the Act of 1804, and are governed by special regulations. Until a few years back the force was composed almost entirely of farmers, the commissions being held by the nobility and landed gentry. The farmer element is unfortunately by no means so prominent as it used to be, and in populous districts nent as it used to be, and in populous districts is being replaced by men who adopt soldiering because they like it, though the town-bred Yeomanry have not the character or value of their predecessors. The maintenance of the force depends largely upon the patronage of the gentry, and is thus locally subject to vicissitudes. The aspenditure upon the force in 98-9 is \$77,000, divided thus regimental pay, the contract of the cont 11 30-3 is 277,000, divided this regimental pay, £47,000, extra pay and allowances, £26,000; miscellaneous, £1110. The expenditure upon the force in '97-8, was £76,000, the decrease being due to the smaller amount required for clothing and contingent allowances. The force is organised in regiments, thirty-eight in number, and these again in bigades. The regiments are and these again in origades. In regiments are assembled annually for training for eight days. (See ed of for pay.) The force is liable to be called out for service in any part of Great Britain in case of threatened invasion or to suppress in case of threatened invasion or to suppress civil riots. A return issued in '98 giving particulars of the force, shows that on Jan 1st, '98, the enrolled strength was 10,467, as compared with 10,342 on Jan 1st, '97. At the inspection of '97 there were present 563 officers, 981 non-commissioned officers, including permanent staff, 188 trumpeters, and 7097 rank and file, making a total of 8829. The enrolled strength making a total of 8829 Ine enrolled strength is 1424 below the establishment. **Marketry**Training The year '93 was the first in which an obligator y course was prescribed On Jan. 1st, '97, the School of Instruction for Yeomanry and Volunteer Cavalry was abolished, and the work of instructing officers and non-commis-sioned officers of these forces was charged upon the regiments of regular cavalry, to which officers are to be attached during the period of squadron training Yeomany Oavalry Brigades. The isolated situation of the Yeomanry regiments, which gave them no cohesion or plan of mobilisation as a fighting force, was long felt to be unsatisfactory; but although something has been done to supply the want, the progress made has been so far inconsiderable. In '93 all the existing regiments made up into squadions of 100 members, or not less than 70 efficients, were formed into 18 brigades, with the exception of the Pembrokeshire Regiment, which, on mobilisation for home defence, was assigned to the Milford Haven defences Fifteen of the brigades were allotted in this scheme as divisional cavalry for the Home Defence Army, and the remaining three to the garrisons of Portsmouth, the Western District, and Dover and the South Coast defences.

and the South Coast defences.

Yonge, (Miss) Charlotte Mary, was b. at
Otterbourne, Hants, in '23, and is a daughter
of the late Mr. W. C. Yonge, of Otterbourne.
Known chiefly by her novels and other books.
She has also edited the Monthly Packet for
thirty years. Her principal novels are: "The
Heir of Redclyffe," "Heartsease," and "Dove
in the Eagle's Nest", and she has also published "Cameos of History of England,"
"Landmarks of History: Ancient, Middle
Ages, and Modern," a "History of Christian

Names and their Derivation," a "Life of Bishop Patteson," and various other historical and miscellaneous works. Address: Elderfield, Otterbourne.

York, Archbishop of. See under PERRAGE. York, H.R.H. George Frederick, Duke of, and son of T.R.H. the Prince and Princess of Wales, was b. at Marlborough House on June 3rd, 1865, just seventeen months after his elder brother, the late Duke of Clarence. The two brothers were greatly attached to one another all through boyhood, and entered the navy together as cadets June 5th, 77. Iwo years were spent on the training ship Britannia, and then Prince George, accompanied by his brother, started for a three years' voyage round the world on board the Bacchante. In May '83 H.R.H. was made midshipman to the Canada, which was stationed on the North-American coast. In '85 he was promoted to be lieutenant, after passing his examinations with distinction, and in 'oo was given the separate command of the gunboat Thrush on the West Indian station. the opened the Jamaca Industrial Exhibition during the same year, and in or was made commander. He visited Ireland in October, staying with the late Duke of Clarence in Dublin, but unfortunately contracted a dangerous fever while there. In '92, through the lamentable death of his elder brother, he became the heir to the throne, and took his seat in the House of Lords as Duke of York. In May '93 his engagement to Princess Victoria Mary of Teck was announced The marriage was celebrated in the Chapel Royal at St. James's Palace (July 6th), and was a most brilliant ceremony, attended by all the members of the royal family, by the King and Queen of Denmark, the Czarewitch, and other illustrious foreign guests. The University of Cambridge conferred their Hon. LL.D. degree on the Duke in June '94 A son, Prince Edward Albert Christian George Andrew Prince Edward Albert Christian George Andrew Patrick David, was born to the royal pair (June 23rd, 94), a second son, Prince Albert Frederick Arthur George, on Dec. 14th, '95, and a daughter on April 25th, '97 During '98 H.R.H. for some time hoisted his pennant on the Crescent, attached to the Channel Squadron.

Young Men's Christian Association, The, which has for its object the spiritual, mental, social and physical well-being of young men, was founded in the year 1844, for the purpose of benefiting the young men in the various dry goods houses in the City of London, the President, Sir George Williams, being the chief instigator in its formation. The work rapidly took root, and increased in every direction, until there are at the present time 6415 centres scattered throughout the world, with a total membership of 511,200. In the United Kingdom there are 1240 sentres, with 105,170 members; whilst in London there are 72 members; whilst in London there are 72 the "British National," "London," and "South associations, with a roll of 13,860 members The chief associations in the Metropolis are Inches associations in the Metropolis are building.—The Giris Friendly Seciety (Patron, located at Exeter Hall, Strand; 186, Aldersgate Street, E.C.; Soand 60, Cornhill, E.C.; Stafford Roads, N.W.; 193, Upper Street, Islington, N.; 20, Hill Road, Wimbledon; 275, Mare Street, Hackney, N.E.; 4, Kingsland Road, Shoreditch, N.E.; and Conference Hall, Stratford, E. The headquarters of the Y.M.C.A are and adapted to the requirements of the work in 1287 places, and members (who number 1287 places, and members (who number 1287 places, and members (who number 1287 places).

in the year '80, at a cost of £61,000. Sir George Williams is Fresident. Secretaries, John H. Putterill, Clarence Hooper. Secretary of the National Council, Mr. W. H. Mills.

Young Men's Society, Church of England. See Church of England Young Men's

Young People's Society of Christian Endeavour. In 1881 the first society was established by the Rev. F. E. Clark, D.D., in the Congregational Church of which he was pastor, in Portland, Maine, U.S.A. The object of the Society is stated to be to promote an earnest Christian life among its members, to increase their mutual acquaintance, and to make them more useful in the service of God. The growth of the Society has been phenomenal. In four years there were 11,000 members, five years later 660,000. In '98, seventeen years after its origin, there were 54,101 societies (5575 in the United Kingdom), with a membership of 3,25,5000. The Society is inter-denominational, and has been adopted by every section of Protestants. The **Headquarters** in Great Britain are at the Sunday School Union. Offices, Ludgate Hill, London, E.C.

Young Women, Organisations for the Benefit of. The two principal organisations which exist in England for the benefit of young women are the Girls' Friendly Society and the Young Women's Christian Association, although there are other societies which aid the work in their respective methods. The Young Women's Christian Association numbers about 500,000 young women among its members in all parts young women among its memoers in an parts of the world. Members include those who belong to the Prayer Union, Associates, Working Members, and Hon Associates. The subscription, exclusive of fees for Institute subscription, exclusive of fees for Institute membership, is 1s. per annum; but working members subscribe 2s. 6d., and hon. members 5s and upwards. There are numerous Instatutes and Komes in London and provincial towns, also at many of the seaside resorts throughout the British Empire, besides many branches which hold meetings in villages, the charge for lodging in the London Homes being from 2s 6d. to 30s. per week. There is the charge for lodging in the London Flomes being from as 6d. to 30s. per week. There is a Teachers' Department, a Nurses' Union, a Home for Barmaids, and some 20 other departments for meeting the special needs of young women. Freehold premises have been acquired at George Street, Hanover Square, as headquarters of the Association, and a hall to seat the street of the Association has soo has been erected. The Association has two excellent gymnasia at 26, George Street, and 14, Finsbury Square, E.C. the Preparation Home for workers. A World's Y.W.C.A. has recently been organised, for the union, development, and extension of Y.W.C.A.'s in all lands. Its office is at 26, George Street, Hanover Square, W., and the head offices for the "British National," "London," and "South of England and Wales" work are in the same building.—The Girls Friendly Seciety (Patron, the Queen; Vice-Patron, the Princess of Wales; Presidents, the Archbishop of Canterbury and the Archbishop of York). It has for its object the banding together in one society of ladies (as associates), now 35,000 in number, girls and young women for mutual 500 has been erected. The Association has

150,055 from the age of 12 and upwards) are introduced from one branch to another wherever they may go. "Associates" must belong to the Church of England, but no such restriction applies to "members." Associates contain applies to "members." tion applies to "members," Associates con-tribute annually not less than 2s. 6d., mem-bers not less than 6d. The organisation extends to various towns of Northern and

Central Europe, Australia, New Zealand, India, Central Europe, Australia, New Zealand, India, Africa, and Canada, and in the diocese of Gibraltar. Clubs, classes, homes of rest, registry offices and protected emigration form part of the scheme. See also UNIVERSITY SETTLEMENTS.

Yukon. See North-West Territories.

Eanxibar Protectorate, The, consists of the island of Zanzibar, area 625 sq. m., pop 150,000, and the island of Pemba, area, 360 sq. m., pop. 50,000. Capital, Zanzibar. The Sultan is Said Hamud bin Mahomed (q.v.), and a regular Government is constituted under British control, exercised through the Consul-General. Slavery was abolished in April '97, but the British and Foreign Anti-Slavery Society has since declared that the decree of solition is a dead letter. Imports in '94, £1,197,681; exports, £1,095,240. The products are mainly cloves, which form four-fifths of the entire clove crop of the world, chillies, cocoanuts, betel-nuts, grain, and wheat. Ivory, rubber, hides, and gum are also exported from Zanzibar. See BRITISH EMPIRE (table), EAST AFRICA PROTECTORATE, and DIPLOMATIC.

Zola, Emile, was b. 1840, in Paris. Ed. at the Lycée St. Louis, and began life at Messra. Hachette's, the distinguished French publishing firm. He first appeared as a novelist in "Les Mystères de Marseilles." "Thérèse Raquin" further exhibited his remarkable power of critical analysis of human nature. "L'Assommoir," perhaps his most popular work, has gone through fifty editions. Author of "Nana," "Pot Bouille," "La Terre," "La Bête Humaine," and other works. M. Zola was appointed a Knight of the Legion of Konaur in 188, and elected (April '91) President of the Society of Men of Letters. In '92 he published "Louides," and "Dotteur Pascal" in June '93. This book was the final volume of the famous Rougon Macquart series of twenty volumes, and was dedicated to the memory of M. Zola's mother and to his wife. During '94 he published "Lourdes," a love-story, set in the scenery of the famous resort of French pilgrims. "Rome" followed in '96, and "Paris" in '97. During '97 and '98 he took up with

splendid courage the cause of Captain Dreyfus, whom he declared to have been illegally condemned, and was in consequence of his action prosecuted by order of the French Government, and condemned to imprisonment. For details see France, History, '98.

Zoological Society of London. The annual report of this Society, which was instituted in 1826 for the advancement of soology and animal physiology, stated that the number of Fellows physiology, stated that the number of Fellows on Jan. 1st, '98, was 3158. The number of visitors to the Gaidens in '97 was 717,755, as compared with 665,004 in '96. The number of animals in the Society's collection on Dec. 31st, '97, was 2585, of which 792 were mammals, 1562 birds, and 431 reptiles. The additions during '97 numbered 1508, of which 688 were presented, 278 purchased, 104 bred in the Gardens, 328 received on deposit, and 108 obtained in exchange. The Gardens in Regent's Park are open from 042m till sunset, and the Offices open from 52.m till sunset, and the Offices and Library from 10 a.m till 5 p.m., Saturdays 10 a.m till 2 p.m., Saturdays K.C.B., LL.D. a balloon by means of a trailed rope and a steering sail.

Braxil. President Campos Salles assumed britishtion Bill would be introduced (Mov. 17th).

This was done, and the Bill passed its second-(Mov. 15th). Cape. As a result of the conference between

Crete. The Turkish Military Governor at Canea was notified by the Admirals that he must leave the island by the 15th with all the releave the island by the 15th with all the remaining Ottoman troops (Mov. 7th). Ismail Bey, Civil Governor-General, left the island (11th), and not a single Turkish solder remained (14th). A thank-giving service was held in the Orthodox Cathedral at Canea, and need in the Orthogox canegras at Canea, and the only drawback to the general rejocing was that the Turkish flag was still kept flying on Government House. It was understood that Prince George of Greece would be appointed High Commissioner of the island under the Powers, but his formal appointment had not been notified by the 23rd

Diplomatic. Brasil. The Ministry has been reconstituted (Nov.) as follows: War, Senhor Mallet; Maine, Senhor Balthazar; Finance Senhor Martinho, Interior, Senhor Spitacio, Commerce and Industry, Senhor Severano, Foreign Affairs, Senhor Olynthio

Bousdor. Correct as follows: Foreign Affairs,
Rafael de la Torie; Finance, Ricardo Valdiviedo
Egypt. The Under-Sec. for Finance is Mr.

Mitchell Innes.

Egypt and Malta. Lieut Gen. Sir Fiancis W Grenfell, G.C.B., G.C.M.G., commanding the British troops in Egypt, appointed Governor of Malta (Nov. 19th).
France. The new Ambassador to Great

Britain is M. Paul Cambon.

Egypt. Major Marchand and Captain Baratier left Cairo on their return journey to Fashoda (Nov. 13th). The route of withdrawal chosen was by way of the Blue Nile, Abyssinia, and Libutil.

France. The Court of Cassation instructed the Minister for the Colonies (Nov. 15th) that Dreyfus should be informed as rapidly as possible of the admissibility of the request for revision of his case, and that he should be asked to present his defence of French Guiana telegraphed that this had been done (18th). A commercial treaty with been done (18th). A commercial treaty with Italy was signed (Nov. 21st), by which each country conceded its minimum tariff to the other, except as to silk goods. More friendly relations between the two countries than had existed for some time were thus set up General Zurlinder (Nov. 24th) signed order for the court-martialling of Colonel Picquart for forger y and use of forged documents.

Indo China. A scheme for the construction of a railway system at a cost of about 200,000,000 fr was approved by the French Government (Nov 18th).

The November number of the Labour Gazette contained a report on the working of the Conciliation Act, '96, which working of the Conditation Act, '96, which showed that since the passing of the Act action was taken by the Board of Trade, or invited, in 50 cases of dispute. In it cases the Board refused to take action, and one dispute was pending at the time of the report. Of the remaining 47 cases, 34 were settled, 6 were arranged between the parties, and in the other 7 cases the action of the Department failed to effect a settlement. The Federated Engineering Employers reorganised themselves on a permanent basis, combining the local Associations with representation on a Central Board of forty members (President, Sir Andrew Noble, K.C.B.). A report on the Strikes and Look-outs of '77 was issued by the Board of Trade.

Literature. Odes in Contribution to the Bong of French History (Constable), by George Meredith; The Island Race (Elkin Mathews), by Henry Newbolt; Verrese (Arnold), by Mrs: Holland; Poems (Longmans), by Miss Eva Gore-Booth; Idyls of Thought (Allen), by F. A. Homfray, Pitt: some chapters of his Life and Times (Longmans), by Lord Ashbourne. A Life of William Shakespeare (Smith, Elder), by Sidney Lee, editor of the "Dictionary of National Biography" Notes from a Diary in Asiatio Turkey (Arnold), by Lord Warkworth, M.P. London Local Government. The Con-London Local Government. The Conference of Vestries and District Boards, to terence of Vestries and District Boards, to which invitations were issued by the Vestry of Islington, was held on Nov. 25th. It was pointed out that only 20 of the 42 Vestries and District Boards which constitute the Metropolis were invited to take part in the Westminster Conference of "Concurring Parishes," referred to in the article in the body of the book. The 22 uninvited Vestries and District Boards who took no part in it represented a population of 1,838,877 and a rateable value of £11,076,777. It was therefore proposed by the Islington conference to give to every one of the 42 Vestries and District Boards which constitute Vestires and District Boards which constitute the County of London an opportunity of expressing its own opinion on the reform of the local government of London The Vestries of Battersea, Bethnal Green, Chelsea, Fulham, Hackney, Islington, Mile End Old Town, Rotherhithe, St George (Hanover Square), St George-in-the-East, St George the Martyr (Southwark), St. Luke, St. Martin-in-the-Fields, Shoreditch, and Stoke Newington, and the District Boards of Holborn, Limehouse, Lee, Poplar, St Giles', St. Olave's, St. Saviour's, the Strand, Wandsworth, and Whitechapel sent representatives to the Islington Conference They represented a population of ference They represented a population of 2,204,138, and a rateable value of £15,568,152, out of the total population of 4,439,290, and the total rateable value of £31,557,711 of London.

Nigeria Intelligence was received (Nov. 24th), that on the 13th and 14th Nov. the troops of the Niger Company under the command of Lieut Wake attacked the rebel tribes at Iselpaina. The town was taken and destroyed after prolonged fighting. Lieuts. Wake and Williams were both slightly wounded.

Royal

Society

FOR THE

Prevention of Cruelty to Animals.

105, JERMYN STREET, LONDON, S.W.

patrons.

HER MOST GRACIOUS MAJESTY THE QUEEN, THEIR ROYAL HIGHNESSES THE PRINCE AND PRINCESS OF WALES.

President. HIS BOYAL HIGHNESS THE DUKE OF YORK, K.G.

THE Education Committee of the Society earnestly appeal to clergymen and ministers of every religious denomination, to bring before their schools and congregations the claims of animals. To cultivate kindness of heart towards inferior creatures is to

prepare for the more easy introduction of Christianity.

The Committee are advised that the Fourth Sunday after Trinity is a suitable day for pleading the cause of the lower animal creation in the Church of England; because, (1) of the appropriateness of the Collect on that day, (2) in the Epistle to the Romans viii. 18, we shall read that "the whole creation groaneth and travaileth in pain together until now; and (3) in the Gospel of Luke vi. 36, we shall read that we are commanded to be "merciful, as our Father also is merciful." Any time is suitable, however, and this remark applies particularly to Nonconformist Churches of all denominations, where it is desirable to plead the cause of the Society, which is neither sectarian nor political.

Upon this Institution, founded in 1824 (the only one having for its object the protection of dumb and defenceless animals), rests a heavy responsibility. It is earnestly and respectfully submitted, that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Committee respectfully appeal to the Public to extend a hearty assistance,—

I. By supplying early information to the Secretary of all acts of cruelty that have been witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Upwards of 7,500 convictions obtained annually.

The increased operations of the Society have drawn from the funds an amount vastly exceeding the yearly subscriptions. The Committee need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those inany urgent measures which every well-wisher of this Society has so deeply at heart. Remittances may be forwarded to

JOHN COLAM, Secretary.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

The labour of other Charities is divided among many Associations; but this Charity stands alone—the Defender of the defenceless—without any assistant.

SUGGESTIONS TO PERSONS MAKING THEIR WILLS.

"I give and bequeath free of Legacy Duty,

unto the Treasurer for
the time being of a Society called or known by the name of The ROYAL SOCIETY FOR THE PREVENTION
OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Committee for the time being
of the said Society."

FIRE DEPARTMENT.

Fire Insurances granted at current rates.

LIFE DEPARTMENT.

The Rates of Premium have recently been revised, and are very moderate in respect of all classes of Assurances.

Large Bonuses, including Interim Bonuses.

The Expenditure (including Commission) to be charged to the Life Department has been limited to 10 per cent. of the Life Premium Income.

Claims Paid Immediately after Proof of Death, Age, and Title.

The Alliance Policies are especially valuable, for they are whole-world and indisputable. and they carry important Guaranteed Privileges.

DEATH DUTIES.

DEATH DUTIES.-In order to enable the Owners of Property to make provision for payment of the ESTATE DUTY, Special Forms of Policies have been prepared. under which the Policy-moneys (or such portion thereof as may be required for the purpose) will be paid direct to the Inland Revenue Commissioners, without waiting for production of Probate. Full particulars will be forwarded on application.

LEASEHOLD AND INVESTMENT INSURANCES.

Policies securing the return of Capital Sums on the expiration of Fixed Terms of years are granted.

Prospectuses containing full particulars may be obtained on application to any of the Company's Offices or Agents. ROBERT LEWIS, Chief Secretary.

BAPTIST MISSION HOUSE, 19, FURNIVAL STREET, HOLBORN, E.C.

LONDON MISSIONARY SOCIETY: SECOND CENTURY OF WORK.

HEADQUARTERS: 14, BLOMFIELD STREET, LONDON, E.C.

THIS Society, founded in September 1795, by a number of Episcopalians, Presby terians, and Congregationalists, on a broad and catholic basis, from which it has never departed, has completed its first and entered upon its second century of worl among the heathen and unenlightened races of the earth.

The Society has had the honour of sending out more than a Thousand Missionaries not reckoning their wives; among them such distinguished men as John Williams, Moffat Livingstone, Morrison (the first Protestant Missionary to China), Medhurst, Ellis Mullens, Gilmour of Mongolia, and Dr. Mackenze of Tientsin.

Its chief Fields of Labour are: China, from twelve chief centres; North India, th Madras Presidency and Travancore; Madagascar; South Africa; Central Africa Polynesia; and New Guinea.

It has on its present staff 261 Missionaries, 22 of whom are qualified Medical Missionaries; and 924 Native Ordained Pastors and Evangelists; 2,808 other Nativ Helpers; 55,541 Church Members; 156,982 Native Adherents; 1167 Schools; 52,71 Scholars; 23 Hospitals, in which 120,244 patients were treated during 1897. The Madagascar statistics are omitted.

Donations are earnestly solicited, and may be made payable to

REV. A. N. JOHNSON, M.A., 14, Blomfield Street, London, E.C.

Nearly Five Thousand

Orphan or Waif Children are always being

MAINTAINED, EDUCATED and TAUGHT TRADES in

"DR. BARNARDO'S HOMES."

"Christian, Protestant and Evangelical, but not Sectarian," is the religious motto of the Institutions. The work is supported by all sections of Christendom. In their operations all Evangelical Christians may, and do, join hands.

Applications for urgent cases are received at any hour of the day or night.

Destitute Children of any age or creed, of either sex and of any nationality, are eligible. Deaf or Dumb, Blind or Crippled Children, or those Diseased and already Given Over to Death, are, if destitute, always eligible.

The most searching inquiry is made into every application, but NO REALLY DESTITUTE BOY OR GIRL IS EVER REJECTED. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

Over **35,000** children have been received since 1866. From **50** to **60** Fresh Cases are admitted weekly during the winter months.

About 1500 Young Children are now Boarded Out in rural districts, under careful supervision.

Technical training in some one of the **fourteen** handicrafts carried on in the Homes is given to every **Lad** capable of receiving it.

All the Gipls are brought up in Cottages on the family system, and carefully instructed in the various branches of Domestic Service.

10,013 Tr: ined and Tested Children have already been placed out in the Colonies. Of these 98 per cent, have been successful.

Four Lodging Houses and a Night Refuge open in the Metropolis, and Nine "Ever Open Doors" in Provincial Towns, are accessible throughout all hours of the day and night to homeless "Waifs and Strays" seeking temporary shelter.

These Homes actively co-operate with the **N.S.P.C.C.**, and receive **freely** and **at once** all destitute cases recommended by that Society or any of its Branches all over the Kingdom.

In all, these Institutions now comprise 86 distinct Homes, dealing with every age and class of destitute and needy childhood, and 24 Mission Branches.

FUNDS ARE URGENTLY NEEDED FOR KOOD AND MAINTENANCE.

Donations and Subscriptions gratefully received by the Treasurer, WILLIAM FOWLER, Esq.; by the Chairman of Committee, Howard WILLIAMS, Esq.; by the Founder and Director, Dr. Thos. J. Barnardo; or by the Bankers, London and South-Western Bank, and Messrs. Prescott, Dimsdale & Co.

JOHN ODLING, Secretary.

Offices: 18 to 26, STEPNEY CAUSEWAY, LONDON, E.

HOMES FOR LITTLE BOYS,

FARNINGHAM AND SWANLEY. KENT.

Datrons.

THEIR ROYAL HIGHNESSES THE PRINCE & PRINCESS OF WALES.

Vice=Dresidents.

The Duke of Argyll, K.G. The Marquis of Zetland, K.T. The Earl of Aberdeen, G.C.M.G. The Earl of Stanhope. The Viscount Knutsford, G.C.M.G. Field-Marshal Viscount Wolseley, G.C.B. The Lord Bishop of Ripon, D.D. The Lord Herschell, G.C.B.

The Lord Napier and Ettrick, K.T.

Sir George Newnes, Bart. Sir W. II. Wills, Bart, M.P. The Ven. the Archdeacon of London. Rev. R. F. Horton, M.A., D.D. J. Passmore Edwards, Esq. George Hanbury, Esq. Abel Smith, Esq., M.P. Robert T. Turnbull, Esq.

These Homes were the first to abandon the discredited Barrack System, to secure Family Life for the Boys.

THE COTTAGE HOMES AT FARNINGHAM are for 330 Boys, who are Homeless and Destitute. They are placed in families of 30 each, with a Father and Mother to take care of them. They are fed, clothed, and educated, and receive careful, moral, and religious training.

They are taught to be industrious, by being employed in Tailoring, Shoemaking, Carpentering, Printing, Breadmaking, Painting, Gardening, and Farming. Situations found for them, where they are looked after as "Old Boys."

Boys are either admitted on payment by benevolent persons of 7s. a week, or can be elected free or on part payment.

THE HOMES FOR ORPHANS at Swanley are designed for 200 Boys, whose mothers need to go out to earn their living. They do what they can towards the support of their own boys, and friends who have known them in better days help them. Every boy admitted to the Orphanage is paid for at the rate of £21 per annum, for which they are fed, clothed, educated, taught to work, and entirely maintained throughout the year, and many benevolent people are glad in this way to support an Orphan Boy.

These Homes being entirely supported by Voluntary Gifts, the Committee most earnestly appeal for help.

Treasurer.—W. H. WILLANS, Esq., J.P., 3, Copthall Buildings, E.C. Secretary.—Mr. WILLIAM ROBSON, 25, Holborn Viaduct, E.C. Bankers.—Measrs. Smith. Payne. & Smiths. 1. Lombard Street, E.C. HOME MISSIONS OF THE CHURCH OF ENGLAND.

CHURCH PASTORAL-AID SOCIETY.

INSTITUTED 1836.

FIVE MILLIONS AND A HALF of people in our parishes are indebted to this Society for the presence of additional Clergy, Lay Agents, and Women Workers. The number of Grants has gone up to 896.

THERE ARE STILL MANY urgent applications which cannot be granted for lack of funds.

Secretaries.—Rev. JOHN BARTON, M.A.; Col. H. S. CLARKE, (late) R.A.; Rev. R. G. FOWELL, M.A. •

BENEVOLENT FOUNDED BY THE LATE PETER HERVÉ.

Betablished 1812. Incorporated by Royal Charter.

Under the immediate Protection and Patronage of Her Most Excellent Majesty the Queen, and His Royal Highness the Prince of Wales.

Treasurer-The Reverend Prebendary WHITTINGTON, M.A.

This Institution was founded for the purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and

Subscribers.

The sum disbursed in Pensions now amounts to upwards of £13,000 per Annum.

The total number of Aged Persons who have been supported by the Institution is 2,580, the gross

sum distributed to them up to the present exceeding \$506,100.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily. (Saturdays 10 to 2.)

Office-65, Southampton Row, Bloomsbury, W.C. HENRY C. LATREILLE, Secretary.

ROYAL ALFRED

AGED MERCHANT SEAMEN'S INSTITUTION.

ESTABLISHED IN 1867.

To give a HOME or a PENSION to the MERCHANI SAILOR When Old, Destitute, and Helpless.

This truly NATIONAL Institution deserves, and earnestly APPEALS for, the help of ONE and ALL.

'POOR JACK.'

The Merchant Seaman brings us the food we eat, the cothes we wear, and many of the luxuries we enjoy When we consider his cheerless existence away from home and friends, out in the solitudes of sea and sky, risking his life for his daily bread, yet all the while an unobtrusive factor in welding together our mighty empire, surely it becomes us to lend him a hand when his own hands are too feeble to steer his ship or reef her sail, and when nothing but the workhouse stands between him and the grave.

The ROYAL ALFRED INSTITUTION provides a Home or a Pension, and since its foundation it has thus helped 1,424 poor old Seamen, who else must have ended life in the dreaded Workhouse.

280 are now anxiously competing for every vacancy.

INCREASED ANNUAL HELP URGENTLY NEEDED.

President-R S. DONKIN, Esq., M.P.

The Mission of The Children's Home is to rescue children who, through the death, or vice,

The Mission of The Children's Home is to rescue children who, through the death, or vice, or extreme poverty of their parents, are in danger of falling into criminal ways. It is therefore at once an Orphanage and a Refuge.

The Home receives children of any age, or any sect, without election It is conducted on the Family system; is a Religious and Industrial Institution; is a Training School for Christian Workers; and is dependent on Voluntary Contributions.

Within the last twenty-nine years 4.256 children have received the benefits of this Institution. 1020 are now in residence. About £16 will maintain a child in the Home for a year.

There is the greatest cause for thankfulness to God for the present well-being and for the prospects in life of a large majority of the great number who have passed through the Home.

In connection with this work the Gordon Hall Mission is carried on in the East End of London; an agency for the Protection of Girls is at work, a refuge being available night and day; a Servants Free Registry is open, and Lodgings are provided for respectable young women during the interval between situations; also a Mission to the Poorest Children of East London is very successfully carried on. A Number of Epileptic Children have already been received. The entire work is greatly in need of more liberal support. The smallest contributions will be thankfully received.

will be thankfully received.

The need of such a work is painfully obvious. Our cities and towns are crowded with the need of such a work is paintyliny obvious. Our cities and towns are crowded with children exposed to every evil influence, shut out from all good, and living a life worse than that of savages, and as they grow up they naturally take their places in the ranks of the pauper and the criminal. Yet they may be saved. Hundreds of cases prove that these little ones--some of them mere infants—are susceptible of every elevating influence, and need only the care of a Christian home to develop all that is good in their characters, and fit them for reputable and useful lives.

Collecting Books, Boxes, or Cards will gladly be forwarded to those who are willing to collect in aid of the funds of the Institution.

Cheques and Money Orders should be crossed City Bank, and Orders made payable at General Post Office.

Remittances to be made payable and sent to T. B. STEPHENSON, Bonner Road, London, N.E.

I. PENDLEBURY, Secretary.

Royal London Ophthalmic Hospital.

Founded in 1804.] MOORFIELDS, E.C. Founded in 1804.

The magnitude of the work of this Charity is shown by the fact that in 1897 the Out-patients numbered 25,051, and that the total number of attendances was 129,050,

An Average of over 416 for each Working Day,

whilst the In-patients numbered 1,968, the 96 beds being almost constantly occupied.

Unless more support is forthcoming the committee will be compelled to limit the scope of the work; they therefore earnestly appeal for Subscriptions, Donations, and Legacies.

Cheques and Postal Orders should be made payable to the Secretary, and crossed "Williams, Deacon, and Manchester and Salford Bank"

ROBERT, J. BLAND, Secretary.

Her Majesty the Queen has been the Patron of this Institution for 50 years.

ROYAL' HOSPITAL

FOR

DISEASES OF THE CHEST,

CITY ROAD, LONDON, E.C.

President—THE LORD ROTHSCHILD.

Treasurer—S. HOPE MORLEY, Esq.

Chairman of the Council—SIR T. ANDROS DE LA RUE, Bart.

Vice-Chairman—The Hon. LIONEL ASHLEY.

THIS Hospital was the first of its kind established in Europe, and has uninter uptedly since 1814 carried on its great work in the midst of the suffering poor of the Metropolis.

It treats annually about 750 In-Patients, who come from all parts of the country, and the attendances of Out-Patients each year number about 25,000.

The Charity's income from all sources does not exceed £3,000, whereas its annual expenditure averages £8,000, leaving an annual deficit of £5,000.

DONATIONS and SUBSCRIPTIONS are earnestly solicited, and may be sent direct to the Tre-surer, or to the Secretary,

CHARING CROSS HOSPITAL

STRAND, W.C.

Bresident :

HIS ROYAL HIGHNESS THE DUKE OF EDINBURGH, K.G.

Areasurer :

GEORGE J. DRUMMOND, Eso.

Bankers :

MESSRS. DRUMMOND, 49, Charing Cross; MessRs. COUTTS, 59, Strand; MESSRS. HOARE, 37, Fleet Street; MARTIN'S BANK, LD., 68, Lombard Street. Secretary-ARTHUR E. READE, Eso.

The Governors earnestly solicit assistance for this Hospital, which is mainly dependent on voluntary contributions, and treats annually an average of over 23,000 SICK AND INJURED PATIENTS.

The Assured Income is about ~ £1,000. The Expenditure averages -£16,000.

ANNUAL SUBSCRIPTIONS and DONATIONS will be most thankfully received by either of the above-named bankers; or by the Secretary, at the Hospital.

FORM OF BEQUEST.

"I give and bequeath to the Treasurer or Treasurers, for the time being, of CHARING CROSS HOSPITAL, London, for the use of that Charity, the sum of free of Legacy Duty, to be paid out of my pure personal estate as soon after my decease as may be possible."

GREAT NORTHERN CENTRAL HOSPITAL

LONDON. N.

THE SICK POOR. ENTIRELY FREE TO

AND

Dependent on Voluntary Support.

The Local General Hospital for North London, and the only one available for a population of 1,000,000.

Special Departments for Women and Children, Eye, Ear and Throat, Skin, and Dèntal Cases.

Beds for 155 In-Patients, 25 of which are unused for want of Funds.

12 Beds for Paying Patients.

1,600 In-Patients, and 25,000 Out-Patients treated annually.

The reliable Annual Income is £8,000 less than the Expenditure.

Annual Subscriptions of 5s. and upwards, and Donations of any amount, are urgently solicited. LEWIS H GLENTON RERR, Secretary,

SAINT MARK'S HOSPITAL

For Fistula, Piles, and other Diseases of the Rectum, CITY ROAD, LONDON, E.C.

BANKERS.

MARTIN'S BANK, LIMITED, 68, LOMBARD STREET, E.C.

THIS is the only Entirely Free Special Hospital for the Treatment of such painful and distressing diseases.

FUNDS are VERY URGENTLY NEEDED to OPEN MORE WARDS, and will be thankfully acknowledged by

EDGAR PENMAN, Secretary.

LONDON FEVER HOSPITAL,

LIVERPOOL ROAD, ISLINGTON, N.

Telephone No. 7687, KING'S CROSS.

Over 80,000 sufferers from Infectious Fevers have been treated here since 1802, and many times that number of other persons have, as a consequence, been preserved from infection.

- DISEASES TREATED: Scarlet Fever at all times; and Diphtheria, Measles, and German Measles whenever accommodation can be made available.
- FEES: In the Wards, patients pay a fee of £8 3s., which is equal to about one-fourth of their cost, the other three-fourths falling upon the funds of the Institution.

 In private rooms, £3 3s. per week.
- GOVERNORS: Annual Subscribers of a Guinea or more yearly, on payment of the second year's subscription; Donors of Ten Guineas in one sum.

PRIVILEGES: Governors' own Domestic Servants, and certain Employes of Subscribing Firms, Clubs, and Hotels, are Treated Free of all Charge.

ADDITIONAL HELP IS EARNESTLY ASKED.

W. CHRISTIE (MAJOR), Secretary.

JUST PUBLISHED.

AN ENTIRELY NEW EDITION OF

HAYDN'S DICTIONARY OF DATES

And UNIVERSAL INFORMATION.

A COMPLETE RECORD OF ALL NATIONS AND TIMES.

With Especial Reference to the History and Achievements of the British Empire.

CONTAINING THE HISTORY OF THE WORLD TO THE AUTUMN OF 1898.

BY BENJAMIN VINCENT.

Hon. Librarian of the Royal Institution of Great Britain.

Medium 8vo, cloth, 21s, half calf, 25s.; full or tree calf, 31s. 6d.

TWENTY-SECOND EDITION,

Revised, Corrected, and Enlarged, with New and Important Matter, and thoroughly brought down to the Autumn of 1898, containing considerably over

1,300 Pages, 12,500 Articles, 145,000 Dates and Facts.

"The mention of dates brings us back to 'Haydn' the wonderful. 'Haydn' is far more than a mere catalogue of dates. It is a compendious history of every country and of almost everything under the sun—and on many subjects it is a veritable statistical encyclopædia. Are you interested in diamonds, or coals, or or any mortal thing you like to name? You will find out all about them in 'Haydn,' condensed and chronological, accurate and recent. In short, 'Haydn' shuns no test in its proper line, and will disappoint no reasonable expectation."—DAILY CHRONIGLE.

ROYAL NATIONAL MISSION TO DEEP SEA FISHER

Patron-HER MAJESTY THE QUEEN.

This Society has ministered for seventeen years to the spiritual and physical needs of the North Sea trawlers, as well as to the Fishermen on the West Coast, off the South of Ireland, East Coast of Scotland, and elsewhere. During recent years the Society has established two permanent hospital stations on the Labrador coast, which are also centres of spiritual effort. The steamers, Julia Sheridan and Princess May, carry on itinerary Medical Mission work along the whole 800 miles of coast frequented by the English-speaking fisher-folk. The Society has also shore agents at Gorleston (Great Yarmouth), Grimsby, Ymuiden (Holland), Aberdeen, Milford Haven, etc. It thus wholly employs thirteen vessels (three of them being fully equipped hospital ships with surgeons on board), and the number of persons medically treated as in and out patients during 1897 was no less than 13,540. The Councié carnestly appeal for Funds. Large or small donations will be thankfully acknowledged. Cheques or Postal Orders to be made payable to The Secretary (FRANCIE R. WOOD), and crossed "Lloyds Bank, Ltd.".

"Globe, The" Established 1803, and subsequently incorporated with The Traveller It was started by the old Whrp party and always was started by the old Whig party, and always was recognised as an authority on political matters, its contributors including some who held high office in the State It retained its Whiggism until 1866, when a new proprietary, recognis-ing the changed times, made it an outspoken though independent Conservative organ, ieducing its price from fourpence to twopence, and eventually to one penny. It is now a recognised evening journal of the Constitu-tional party. Editor, George Elhot Armstrong. Offices, 367, Strand, W.C

Gloucester, Bishop of See under PERRAGE. Goa. A port-town and territory between he boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and Belongs to Portugal. See Colonies,

CIC. OF EUROPEAN POWERS

Gold Coast Colony A Buttsh Crown colony on the coast of West Africa The colony has a coast-line of about 350 miles, and though the interior boundaries are not strictly defined, the area may be put at about 45,000 square miles, and the population at 1,500,000, including 37,500 professed Christians. Ihe native state of Ashanti hes inland, at the backlof the central portion of the colony Trouble arose between portion of the colony Trouble arose between the King of Kumassi, who had declared himself King of Ashanti in '94, and the British authorities and in '95 an expedition was sent against him, under the command of Sir Francis Scott, which resulted in the submission of the King, who was afterwards taken to the coast. The kings of Bekwai and Abodom also made their suifmission, and the country was placed under Butish protection, and a Resident appointed at Kumassi Accra is the administrative centre of the colony, and has a population of 16,267. The Government includes a Governor, an Executive Council, and a Legislative Council of nine, none of whom are elected. The products are chiefly palm-oil, gold, palm kernels, rubber, timber, etc See British Empire (table), "Glasgow Herald." A morning newspaper, Independent in politics. Founded in 1782. It circulates all over Scotland, and has the highest Anglo-French Commission sitting at Paris,

and signed June 1sth, settled the boundaries of the hinterland to the west and the north. From the intersection of the river Volta with the 5th parallel of north latitude, the boundary runs up the course of the river northwards to its intersection with the 11th parallel, and then turns east along the 11th parallel, deflecting northwards so as to include Bawku, till it reaches German territory in the hinterland of Togoland. Bona and Dokta were thus given up to France, and the French had to concede Wa and other points to the east of the Volta which had been occupied by them (See also NILERIA.) A number of railway officials left Liverpool (Aug 4th) in connection with the laying of a Government 11 alway from Sekondi to Tarquah in the goldmining district of the colony Railway material had already been sent out, and it was estimated that the construction of the line, which will be about 40 miles long, will occupy three years The old Ashanti capital of Kumassi 1570 miles from Tarquah, but up to the date given the country between the two points had not been surveyed for railway purposes. The new line will have a gauge of 1t. 6 in , and the starting point will be Tocoiday Bay, where wharves and piers will be erected.

Gold Fields and Production. Gold is found in every quarter of the globe in reefs or veins among quartz, from which it is separated by among quartz, from which it is separated by quarrying, crushing, washing, and treatment with mercury; in alluvial deposits, from which it is extracted by washing, in dust, grains, laminæ, or nuggets. Alluvial deposits are of several kinds -namely, (1) beds of running rivers, involving the employment of dredging apparatus; (2) superficial or not deep deposits, capable of being worked by diggers single-handed, (3) deep alluvial beds, often underlying hard rock necessitations theretical manner. hard rock, necessitating thorough mining, (4) deposits of gravel, schist, and disintegrated rock, often on hillsides, now generally washed gradually down by means of hydraulic engines Mining in quartz entails the employment of large capital and expensive machinery, including heavy stamps, (yandeworks, etc. The ore is in the first instance crushed by stamps, the separated gold being collected. This process heavy house the second of the control of the contro cess being, however, ineffectual in separating the whole of the gold, the residue is again treated by cyanide, and a considerable further quantity is obtained. Until lecently the ore then left, technically known as "slimes," was regarded as worthless, but now that in its turn is made to yield a further quantity of gold One of the most interesting developments of recent years has been what is known as deep-level mining in the Transvaal—that is, sinking shafts to a great depth in order to work an existing reef known to dip at a considerable angle. In the Witwatersrand field many deeplevel mines are now yielding very satisfactory results. The initial expenditure in connection with quartz mining is so great, that it is mainly conducted through the agency of limited companies, the buying and selling of the shares of which are an important part of the business of the Stock Exchange (q v). Thanks to the of the Stock Exchange (q v.) Thanks to the rapid development of gold mining in the I ransvaal, Western Australia, and India of recent years, there has been a rapid increase in the production of the metal after unimportant fluctuations for a considerable period. This is clearly shown in the following table, the main figures of which are quoted from the Statist:-

	Production in-					
Year,	Australasia	America.	Whole World.			
	£	£	£			
1851	1,319,000	11,000,000	17,200,000			
1855	11,277,000	11,000,000	27,015,000			
1860	10,554,000	9,200,000	23,850,000			
1865	10,253,000	10,600,000	24,040,000			
1870	8,939,000	10,000,000	21,370,000			
1875	7,326,000	6,700,000	22,700,000			
1880	6,174,000	7,203,000	22,130,000			
1885	5,597,000	6,400,000	21,250,000			
1888	5,530,000	6,600,000	21,985,000			
18 9 0	6,004,000	6,600,000	24,260,000			
1891	5,305,000	6,600,000	26,700,000			
1892	6,835,000	6,600,000	20,000,000			
1893	7,127,000	7,200,000	32,600,000			
1894	7,282,000	7,000,000	36,765,000			
1895	8,870,000	0,300,000	41,000,000			
1896	8,983,000	10,800,000	45,000,000			
1897	11,075,000	11,400,000	51,706,000			

As regards the new fields of importance, that of the Witwatersiand takes the first place Deposits were only discovered there so recently as 86, but owing to the icefs being good and regular, and to the fact that the best scientific methods of mining have been employed, the output has increased by leaps and bounds. It probably from eighty to a hundred—must clapse before the field is worked out. Gold is known to exist in other parts of the Fransvaal, such as the Lydenburg, Kleiksdorp, and De Knap districts, but these are being only partially worked at present. The existence of payable gold in Rhodesia has been a much disputed point for many years past. In the autumn one way or the other before long. The output one way or the other before long. The output in Western Australia is also steadily increasing, but the gold there is scattered over a wide area, and the reefs in many paits are irregular and patchy. In the neighbourhood of Kaland patchy goorlie, however, very large and rich teels are being systematically worked. In none of the other Westein Australian districts have important developments taken place during the year In India there has been steady progress without any occurrences worthy of note Gold mining in New Zealand continues in a somewhat unprogressive condition, but in British North America, especially in the Klondike region, rapid progress is being made

GOLF, '98.

Golf retains and even increases its hold on popular favour, and each year more links are added to the large number that now exist. The following are the most important matches that have taken place during the year. On Feb. 17th J. H. Taylor and J. Braid played a grand game in a 36-hole match at Wimbledon, for a prize presented by Sir George Newnes, Bart, in which Taylor won, his score being 150 against Braid's 15t. On April 2nd, at the opening of the new Wimbledon Park Golf Club, a march was played between Rowland Jones, the professional of the new club, and P. Paxton, when the former won by 2 holes up and 1 to play. An 18-hole match between J Braid and Jack White at Seaford, on April 13th, resulted in Braids victory by 4 holes up and 3 to play. A return match was played on the following day at

Newhaven, when Braid again won by 7 holes up and 6 to play. A 72-holes professional Foursome for £100 was played between A. Kirkaldy and A. Herd on one side and B. Savers and and A. Herd on one side and B. Sayers and A. Simpson on the other, on Apil 14th and 21st. At the end of the first day the former were leading by 3 holes, which advantage they increased to 12 up and 11 to play, by which they won. On Apil 14th J. Braid beat Jack White. On Apil 19th, at Aberfeldy, A.Kirkaldy beat A. Herd in an exetting match by 1 up. On Apil 23rd W. Fernie beat J. Kinnell in a 26tholes match. the scores hence were to 15th. 36-holes match, the scores being 151 to 154 A. Herd beat Tom Varden in a 36-holes match on April 30th by 148 strokes to 155 At Hastings, on May 4th, a match between many noted pro-lessionals resulted in favour of A. Herd, whose score was 148. On May 11th, at Burnham, Somerset, J. H. Taylor beat J. Braid, the scores Somerset, J. 11. 1 aylor beat J. Braid, the scores being 163 and 166; and on the 18th, at East Finchley, a match between the same professionals ended in a tie, the scores being 154. Miss Lena Thomson won the Ladies Golf Championship at Great Yarmouth on May 20th The Amateur Championship was won by Lt F. The Amsteur Ortanguagement was won by he for a till flack Watch) for the second time, at Hoylake, on May 27th Mr S Muir Feigusson was beaten in the final by 7 up and 5 to play. Mr. Tait also won the St. George's Challenge Cup at Sandwich on June 1st, with a score of 163 W. Park, in a match for £200 against W Fernie, w. Fark, in a match for £200 against w refine, beat him by 13 up and 12 to play. The Open Championship was played over the Prestwick Links, when Harry Vardon for the second time won, with a score of 37, Willie Park being second with a score of 308 Miss K Moeller won the Ladies Championship of Yorkshire, Mr. Frank Woodhead being the Amateur Champion of the same county, beating his brother Arthur in the final by 3 up and 4 to play On July 9th, in two matches at Romford, J. Haid defeated the champion, H. Vardon, but on the 23rd H. Vardon won a match at the North Surrey Ground against other professionals The Galoutta Gup was won by Mr. E Blackwell at St. Andrews on Aug 5th. At the Camoustic Fournament or Professional, on Aug 13th, Harry Vaidon won the 36 holes match, and he also won at the Elie Professional Fournament The Borough of Deal Amateur Challenge Cup was won by Mr. Schacht. Mr Mache won the Queen Victoria Jubilee Vasc at St. Andrew's, The Irish Golf Championship was won by Mr. W. B. Taylor, of the Edinburgh Carlton Citish. Club, in a most exciting match, an extra hole being played to decide the game. Mr Dallmeyer, of the London Scottish, was his opponent On of the London Scottish, was his opponent On Aug. 26th Kiikaldy beat Scott by 4 up and 3 to play, and a few days afterwards A Herd defeated H. Vardon by 3 holes up and 2 to play. Mr. Lawson won the Midothian Cup with a score of 77 Mr. H W de Zoete won the King William IV. Medal, at St Andrew's, with a score of 80, and Mr. F G lait the Club Gold Medal with a score of 78 Hairy Vardon won the Newcastle (Co. Down) Professional Tournament on Cet 1st Tournament on Oct 1st

Goluchowski, Count Agenor, Austro-Hungarian Minister for Foreign Affairs, was

He is a large landed proprietor in Galicia, and has sat as a Conservative in the Austrian Chamber of Peers. He was appointed Minister of Foreign Affairs on Count Kalnoky's

resignation in May '05.
Good Templars, The Independent Order of, a total abstinence fraternity originated in New York in 1851. In '88 it was extended to England by Joseph Malina, who, by '70, had instituted the Grand Lodge of England, from which the Order has spread round the world. It administers a pledge of lifelong abstinence from intoxicating beverages, and advocates the legal suppression of their common sale. seeks to protect the abstinent and reclaim the inebriate. It admits both sexes to equal privileges and office. Only a small fee of 6d or 1s. per quarter is exacted, as it is non-beneficiary per quarter is exacted, as it is non-beneficiary in basis The Order consists of (1) local "Subordinate" lodges, meeting weekly; (2) county "District" lodges, meeting quarterly; (3) national "Grand" lodges, meeting annually, and an "International Supreme Lodge." The latter has met in the United States, Canada, England, Ireland, Scotland, Wales, and Sweden, and next meets at Toronto, Canada, on the fourth Tuesday in June '98. The Order publishes about forty newspapers and magazines in various languages. It has and magazines in various languages. It has a membership of over 550,000, in about 12,000 branches, governed by 100 different Grand Lodges. There are in the United Kingdom nearly 200,000 adult and junior members, of whom 55,000 adults and 45,000 juniors are under the Grand Lodge of England, whose permanent offices are in Edmund Street, Birmingham. This Grand Lodge has over 1300 lodges, of which 100 are in the army and navy. The Grand Lodge annual session at Plymouth, Easter '98, was attended by 600 representatives and The Juvenile Section of the Order enjoins abstinence from strong drink, tobacco, gambling and bad words, and has 70,000 British members, in 1000 branches. The members have founded a Temperance Orphanage at Sun-bury, at a cost of about £10,000. They have Mission Yans, with travelling missionaries to hold open-air meetings and circulate temperance literature in rural parts, and in many counties have latterly formed Good Templar Cycling Brigades. The Grand Lodge of Scotland has 1061 adult and 380 jumor branches, with a total of 79,000 members; its office 18 72, Great Clyde Street, Glasgow, and its monthly organ is The Good Templar. Ireland and Wales have about 500 adult and junior branches, and have an increasing membership The organ in England is The Good Templar's Watchword, weekly; and several local monthlies are issued besides much literary matter, from the Grand Lodge printing presses, at 168, Edmund Street, Birmingham

Gore, Rev. Charles, M.A., D D (Edin.), was b. 1853, and is the son of the late Hon. Charles Alexander Gore, the brother of the 4th Earl of Arran He was ed at Harrow and Balliol College, and was a Fellow of Trinity College, Oxford.
Mr. Gore has taken a prominent position in
Oxford as the exponent of High Church tenets.
The publication of "Lux Mund.," for which he Hungarian Minister for Foreign Affairs, was born in 1849. He entered upon his diplomatic career in the Ministry for Foreign Affairs, and in '72 was appointed Attache and afterwards Secretary of Embassy at Berlin. He then went to Paris as Counsellor of Embassy, and there married a daughter of Prince Joachim Murat. He was Minister at Bucharest, '87-93. Canon of Westminster. In '95 and '96 he took a prominent part in the Armenian agitation, and in '97 attended, with the Bishop of Rochester, the Convention of the Brotherhood of St Andrew, at Buffalo, U.S.A. In '98 he edited "Essays in Aid of the Reform of the Church." Address 'Little Cloisters, Westminster.

Gorst, Sir John, M.P. See under Commons Goschen, Rt. Hon. George J., M.P. See under Commons.

Gosse, Edmund, was b. in London 1849. Ed. privately. His book "Seventeenth Century Studies" was published in '80 (3rd edition' 97). "The Masque of Painters," which was performed with great success by members of the Royal Institute of Painters in Water-Colouis in May '86, was written by Mr. Gosse. In '89 he published "The History of 18th-Century Literature, 1660—1780" Histater works include a volume of most interesting essays entitled "Gossip in a Library" (91); a novel, "The Secret of Narcisse" (92); a collection of essays, "Questions at Issue" ('93); a critical volume on "The Jacobean Poets", a collection of lyrical poems, "In Russet and Silver" ('94); "Critical Kit-Kats" ('96), a series of modern monographs, and "A Short History of English Literature" ('97). An edition of Mr. Gosse's now engaged on the "Life and Letters" of the great Elizabethan poet and divine, Dr John Donne. Address. 29, Delamere I errace, W.

Gothenburg System, The. See special articles in '95 and '96 cditions, "The Gothenburg System of Publichouse Licensing," published by the Church of England Temperance Society, 9, Bridge Street, Westminster, a book on the Gothenburg system, by Mr Edwin Goadby, "Sober by Act of Parliament," published by Swan Sonnenschein & Co, and "The Gothenburg and Bergen Schemes," by D Lewis, JP, published by Elliott, Edinburgh. See also Local Option.

Gould, F. Carruthers, one of the greatest cartoonists of the day, was at Bainstaple in 1845, and was ed in that town He entered a local bank at the age of 16, and at 20 came up to London and entered a stockbroker's office, eventually himself becoming a member of the Stock Exchange As a boy his genius for caricature was noticeable, and on the Stock Exchange he found plenty of material ready to his hand. In '79 he began to illustrate the Christmas number of Truth, but his first journalistic work was done on the Pall Mall Gazette and Budget when Mr. Stead was editor He very soon became a regular member of the staff, and with his colleagues transferred his services to the Westminster Gazette when the former paper passed into Mr Astor's hands, For years his pictorial commentary on the proceedings at Westminster has been brilliant in the extreme, and latterly he has done the literary commentary also with equal success His "Cartoons for the Crisis" doring the general election of '95, afterwards republished separately, put his name into all men's mouths, and firmly established his reputation as a political caricaturist. He is now assistant editor of the Westminster Gazette.

Government. See Ministry, Treasury, and other articles.

Grace, Dr. W. G., the renowned cricketer, was b. at Downend, Bristol, 1848, and made his

first appearance in important matches in West Gloucestershire v. Bedminster, at Mangotsfield. Between '64 and '79 he made 20,842 runs in a total of 475 innings. His exploits as a batsman, fielder, and bowler, became so celebrated, that the title of "champion" was spontaneously conferred upon him. On July 22nd, '79, at Lord's, the enthusiasm of his admirers took the form of a presentation of the value of £14000 Although pui suing the medical profession, Dr Grace has still kept his place in first-class cricket. An interesting book upon Cricket was published by him in '97, and another is in preparation. He celebrated his Jubilee in '98, and it was announced in the autumn that he had accepted the position of secretary of the London County Cricket Club, whose ground will be at the Ciystal Palace.

"Graphic, The," founded 1869, by Mr. W. L. Thomas, its present manager, is an illustrated weekly of high-class character, and treats of current events Its Christmas and Summer numbers are especially excellent, and have a very wide circulation Editor, Mr. T. Heath Joyce. See also Daily Graphic Office, 190, Strand.

GREAT BRITAIN AND HER COLONIAL TRADE.

The British dominions are expanding rapidly both in wealth and in population. According to the best estimates, there were 320,000,000 persons subject to the Empire in 87, over 351,00,000 in '93, and about 400,000,000 in '97, exclusive of the inhabitants of Protectorates and spheres of the Empire. In fact, more than a quarter of the population of the civilised world reside under the British flag. The importance of the trade of such multitudes needs no demonstration, and it is therefore not surprising that attention has been closely directed to the best means for making it of mutual benefit, and to the dangers of foreign competition. The Canadian preferential tariff, adopted in '97, and put into full operation in '98 (see Canada), is of great interest in this connection Whether other colonies are likely to follow Canada's lead seems very doubtful. It would be extremely difficult, if not impossible, for many of the colonies at present to dispense with a tariff on imports. It is probable that for the present such changes as do take place will be rather in the relation of adjacent colonies to each other than in that of those colonies to the mother country. It is calculated that 70 per cent of British exports go to foreign countries, while 77 per cent. of British imports are derived from outside the Bitish Empire. The following tables, compiled from the Colonial Office list, show the state of things in the Colonies. The percentage of some of the minor colonies has been omitted to save space, but the general average at the bottom includes all British possessions.—

Indian and Colonial Exports.

Percentage to

	United	British Possession		Foreign countries
Cape Colony .	95	1		4
New Zealand	78	15	•	7
Ceylon .	. 70	18	•	12
Natal	. 64	12	• •	24
Victoria .	· · 57	29	•	14
British Guiana	. 52	6		42

Percentage to

	United Kingdom	British Possessions		Foreign Countries	
Canada	52		4	44	
South Australia	41		54	. 5	
Queensland	30		60	ī	
West Australia	38		6r	1	
New South Wales	36		45	19	
Newfoundland	36		4Í	23	
India and Burmah	31		20	49	
West Indies	20		8	64	
Tasmania	. 21		79		
Straits Settlements	21		14	65	
Av'ge for all Coloni			27	26	

There are great variations in this table, and the colonies are purposely so arranged as to show how much more some colonies send here than others. Of course the fact that some of the exports sent here are for distribution only must not be lost sight of, but broadly it may be said that as regards foreign trade our colonies fall into three distinct categories. There are those which he contiguous to foreign countries and naturally do a large amount of business with them. Of these Canada, the West Indies and the Straits Settlements are conspicuous examples. There are others which are greatly isolated from the world at large, and therefore 180lated from the worm at large, and therefore depend mainly on Great Britain as a market-for instance, New Zealand, Cape Colony and Natal. The third category comprises those colonies, mainly Australian, which he near to each other and trade largely with each other This classification is important, as we are too apt to speak generally of the colonics as if their conditions were similar, while the differences between them are great and have a vital bearing on inter-Imperial trade relations

With some variations, the classification of imports on the same lines is very like that of exports, as will be seen from the following table.—

Indian and Colonial Imports
Percentage from

		mied	British	Foreign ountries
Cape Colony .		80	 7	 13
Natal .		76	ý	15
India		71	11	18
New Zealand		65	27	8
British Guiana		55	16	29
West Australia		49	49	2
West Indies .		46	12	42
Victoria		42	49	Q
New South Wales		40	52	8
Queensland		36	60	4
Canada		35	2	62
Tasmania		33	 6 6	1
Ceylon .		26	68	6
South Australia		25	67	 8
Newfoundland		20	19	61
Straits Settlement		14	20	60
Av'ge for all Colon	165	47	27	26

Leaving out of account those colonies all eady alluded to, which, owing to their geographical position, necessailly trade largely with neighbours, it will be seen that foreign competition is much less than many suppose. Allowance has of course to be made for the fact that all the goods exported from this country are not necessarily made here, but even then it is obvious that we command the bulk and the pick of colonial trade in manufactured goods. See Colonial Conference '97.

GREAT BRITAIN AND HER FOREIGN TRADE.

In the Annual of the last three years much attention has been paid to the rapidly changing conditions of our foreign trade, owing to the eager rush for the development of new markets and the increasing and organised competition of enterprising rivals. The special conditions affecting particular markets throughout the world were surveyed, partly with the view of inducing traders to remedy some of the defects in our commercial system, the existence of which was demonstrated. Generally speaking, it may be said that the conditions explained have changed but little, though in some directions the competition has become accentuated. It is not proposed here to repeat the particular survey of foreign markets (see eds. of '96, '97, '98), but merely to collect certain particulars concerning the mercantile energy of our rivals and the unsatisfactory methods which many British traders employ. Some credit may fairly be taken for the part played by the Annual in calling the attention of the public

ANNUAL in calling the attention of the public to these matters.

Early in '97 a Memorandum was laid upon the table of the House of Commons embodying Comparative Statistics of Population, Industry, and Commerce in the United Kingdom and some Leading Foreign Countries. The general conclusion was that the conditions of the manufacturing and industrial predominance of the Kingdom were different from what they were when the non-agricultural population of every country in the world was smaller than in our own—in other words, that industries and manufacturies abroad are becoming much bigger things than they were Later on, a paper embodying Correspondence respecting Diplomatic and Consular Assistance to British Trade Abroad was presented to both Houses of Parliament, and a gicat deal of information was derived from the Chambers of Commerce throughout the country as to the manner in which this

the country as to the manner in which this assistance might be ancreased.

A very important step was taken by the Board of Trade in July '07, in the appointment of a Departmental Committee to undertake an Inquiry into the Development of British Trade. The special instructions to the Committee were that they should consider and advise as to the best means of binging to the knowledge of the home trades the information furnished by Consuls and Commercial Attaches, and by Agents-General and other representatives of Colonial Governments and of India, as to the supply and demand and other conditions of the markets in their respective districts, and as to the opportunities which they afford for the introduction and development of British trade. They were also to report as to whether in their opinion it was desirable that Consuls and Agents should be instructed to remit home from time to time samples of goods most in demand—this being a recommendation which had been made by many Chambers of Commerce—and if they should be of that opinion they were to advise in regard to arrangements for

the exhibition or circulation of such samples.

The Committee presented their Report in July, 98, making a number of general suggestions in relation to the dissemination of commercial intelligence. In regard to a suggested Commercial Intelligence Office, the Committee with practical unanimity recommended the

establishment of an office whose function it should be to meet the constantly increasing demand for prompt and accurate information on commercial matters, so far as it can be met by Government action. There was no desire to suggest anything which would, even if it could, impair the value of the information already obtainable by individual enterprise. It was more than ever essential in these days that our manufacturers and traders should rely mainly on their own efforts to extend the area of their transactions and the amount of their business. Sir James Mackay, a member of the Committee, laid great stress upon this matter, and was of opinion that the establishment of such an office as was proposed would tend to rob the trader, who has embarked in operations in distant regions, of the just fruit of his enterprise, while at the same time it would lay open to foreigners and competitors information that would be very valuable to them. "The State may, however," said the report, "usefully afford assistance in the interests of the trading community as a whole, and may supply information from a broader point of view than that of the individual trader." The Committee further came to the conclusion that it is desirable to obtain more completely than at present particulars and samples of foreign-made goods mostly in demand in foreign, Indian and Colonial markets, and to make arrangements for the exhibition of those samples in our centres of industries and commerce.

In such helps to commerce foreigners are particularly energetic There are typical museums of the class in Brussels and Vienna, and Commercial Information Bureaus exist in several of the capitals of Europe. In July 98 the French Minister of Commerce announced the institution of a Commercial Intelligence Bureau in Paris, which was to collect and disseminate information concerning raw materials or products which France can import for manufacturing purposes, for consumption, or trarsit, on customs, tariffs, port dues and taxes affecting trade or navigation; on products capable of finding an outlet in foreign markets, etc., with particulars of conditions of transit, payment, package, the position of markets, firms, etc, and on undertakings to be opened in foreign countries. Later, in Oct. '98, it was announced that the loss of the Spanish colonies had caused the Spanish Government to form a special sub department of the Ministry of Foreign Affairs for the purpose of supplying commercial information and statistics to traders These are but illustrations of the new commercial activity being displayed abroad in Austria-Hungary a plan has been formed which is striking, though not new, of despatch-ing a Floating Exhibition to make known the products of the dual monarchy in various countries. The exhibition is intended to be installed in a ship of the Austrian Lloyd's installed in a ship of the Austrian Lloyd's Steamship Company, to leave in Deep of carrying a large assortment of samples, with experts and catalogues in four languages, for the Piræus, Salonika, Constantinople, Smyrna, Alexandria, Massowah, Aden, Bombay, Colombo, Calcutta, Akyab, Rangoon, Singapore, Bangkok, Saigon, Batavia, Macassar, Sandakan, Cebu, Manilla, Pakhoi, Kiungchow, Canton, Hongkong, Swatow, Amoy, Kelung, Foohcow, Shanghai, Chin-Kiang, Wei-hai-wei, Chefoo, Port Arthur, Yuensan, Nagasaki, Kobe, and Yokohama.

But certainly the most important commercial rival we have is Germany, which is everywhere displaying extraordinary energy and enterprise. The Berlin correspondent of the Times, writing in October '98, gave an exceedingly interesting account of the development of German influence in Turkey since 1888, largely through the operations of the Deutsche Bank group of financiers, both directly and indirectly. The transaction of business was facilitated, and German enterprise was not slow to take advantage of the new opportunities Everywhere the beginnings of new business connections are visible, and in many cases it is the promise of future development rather than what has been achieved which merits the intelligent attention of Englishmen. This expansion will doubtless receive a new impetus from the visit to Constantinople of the German Emperor, who said to the German community on his arrival. "I have it from the ruler of this land himself that you have established for yourselves a high position in this capital." The correspondent made some remarks which are confirmed by all experience -" The German export trade, I am assured on all hands, owes its successes to the stolid, steady perseverance of German industrialists, who imitate the methods of the German general staff, and, it may be added, those of our own admirable Sirdar, in neglecting no detail, however trivial, in their plan of campaign. Putting their pide in their pockets, they accommodate then system to the task in hand Like great generals and strategists, they are perfectly content to labour for long years in obscuitty, and to 'cast thei bread upon the waters, conscious that 'after many days' it will return to them Above all, they study the business ways of their customers, and do not thoughtlessly apply Western stan-dards to Fastern transactions Fertility of resource and a prompt willingness to abandon their own experiments, when these prove unsuitable for the purpose in view, are also characteristic of German commercial methods. In the Balkan States, for example, they tried the establishment of warehouses for the exhibition of German products. This was found not to answer, and the idea of commercial museums was simply dropped. In its place the system of sending out large numbers of energetic, well-educated, and experienced commercial travellers was adopted, and it has hither to yielded the best results

This commercial activity of the Germans is even more marked in the Far East, where Kiao-chau is expected ultimately to overshadow the prosperity of Chefoo, and to lead to a wonderful increase of German trade. Our system of trade is obviously cf a stiff and unbending character. Mr. Byron Brenan, Consul at Canton, in a report to the Foreign Office has made a useful comparison of German and English methods. The young German puts up with trouble and disagreeable experiences much more readily than the young Englishman. English makers, he says, show less eagerness to secure orders than Continental and American rivals. If the critical eye sees vagueness in the applications of a would-be Japanese purchaser, the vendor thinks there can be no real business, whereas the possibility is that the Japanese does not know precisely what he requires. "But the loss of business caused by this unbending adherence to established standards is not limited to the makers who refuse to be accommodating. If

sometimes reacts upon others. One British firm in Japan lost a good order for rails, and consequently some English maker also, because with the rails it was necessary to supply a certain kind of crossing and switches which are not now made in England. The English firm had hitherto got over the difficulty by supplying the rails from England and obtaining from the Continent what the British iron-masters refused to make; but their Continental rivals here saw their opportunity. The order had to be executed as a whole, and if the British firm could be prevented from obtaining the switches, the order would have to be transferred to such parties as could supply all that was desired, so a paternal Government applied a little pressure to the Continental maker of the right kind of switches, and he refused to sell any more to the British firm, who thus were unable to fuffil their orders, and in the end both switches and rails were procured from the Continent."

A remarkable illustration of German commercial zeal is the Commercial Mission which was sent out to the Far East The mission visited Canton, Swatow, Amoy, etc., and penetrated 1100 miles up the Yang-tse, staying at the towns on the banks, and especially the newly opened treaty port of Shashi. Samshui and Wuchow were visited, and an accurate know ledge was gained of the province of Chekiang and the southern portion of Kiangsu, as well as of the silk districts of Canton. Some members of the party made an overland journey from Tientsin to Newchwang and the neighbouring districts. The mission also thoroughly in vestigated the trade conditions of Japan, and had a glance at Korea. The result is that a vast amount of special commercial intelligence has been made available to German traders, with careful provision that it shall not be divulged to others. In April '98 an exhibition of 5,000 samples brought back was opened in two large rooms in the Reichstag buildings, which showed that the collection was the result of close study of technical men thoroughly versed in their work. The exhibition, which was transferred to Diesden before the end of April, had the twofold object of showing what Europe an and American goods are exported to East Asia, and what goods can be purchased out there, The commercial attache to the British embassy in Berlin has described the interesting conditions on which the collection was on view. These should be carefully noted by British traders as an excellent example of the German commercial system. "The exhibition is only open to those persons actually interes ed in the trades concerned, and to members of the Chambers of Commerce and some officials, no other persons are admitted, and entrance is only permitted on the presentation of a permit from the Society of Industrialists. The general report, and the valuable special reports on the different branches of particular trades to the East will not be published, except for private circulation amongst those persons interested in each particular branch. Copies of these reports are not to be obtained anywhere for the general information of the public."
There is reason to hope that our manufacturers and merchants are now alive to the serious nature of the attack which is being made upon our commerce. With a fair field and no favour the British trader can probably in most things hold his own against the world; but he must

abandon the antiquated and unbending methods of business which forbid him to study the wants of his customers, and cause him to attach great faith to his catalogues in the English language, with English prices, weights and measures, deposited at British consulates, and to a system of payment which is often not suited to his correspondents, as well as to methods of packing goods which are generally far inferior to those of his commercial rivals.

A memorandum lately (Oct '98) published by the Board of Γrade on the ways and methods of British trade is a complete exposition of the defective system referred to Not less than 116 consular and diplomatic officers throughout the world report with much thoroughness upon the prevailing currents of trade, and, with few exceptions, all deplore the supineness and short-sighted policy of the British trader He finds eager rivals in markets where once he was supreme, and these gain the advantage because they rush forward, while he is apt to be stationary. He has not seen, as this memorandum makes plain, that the conditions of trade are rapidly changing. He makes things that are good, solid, generally honest, and often expensive; and if the customer asks for cheaper objects he will not supply them. Much as he may regret that quantity is valued more than quality all the world over in these days, he must sail with the stream, or his fortunes will be hipwrecked. This is, in effect, what the consuls say. We have almost lost the trade with Poland in agricultural inplements because we would not suit our productions to the purses of our customers Many of the onsuls report that our merchants will not sell unless they get large orders, whereas the German will book and execute small orders One consul quoted in the memo-randum says that the chief cause of success in foreign competition is the greater attention paid abroad to the art of exactly suiting the foreign customer's "pocket, taste, and convenience." In regard to the first matter, the Germans seem particularly obliging, though, of course, with an ulterior object in view. While English houses will give only two or three months' credit, or even demand cash on delivery, the German will give six months' credit so that the consument may be the control of the course o credit, so that the consignment may perhaps be sold before payment is made. To give credit without making many bad debts re-quires an intimate knowledge of the stability of individuals, which can only be obtained by diligent and careful travellers, and these not all English houses take the trouble to send out. Many of the consuls whose opinions are collected in this important memorandum declare that too much reliance is placed in flooding the consulates with elaborately and artistically got-up catalogues, price lists, etc., containing a request that they should be distributed or placed at the disposal of dealers—a system pronounced "absolutely valueless."

"In many cases the first thing the recipients of these catalogues and price lists do, on seeing the drawing or design which has taken their fancy, is to apply to the representative of the foreign firms with whom they have been in the habit of dealing in order to ascertain all particulars concerning the articles described in the English language" "One commercial in the English language" traveller, says the consul at Cherbourg, "who knows the language and the ways of the people,

will do more than ten thousand circulars

while his colleague at Naples remarks that "it is pitiable to see the British commercial traveller stumbling along with an interpreter, while his German competitor is conversing fluently; and one is still more sorry for him when his patterns and samples are marked with British weights and measures" The notes here collected have the purpose of enforcing and recording much that has lately been said, for the condition of our foreign trade has been one of the keenest interests of the year '98.

Great Central Railway. See RAILWAYS.

GREECE.

A kingdom under George I. (q v.), of Glücksburg. The country gained its independence in the famous struggle of 1821-9, after centuries of subjection to Turkey. The present monarch, who is the second son of the King of Denmark, was elected in '63, after the expulsion of King Otto. Executive vested in King and responsible ministers. The legislative authority is in the hands of the Boule, a chamber of 207 representatives elected by manhood suffrage for four years. The deputies are each paid about £72 per session. There are large numbers of Greeks outside the limits of the Kingdom. In Asia Minor there are probably about 2,000.000, in European Turkey about 3,500,000, and large numbers dwell in Crete, Cypius, etc. The Greek orthodox Church is the State religion, but complete liberty of worship prevalle Education is compulsory, but the law is not enforced. The State has a monopoly in salt, petroleum, matches, and playing-cards. The chief exports are currants, ores, wines, fruit, and olive oil. There are 591 miles of railway open. By the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece underwent humiliation and defeat, and had to agree to pay an indemnity of £74,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters Area about 25,014 sq m; pop. ('96) 2,433,866. Revenue, '88, £2,502,188, expenditure, £2,402,906, old public debt, £6,800,000; imports, '97, 4,500,461; exports, £3,22,365. See Diplomatic, Foreign Armies, and Foreign Navies

and Forrign Navies.

Political Parties. Until '90 the two chief party leaders were M. Triooupi and M. Delyanni. But in '90 a section of the Opposition under M. Delyanni broke away from him to follow M. Balli, who posed as the chief of the Neo-Hellenic party. M Delyanni ruled the country from '90 till March '92, and M. Tricoupi from June '92 (with the exception of a few months during '93) till Jan. '95. In April '95 M. Delyanni was returned to power with 140 supporters, if supporters of M. Tricoupi, 18 of M. Ralli, 24 Independents, 8 Progressists, and others being elected. M. Tricoupi thereupon withdrew from political life, and died during '96. M. Delyanni remained in office till April '97, when the popular feeling against him aroused by the Greek reverses during the war with Turkey led the King to dismiss him M Ralli succeeded as Premier, and held office till Sept. 30th, '97, when he was succeeded by M. Zalimis. With the formation of the Zalimis Cabinet (Oct. and, '97) a split occurred amongst the Delyannists. M. Zalimis himself had for

merly been a follower of M. Delyanni; but on his accession to office there was a rupture between them, and very many members of the party supported M. Zaimis. Nevertheless M. Zaimis deemed the opposition too atrong for him, and resigned (Nov. 7th, '98)

M. Zamins deemed the opposition too strong for him, and resigned (Nov. 7th, '98)

History, '98. The treaty of peace with Turkey was at last signed at Constantinople (Dec. 4th), and the details of the law for the institution of an International Commission of Control over the revenues assigned for the service of the foreign debt and the indemnity loan were settled by the Foreign Minister and toan were settled by the Tolegal manuscreams the European delegates (Jan. 12th). The Commission consists of six members, one from each of the Great Powers, each in turn acting as president for six months. The Commission nominates its own agents and employés, collecting the money through a Greek company under its absolute control, and furnishing an account of its operations to the Greek Government every six months In case the assigned revenues should not suffice to pay the foreign loans the Greek Government is responsible for the definency The arrangements with the bondholders were made an integral part of the law, the foreign loans being divided into three categories. The first category comprises the two privileged loans, the Monopoly and Funding, the second includes the Five-per-cent loans of '81, '84, and '90, and the third the Four-per cent Rentes. The revenues assigned as security were monopolies (including emery from Naxos) valued at 12,300,000 drachmas per annum, the tobacco trx valued at 6,600,000, stamps at 10,000,000, and the Pireus Customs at 10,000,000 or ode than 30,600,000 drachmas. In case of a deficiency, the Customs of Patras, case of a deficiency, the Customs of Patras, Volo, Corfu, and Laurium, valued at 7,200,000 dr.chmas, were assigned as supplementary revenues. The indemnity loan was successfully airanged (Feb. 24th) with the help of Great Biltain, France, and Russia. £ \$\mathcal{I}_{4}\$,000,000 were furnished by a Syndicate under the guarantee of the three Powers, and £ \$\mathcal{I}_{1}\$,000,000 without guarantee. The Greek Bank found the remunder of the loan £ \$\mathcal{I}_{6}\$ foo.000. without guarantee The Greek Bank fo the remainder of the loan £T6,600,000. cowardly attempt to assassinate the King by shoo ing him while out driving with the Princess Marie failed (27th). The King displayed great courage, and his escape awoke an outburst of enthusiastic loyalty. The two would-be assassins were caught and con-demned to death. The Chamber reassembled and the Finance Minister introduced the Bill for the international control of the revenues set apart for the service of the foreign debt (March 3rd) It passed quickly, and practically unopposed, through its various stages, and was carried (7th). The Bill authorising the issue of the loan guaranteed by the three Powers was also carried (April 3rd), and the Session was then closed. The Porte was notified by the Powers (May 6th) that the evacuation of I hessaly must begin, and it was announced (June 6th) that all the Turkish troops had left, and that the province had been reoccupied by the Greeks M. Zaimis and his Cabinet resigned (Nov 7th), declining to meet a Chamber which he knew beforehand contained a majority of members hostile to him; but was commissioned by the King to form, and formed, a new Cabinet. The date for the opening of the Chamber was postponed from Nov. 12th to Nov. 27th.

Grenadines. A cluster of islets lying between Grenada and St. Vincent, some of which are subordinate to Grenada and some to St Vincent. The largest is Carriacou, with an area of 10 sq. in and pop. 6031 Exports: fish, oll, wood, sugar, corn, and cotton. Area, 86 sq. m.; pop. 5400

Gresham College. The Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of Sir Thomas Cresham, the "Royal Merchant" of Queen Elizabeth. By his will, dated July sth, 1575, Sir Thomas bequeathed certain rents growing out of the Royal Exchange, which he built, to the Corporation of the City of London, and to the Mercers Company, for the "erecting and maintaining of divers lectures in sundry and mannaning of uvers returned a status, faculties "-divinity, law, physic, geometry, astronomy, music, and rhetoric. The lectures were organised and commenced in June 1597 The buildings of Gresham House, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500 In '76, whilst the Earl of Selborne was Master of the Mercers' Company, the Gresham Lecturers submitted two schemes for the improvement of the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given in each year by each Prolectures to be given in each year by each Fro-fessor. The names of the present Gresham Lecturers are as follows: Physio, E. Symes Thompson, M.D.; Rhetoric, J. E. Nixon, M.A.; Astronomy, Rev. E. Ledger, M.A., F.R.A.S.; Law, G. H. Blakesley; Geometry, W. H. Wagstaff, M.A.; Music, J. F. Bridge, Mus. Doc. (q.v); Divinity, Rev. Henry E. J. Bevan,

M.A.; Clerk to the Gresham Committee, John Watney, Mercers' Hall, London, E.C.

Grey, Earl. See PEERS.

Guadeloupe. This colony is one of the principal French possessions in the West Indies, and consists of two islands, Basse-terre and Grande-terre, separated by a narrow salt-water river, with five smaller dependent islands. It is situated in the Leeward group of the Lesser Antilles. Capital, Pointe-à-Pitre. Products: sugar, rum, coffee, cotton, cacao, bananas, etc. The colony is represented at Paris by a Senator and two Deputies, and has an area of about 680 sq. m., and a total population of 167,000. It is administered by a Governor with an elected Council. See Cquonies, ETC., of Europplan Powers.

Guatemala. The most northern republic of Central America, bounded on the east and north by Mexico, west by Belize, the republics of Honduras and Salvador, and south by the Pacific Governed by a President, elected for six years, and a National Assembly, elected by universal suffrage for a term of four years. Koman Catholicism is the chief religion, but liberty prevails. Education free and compulsory. Chief products: coffee, lindes, bananas, and sugar Army numbers about 7000 officers and men, with nulitia about 50,000. Area, 63,400 sq m., pop 1,750,000. Capital, Guatemala la Nueva, pop. 85,000 Revenue, 97, \$22,073,588; expenditure, \$21,433,194, internal debt, \$3,000,000, external, £1,432,800, imports, 97, \$21,452,053 (silver); exports, \$19,775,800 (silver). See CFNIRAL AMERICA, for Ministry, etc., see Diplomatic — History, 98 Senor Barrios, the President, was assassinated (Feb. 9th), and Senor Cabrera, the first Vice-President, at once a sumed office The National Assembly afterwards formally proclaimed him President for the period '99—1905 (Sept. 25th).

Guernsey. One of the Channel Islands (q, v_*) .

Guildhall School of Music, Victoria Embankment, E.C., was established by the Corporation of London in '80, for the purpose of providing high-class instruction in the art and science of music at a moderate cost. Students are nominated by an alderman or a member of the Court of Common Council. The school commenced with 62 pupils, but now there are more than 3600 pupils. Its origin is traceable to the Guildhall Orchestral and Choral Society, founded in '78. The Common Council having had a report of this school laid before it, granted £350, and lent some buildings in Aldermanbury with which to establish the present school. Its speedy success led the Corporation of London to vote £20,000 for the fine buildings in which the school has carried on its work since '87. The total sum which the Corporation have expended on the school is £50,000, in addition to an annual contribution of £2300. There are several exhibition scholarships in connection with the school. Principal, Mr. W. H. Cummings; Secretary, Mr. Hilton Carter; Lady Superintendent, Mrs. Charles P. Smith.

Guy's Hospital and Medical School, London Bridge, S.E. This institution, now one of the great general hospitals of the Metropolis, was built and endowed in the year 1725 by Thomas Guy, a City bookseller. The wards contain accommodation for 650 patients. Agricultural depression has of late years decreased

the endowments, and public aid has had to be invoked. The Medical School has recently received an important addition in the erection of the Physiological Laboratories, opened in '97 Resid by H.R.H. The Prince of Wales. Guy's also for fi possesses a Dental School for complete instruc- staff.

by £20,000 per annum the income derived from tion in dental surgery and mechanics, being the only institution in London in which the whole of the dental curriculum for the College of Surgeons' examination can be taken. The Residential College furnishes accommodation for fifty students and the resident medical

Н

Haggard, Henry Rider, was b. at Braden ham Hall, Norfolk, 1856. He was private secretary to Sir Henry Bulwer at Natal, and was subsequently on the staff of Sir Theophilus Shepstone, H.M. Commissioner to the Transwal, during the temporary annexation of that territory in '77. He was afterwards appointed **Master** of the **High Court of the Transvaal**. At the commencement of the Zulu war he was adjutantlieutenant of the Pretoria Horse. He began his career as an author with the publication of "Cetewayo and his White Neighbours" in 82, and subsequently wrote "Dawn," "The Witch's Head," and "King Solomon's Mines" This Head," and "King Solomon's Mines." This won for him immense popularity, which was further increased by his romantic allegory "She." "Allan Quatermain," "Jess," "Mr. Meeson's Will," "Maiwa's Revenge," "Colonel Quaritch, V.C.," "Allan's Wife, and "Cleopatra" followed. Then came "The World's Desire," in collaboration with Mr Andicw Lang, "Beatrice," "Eric Bright-eyes," "Nada the Lily," "Montezuma's Daughter," "The People of the Mist" (50), "Joan Haste" (55), "Heait of the World" (50), and "Swallow" (78) He is a barrister of Lincoln's linn and a magnistrate for Notolk and Suffolk, and was magistrate for Norfolk and Suffolk, and was Chairman of the Committee of the Society of Authors, '96-8. Address Ditchingham House, Nortolk.

Haileybury College, Horts. Founded 1862, received Royal Charter '64. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. Pupils 500 Head Master, Hon, and Rev. Edward Lyttelton, M.A., Hon. Canon of St. Albans.

Hallé, Lady the famous violinist, known before she married the late Sir Charles Halle in '88 as Madame Norman-Neruda She comes of a famous musical family, and was b, at Brunn, in '40. After studying under Jansa, she made her début at Vienna in '46, and at once excited enthusiasm by her wonderful execution. Her first appearance in London was at a Philharmonic concert in 49. Thence-forward her career has been one long success, both here and on the Continent. Her first husband was a Swedish musician, Ludwig Norman. Sir Charles Haile died Oct. 25th, '95.

British Architects. His first noteworthy literary effort was a novel published in '71, entitled "Desperate Remedies." In '74 the interlay enor was a nover published in 71, entitled "Desperate Remedies." In 74 the work by which he is best known appeared in the pages of Cornhill Magasine—"Far from the Madding Crowd." Other novels from his pen have been "Under the Greenwood Tree" (72), "A Pair of Blue Eyes" (73), "The Trumpet Major" (80), "A Laodiccan" (81), "Twe on a Tower" (82), "The Hand of Ethelberta," "The Return of the Native," "Ihe Mayor of Casterbridge," "Wessex Tales," "A Group of Noble Dames," "Tess of the D'Urbervilles" (91), which was held by some of the citties to be the finest of all his works, "Life's Little Ironies" (94), "Jude the Obscure" (95), and "The Well-Beloved" (92 and '97) In June '93 Mr Hardy followed an early dramatic version of "Far from the Madding Crowd" with a dramatic piece called "The ding Crowd "with a dramatic piece called "The Thiee Wayfarers," which achieved a striking success "Fess' also has been recently dramatised and played in America. He was made a J.P. for Dorchester in '84, and for Dorsetshire

in '94.

Harris, Lord. See under l'LI RAGL. Harrison, Frederic, MA, was b in London 1831; educated at King's Coll, Lond, and Wadham Coll., Oxford; scholar, 48; first class Wadham Coll., Oxford; scholar, '48; first class in classics, '53; fellow and tutor, '54. Called to the bar, Lincoln's lnn, '58; practised in the Equity Courts; examiner in jurisprudence for Inns of Court '69-76, for London University '75-9; Professor of Jurisprudence, Inns of Court, '78-80, member of Royal Commission on Irades Unions '07-9; secretary to the Royal Commission for the Digest of the Law '69-70. Hausa Association, The This association was formed in 92, for the purpose of securing scientific study of the Hausa language, so that the Scriptures might be translated into the Hausa tongue, and the higher interests of

the people be furthered in other ways. Hausa is the lingua franca of the Central Soudan, extending from the Sahara to the pagan tribes near the Gulf of Guinea, and from the Egyptian Soudan to the French colony of Senegal. The greater portion of this region is in the sphere of British influence. It is estimated that no fewer than fifteen millions of persons speak the Hausa tongue, and many of these can read and write it in a modified form of Arabic character. The first student, the Rev C. Robinson, was sent out in April '93. Since then he has visited Lokoja and Kano, the commercial centre of Hausaland, and collected the materials for a grammar of the Hausa language, besides having translated two of the gospels into Hausa, and revised and corrected Dr. Schon's dictionary. The Cambridge University has accepted the offer of the Association to endow a Lecture-ship in Hausa for three years; and the University Press in '96 published under Mr. Robinson's editorship a volume containing facsimiles of the fragments of Hausa literature brought home by him from Kano. Hon Secretary, Rev. J. O. F. Murray, Dean of Emmanuel College, Cambridge; Hon. Treasurer, Mr. J. H. Iritton, 54, Lombard Street, E.C.

Hawaiian Islands A group of eight inhabited and four uninhabited islands in the North People.

North Pacific. Area, 6577 sq m.; pop 100,020. Capital, Honolulu, on the south-west coast of the island of Oahu, pop. 29,020. Until '93 the Government of the islands was that of a limited monarchy, under Queen Liliuokalani, but then a revolution broke out, and a President and provisional executive were appointed. The Hawaiian Republic was proclaimed and a new Constitution was pro mulgated on July 4th, '94 Mr Dole was elected President for a term of six years. The islands were annexed to the United States in '98 (see History, below). The legislature now consists of a Schate of 15 members, and a Chamber of Representatives of 15 members. There is a State Council of 15 members, 5 appointed by the President, 5 by the Senate, and 5 by the Chamber The natives almost all profess the Christian faith, and education is general ports sugar, rice, coffee, hides, wool, whale oil, and bone. I he bulk of the trade is with the United States Steamers connect the islands with America, Australasia, and China Revenue, 96, £496,470, expenditure, £445,220, imports, 97, £5,127,370, exports, £3,304,491; debt, '97, £88,160 For Ministry, etc., see DIPLOMATIC—History, '98 The islands were definitely annexed by the United States and attached to the military department of California (July 11th), a garrison being sent out to Honolulu. The The formal transfer took place (Aug 12th), and the American flag was 1215ed. Mr. Dale took the oath of allegiance as President, and the islands were made "a new territory of the United States "

Hay, Colonel John, b. at Salem, Indiana, in 1838, and ed at Brown University. He was a barrister practising in the Supreme Court of Illinois till '61. when he gave up his profession in order to become private secretary to President Lincoln. He also served as his aide-decamp, and took an active part in the field as Adjutant and Lieut.-Colonel. After President Lincoln's death he continued his political and diplomatic career, and was appointed Secretary of Legation and Chargé d'Affaires at Paris ('65), Vienna, and Madrid. He then became Presi-

dent Haves' First Assistant Secretary of State 70-81. But Colonel Hay is best known in this country by his literary efforts, the "Pike County Ballads" having won him high favour with the reading public. In conjunction with with the reading public. In conjunction with Colonel Nicolay he wrote the Life of Presi-dent Lincoln, a task for which he was specially fitted. In Feb. '97, on President M'Kinley's accession, he was appointed Ambassador to Great Britain, a post which he filled with distinction till he became Secretary of State ın '98.

Hayti, called Hispaniola by Columbus, and afterwards San Domingo. The second largest island of the Antilles, lying between Cuba and Puerto Rico. Area, 28,249 sq. m.; pop. 2,000,000. There age two states in the island. The largest is the Republic of San Domingo (q.v.). The Republic of Hayth occupres the western portion of the island Area, 10,204 sq. m.; pop. 1,500,000. Capital, Port-au-Frince, pop. 50,000. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in '67 The executive power is in the hands of a President, elected by the people in theory, but in practice by the Senate and House of Representatives, in whom rests the legislative power The House is elected directly for three years by all male citizens, and the Senate indirectly for six years. The religion is Roman Catholic, and elementary education is free, though in-efficient in many districts. There is an aimy of about 7000 men, and a navy of six small vessels. Bevenue, 07, £1,500,000, expenditure, £1,580,000, debt, 97, £4,700,000; exports (coffee, mahogany, logwood, cotton, cocoa, turtle shells, and hides), 97, £2,614,500; imports, £1,140,000. See Diplo

Healy, T. M., M.P. See under Commons. Healey, W. E., poet, critic, and dramatist, LL.D. St. Andrews '93, was b in 1849 at Gloucester, at which city he was also educated. In his youth he suffered greatly from ill health, and his "In Hospital. Khymes and Rhythms" ("A Book of Verses," fourth edition '93) was largely a telectron of certain experiences in the Old Infirmary, Edinburgh, between '73 and '75. In the latter year he began to contribute to various London journals, and was one of the jounders of London ('77-0), which he edited for some time, and in ('77-9), which he edited for some time, and in which many of his verses first appeared. His editorial career subsequently led him to the chair of the Magazine of Ait; in 89 to that of the Scots Observer, atterwards the National Observer, which he left in 94; and in 95 to that of the New Review. In these journals and in others—the Athenaum and the Saturday Review among them-Mr. Henley's critical work has been done, but a reprint of some selected passages appeared in 90 as "Views and Reviews" (second edition 92). His dramatic work in collaboration with the late R. L. Stevenson to which he contributed an essay on the poet's "Life, Genius, and Achievement," and "English Lyrics: Chaucer to Poe," appeared in '07. In '98 he was granted a pension (£225) on the Civil List for his services to literature. He is at present—after a long spell of ill-health—engaged on a new edition of Byron's prose and verse (12 vols.), with a fuller commentary than has ever been essayed before. Address: Stanley Lodge, Muswell Hill, N.

Herkomer, Hubert, R.A., was b. 1849 at
Waal, in Bavaria. At an early age he settled
with his parents first in America and subsequently in England. Joined the Institute of
Painters in Water Colours '71, but resigned '91,
and to the gallery of this Society and to the
Grosvenor and Academy exhibitions he contributed many drawings, chiefly of Bavarian
subjects. His oil picture, "After the Toil of
Day," in the Academy exhibition of '73, was
followed by his "Last Muster," the memorable
picture of the Chelsea pensioners ('75), which picture of the Chelsea pensioners ('75), which gained him the "Grande Medaille d'Honneur" at the Paus Exhibition, '78. He was ('79) elected an A R.A. Since '80 he has devoted much time to portraiture, and his portrait of Miss Grant is one of his many successes in that branch of art. He personally directs the well-known Art School at Bushey, of which he is the founder, and in connection with which a new theatre was opened in '88 with the per-formance of a romantic fragment entitled "The Sorceress," followed in '89 by a more important opera, "An Idyll," both composed by the Pro-fessor himself. Elected a Royal Academician in '90. He is also Deputy President of the Royal Society of Painters in Water-Colours, and was elected an Associate of the French Academy of Fine Art in '95.

Historical Manuscripts Commission. A Royal Commission was appointed in 1869 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law and general literature. Fourteen reports and many appendixes thereto have been issued by the Commission describing some hundreds of private collections of manuscripts in Great Britain and Ireland. The Commission at in collaboration with the late R. L. Stevenson included four plays republished in [66]. His second book of verse, "The Song of the Sword," went into a second edition as "London Voluntaries" in [93]. A corrected reprint of both volumes, with deletions and additions, was published in [97], under the title of "Poems." He is the editor of a series of "Tudor Transhe is the editor of a series of "Tudor Transhe is the editor of a series of "Tudor Transhe is the editor of a series of "Tudor Transhe is the editor of a series of "Tudor Transhe is the editor and compiler of "Lyra Heroica" [93]; and, in collaboration with Mr. Charles Whibley, the editor and compiler of an anthology of English prese. The fourth and last volume of "The Centenary Burns," series as secretary. The reports are prepared by various inspectors acting under the authority of the Commission, many of the historical papers examined being deposited by their owners in the Public Record Office for the purpose. Office, Public Record Office, Charcery Lane, W.C.

Hockey continues to be most successful, and anns ground every year. The number of clubs grows annually, and most towns have a club now. Ladies play a great dcal, especially in the country, though in the suburbs of London there are not many ladies' clubs at present. The hon, sec. of the Hockey Association is Mr. Stanley Christopherson, of the Wimbledon Hockey Club who is also one of the best players. Hockey Club, who is also one of the best players of the game. Of the teams round London, Teddington is perhaps the best, having won Teddington is perhaps the best, having won az out of the 28 matches the Club played—only losing 2 and drawing 4—a record hard to beat Some of the principal matches resulted as follows—England beat Wales, Ireland beat Wales, England v. Ireland drawn. Cambridge beat Oxford, Cambridge Ladies beat Oxford Ladies, North of England beat Midland Counties, South of England beat Midland Counties, the state of the s Kent beat Surrey, Cheshire beat Lancashire, Cheshire beat Middlesex, Lancashire beat Middlesex, Kent beat Middlesex, South beat North, Warwickshire beat Shropshire, Gloucestershire beat Somersetshire, Durham v York drawn Denbighshire beat Merioneth, Middlesex beat Surrey.

Hohenlohe, Prince, appointed Chancellor of the German Empire and Prime Minister of Prussia in Oct. 94, was b in 1819 He is a native of Bavaria, and a Roman Catholic, and his long public career has given him exceptional experience and influence So long ago as '66 he was Prime Minister of Bavaria, and in the war of '70 he took a most important part. In '74 he was chosen to succeed Count Arnim as the German Ambassador to France, and held the post till '85, when he became Governor General of Alsace-Lorianc When the crisis which resulted in the resultation of fourth which resulted in the resignation of Count Caprivi and Count Eulenberg arose, in '94, he was appointed Chancellor and entrusted by the Emperor with the continuance of Count Caprivi's poucy. He is married to Princess
Savn-Wittgenstein, a daughter of an aide de

Holloway College, The Royal Sec Women, Higher Fducation of. Home Arts and Industries Association Founded Nov. 1884. Supported by voluntary contributions. Its aim is to teach hand-work to the children of the poorer people by means of classes taught voluntarily by members of the association, and through such training to revive hand-work, and keep the people from the evils of idleness and drink. President, The Rt Hon, Earl Brownlow; Hon. Treasurer, Mr. A. K. Hichens. Office and studios, Royal Albert Hall.
Bankers, London and County Bank, High
Street, Kensington, Branch.
Home Office. This is a many-sided depart-

ment, and makes great demands upon the time and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens. Addresses to the Sovereign and the gracious replies thereto pass through his office, reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers

of the Isle of Man and the Channel Islands; and most civil knighthoods are conferred upon his most civil knightnesses are connerred upon his recommendation. Heavy fees are paid to the Department by those upon whom peerages and other dignities are bestowed. The Home Secretary may grant Provisional Orders for the improvement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines; another sees that the Acts relative to the manufacture and storing of explosives are properly carried and storing of exploaves are properly carried out; and a third visits faotories, printing works, bleaching works, brickyards, white lead works, and workshops. The House Secretary is also charged with powers of inspection under the Burial Acts, and may permit in certain special cases interments in closed burial grounds, or the exhumation of bodies where grounds, or the exhumation of bodies where there is suspicion of foul play. Under the Prevention of Cruelty to Children Act he is given authority to direct a factory in spector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. His consent is required before certain steps can be taken under the Building Societies Act, '94, and he may, on the application of a County Council, make orders for the protection of wild birds, or prohibiting the taking or destroying of wild birds' eggs. His duties in connection with the police include the appointment of with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer (see Police of THE UNITED KINGDOM); he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency by withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. The prevention and suppression of local disorder lies with the local authorities, but he may authorise the employment of the armed forces of the Crown in order to aid the local forces in the suppression of riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions. The control of the prisons and Prosecutions. The control of the prisons and convict establishments, and the inspection of reformatory and industrial schools are exercised by his Department, and he has the charge of criminal lunation and insane prisoners. He may recommend to the Crown the remission of punishment passed upon offenders, either by ustices of the peace or by the judges, his most anxious and responsible function in this councection being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to arrive at a just conclusion. The present Home Secretary is the Rt. Hom. Sir M W. Ridley, Bart See Ministry and Secretary of STATE. Home Rule. In the '94 edition, under the heading SESSION, Part I., sect. 3, and Part M.,

sects. 79-101, full particulars are given as to the provisions and progress of the Home Kule Bill, which was introduced by Mr. Gladstone in the Session of '93. For the Local Government (Ireland) Act '98, see Srssion, sect. 63. Honduras, a republic in Central America

Area, 43,000 sq. m.; pop. 450,000. Capital, Tegudiapa, pop. 12,000. Governed by a President and Congress, elected for four years During '98 Honduras, Nicaragua and San Capital, Salvador combined to form the United States of Central America. Costa Rica and Guatemala may eventually join the combination. country possesses great agricultural resources and much mineral wealth, but these lie neglected because of internal disagreements and the consequent paralysis of enterprise Agriculture, however, is now showing signs of development. Chief products: tobacco, sugar, of development. Chief products: tobacco, sugar, conee, indigo, wheat, mahogany, hides, and cattle. Revenue, '66, £40,000; expenditure, £471,750; imports, '96, £275,000; exports, £051,000, debt, £5,400,000. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. The arrears of interest amount to over £11,000,000. Army small, but there is a militia of about See CENTRAL AMERICA and DIPLO-20,000. MATIC.

Hong Kong. An Island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by a narrow strait—the Ly-emoon pass. It was ceded to Great Britain in 1841, at the close of the opinim war. The peninsula of Kowlung, opposite the island, and the small adjacent Stonecutter's Island, now strongly fortified, appertain to the colony Capital, Victoria (commonly called Hong Kong). Area, 32 sq. m, pop. 261,258. Government is in the hands of a Governor, with Executive and Legislative Councils. Religion and eduand Legislative Councils. Religion and education are abundantly provided for. The island is our "Eastern Gibraltar," and is both a military and naval station, forming the headquarters of the China Squadion. It is also the great emporium for the European trade with China, and for the local coast trade, and is a free port. Imports, chiefly goods for China, cottons, and other manufac-tured articles; exports, tea, silk, and other Chinese produce. For latest financial statistics see BRITISH EMPIRE (table); and for Executive see BRITISH EMPIRE (table): and for Executive Council see DIPLOMATIC History, '98—For the better protection of the colony, the territories on the mainland opposite, behind Kow-lung up to a line joining Mirs Bay and Deep Bay, as well as the island of Lau-tao, were leased for 99 years to Great Britain by a convention (June 9th). The area leased amounted to 200 so, miles. sq. miles.

Hope, Anthony, is the pen-rame of one of the most brilliant of the younger novelists of the most brilliant of the youngs. H. Hawkins, the day. His real name is Mr. A. H. Hawkins, and he is a younger son of the Rev E. C. Hawkins, vicar of St. Bride's, Fleet Street, and was b. in London, Feb. oth, 1863. He was ed. at Marlborough Coll. and Balhol Coll, Oxford,

Mark," was published in 'co, and there have since followed, "Father Stafford," "Mr. Witt's Widow," "Sport Royal," "Half a Hero," "The Prisoner of Zenda," "The God in the Car," "The Dolly Dialogues," a collection of exquisitely finished dialogues, "Count Antonio" ('95) "Comedies of Courtship," and "The Heart of Princess Osra" ('96), "Phroso" ('97), "Simon Dale" and "Rupert of Hentzau," a sequel to the "Prisoner of Zenda" ('98). A dramatic version of "The Prisoner of Zenda" sequel to the "Prisoner of Zenda" (98). A dramatic version of "The Prisoner of Zenda proved very successful in '96, and a comedy, "The Adventures of Lady Ursula," was successfully produced in the United States, and in London ('98) Address. 16, Buckingham Street, Strand, W C

Horological Institute, The British, has for its main object the encouragement of the English watch trade. Technical classes and examinations are held by the Institute at its headquarters, Northampton Square, E.C., and certificates of competency are granted. It publishes monthly the "Horological Journal," which circulates among watchmakers, jewellers, and silversmiths. There are 315 members and 15 associates. Secretary, F J Britten.

Horton, Robert F., M.A., D.D., Congregational minister, was b 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford (74). where he commenced a bulliant college career by obtaining First Class in Moderations, and was President of the Union, and in '78 a First in Classical Greats Elected Fellow of his college '79, but excluded from an examine ship in the Rudiments of Faith and Religion by reason of his Nonconformist views He began his ministry at Hampstead (80), and his suc-cess there soon necessitated the building of a larger church, in the Lyndhurst Road, which was opened in '84 Hc has published "Inspiration and the Bible," '87, "Revelation and the tion and the Bible," 87, "Revelation and the Bible," 93, a course of lectures on "Preaching," delivered at Yale, and subsequently issued in book form as "Verbum Den" 93, "The Cattoons of St. Mark" 94, "The Teaching of Jesus" 95, "The Life of John Howe," "The Book of Proverbs," in the Expositor's Bible, "The Art of Living Together" 95, "The Four Pillars of the Home," "Oliver Cromwell, a Study in Personal Religion" "Success and Failure," "The Women of the Old Festament," all in 97: "Brief Sermons to Busy Men," Failure," "The Women of the Old Testament," all in '97; "Brief Sermons to Busy Men," "England's Danger," and "The Commandments of Jesus," 98 Address Chesils, Christ Church Road, Hampstead, N.W.

HOSPITALS AND DISPENSARIES.

The first annual meeting of the Council of the Prince of Wales's Hospital Fund was held at Marlborough House on Feb. 4th, '98. The total paid to the Fund for the eleven months ending Dec. 31st, '97, was £227,553. Of this amount £56,286 58 was given to the various London Hospitals, and £167,022 198. 8d. was invested, the expenses were £3704 75. 94 The sale of stamps produced £34,776; the Daily Telegraph fund reached £36,780, and that of Lloyd's New £2618. A total of £74.174, the at Mariborough Coll, and Balliot Coll, Annual Spanish Coll, and Balliot Coll, which represents efforts not first class in Classical Schools in '85, and took his M.A. degree in '89. He took the step which his M.A. degree in '89. He took the step which is apparently necessary to success in literature by devoting himself at first to the law, and was called to the Bar at the Middle Temple in '87. His significantly named first book, "A Man of the significantly named first book, "A Man of the significantly named first book, "A Man of the significantly named first book," A Man of the significantly named first book, "A Man of the significantly named first book," A Man of the significantly named first book, "A Man of the significantly named first book," A Man of the significantly named first book, "A Man of the significant signifi reater portion of which represents efforts not

The following list comprises most of the important hospitals and dispensaries in London, with their last notified annual income and secretary's address:

Alexandra Hospital for Children with Hip Disease (£2661), Stanley Smith, Queen Sq.,

Belomsbury.

Belgrave Hospital for Children (£1741), Percy Gates, 7, Victoria St., Westminster, S.W.

Bischoffsheim; Hon Secretary, Mr Thomas Ryan, Secretary of St. Mary's Hospital, W., to which address all urgent communications should be sent.

House of Commons. See Commons, House OF

Howard Association (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association It collects information both at home and abroad bearing on the present systems of punishment and prevention of crime.

Many books and pamphlets dealing with pauperism, boarding-out neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. A remarkable work, entitled "Penological and Preventive work, entitled "Penological and Prevenuve Principles," which has received high official recognition, and reached a second and enlarged

serving his time with his father as a printer, he adopted journalism as his profesion, and in '66 was appointed editor of the Atlantic Monthly. from which he retired in '81. His poems, sketches, and stories are characterised by a lightness of artistic touch which marks the individuality of their author, and have had a wide circulation on both sides of the Atlantic. Mr. Howells was American Consul at Venice 61-5. Amongst the most popular of his numerous writings are "A Foregone Conclusion" and "The Rise of Silas Lapham" In '22 he became the editor of the Cosmopolitan Magabecame the editor of the Cosmopolitan Maga-sime, but after a short tenure resigned the post. Published "The World of Chance" (93), "A Fraveller from Altruria" (94), "Impressions and Experiences" (96), "The Landlord of Lion's Head," "An Open-eyed Conspiracy" (97), and "The Story of a Play" (98), Ad-dress Authors Club, New York, U.S.A. Hughes, Rev Hugh Price, M.A., the leader of the "Forward Movement" of Wesleyan Methodise is a native of Welleyan

Methodism, is a native of Wales, and was b. 1847. Ed at Richmond Theological Coll., and graduated M.A at London Univ Has held appointments at Dover, Brighton, Fottenham, Dulwich, Oxford, Brixton, and West London Is a member of the Legal Conference Has edited, with conspicuous success, the Methodist Times since '8s, and is the Superintendent of the Weslevan 85, and is the Superintendent of the Westeyan Mission to the West End He is the author of "Social Christianity," "The Philanthropy of God," "Ethical Christianity," and "Essential Christianity." In '92 he took a prominent part in the "Review of the Churches," Conference at Grindelwald He is one of the founders of the Evangelical Free Church Movement, and was President of its National Council in 'o6. He is a Vice-President of the United Kingdom Alliance, and an active member of the Anti-Gambling League In '98 he was elected President of the Wesleyan Conference.

Humanitarian League, The, was founded in 1891, its main object being to apply and emphasise, wherever possible, the principle that it is iniquitous to inflict innecessary suffering on any sentient being. The League proposes a thorough revision and more equitable administration of the criminal law and prison system, deprecates the various provocations to aggressive warfare, and urges the need of amending present social conditions. With regard to the treatment of animals, it denounces the practice of vivisection as incompatible with the fundamental principles both of humanity and sound science, condemns cruel sports, and aims at the mitigation of the sufferings to which animals are subjected in the cattle traffic and the shambles The Hon. Secretary; Mr. Henry S Salt, and the offices are at 57, Chancery Lane, London, W C.

Humbert I, King of Italy, was b. 1844; succeeded his father Victor Emmanuel '78. While Crown Prince he distinguished himself by the active part he took in the movement for promoting Italian Unity. He shared with Garibaldi the triumph of the reorganisation of the king-dom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of Custozza, in which the Italians recognition, and reached a second and enlarged edition in '95, is the work of Mr. William Tallack, who is the Socretary of the Association. Office, 5, Bishopsgate Street Without, E.C.

Rowells, William Dean, the eminent American novelist, was b. in Ohio, 1837. After | 11th, '69. His marriage to Princess Helen of

Montenegro took place in October '96. During his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poniard, made an attempt upon nis life with a poniaru, and another attempt in '97 also happily failed. His Majesty is very popular among his subjects. The Queen is well known as an accomplished artist. The royal silver wedding was celebrated at Rome with splendid pomp in April '93.

Hungary. See Austria-Hungary.

England and Wales there were 19 packs of staghounds, 160 of foxhounds, 108 of harriers, and 43 of beagles. In Ireland there were 5 packs of staghounds, 23 of foxhounds, 26 of harriers, and 4 of beagles. In Scotland there were 10 packs of foxhounds and 3 of harriers.

Husband and Wife. See Law, '98.
Hypnotism. See '95 and previous editions Hypnotism. See '95 and previous editions at Rome with splendid pomp in April '93.

Hungary. See Austria-Hungary.

Hunting. According to figures given by the Field there has been of late years a steady increase in the number of packs kept in all parts of the kingdom. There were in the United Kingdom in '98 24 packs of s'aghounds, 193 of foxhounds, 137 of harriers, and 47 of beagles, as against 26 packs of staghounds, 195 of foxhounds, 125 of harriers, and 50 of beagles as against 26 packs of staghounds, 195 of foxhounds, 195 of harriers, and 50 of beagles in '97. The packs were thus distributed: In (Pentland)

_--:--

There has lately been a considerable exodus and poet, was bon March 20th, 1828, at Skien. After serving his apprenticeship to an apothecary, he went to Christiana Univ to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '50 he produced his first but to study medicine. In '52 he travelled for a time in current events and subjects of interest, with learning which he managed till '62. During Mickay ('48. '50), and Mr. John Lash Latev Christiania, which he managed till '62. During this period several of his plays were written and produced. Most of his works are transand produced. Most of his works are translated into German, and many into English His "Doll's House" was produced at the Olympic, in London, July 89, and his drama "Rosmersholm" at the Vaudeville Theatre in Feb. '91, followed by "Ghosts," and "Hedda Gabler." Ibsen'scharacters are most powerfully drawn, and impress even the reader of his plays as being living men and women. The "Pillars of Society" perhaps represents his social philosophy as closely as any of his plays, while "Brand" is held to be his masterpiece "Ghosts" is a striking, almost ghastly, study of heredity. "The Master-Builder" was transof heredity. "The Master-Builder" was translated, published, and performed in English early in '93. It produced violent discensions amongst the critics, and even alienated some who had before been pronounced libsenites. Two English translations of "Brand" were published in '94. "Little Eyolf" in November of that year, and "John Gabriel Borkman" in '96 A distinguished group of English admirers presented him with a set of silver on his 70th birthday, '98.

Toeland. A large island, 130 m. east of Greenland, and 850 m west of Norway, belonging to Denmark. Area, 39.756 sq. m; pop. 70,027. Capital, Bejkjavik. The legislature, called the Althing, consists of two houses, the Lower containing twenty-four members

the Lower containing twenty-four members elected by household suffrage and the Upper Council. India and the Crown Colonies would twelve members, six elected, and six nominated by the King of Denmark. Exports: a tries of State at present charged with the sulphur, Iceland moss, wool, dried fish, seal-skins and oil, whale-oil and baleen, eiderdown, other manner as might become desirable. The bird-skins and ponies. Manufactures domestic. Council might include on the part of the United

explanatory letterpress. Its first editor was Mi Bailey, who was succeeded by Dr. Charles Mackay ('48'-59), and Mr. John Lash Latey ('59'-90). Editor. Mr Clement K. Shorter. From the office of the Illustrated London News are also issued the Penny Illustrated Paper (edited by Mr. John Latey), the Sketch, which reproducting the apprenance made for immediately after its appearance made for itself a very highe reputation, which it has since maintained, and the English Illustrated Magazine

IMPERIAL FEDERATION.

The Imperial Federation League was formed at a Conference held in '84 under the chairman-ship of the late Right Hon. W. E. Forstei. A special committee of the League appointed in '91 prepared a practical scheme of Federation, and presented its report on Nov. 12th, '92 The substance of the report was as follows—It being admitted that in order to combine the resources of the Empire for the purpose of defending and maintaining its common interests, some central body, in which all its parts are represented, is essential, the question of the nature and functions of the question of the nature and functions of such a body at once arises. It remains then to consider—(i) How shall a Council of the Empire be constituted? The Council should consist of members appointed by the United Kingdom and the self-governing Colonies. The three great groups of self-governing Colonies. three great groups of self-governing Colonies, North American, Australasian, and South African, should be directly represented in that Council. India and the Crown Colonies would

Kingdom, the Indian Empire, and the Crown Colonies, the Prime Minister, the Secretaries of State for Foreign Affairs, War, Colonies, and India; the First Lord of the Admiralty and the Chancellor of the Exchequer; and on and the Chancellor of the Excheduer; and on the part of the self-governing Colonies, of repre-sentatives of the three groups. (2) By what means can the resources of the Empire be most effectively combined? Such a Council, being furnished with adequate information relating to matters of foreign policy, should deal with Imperial Defence; and in matters of defence should supervise the appropriation of any moneys provided for the defence of the Empire by the common contribution of the United Kingdom and the Colonies. It is in the maintenance of the sea communications of the Empire that the community of interests is most absolute. The primary requirements of combined defence therefore are a sea-going fleet and naval bases. It may be laid down as a leading principle that as all parts of the Empire enjoy the benefits of Imperial Defence they should contribute to its cost. In the case of India and the Crown Colonies the United Kingdom would continue to be responsible for all matters relating to their respective contri-butions. The method of raising contributions would be left at the outset to the choice of the individual self-governing states, but future developments may disclose a means of raising the necessary contributions upon some uni-form principle throughout the Empire, by the allocation to this purpose of special sources of revenue or otherwise. The amounts to be contributed by each country should be fixed in the first instance for a term of years by a conference, and be subject to periodical revisions. There is no reason to doubt that if the necessities of the case were made clear, the Colonies would be prepared to take their share in the cost of the general defence of the Empire, provided that they were given a proper share in the control and expenditure of the common fund. It is pointed out that by so doing those countries would be undertaking an incomparably smaller financial expenditure than would be required for their own defences if these did not form part of the general scheme of defence adopted for the empire.

of defence adopted for the empire.

After the adoption of this report by the Council it was recognised by the leaders of the movement that its first stage, that of general discussion without any plan, had been passed, and that it would be necessary in future to advocate practical steps for bringing the matter to an issue. As the League had been avowedly founded without any defined policy as to the way in which Federation should be carried out, and as it was evident that opinions within the League would be likely to differ upon this point, it was decided to dissolve the League at the end of '93, in order that complete freedom of opinion should be afforded in advocating practical steps. The League was accordingly dissolved on Dec. 31st, '93, by resolution of the Council adopted some months previously. This step has had the effect of giving increased activity to the movement in some directions, and it is now being prosecuted by several bodies in the United Kingdom, as well as by branches founded by the League in Canada and Australia. Among the former may be mentioned The United Empire Trade League, Sir Howard Vincent, M.P., Hon. Sec., which advocates a commercial union of the Empire by means of Protection;

The British Empire League, Sec., C. F. Murray, 112, Cannon Street, London, F.C. (see separate account under the heading British Empire League); The Imperial Federation (Defence) Committee, Hon. Sec., A. H. Loring, 25, Old Queen Street, Westminster, which advocates combination for the purposes of Defence on the lines of the report quoted above, in the first instance by maintaining a common Navy; the Unity of the Empire Association, Edinburgh.

The celebration of the sixtieth year of Her Majesty's reign during '97 was the occasion of a gathering in London of the Prime Ministers of all the self governing Colonies, who were entertained by H.M. Government as the guests of the country. This was the second occasion of the country This was the second occasion of a meeting of representatives of the Colonies in London, the first having been the conference of 87. After taking part in the Queen's procession and the attendant festivities, the Premiers met the Secretary of State for the Colonies (Mr Chamberlain) in conference (see COLONIAL CONFERENCE, '97). The subject of Imperial Federation was discussed at one of these meetings, and though more than one of the Premiers directly advocated the representations. tation of the colonies in a Council sitting in London, the opinion of the greater number was expressed in the observation that the Colonies were very well as they were at present. The importance to the Colonies of maritime defence was recognised by Cape Colony in the offer to Her Majesty's Government of an monclad as a contribution to Her Majesty's Navy It has since been proposed to convert this offer into an annual contribution of money The Canadian Tariff Act came into force on Aug. 1st, '98, setting up a preferential tailff in favour of the United Kingdom and various Colonies (see CANADA). Penny postage between Great Britain and Canada and Cape Colony was also set up in '98. A movement was set on foot in Canada with the object of securing the enrolment of Canadians in the Royal Naval Reserve, the proposal being that they should be trained at the expense of the Canadian Government but the expense of the Canadian Government was paid by the British taxpayer. See Great Britain and her Colonial Prade Consult "Round the Empire" (Cassell), and "Imperial Federation" (Macmillan), by Mr. G. R. Parkin; "Britannic Confederation" (Philip) Publications of Imperial Federation (Defence) Committee (P. S. King & Co.); Britannia, monthly (Simpkin, Marshall & Co., Ld.).

IMPERIAL INSTITUTE.

The Imperial Institute of the United Kingdom, the Colonies, and India, was founded in 1887 as a record of Her Majesty's Jubilee. (See eds. 87 and '88.) In the main, the aims of the Institute may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The government of the Institute is carried on by a chartered body, whose form of constitution was approved by a royal warrant dated April 21st, '91. The governors are 125 in number, 12 being nominated by the Soverigin, 6 by the President, 36 by Colonial Governments, 15 by the Government of India, by 21 county and municipal authorities of the United

Kingdom, and 27 by the various learned and technical societies and institutions of the Empire. The full complement is made up with certain ex-office governors, who are principally high officials of the State. The foundation-stone was laid by Her Majesty on July 4th, '87, and the buildings were partially opened in June '02. The Fellows of the Institute number over 8000, but nearly 1500 of them are Chartered Life Fellows, principally by reason of being original subscribers, and therefore exempt from payment of subscription. The annual subscription for the United Kingdom
15 £2; for Indian and Colonial Fellows £1 the wives of Fellows are entitled to Fellowship on election at half rates The Institute practically offers all the advantages of a club-house. Vast quantities of specimen proclub-house. Vast quantities of specimen products from all parts of the Empire are in the galleries. Collections of products have been prepared and transmitted by the Governments of India, Ceylon, Straits Settlements, Mauritius, and Seychelles; the Canadian provinces of Quebec, Ontario, New Brunswick, Nova Scotia, British Columbia, and Manitoba; New South Wales, Victoria, South Australia, Queensland, Western Australia, Tasmania; West Coast of Africa, Zanzibar, Cape Colony, Natal, Bechuanaland and Mashonaland, Jamaica. Bahamas. Bermuda. Hong-Kong. Jamaica, Behamas, Bermuda, Hong Kong, British North Borneo, and Malta. Curators and offers in charge of collections have been appointed by the Governments of India, Ceylon, the Canadian provinces, Cape Colony, Jamana, and Bahamas.

The formal inauguration by the Queen took place on May 11th, '03 During the summer of '98 an Exhibition of Acetylene Gas apparatus was held, and the celebrated Concert Orchestra from La Scala, Milan, under the directorship of Leandro Campanari, gave a series of con-certs twice daily. Admission to the Institute during the summer season is free from 10 a m to 1 p.m. on every week-day except Wednesday; after 1 p.m. on payment of 18 On Wednesdays he Institute 18 exclusively reserved for the inspection of Fellows and friends introduced by them with tickets. During the autumn and winter seasons the Commercial Collections and the Commercial and Industrial News Room are open free to and Industrial News Room are open free to the public from 11 a.m. till 5 p.m. Lectures and concerts are also given during the winter season. In connection with the School of Modern Oriental Studies, the Ouseley Scholarships of '99, each of £50 per annum for two years, will be awarded, should sufficient merit be shown, the first for proficiency in Arabio, be shown, the first for proficency in Arabio, the second for proficency in Sanskrit, and the third for proficency in Persian. In Jan. '95 was published the first number of the Imperial Institute Journal, which is issued every month as a record of the trade and commerce, finance, and agriculture of the British Empire. The Imperial Institute Year-book is a unique and most valuable compilation dealing with the history physical recognity. and most valuable compilation dealing with the history, physical geography, natural re-sources, industries, and commerce of the Colonies and India, and collating facts and figures with regard to those mainly taken from official sources which had never before been comprehensively brought together. A most valuable feature of the book is the inclusion in it of diagrammatic charts, showing the fluctuations in money and discount, in the exchange value of silver, etc. The Scientific and

Technical Department of the Institute, opened in '04 for the practical investigation of economic products furnished by the Empire, is partly supported by special contributions from the Royal Commissioners of the Exhibition of 1851 and the Goldsmiths' and Salters' Companies. In '66 the Laboratories and staff were much In '96 the Laboratories and staff were much extended, and the department was placed under the direction of Professor W. R. Dunstan, M.A., F.R.S. The Department has attached to it a special staff of Scientific and Technical Referees. Hon. Secretary and Director, Sir Frederick Abel, Bart., K.C.B., D.C.L., F.R.S.; Director of the Scientific and Technical Department, Professor Wyndham R. Dunstan, M.A., F.R.S.; Assistant Secretary, Lieut. Gerald R. Maltby, K.N (ref.) Offices, Imperial Institute, Imperial Institute Road, S.W.

The rates at which the In-'95-8, 8d., and Abatements of £150 allowed on Incomes between £400 and £500, of £120 between £500 and £600, and of £70 between £600 and £700.

Incorporated Law Society, The. From papers discovered a few years ago at the Incorporated Law Society, and iecently published, it appears that in the year 1730 a society called the "Society of Gentlemen Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. This Society continued in active existence from that time till 1822, from which period all trace of the best less than the property of the less than the less th of it is lost. In the year 1825, however, certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." The deed of settlement of the Institution was completed in Feb. '27, and a royal charter was obtained in Dec. '31. In '45 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in '72. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extra-ordinary members chosen by the council from among those members of the Society who are

presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the Society from the members of the Society at present number 1882. Its buildings are situated in Chancery Lane, and comprise a handsome hall and a library of upwards of 36,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of solicitors. When it was founded no test was required from any person wishing to become a solicitor beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then Preliminary and Intermediate Examinations have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court. The Society exerts itself to promote what it considers the legitimate interest of the public and of the pidession. It has also assisted in promoting reforms beneficial to the whole community, such as the concentiation in one building of the various Courts, the Conveyancing Acts, the Trustee Act, and the Conveyancing Acts, the Trustee Act,

tions of the Society. Socretary, E. W. Williamson. Office, Chancery Lane Consult the Handbook of the Society.

Incorporated Society of Authors, The, established in 1884 by the late Sir F. Pollock, and other eminent literary men, under the presidency of the late Lord Tennyson. Its object is to defend the interests of literary, dramatic, and musical property, to maintain the rights of authors of all the above works, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works; to assist them to recover accounts and moneys due under their agreements, or for work sent to magazines, etc. Also to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. During of the Society diafted a small Copyright Bill to amend some of the worst features at present existing. This Bill passed the Lords in '97. It is hoped that either this Bill will become law, or that in the near future the Government will bring forward a full consolidating Bill. It is the only association of the kind in England, but its model, "La Société des Gens de Lettres," has been flourishing for over fifty years in France. The works published by this Society are "Grievances of Authors," "Literature and the Pension List." "History of the Society as The Author (monthly). Office, 4, Portugal Street, Lincoln's Inn Fields, W.C. Chairman, Sir W. Martin Conway ('98); Beoretary, G. Herbert Thring. Affiliated to the Society is an agency, the Author's Syndicate, which undertakes business arrangements for

members. Mr. W. Morris Colles is **Managing** Director.

INDIA.

India is a dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, all subordinate, in varying of native states, all supportunate, in varying degrees of relationship, to the suzerain power. The British territory was acquired by the **East** India Company, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Cappy serve (182-28) the Fast India of the Sepoy army (1857-8), the East India Company ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. In accordance with an Act of Parliament passed in '76, Queen Victoria assumed the title of "Empress of India," Kaisar-i-Hind. The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company also created a Secretary of State for India, together with a Council (selected for a period of ten years from among Indian officials for the most part), in which is vested the authority of the Crown. In England every measure concerning India runs in the name of the Secretary of State; and, he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank. In India the supreme authority, both executive and legislative, is vested in the Governor-General in Council. The Governor-General, or Viceto, has power to overrule his Council in cases of emergency. For ordinary purposes the Council 15 composed of six members, all appointed, like the Governor General himself, by the Crown I hese six members preside over the departments of Finance and Commerce, Home Affairs, Revenue and Agricul-ture, Military Administration, Legislation, and Public Works The Commander-in chief is appointed as an extraordinary member. For purposes of legislation this Council is augmented by about twelve additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The four whom some are always natives. The four provincial legislative councils and the Calcutta Chamber of Commerce have each the right to recommend one member. The seat the Supreme Government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the work of administration, India is divided into several divisions. Two of these, Madras and Bombay, which boast a historic existence for two centuries, are styled Presidencies, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. They each possess an army and a civil service of their own. Bengal and the North-West Provinces are under Lieut.-Governors and have each a legislative council only. The other provinces

have no councils or legislative powers. The more, of less importance (the Central Provinces. Burma, and Assam), are under Chief Commissioners. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces the actual unit of administration is the District, which forms the charge of an officer, usually styled Collector or Deputy-Commissioner. His princi-pal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. The Districts are combined into Divisions under Commissioners. As to justice, the Collector in each District is usually judge both of first instance and appeal. Madras, Hombay, Bengal and the North-west Provinces have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burmah, the Central Provinces, Oudh and Sind, have each a Judicial Commissioner. For local government purposes there are the municipal bodies, numbering about 750, in all towns of sufficient size, appointed on the elective principle, and in the rural districts there are over a thousand district and local boards. The staff of administration consists of. (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives, (8) inilitary officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. There still remain a number of native or feudatory states, over which the British Government has indeed control, but not control of the direct character which it exercises over the wholly British territory. but not all, of these states pay tribute to the supreme Government. The nature of British control over these states varies, and is exerted chiefly through a political resident, who assists the native princes. I here princes can manage their internal affairs, but have no power to make war or peace. Their external relations make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. The latest census of India ('01) states that the total area of these states was 595,167 sq. m., and pop. 66,050,479. Religion. The Hindu religion is that of three-fourths of the whole population. The Mohammedans number about 57,000,000 adherents, the Budhists about 7,000,000 (chiefly in Burmah), and Christians about 2,500,000. The total number of schools and colleges, 97, was 152,841, attended by 4,301,100 pupils, of whom only 397,103 were girls. The large majority of the population are engaged in agricultural pursuits, nearly 200,000,000 either being engaged in tilling the soil or dependent upon those so engaged. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. In every province a special department is established for the purpose of improving agricultural methods and dissemiimproving agricultural methods and disseminating information. The principal crops cultivated are rice, wheat, and other food grains, tea, cotton, sugar-cane, tobacco, and indigo. There are two kinds of tenure under which the land is held. The first, the Zamindari tenure, prevails principally in Bengal, the Punjab, and the North-west Provinces and Oudh, while it

also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates by zamindari and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. The rayatwari system prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly assessed with each notding, and is paid directly to the State. The country is rich in coal, though little mining has as yet been done. The production in '97 was nearly 4,000,000 tons. The railways of India have been contons. The railways of India have been con-structed either by private companies to which the State guarantees interest, or directly by the State. The total number of miles open for traffic in March '97 was 20,390, while over British territory alone (excluding native states) 18 964,993 sq. m., and the population, 221,172,952. The total area of India, including Burma and the native states, amounts to 1,560,160 sq m, and the total population, accordmg to the corrected census of '91, numbers 287,223,431. The revenue for '96-7 was, reckoning the ripce at 18. 44°, $62_{17}5_{31}$ 60, and the expenditure $66_{31}88_{91}80$, the estimates for '97-8 showed a revenue of $64_{17}4_{17}00$ 0, and expenditure of $66_{17}6_{31}00$ 0; the estimates of '98-9 a revenue of £66,057,000, and an expenditure of £65,463,000. The public debt is Rx. 114,862,983 in India, and £107,404,143 in England. The imports, including merchandise and treasure, for the year ending March 31st, '97, were £59,453,000, and the exports £72,607,000 For all details as to the army see ARMY, BRITISH; see also British Empire (table), Burma, DIPLOMATIC, INDIAN CURRENCY COMMISSION,

INDIAN FINANCE, ROYAL COMMISSION ON;
MEDICAL SUMMARY, 98, and other aiticles.

History, 198.—The retirement of the British
forces from Tirah, in the Africa country, to winter quarters in the lower valleys, neces-sitated by the approach of the cold weather, sitated by the approach of the cold weather, was skilfully and successfully effected early in Dec. '97, but the troops were much harassed by the enemy all the way. Various amendments to the penal code and the code of criminal procedure were proposed at the Legisland of the control of the code of the code of criminal procedure were proposed at the Legisland of the code of the lative Council's meeting (zist), so as to make it a penal offence to excite hatred, contempt, or disaffection against the Government, and extending the meaning of sedition so as to include attempts to promote feelings of dis-loyalty or enmity between different classes of Her Majesty's subjects. The 13th Indian National Congress met at Amraoti (28th), with Mr. Sankaran Nayar as Piesident. Resolutions were passed unanimously condemning the Government's frontier policy, and calling on Great Britain to pay a substantial share of its cost. The direct representation of the people in the Viceregal Legislative Council was recommended, a protest was made against the gagging of the Press in the native States, and permanent settlement all over the country was suggested as the only means of mitigating and preventing famine Gratitude was enthu-siastically expressed for the aid given by Great Britain during the famine; and finally a protest was made against the proposed changes in the penal code. Sir James Westland introduced a Bill in the Legislative Council (Jan. 14th) providing for the issue of currency

notes to an amount equal to the value of gold deposited with the Secretary of State in London. He said that the Bill was necessary to relieve the stringency in the money market, and that it would certainly have this effect. The Bill was shortly afterwards carried, and its operation extended for two years. Most of the Afridi tribes had been brought into a submissive frame of mind by the middle of this month, except the Zakka-Khels of the Khaibar, who seized every opportunity of harassing the British force. Serious plague nots, accompanied by some loss of lite, occurred at Bombay (March oth). The Criminal Procedure Bill was finally passed by the Legis. lative Council (12th), 22 amendments having been accepted and 17 rejected. Sir William Lockhart had an interview with a number of chiefs representing all the frontier tribes, and gave them their final choice of peace or war (13th). The Zakka-Khels gave in (April 18t), paying the full fine and giving up all the rifles demanded. This virtually concluded the submission of the tribes, and the Firah force was reduced to three brigades, while Sir W Lockhart left Peshawar (4th). By September the caravan traffic through the Khaibar was in full swing again, a brigade under Colonel Egerton holding Landi Kotal, and the Khaibar Rifles serving between that point and Jamrud. A few titles were still in the hands of the Khasroji section of the Zakka Khels, but the outlook all over the frontier districts was eminently satisfactory. The conditions drawn up by the Government for the control of the Khaibar Pass were announced to the Afridi jirgahs at Peshawar (Oot. 24th). Forts will be built at Landi Kotal, and at other places between there and Jamrud, to keep the pass open. A railway will be built, if necessary. The Afridis will manage their own affairs; but in the Khaibar they will be responsible to the Government, which will continue the allowances and will maintain a militia recruited from the Afridis and other clans, commanded by British officers. The jirgahs, which were of an absolutely representative character, and numbered nearly 200 o men, accepted the terms (Nov. 4th) A full account of the recrudescence of the plague during the year, and of the steps taken to combat it, will be found under the MEDICAL SUMMARY, '98 The question of cuirency, so inuch debated during the year, is also treated in a separate article, Indian Currency Com-Mission. Lord Elgin's term of office expired during the year, and Mr. G. N. Curzon, M.P., then Under-Secretary for Foreign Affairs, was appointed to succeed him, and raised to the Peerage as Lord Curzon of Keelleston.

India Frontier Operations. See Session.

India Frontier Operations. See Session, sect. 13.

India, Imperial Order of the Crown of, was instituted Jan 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other female relatives of of Indian Princes; and the wives and other female relatives of of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General of India, Governors of Madras and Bombay, or Principal Secretary of State for India Registrar of the Order, Sir Albert W. Woods

Indian Association, National. Established in 1870 (by Miss Mary Carpenter) for the pur-

pose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association carries out these objects by the diffusion of information; by grants in encouragement of education, especially of female couragement of education, especially of female education, in India; organising lectures on Indian subjects, social meetings, etc.; selecting English teachers for Indian families and schools; helping and advising Indian students who visit England. The Princess of Wales is Patroness of the Association, and Lord Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of in-Presidents include a large number of in-fluential natives of India, Anglo-Indians, and other ladies and gentlemen interested in the welfare of the Empire. Organ of the Association, The Indian Magazine and Review (monthly), published by Archibald Constable & Co, 2, Whitchall Cardens, S.W. There are several branches of the Association in India. **Hon.**Secretary in England, Miss E. A. Manning, 5, Pembridge Crescent, Bayswater, London, W.

Indian Civil Service embraces a much wider field of employment than does the Home Civil Service Besides the ordinary departments of civil administration, it includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. Situations in the Covenanted Civil Service are gained by passing a competitive examination in England—which examinations are as a rule held annually during August in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India Candidates must be above 21 and under 23 on the 1st of April preceding the date of the examination. Application for admission to the examination must be made before May 31st in each year. Candidates are encouraged, though it is not imperative, to obtain a university training; and to this end the Government makes an allowance of £100 per annum to all who pass their one year's probation in residence at a university. Having arrived in India, the candidate must within a specified period elect to serve either in the executive or the judicial branch of the service. In the former branch the lieutenantgovernorship of a province is the highest post governorship of a province is the nighest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. The members of the Statutory Civil Service of India are selected purely from among the natives. Many appointments are in the gift of the local governments. The Public Works Department is recruited from the Royal Indian Francetium (allege(u v) at Cooper's Hill, from Engineering College (q v) at Cooper's Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges in India. The Telegraph Department is recruited much in the same manner Examinations for the Forest Department and the Medical Service are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, during which period they receive an allowance to cover the cost of living. A resolution was carried in the House of Commons (June and, '93) to the effect that all open competitions for appointments to the Civil Services of India should be held simultaneously both in India and England, and that, such examinations in

all who competed should be finally classified in one list according to merit. The Government immediately requested the Indian Government to give prompt and careful consideration to the subject. This was done, and the result was that that Government pronounced emphatically against the proposal. Her Majesty's Government, therefore, came to the conclusion that by far the best method of meeting the legitimate claims and aspirations of the natives of India was to bestow such of the higher posts as could be made available for them on those who distinguished themselves by their capacity and trustworthness in the performance of subordinate duties, and that the existing system, subject to such alterations in detail as experience might prove to be necessary, should be maintained.

INDIAN CURRENCY COMMISSION.

As early as 1878 the Indian Government, in consequence of the fall in silver then beginning to be seriously telt all over the world, conceived the idea of closing the Indian mints against the free coinage of silver until the rupee should rise in value to 28, or one-tenth of an English sovereign. This they hoped would counteract the cheapness of silver, by raising the value of the rupee. I his proposal was referred to a committee, appointed, like the present Committee, by the Secretary for India. But the difficulties of interfering with the currency were felt to be so grave, that the proposal was finally rejected at that time The financial troubles of the Indian Government-however, increased That Government undertakes large responsibilities in the way of rail-roads and public works of all kinds, it has heavy official expenses, it imports largely from Europe, and has borrowed from other countries The debt thus incurred is entirely a gold one, and must be paid back in gold But it receives its revenue in rupees, and since these rupees are principally raised by land taxes, it follows that when silver became low in value the Government required more supers to pay its obligations with than it had at its commandthe amount of these land taxes in rupees having been already determined and settled with the natives, either for ever or for very extended periods of years. The suggestion that the extra revenue thus called for might be met by increasing those taxes was deemed implacticable, as likely to cause riots and other political dangers; and eventually the closing of the Indian mints to silver in '93 was sanctioned by the Imperial Government on the strength of recommendations to that effect received from India and from a second committee, commonly called Lord Herschell's Committee, which had been appointed to consider the question. The mints were accordingly closed, and it was pro-vided that when the scarcity of silver coin should bring the value of the tupee up to 18 4d, the mint would be opened to the coinage of rupees at that price; but, as a matter of fact, that has never been realised. The consequences of this step have been variously estimated by its upholders and opponents. The believers in a gold standard consider it as the first move in a change that will finally end in gold being made full legal tender in India as in England. The advantages gained by the Indian Government are obvious, the rupee has gone up in price, as was hoped, and exchange is altogether in favour of remitting home. As far as the official side of the question is concerned the position of the Government financially has improved.

But there is another side, which is of equal importance. While the Government has gained, the producer, whether native grower or European planter, finds he has to lose whenever he has to place his tea, cotton, or whatever it may be, on a market where he is paid for his goods in gold. When he has turned the gold into rupees he now has proportionately fewer for each sovereign than he had when the value of the rupee was less, and as he has to pay his labourers as many rupees as he did before the mints were closed, it follows that his own profits are smaller. In other words, while all expenses of production remain the same, he is left with fewer rupees as his own share of his industry In addition, the capital which a few years ago flowed easily from Great Britain to India to be invested in the planting industries, etc , has now almost entirely ceased, investors declining to lend their money where they cannot be sure of a profi able return. Hence the opponents of the Government's financial policy contend that the improved balance sheet of the Indian Government shown since '93 is no real criterion of the state of trade in that country or in Ceylon, which, although a Crown Colony, must be included with India in any consideration of the question, as it uses the same coinage as its greater neighbour. The natives have lost heavily by the closing of the mints Many of them are compelled by poverty or some other cause to turn their hoards of silver ornaments into money, and it has been estimated that not less than £00,000,000 has been lost by the poorest classes in weigh and exchange from this cause alone. There have not been wanting, indeed, politicians who have argued that the recent Indian famine wa caused less from scarcity of food than of the means with which to buy it. All these facts combined have resulted in a strong feeling of discontent with the action of the Government, and it may be said without fear of contradiction that commercial opinion is practically agreed that the reopening of the mints is the only possible cure for the present state of affairs. Strong memorials representing that view have been received by the India Office from the merchants in India, London, and other centres of trade. On the other hand, a proposal was brought before Parliament in the spring of '98 to mend matters by sending out from this country a gold reserve of £20,000,000 to India; and finally a Departmental Committee to consider the whole question was appointed by Lord George Hamilton This Committee, Lord George Hamilton This Committee, which is now sitting, consists of the following members.—Sir Henry Fowler, G.C.S. I. (Chairman), Lord Balfour of Burleigh, Sir David Barbour, K.C.S. I., Sir John Muir, Bart., Sir Francis Mowatt, K.C.B., Sir Charles Crosthwaite, K.C.B., F. C. Le Marchant, Esq., Everard Hambro, Esq., W. H. Holland, Esq., Everard Hambro, Esq., W. H. Holland, Esq., Robert Campbell, Esq., Sir Alfred Dent, K.C.M.G., Robert Chalmers, Esq. It has already heard a large number of witnesses and experts, but its report is not to be and experts, but its report is not to be looked for till the spring of '99 at the earliest. A considerable number of the witnesses endeavoured to demonstrate that there was really no other course possible to the Indian Government but to close the minte, whereas

the unofficial evidence has been all the other The final recommendations of the Committee are awaited in much anxiety by all having official or commercial interests in India.

Indian Empire, The Most Eminent Order of. Instituted in 1878 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order consists of the Sovereign, a Grand Master, who is the Vicercy of India for the time being, and of three classes of members—viz., Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is *Im*-

peratricis Auspiciis. Indian Expenditure, Royal Commission n. A Royal Commission was appointed in May '95 to inquire into the administration and management of the military and civil expenditure of India, and into the apportionment of the charge between the Governments of the United Kingdom and of India. The Commission was constituted as follows —Lord Welby (Chairman), Rt. Hon. L. Courtney, M.P., Rt. Hon. W. L. Jackson, M.P., Iteld-Marshal Sir Donald Stewart, Sir W. Wedderburn, M.P., Sir E. W. Hamilton, Sir James Peile, Sir Andrew Scoble, M.P., Mr. T. R. Buchanan, M.P., Mr. W. S. Caine, M.P., Mr. Dadabhai Naoroji, M.P., Mr. R. G. C. Mowbray, Sir Ralph Knox, Mr. G. L. Ryder, and Mr. Collin G. Campbell (Secretary). The main problems to be solved are how far the Indian Freasury ought to be charged for a number of services for which no charge is made to other dependencharge between the Governments of the United for which no charge is made to other dependencies of Great Britain, and especially for military charges designed primarily in the interests of Great Britain and without reference to India A Select Committee in '74 acknowledged the right of India to equitable treatment, but also declared her hability for the cost of improve-ments in the general military administration If the principle be maintained, it is questionable whether the present capitation charge be materially reduced by any fresh scrutiny. If the principle be modified with a view to the financial effect of the reforms as regards the troops on Indian service, and of the unsuitability of certain of the charges to Indian military requirements, then a field for the readjustment of home charges opens up. And so as to the civil establishments in England which are charged to the Indian Exchequer India now has to pay the total cost not only of the services which the India Office renders to her, but also of the functions it discharges as a branch of the Home or Imperial administration The fundamental question is—How far are Parliament and the nation willing to reconsider the principle, and to leadjust the financial settlement which has been gradually formed upon to? The Commission began its work at the end of Nov. 95, and a mass of material was at once placed before it by the Indian Committee in the House of Commons, consisting of those members who devote themselves

among the educated classes of India of all races religions, and provinces—to meet together and discuss their political wants. Hitherto the people of India had been widely separated from one another by differences of language, creed, and caste; and these differences had been intensified by distance. It was the English Government that for the first time made it possible for them to unite in a common object. The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first Indian National Congress was held at Bombay in Dec. 85; the president was Mr. W. C. Bonnerjee, a Bengali Brahmin Calcutta was the scene of the twelfth Congress, in December '96, Amracti of the thirteenth Congress, Dec. 28th, '97, and Madras of the Fourteenth Congress, December '98. The political meetings of the Congress being ended, a Social Conference for the discussion of social reforms in the Hindu community is regularly held. From one-half to two-thirds of the delegates to the Congress attend this Conference. The resolutions adopted at all the congresses have been of a similar character. Questions of social reform—such as child marriage—have special religions and castes. Loyalty to the British Crown has been unhesitatingly avowed, both in the resolutions and in the speeches and certain political changes in the administrative system have been as unhesitatingly demanded, special stress being laid upon the excessive growth of Indian military expenditure, the evils of the "forward" frontier policy, the want of an adequate system of education, and the urgent necessity of giving effect to the resolution of the House of Commons in favour of holding examinations to the Indian Civil Service simultaneously in India and England. The Right Hon. Sir Richard Garth, Q.C., late Chief Justice of Bengal, has described the Indian National Congress as "a large, influential and important assembly of earnest and patriotic gentlemen, and says that it "affords an open, honest and loyal means of making the views and wishes of the most intelligent section of the Indian people known to the Government. The Indian Parliamentary Committee, which consists of 120 members of the House of Commons, and acts in concert with the British Committee of the Indian National Congress watches Indian interests in Parliament, and was chiefly instrumental in securing the appointment of the Royal Commission on Indian expenditure The chairman of both Committees is Sir W. Wedderburn, M.P. The official report of the various sessions of the Congress may be obtained from the British Committee, 84 and 85, Palace Chambers, West-minster, S.W. A weekly journal, named India, "a record and review of Indian affairs," is published at the same address. It is edited by Mr. Gordon Hewart, M.A. (Oxon), who is also Secretary of the British Committee. India publishes a full report of all proceedings in Parliament relating to Indian affairs.

of those members who devote themselves specially to Indian questions. No report had been issued by Nov. '98, though it was understood that it was then in preparation.

India, The Most Exalted Order of the Star of Established by letters patent in 1861, and enlarged in '66 and '78. Its badge is a light-blue ribbon with white stripes edge-wards, and with motto, "Heaven's Light our years ago a movement took definite shape, Guide." It consists of the Sowereign, a Grand

Master, who is the Viceroy of India for the time | tion, unless they have previously passed some

Master, who is the Viceroy of India for the time being, and three classes of members:—
G.C S.I. . Knight Grand Commander.
K.C.S.I. . Knight Commander.
C.S.I. . Companion.
Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first least the companion of the Coder be are entitled to the prefix "Sir." Of the first class there may by the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed. The Registrar of the Order is Sir Albert W. Woods; and the Secretary is the Foreign Secretary to the Government of India. Indo-China is the name superior the Foreign Secretary.

Indo-China is the name given to the French possessions in the Annamese peninsula. They include Cochin China, Annam, Cambodia, and Tonquin, of which separate accounts will be found under their respective headings. A convention with China (signed June 25th, 95), completed the delimitation of the boundaries between French Indo-China and Chinese territory, and settled all commercial arrangements in connection therewith. Among these one of the most important points was the right given to France to extend the Annamite railway into Chinese territory. This conrailway into Chinese territory. This convention made French and Chinese territory contiguous from the Mekong to Laoka, on the Ionquin-China frontier French access to China through Ionquin and Yunnan was thus definitely assured; but British rights seemed to be infringed, for Great British had definite rights over the Shan States of Kiang-Hung and Kiang-Kheng, to which France laid claim under the convention. However, by an agreement made in '96 between England and France the matter was settled. The Khiang-Kheng territory was handed over to France by Great Britain, the Mekong river being made the dividing line between the possessions of the two nations from the north of Siam to the boundaries of China. The idea of a buffer state was thus given up. The boundary between the French and Siamese possessions was made the river Mekong southwards to the rapids just below Stune Treng, from which point the frontier diverged in a south-westerly direction to the coast. For the effect of the agreement upon Siam see Siam. See China (map) as to French railway projects M. Doumer is the Fiench railway projects M. Doumer is the Governor-General of Indo-China, and the seat of government is at Hanoi.

Institut de France. See Academy, The

Institute of Chartered Accountants in England and Wales. Incorporated by royal charter May 11th, 1880. Objects. The elevation of the profession of public accountants as a whole, and the promotion of their efficiency and usefulness, by compelling the observance of strict rules of conduct as a condition of membership, and by setting up a high standard of professional and general education and knowledge, and otherwise. Conditions of Membership. Except in the case of persons who have been for not less than ten years in practice as public accountants, or who were in service as public accountants' clerks before March 21st, 82, the date of the first bye-laws, mental meetings for students only. The gree persons desiring to become members of the receipts were £24,787 5s. 11d., including strict institute must pass the preliminary examina- income £21,892 5s. 7d., capital £2428 13s., and

equivalent examination; they must then be articled for five years, and pass an intermediate examination after the expiration of half the term of service, and a final examination on the end of their service. In the case of graduates end of their service. In the case of graduates of a university, the term of service under articles is three years. Officers: President, John George Griffi.hs (Deloi.te, Dever, Griffiths & Co), 4. Lothbury, E.C.; Seoretary, William Gethen Howgrave; Librarian, Edward Taylor, Solucitors, Messrs. Markby, Stewart & Co., 57, Coleman Street, E.C. Hall and Offices. Moorgate Place, London, E.C. Institute of Journal state. See Journal 1818.

Institute of Journalists. See Journalists.

INSTITUTE OF.

Institute of Secretaries, founded 1891. Has enrolled over 1400 members, and aims at the general advancement of the status of secretaries, and the promotion of personal and friendly intercourse. One of its objects is to ascertain the law and practice, and form as to ascertain the law and practice, and form a strong body of expert opinion, with the view of codifying and amending the Acts relating to Companies, and to watch legislation affecting the same. Secretaries of public companies, societies, institutions, etc, are eligible as fellows, and assistant secretaries, legistrats, or clerks as associates Examinations for membership as associate are held in June and membership as associate are new in the according to the camber; no date has yet been inxed for examinations for membership as fellow A Library and Reading-room has been opened, and an Employment Register 18 kept. Organ. The Secretary's Journal, monthly President, Mr. John I Denniston Secretary, Mr Russell Day, BA, LLM. Offices, 19, Birchin Lane, Cornhill, E.C.

Institution of Civil Engineers, The. Founded Jan. 2nd, 1818, incorporated by royal charter June 3rd, 28, and received supplemental charters, with extended powers, Aug-ard, '87, and March 20th, '96. The object of the Institution is to further the advancement of mechanical science, and more particularly to promote the acquisition of that species of knowledge which is essential in the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. It has recently adopted a scheme by which andidates for associate membership and studentships will in future be subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. These examinations will be open to non-members. The numbers of the several classes are members 1939, associate members 3945, honorary members 20, associates 322, and students 902 total 7148. The session extends from the first Tuesday in November to the last Tuesday in April, the ordinary meetings being held on the Tuesday in each week. The record of the papers read and the discussions thereon at these meetings is embodied in the Minutes of Proceedings, which likewise contain other original communications presented to the Institution, as well as abstracts of papers in scientific Transactions and periodicals. Be-sides the ordinary meetings there are every fortnight during the session special suppletrust funds £466 7s. 4d. The funded property of the Institution amounts to £52,000, besides which it has under its charge trust funds of the nominal value of £17,092 os. 9d. It has a library of upwards of 30,000 volumes, including 790 of rare tracts, the number of which cannot be much less than 10,500. Bearetary, Dr. J. H. T. Tudsbery. Offices, Great George Street, Westminster, S.W.

INSURANCE.

The following article on Insurance in all its branches, and in every department of those branches, will be found to be thoroughly up to date, and as exhaustive as its limits allow. The article deals with five branches, viz. -

I. FIRE.
II. LIFE.
III. MARINE.

IV. ACCIDENT AND FIDELITY GUARANTEE,

V. MINOR BRANCHES, AND EXTRAORDINARY FORMS OF INSURANCE.

Since the previous edition of this Annual was published, fire insurance companies have had a very bad time for business, as the fires have been more than in average corresponding years, and, if rumour is correct, several insurance companies, and among them some in the first rank, will show an adverse balance on the year's transactions. In the United Kingdom the most extensive conflagration was that which occurred at Glasgow on April 25th, '98, and which, after starting in a block of buildings in East Howard Street, rapidly spread from block to block and from street to street, until a large amount of property was involved and finally destroyed. The manner in which the flames leapt across the surrounding thoroughfates recalls the calamitous fite at 5t. Mary Axe, London, in 1/93. These has been a marked decrease in Liverpool cotton fires. The only one of importance was that which broke out in Atlas Street, on April 22nd, when about 2 oo bales were destroyed or damaged. Owing to the more general adoption of automatic sprinklers in cotton mills, these factories have not materially contributed to the yearly fire waste. A serious loss took place in a warehouse connected with Messrs. Barlow & Jones' mill at Bolton, and the destruction of Messrs. Booth & Sons' mill at Turton, near Bolton, which was an automatic-spiinklered risk. which was an automatic-splinkiered risk. Several fires have occurred at print works. The most destructive happened at the Gateside print works, at Barrhead, near Glasgow, at the Dunmurry print works at Belfast, and on Messrs. Lee & Co.'s premises at Castleton, Lancashire. Several woollen and worsted Lancashire, Several woollen and worster mill fires have been recorded during the year, the most serious being at Wrigley & Parker's factory at Batley, Lobley & Co.'s, Carlinghow, in the same neighbourhood, Watergate mill, Dewsbury, and Rective mill, near Wakefield. A fire also involving a very heavy love occurred at the Welsh flannel mill, Holywell. The insurance companies have not, during the year, suffered much from flour-mill risks. The only fires of importance which happened were those in a mill at Bedminster, Somerset, tions to save expense. The necessity of expert and one at Woolton, Lancashire. On Aug. 1st and scientific workmanship for this purpose is a fire broke out in Norwich on premises more necessary than ever, and it should always occupied as rope works, and before it could be done under the supervision of a practical

be extinguished a large quantity of adjoining property, including an extensive drapery establishment, was destroyed. In the same month the menageries of Mr. Cross, at Liver-pool, were demolished, and several hons and other animals were burnt to death. No theatre fires of any consequence have occurred during the year; but a music hall at Dewsbury, known as Hart's Amphitheatre, was burnt out in June. The timber trade has contributed its full quota of losses: many destructive fires occurred in saw mills, timber yards, and stores in various parts of the country. Printers have fairly maintained their reputation as hazardous risks, and it is therefore improbable that the insurance offices will, for the present at least, see their way to make any reduction in the heavy rates printers are required to pay. The only important wharf fire that happened was that at Hay's wharf, in Tooley Street, London, which occurred in June, and caused heavy losses to occurred in June, and caused heavy losses to several insurance companies. Among other big fires may be mentioned a tannery at Yatton, Young's brewery at Eigin, Free, Rodwell & Co's mait mills at Mistley, Essex, Saltpans hotel, Saltpans, and Aspinall's paint works, New Cross, and a large fire in Tabernacle Street, London, destroying several buildings The number of farm and stack fires has been unusually large, especially in the South and West of England. They have been mainly attributable to the defective been mainly attributable to the defective manner in which the hay was got and ricked this season, but the ubiquitous tramp has been responsible for many. There have also been several mansion fires during the year, the most nateworthy being at Rendlesham Hall, Suffolk, the seat of Lord Rendlesham Eynsham Hall, Oxon: Abington House, Lanark, the property of Sir E. A. Colebrook; Lanark, the property of Sh. E. A. Coledious, "Argosy," near Armagh, the seat of Capt. Bond-Shelton, and Tempsford Hall, Tempsford, Beds, the seat of W Dugald Stuart, Esq. Owing to the constitution of rural and urban district and parish councils, a large number of fire brigades have recently been established. Many of them have done good work; but there are a considerable number (and this iemaik also applies to some of the older-established brigades) which have made themselves conspicuous by their efforts to take advantage of the mistortunes of others, and to extort heavy and unreasonable charges from the insurance companies through their insured.

The insurance companies allow about 50 per cent. discount for sprinklers with other fireextinguishing appliances in cotton mills, 30 per cent. for lace factories and flour mills, and often 25 per cent. for wood-working establishments. Only about 15 per cent. 18 generally allowed as discount for sprinklers in printing works, which is far less than that allowed to more hazardous trades, and this small percentage is justly regarded by printers as a consider-able grievance. As there are several latent dangers from the electric light in buildings, it is very necessary that there should be no defective installation of such. Several Fire Offices have rules for avoiding these dangers, but they are often disregarded owing to the employment of inexperienced men for installa-tions to save expense The necessity of expert

electrical engineer. In several large towns many buildings intended for dwe'ling-houses, and which have long been used as residences, are afterwards made to bear far beyond their strength the weight of heavy stocks or heavy vibrating machinery. In consequence of this use made of the buildings, fires therein frequently become very serious, and the losses are heavy. In a recent paper read at a meeting of the Insurance Institute of Yorkshire by Mr J. H. Mills, Resident Secretary at Huddersfield of the Palatine Insurance Company, he stated that in fire insurance business within the United Kingdom there is no scheme to be more desired than the general periodical inspection of all manufacturing and other large inspection of all manufacturing and other large fire risks. Such inspection is made by the London Salvage Corps, the Liverpool Salvage Corps, and the Glasgow Salvage Corps, in warehouse risks coming under the London Mercantile Tariff, the Liverpool Mercantile Tariff, the Liverpool Mercantile Tariff, and the Glasgow Warehouse Tariff. He adds that "the loses under these toriffs have adds that "the loses under these torifs have adds that "the losses under these tariffs have shown much improvement in recent years Outside these three areas the companies for the most part rely upon the fitful, far between, and comparatively cursory visits of surveyors for knowledge of their risks . . . Periodical general inspection by every office is impracticable. Concerted inspection by all the offices able. Concerted inspection by all the offices is sure to come. Many of the more serious losses from building fires have resulted from the insufficiency and unreliableness of public water supplies. The people of a district with aveclery twicer supply and decorate public. excellent water supply and adequate public appliances for extinguishing fires have propor-tionately to pay as much for fire insurance as those who have not these advantages

The aggregate premium income of fire offices in '97 amounts to about £18,870,920, as reported in While's Insurance Register, '98, and the losses to about £10,596,179. The number of losses to about £10,596,179. The number of companies in the United Kingdom whose business is entirely or mainly that of fire insurance s [22], 37 compose the London Salvage Corps; and 61 companies contribute towards the expenses of the Metropolitan Fire Brigade at the rate of £35 per million on the amount of property insured. The premiums and losses of the leading British fire insurance companies as given below are mentioned in the Annual Insurance Digest, '98, published at the Post Magasine Office in November.

II. LIFE.

As the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for some months subsequently. According to the returns relating to life assurance companies in '07 to the Board of Trade, and published in '98, the important particulars in

the table opposite are notified —
Of the British and Colonial companies transacting ordinary life assurance in the United acting ordinary life assurance in the United Kingdom, the following, arranged alphabetically, receive an annual premium income of £100,000 and upwards—viz. Alliance, Atlas; British Empire, British Equitable; Caledonian, City of Glasgow; Clergy Mutual; Clerical, Medical and General; Colonial Mutual, Commercial Union; Eagle, Economic, Edinburgh, English and Scottish Law; Equitable; Equity and Law, Friends' Provident; General; Gressham Guardian Handland Imperial Gresham, Guardian, Hand-in-Hand, Imperial, Law Life, Law Union and Crown; Legal and General; Life Association of Scotland; Liverpool and London and Globe; London and Lancashire; London Assurance; London Life; Metropolitan, National Mutual; National Provident ; North British and Mercantile ; Northern ; Norwich Union, Pelican, Provident Clerks: Provident Life, Prudential (Ordinary); Refuge (Ordinary); Rock, Royal; Royal Exchange; Scottish Amicable; Scottish Equitable, Scot-Scottish Aminone; Scottish Lunion and National, Scottish Union and National, Scottish Union; Sun Life of Canada; Union; and United Kingdom Temperance. The yearly premium incomes of three of the United States of America companies are very much in excess of those of British life assurance companies. These American companies are the Equitable of the United States, the New York, and the Mutual Life of New York. The premiums of British and American companies, while they indicate the magnitude of the business done by them, are not always an approximate evidence of their merits.

assurances for '97 was 849 for £48,017, as compared with 256 for £20,600 in '83. The number of immediate annuities granted in '97 was 2051 for £56,237, as compared with 770 for £14,141 in '83. The number of deferred annuities in '97 was 207 for £4000, as against 104 for £2120 in '83.

On the other hand, an enormous number of the number of the passes by industriance of the masses in the second of the secon

life policies are granted to the masses by indus-trial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last twelve years—so much so that about half the popula-

tion of this country is insured in them. The following figures, according to the latest returns, show receipts of over £100,000 premium incomes of industrial companies and collecting friendly societies: viz., British Workman's and General, socicties: viz., British Workman's and General, £555,168 (including ordinary); Liverpool Victoria Legal, £573,749; London, Edinburgh and Glasgow, £262,661, Pearl, £540,929 (including ordinary); Prudential, £4,793,591; Refuge, £882,370; Royal Liver, £465,137; Royal London, £362,493, Socitish Legal, £147.850; Wesleyan and General, £329,525 (including ordinary). About half the number of British life offices

grant immediate annuities; and lend on personal security with life assurance; and about 27 transact fire insurance. The Caledonian Insurance Company have introduced a new form of assurance, whereby in approved cases it will grant immediate life assurance without medical examination. The directors require the appli-cant under this method to lodge a proposal containing the usual information respecting containing the usual information respecting his own health, history, and the causes of the death of his relatives; and although the directors reserve their right to communicate with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the requirement that the transaction shall take the form of an endowment seasurance—that is, an with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the wording that the transaction shall take the requirement that the transaction shall take the form of an endowment assurance—that is, an

assurance payable on the attainment of a selected age, or at death if this should occur previously; but with this variation from the ordinary endowment assurance-viz., that the amount payable on survivance shall be double the amount payable at death. To meet the case of those who do not desire a cash benefit on reaching the selected age, there is provided instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. Liberal cash values will be allowed for the surrender of these assurances policies at extraordinarily low premiums for sums payable at death if this event occur before the attainment of ages 45, 50, 55, or 60. These are practically temporary assurances of very long duration. Nothing will be paid under them if policy-holders die after the expiration of the term for which they are

granted.

Endowment Policies payable at a given age or earlier in the event of death, answer a very important public requirement, and are granted by most of the life offices. They have greatly increased during the last eleven years. Better arrangements have been recently made for paying surrender values and reviving lapsed polices Several important restrictions have also been removed in favour of policy-holders also been removed in awour or policy-noted as regards travelling and residing abroad. Invalids can also have their lives insured on favourable terms.—The Equitable Life Assurance Somety, or the Old Equitable, as it is generally called, started upon a new career on lune 16th, '93, when a memorandum and articles of association were substituted for the deed of settlement, which had done good service for 130 years, but which had become antiquated and almost unworkable. The directors availed themselves of the new powers by issuing an Endowment Assurance prospectus containing the rates of premium on which they were prepared to issue this class of policy with full participation in the exceptionally large profits. Hitherto they had not been able to grant such policies. The plan has been still further extended by a scheme for guaranteeing interest at the rate of 5 per cent on the sum assured, and bonuses from the date of maturity until death. This has been followed by an attractive prospectus containing a somewhat novel feature—namely, deferred assurance for children without medical examination. The assurance under this scheme does not come into force or enter for profits until the child attains twenty-one | Fen pounds a year paid in respect of a child less than twelve months old will secure for he child at the age of twenty-one a with-profit policy for £1000 payable at death, free from all restrictions as to residence or occupation, and for which he will only have to pay Lio a year In the event of the child dying before twenty-one all the premiums paid will be returned without interest. In consequence of many adverse criticisms having been made on the use of the Northampton Table by the Old Equitable in its latest inves-Table by the Old Equitable in its latest investigation, the directors have published a valuation by the Institute of Actuaries, H^m and H^m (*) Tables and 3 per cent interest, which is considered the highest standard for a company to adopt, and the result shows that the surplus was £1,782,497, being £584,727 more than the amount divided as profit. This Society offers, as at has ever done, the most ample security for the discharge of its liabilities. ample security for the discharge of its habilities, and a substantial guarantee for future profits. The new prospectus is a comprehensive guide, and should be studied by all who are thinking of assuring their life. The Society now grants immediate annuities. It previously only granted deferred annuities. The Royal Exchange Assurance, under the heading of Settlement Endowment Policies, has recently assurance upon the life of the survivor of husband and wife, combined with a deferred annuity payable to the husband on his attain.

ing an agreed age, and to the wife on her husband's death. The policy may be either a whole-term or an endowment assurance, and, if required, may share in profits. In the is payable to the wife only after the death of the husband. The amount of the annuity is fixed when the policy is granted, and may range from 3½ to 5 per cent on the sum assured, according to the wishes of the proposer. The premiums payable are regulated according to the percentage agreed upon On the failure of both lives, the sum assured is paid to the husband's representatives to be distributed among the children or other beneficiaries as appointed by him, or, if no such appointment is made, "as provided in the policy itself."

This scheme is adapted to, and obviates the necessity of, the ordinary form of settlement that secures a life interest to the wife, with remainder to the children, as appointed by the settler. It may also be stated that, contrary to the practice on the grant of an ordinary last-survivor policy, no evidence of the wife's

health is necessary

The Sun Life Office has introduced Improved Tables of Endowment Assurance. table the assurance matures in the fifty-fifth, and in the other in the sixtieth year of age. The assurance money is also payable at death if this occurs before the maturing period. It has also introduced what it terms The Perfect Protection Policy, which means (a) that the policy cannot lapse as long as it has any surrender value, (b) if the assured has a breakdown in health he has no premiums to pay during the period of his incapacity, (c) if he becomes totally incapacitated the Society will not trouble him for any more premiums, (d) if he meets with a very serious accident the Society will pay him half the sum assured, keep the policy in force free of cost, and pay the balance of the policy at his death, (e) he can travel anywhere poincy at its death, (e) he can travel anywhere without paying an extra premium, (f) he can surrender his policy, and either receive a paid-up policy or withdraw its value in eash; (g) he can borrow money on his policy. It is stated that no other assurance office issues this policy.

The Immediate Bonus Plan has been introduced by the Scottish Equitable Life Assurance Society. Under this scheme a table has been prepared under which members may pay very low premiums, while retaining the right to share in the profits. The payments for those using the table have been fairly adjusted, so as to put them on a footing of equality with members paying the higher ordinary premiums. The system of assurance called Guaranteed Tentine Endowment has been introduced, whereby double the amount assured is paid if the policy-holder survive the stipulated is paid in the policy-house state which his policy is granted. Other systems of Fontine Endowment also prevail.—

Fenance are also granted by several life offices. to secure an annual income payable during the later years of life. If the assured should die before that date the whole of his premiums and interest will be returned to his representatives.

The National Mutual Life Assurance Society has introduced a scheme of Guaranteed 5 per cent. sum assured is payable to the legal representatives of the deceased, and who can surrender both the sum assured and the annuity either on the failure of the life assured, or at any time within the specified period after such failure, the surrender value being greater than the sum assured. The benefits of the scheme can also be extended to endowment assurances on payment of a slightly increased premium. The British Empire Mutual Life Assurance Company have also introduced & new feature, under the title of Children's Assurances. In this method there are two scales of premiums. In one all that are paid are returnable if a child dies before twenty-one. In the other scale, which is lower in the amount of premiums payable, these are non-returnable. On the child attaining twenty-one the policy comes into full force as a policy of insurance.
The Norwich Union Life Assurance Society also transact this business as regards adults as well as children. The British Empire Mutual likewise issue Six-per-Cent Investment Policies, whereby an assured income is secured without fluctuation or loss of capital value This scheme is specially suited for marriage and (amily settlements. Under the Reverable Premium Plan, which is a new one introduced by the Colonial Mutual Life Assurance Society on connection with old age pensions, the sum assured becomes payable at death, and the premiums cease at the age of sixty or sixty-five, as selected at the outset, and afterwards the society will return one premium each year as long as the policy-holder lives For providing a fund for payment of Death Duties under the Finance Act of 94 several life offices insert a clause in their policies that if requested by the legal personal representatives of the assured, entitled to receive the policy noneys on grant of probate or letters of administration, they will either pay so much of the sum assured as will be enough to satisfy these duties to such representatives, or at their option pay the whole or so much of the policy moneys as shall be required for these duties to the Inland Revenue Commissioners or any other persons lawfully entitled to receive the same under the before-mentioned or any other statute. In consequence of these airangements, executors and administrators are re-lieved from the necessity of realising the estate to provide the money for the payment of these heavy duties. An important and distinctive feature of the Scottish Provident Institution is what may be called the Low Premium and Deferred Bonus system. The premiums for policies granted by this society are considerably lower than the average rates of other offices, and thus a much larger sum can be assured than can be assured by the same premium in other offices. The particular feature of the scheme is that bonuses are reserved for division exclusively among those who survive the period at which their premiums with compound interest at 4 per cent, amount to the sum assured More than half the policyholders divide the bonuses between them, which are very large.

As there appears to be a demand for an assurance policy at a low rate of premium under which the holder shall not be excluded from bonus additions, the Pelican Life Office

without profit policies. The reversionary bonus to be allotted to the policies is always to be r per cent. per annum less than that allotted to the ordinary full-premium policies. If the bonus should fall below r per cent. these policies will get nothing, but will rank for their share beyond that proportion when the distribution is more than that rate. The great advantage of this arrangement is that it involves no hability on the policy-holder. He is assured for a definite fixed sum, which cannot be reduced even if there is no bonus; nor can the premium be increased.

The 8-per-cent Consols with Bonuses of the Norwich Union Life Insurance Society appears to offer an eligible and safe investment 4 per cent Guaranteed Increasing Policy, recently introduced by this Company, appears to be much appreciated. Under this scheme the assured or his legal representative is entitled to a bonus of 4 per cent annually during the continuance of the policy up to 25 years. If he should survive this period he will then It he should survive this period he will then be entitled to the following options if he insures for £1000 viz, (a) A cash payment of £1000, and a paid-up policy for the same amount; (b) A cash payment of £1500, (c) A paid-up policy for £2002, subject to health; (d) On a continuation of the premiums a policy for £4150, subject to health, (e) An annuity of for \mathcal{L}_{4750} , sincect to nearth, (e^2) An annutry of \mathcal{L}_{108} its 3d, payable half-yearly, (f) A padup policy for \mathcal{L}_{1000} , and an annutry for life of \mathcal{L}_{72} 75 6d, (g) A cash loan value at the end of 5 years of \mathcal{L}_{94} , at the end of 10 years \mathcal{L}_{220} , at the end of 15 years \mathcal{L}_{540} , and at the end of 20 years £950. This example applies to a policy taken out by the assured at 25 years of age, but premiums and options of the like kind as far as is practically and equitably applicable and will be quoted on application to the Society.

Very liberal Immediate Annuities are granted by many life offices, but in consequence of the small rate of interest paid for first-class investments the consideration money or rates paid for these annuities has increased very considerably, and is likely to further increase in the near future.

In order to meet the difficulty which trustees have now in finding safe investments yielding a fair rate of interest, the Rock Life Assurance Company and the Westminster and General Life Assurance Association have adopted Assurances to Secure an Income for Widows and Children at low premiums.

The system of profit peculiar to the Rock Life is that larger bonuses are reserved for those policy holders who survive and cause a profit, a smaller share being reserved to those by whose earlier death there is a loss to the common fund.

The Family Settlement Policies of the North British and Mercantile Insurance Co., which come under this class of assurance, also answer a growing requirement. They avoid the necessity of appointing trustees for the widow, and secure to her during her life a fixed safe and remunerative investment of the funds provided by the assurance on the life of her husband. It is stipulated in the policy that on the death of the husband, the wife surviving, the Company will pay to her during her life interest on the sum assured at the rate of has made an arrangement which is described 5 per cent per annum. On the death of the as Bonus Policies at Kinimum Premiums. The survivor of husband and wife, the sum assured rates are very little in excess of those for will be at once paid over to the executors of

the husband. If the husband and wife both die, leaving a child or children, and while any child is under age, the fund may, on the death of the survivor of the parents, either be at once paid over to the husband's executors, and the matter closed—or it may, if the husband have so directed at the outset, be left in the hands of the Company, until the youngest child attains twenty-one, the Company allowing interest at 3½ per cent. Power is reserved to the husband to revoke the foregoing provisions—in which case the sum insured would at his death be at once paid to his representatives or assigns. If it should be desired while husband and wife are both living to discontinue payment of premium, the Company will give to him either a cash surrender value, or a fully paid up policy, securing a reduced amount of assurance and annuity. The husband alone is medically and annuity. The husband alone is medically examined. The same Company also issues Threefold Option Policies. By this scheme the policy secures a capital sum payable at death or on the attainment of an age (say 55, 60, or 65) specified at the time the policy is effected, but the assured may, on attaining that age, choose to receive either—(i) Immediate payment of the capital sum, or (a) An annuity (equal in amount to interest on the capital sum at the rate of 4 per cent) payable during the remainder of his life—payment of the capital sum being deferred until his death, or (a) An annuity of lorger amount (in her of capital sum of larger amount (in lieu of capital and interest) payable during the remainder of his life. The Investment Policies granted by the Rock Life Assurance Company are likely to be much appreciated. By these policies small or large sums may be accumulated without any risk of losing the money, and the certainty of receiving back a sure and profitable return as regards sums down, annuities, marriage settlements, family endowments, educational annuities, and leasehold redemption funds; and the whole with or without life assurance. The Yorkshire Fire and Life Insurance Company have brought out a new table, giving Endowment Insurance at Minimum Cost, but with profits deferred until the attainment of the endowment age. liberal options which are obtainable on the attanment of the endowment age are 1. Payment of the full sum assured in cash, with bonuses. 2. The assurance to be continued for the original amount of the policy payable at death, the bonuses and the balance of the sums assured to be paid in cash. 3. A paid-up policy for an increased amount payable at death. 4. A paid-up policy, payable at death, for the original sum assured, and in addition a pension to be drawn for the remainder of life. 5. A pension for the remainder of life, 6. A pension to wife or child 7. A deferred pension to commence at the death of the life assured, and commence at the death of the life assured, and the payable during the life of the widow or of a child. In addition to this table the Company have also brought out a new scheme of Discounted Bonus. This consists of the adoption of a new table of reduced premiums obtained of a new table of reduced premiums covarion by discounting bonus at the rate of £1 per cent. per annum (compound), whereby the actual premiums are reduced to a minimum almost equivalent to non-profit rates, but with the special advantage that should the assured attain a specified fixed age—say 30 years after the date of the policy—it will then participate in the profits for the whole period at the rate of the bonus declared over the £1 per cent. assumed; or, in other words, the difference between

& per cent. and, say, 30s. per cent. (which is below the average rate hitherto declared by the Yorkshire) would be credited in a lump sum to the policy. Assurances on Invalid Lines, called "Invalid Assurances," are effected by the Clerical, Medical and General Life Assurance Society. For conducting this class of business with fairness to the public, the regulations of the Society provide that of the seventeen directors eight at least are to be members of the medical profession. The system adopted for assuring invalid lives, while safe to the Society, is as favourable to the assured as the various risks will permit. Other companies also take these and other under-average life risks Non-forfestable Endowment Assurances risks Non-torteitable Engagement assumed with Guaranteed Bonuses are granted by the London, Edinburgh and Glasgow Assurance Company. The Sun Life Assurance Company of Canada issue among other policies Coupon Bonds which are very attractive. The rates for these are so low that a person can, it is stated, carry 40 per cent. more assurance than in the ordinary plans for the same money. The coupon bonds differ from other systems of assurance, because the amount assured instead of being paid in one sum at the death of the assured, or at the maturity of the policy, is payable by the company in twenty equal annual instalments. A coupon to represent each of these is attached to the bond. The first coupon these is attached to the bond. The first coupon becomes due immediately at death, or at the end of the endowment term, and the other coupons are payable one each year thereafter to the assured, or if dead, to the beneficiaries named by him, until the whole twenty have been redeemed. One great advantage of this form of policy is that it avoids the trouble and risk of finding suitable investments. for the assurance money which a wife may receive at the death of her husband. The bonds participate in the profits, and if money is urgently required during the twenty years, the coupons not then due will at any time be discounted by the Company, Semi-Endowment Policies are also granted by this Company They differ from the ordinary endowment ones in the following manner. While an ordinary endowment contract provides for the payment of a fixed sum at the end of the term specified, or in the event of previous death, a semi-endowment policy proprevious death, a semi-endowment policy provides for the payment of double the amount on the death of the assured before the expiration of the endowment period. One of such policies taken out by a person aged 30 next birthday for £1000, payable at the end of 20 years, would cost under the with-profit plan £33 9s. The amount payable on death during this interval would be £1000, but if the assured survived the endowment term the amount payable to him would be £1000. amount payable to him would be 6500, exclusive of bonuses; which, if allowed to accumulate on the Beauty During and the contractions of the contraction of the contra late on the Reserve Dividend plan, would pro-bably amount to £536. So that at the end of the term he would receive altogether about

Assurances with Exemption from Payment of Premiums under circumstances involving temporary or permanent Incapacity. There are many professional men, and others, whose incomes solely depend upon their ability to follow their occupations, to whom it would be a great advantage to effect assurances under conditions that should provide for the discontinuance of the premiums under their policies, in the

event of their becoming incapacitated, either by accident, or bodily or mental disorder, from continuing to earn their own livelihood. With the view to secure this advantage to the assured a German life office, many years ago, issued policies for this purpose, and so much was their scheme appreciated that the Law Life Assurance Society introduced it into the United Kingdom shortly afterwards. It now issues policies of this kind upon the lives of males above the age of 24, whose occupations do not involve undue exposure to risk, and who are found to be "assurable at ordinary rates. Under this scheme female lives are not accepted. This description of assurance is also transacted by the Scottish Accident Life and Fidelity Insurance Company, for the Exemption from Payment of Premiums on the life assured attaining the age of seventy, or whilst the assured may be temporarily or permanently incapable by accidental bodily injury or illness, or by mental disorder, from attending to his

incapable by accidental bodily injury or liness, or by mental disorder, from attending to his usual profession, business, or occupation.

The Edinburgh Life Assurance Company have brought forward a scheme—the New "Edinburgh" Policy with Guaranteed Options
This is stated to be an extension of the principle of endowment assurance. The annual contributions at most ages between 20 and 40 is £40 per £1000, if payable for 25 years, and £50 per £1000 if payable for 20 years, and £50 per £1000 if payable for 20 years. An intending policy-holder is offered three options. The first, if selected, must be declared at the outset, but a choice between the second and the third may remain open until the end of the selected term. Option 1 includes £1000 at death if within the selected term, £45 annually for life after the selected term, and £1000 when that yearly payment ceases, whether by death or surrender, it being the option of the policy-holder to drop the same at any time after the end of the selected term and take the £1000 in cash Option 2 comprises the £1000 at death if within the selected term, £1000 in cash at the end of such, and accumulated profits to those who survive the term Under Option 3 £1000 is payable at death if within the selected term, £1500 to £2200 fully-paid-up assurance at the end of the term according to the age then attained, and accumulated profits to those who survive the term. The profits may either be taken in cash or applied to secure additional paid-up assurance. The same company has introduced an Early Provident Scheme, whereby parents who wish to secure to their children a future provision may effect policies under this arrangement at about half the usual rates These assurances may be of the ordinary kind, with premiums payable for the whole life or ending at a fixed age, or they may be endowment assurances payable at a given age or a death if that sooner occurs. The assurance commences after 15 years, but if death happens in the meantime the premiums are returned. When the age is attained at which the assurance is to begin; the policy takes rank for bonuses at the same rates as those declared on policies effected at that age. A surrender value is guaranteed after the first three years, or a paid-up policy may be had instead. This Company has introduced new schemes for the assurance under more favourable terms of Maval and Military Officers. The Law Union and Crown Insurance Company have recently issued a new Secured Option Policy. The following example will show the working of such scheme.

A person aged 20 may, by paying £31 10s. per annum until he is 60, or until his death if earlier, secure £1000. If he should previously die, 5 per cent. per annum on £1000 would be paid to his representatives for 20 years, and the full sum of £1000 at such time as he would have attained 60. If he should survive this period he is entitled to receive in cash a tontine bonus representing his share of profits of the entire class, which are divided among survivors. Respecting the flood assured, he may either receive it immediately on reaching 60, take 5 per cent. per annum on it for the remainder of his life and leave it to his representative or access in leave. leave it to his representatives, or accept in lieu of it an annuity of £ 100 for life. Again, instead of an immediate annuity, he may have one not commencing until he is 65 of £165 for the remainder of his life. Moreover, he may on satisfactory medical examination exchange the satisfactory medical examination exchange that flood immediately payable for a fully paid policy of £1670 payable at death; or for one of £1290 payable at the end of five years or at death if carlier. The policy carries the further advantage, beyond those mentioned, that in the event of the assured being in capacitated for business by bodily or mental disorder for any continuous period exceeding six months while premiums are payable, a remission of premium is made for a period corresponding to the duration of the incapacity For example, if an assured were disabled for a consecutive period of nine months previous to a year's premium falling due, only a quarter of such year's premium would be charged. Until recently life offices were not favour-ably disposed to assure Women, and would only grant them policies at premiums very much in excess of those charged to males. The New York Life Insurance Company, which transacts much assurance business in the United Kingdom, concedes the same benefits in respect of non-forfeiture, freedom from restrictions, etc, in female policies at the same premium rates as are charged to males. This is a very important experiment, which, as is alleged, is justified by the rapidly changing conditions of the female sex as regards their increasing professional and business occupations and other causes. Assurance companies are paying more attention to the rating of female lives, and are canvassing for policies by women. A large number of this sex in the United States is specially employed to solicit life assurance among female workers, and secure large numbers of them as policy-holders. In Great Britain it appears that the number of lady agents engaged to canvass women to assure their lives is on the increase, and it is stated that a great development in this pursuit may certainly be looked for in the near future. It appears from a recent article in the Bankers' Magazine, by Mr. A. G. Mackenzie, F.I.A., that the invested assets of Life Offices have now reached the enormous sum of £234,000,000 sterling, having doubled in the last 26 years. At this rate of progress they will amount to At this rate of progress they will amount to \$500,000,000 by 1921, and in another quarter of a century to a thousand millions, and the rate of interest, which is declining, to \$3 9s. per cent. by 1921. He adds that "in the not remote future" it is probable that 3 per cent will be the highest rate of interest that a wellmanaged office will feel justified in assuming that it will earn in the future, "and it may be confidently hoped that this assumption will

result in a fair profit from interest being made for a good many years to come.

III. MARINE.

This has, in '98, been in a worse condition than for several years, owing to many losses from foundering, stranding, and wiecks of ships. During recent years very low rates have been charged for insurance, which have been greatly inadequate to the risks involved. Such reduced rates have been occasioned by the influx of a great number of small marine insurance companies, who to get business have reck-lessly issued policies at such remarkably small premiums that they were not remunerative. Many first-class underwriters and insurance brokers condemn this practice as one that will become ruinous to marine insurance companies, since it has materially increased over-insurance of ships. In consequence of the prevalence of very low premiums for marine insurance during the last twelve years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. For the last nine years, however, marine insurance brokers have become more careful in considering the security of the companies they insure with than formerly, and therefore have increased their policies with leading companies of old standing, so that the latter have considerably regained much of the business they lost owing to smaller and newly established companies of indifferent financial status insuring at lower The result has been that, while the latter companies have effected less insurances, the leading companies have issued more policies Of eighteen leading matine insurance companies in Great Britain, the oldest are the Royal Exchange and the London Assurance Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824 Very heavy claims have recently been paid for losses on all kinds of ships, and the rates for insurance of them have materially increased during the last six years.

The dividends paid upon some marine insur-ance companies shares are mainly, and as to others are almost entirely, derived from the investment of capital and reserves Several of such companies are more financial than insurance concerns. A large amount of marine insurance business is also done by private underwriters connected with Lloyd's. Marine insurances are generally effected through marine insurance brokers, who are an important class in London, Liverpool, and Glasgow. Claims are determined by average adjusters in difficult cases One of the grievous evils in underwriting transactions is the use of so-called "honour policies," generally is used as insurances on prospective freight. The number of members engaged as underwriters at Lloyd's is about 560, who, with few exceptions, have lodged with the Committee security, either by deposit or approved guarantee, against the marine ha-bilities which they severally incur at Lloyd's Several wealthy foreign marine insurance companies having branches in Great Britain do a large portion of business here. To satisfy the requirements of the coasting trade, a few maine insurance clubs have been established.

whose operations are governed by the principle

of mutuality and co-operation.

About 50 per cent. of the total outgoings of underwriters on hulls is for average claims, and the remainder for total loss claims. According to the law of marine insurance relating to "con-structive total loss," which shipowners agree is fair, the estimated market value of a ship, after repair, should be taken as a test of such loss, so that if the estimated cost of repairing a vessel is more than her market value after repair, she is constructively lost. Under-writers, however, demand that a valuation which is admitted to be far beyond the market value when the ship is sound, shall be fixed as the value below which, when the state of her damage may have entirely prejudiced her character in the market, she cannot be made a constructive total loss. Thus if a ship is offered for insurance at what her owners consider her market value, £15,000, the under-writers, for reasons connected with averages, ask for the ship to be valued at £20,000, and policies are taken out for her insurance accordingly. If the vessel strands in a bad position, and sustains serious damage whereby her repairs are estimated by the surveyors to cost £12,000, and it is also estimated that after she A.12,1000, and it is also estimated that after she is repaired buyers, thinking that she might have latent structural injury, would not give more than £10,000 for her, underwriters wish to make not this sum, but £20,000—their own fancy valuation—the test of constructive total The losses which Marine Insurance Companies have recently suffered from strandings have been materially increased by the new method in the construction of hulls.

ACCIDENT, AND FIDELITY GUARANTEE.

By far the most important change which has taken place in recent years by legislation between employers and employed has been caused by the Workmen's Compensation Act. The pro-visions of this Act, and the action taken by employers and the insurance companies in regard to it, are fully dealt with in the separate article on Workmen's Compensation (q.v).

1. Accident, Personal.—The business of this

branch is done by nearly 40 companies, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. The Railway Passengers Assurance Company was the first established, which was in 1840; but as regards premium income, the Ocean Accident and Guarantee Corporation takes the lead of all the Accident Companies At the lead of all the Accident Companies At the end of Dec. '97 this income was £334.1024, as against £245.258 in '96, and £186,707 in '95. The premium income of the Employers' Liability Assurance Corporation for the year ending March 338t, '98, was £320,386, as against £314,173 of the year preceding, and the premium income of the Railway Passengers Assurance Company for '97 was £244,948 as against £240,129 for '96 Mest accident insurance companies transact Employers' Liability Insurance, as well as 84 life assurance companies. Under the present law employers are indemnified against their liability to pay compensation for injuries to their workmen under the Employers' Liability Act of '80, and at common law up to the limit of three years' wages. The pre-

miums are calculated on an estimate of the annual wages paid by the employer. Very many accidents which occur during employment are such that no compensation can be recovered against the employer. Joint policies are therefore granted to give the full indemnity under the Employers' Liability Act and at common law, as before mentioned, and also grant compensation in all cases of accident during occupation Many employers extend their insurance by joining with their workpeople under this system, so as to provide for every accident during occupation. The usual benefits under wages in the event of death, and weekly allowances varying from one-third to one-half of the weekly wages, for not exceeding twenty-six weeks, during total disablement. The premiums for these policies are paid in full by the employer, who, by arrangement with the work-people, deducts from their weekly wages their contributions, which vary from 1d. to 3d. per week, according to occupation. Since the latter part of '95 several important additional benefits have been offered to the public by the Personal Accident Insurance Companies At the end of '95, it of the companies out of 31 issued what is termed a "Combined Policy," offering a variety of benefits beyond the death and permanent and temporary disablement allowances of the older Accident policies With these increased benefits, however, additional and necessary restrictions and safeguards have been adopted.

The Tontine Bonus for Non-Claimants is a

The Tontine Bonus for Non-Claimants is a system devised by the London, Edinbuigh & Glasgow Assurance Company Under this scheme the premiums payable by a policy holder who continues his assurance with the Company, and who makes no claim for compensation, will be considerably reduced after five years over and above the abatement allowed to all policy-holders, and it is possible that they will be eventually extinguished altogether, and the assured will at the same time retain the full benefit of his assurance in the event of subsequent injury

2. Fidelity Guarantee — This class of insurance dates back to '40, and was commenced to supersede the system of private suretyship, against which there are many objections, one of the principal being the necessity for continual inquiry into the financial position of the bondsmen. Companies' guarantees have gained much popularity among employers owing to the liberal manner in which claims are dealt with; and all the Government departments at home and abroad, the law courts, municipal corporations, local boards, etc, accept them in preference to private bonds. Guarantees are issued on behalf of all persons of good character, and very many finms require a guarantee society's security with every new member of their staff, because if it is obtained it is a proof that the employe has satisfactorily passed through the searching inquiries made into his antecedents. Among the principal causes leading to defalcations by employes are drink, women, and betting So much is this the case, that a man with a clear record as to honestly and character will find it difficult to obtain a guarantee if there is a suspicion of weakness in the matter of sobriety. On the employers' side the leading cause of the defalcations referred to is either the want of a good system of accounts, or, if a good system.

negligence in its application. That opportunity makes the thief is the daily experience of guarantee societies, and any deficiency in the before-mentioned method of accounts is most seriously against the interests alike of employers and employed. These companies are not intended to render good accountants unnecessary, but to meet those losses which it is, and apparently always will be, unable to prevent. The rates of premium vary from to 408, per cent., and are classified under the different employments. Length of service, position and means are all matters taken into consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Additions and alterations are made by endorsement when there is a large staff within the last few years, premiums have been reduced 50 per cent, and the present tariff is drawn up on such moderate lines that the inducement for large firms to form their own guarantee fund is removed The Guarantee Society, the Provident Clerks' and General Guarantee Association, and the London Guarantee and Accident Company, Ld, have each paid hundreds of thousands of pounds in claims The Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the General Accident Assurance Corporation, the Palatine and other companies, have also paid large claims. One of the leading grievances of Fidelity Guarantee Insurance Companies is that they are not allowed more than a mere trifling percentage of the costs they incur for the prosecution of offenders In addition to these companies, who insure employers generally against loss by their servants dishonesty, there against loss by their servains unannessy, their servains unannessy, their servains unannessy, their servains unannessy, their servains unannessy to unarantee Trust Fund, "to indemnify against loss by bank employes. The Society is divided into two branches, the British and the Foreign Guarantee Trust The Bank of England and several of the leading railway companies have a fund contributed by the employes to secure their employers against loss by the dishonesty of the former. There is also a Local Government and a Post Office Fidelity Guarantee Society, to insure the honesty of the Local Government and Post Office employes At present the only Insurance Company of importance whose premium income and expenses are not known to the public and the insurance world, is the Guarantee Society, and it is a cause of general astonishment that they are not published.

V. MINOR BRANCHES, AND EXTRAORDI-NARY FORMS OF INSURANCE.

Lisekness.—The Sickness, Accident, and Life Association answers a great requirement of the middle classes, and is particularly valuable to professional and business men. It pays weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. This company also combines accident with health assurance. The Ocean Accident and Guarantee Corporation, the Northern Accident Insurance Company, the General Accident Assurance Corporation, the Palatine Insurance Company, tae Acme Insurance Company, and the National Cycle and Motor-Car Insurance Company transact this business.

2. Diseases. - More than twenty companies

transact insurance against certain diseases, and make weekly allowances for temporary total disablement by scarlet, typhus or typhoid fevers, or smallpox. These allowances are extended to measles by eleven, and to diphtheria by ten companies.

3. The coupon system of insurance entitles persons who possess copies of specified newspapers, railway guides, etc., containing accident coupons, to the payment of certain sums for injuries mentioned therein; while some of these on other coupons promise to pay the next-of-kin or legal representatives of the holders who suffer death from certain accidents which are generally those that happen in railway trains—within specified times, fixed sums, which vary very much according to chances of death from such occurrences. By far the greater part of this insurance is transacted by the Ocean Accident and Guarantee Corporation It is also transacted by the General Accident Assurance Corporation, the Law Accident Insurance Society, the Sickness and Accident Assurance Company, the Northern Accident Insurance Company, and the Fine

Arts Insurance Company.
4. Medical Attendance during Sickness 15 insured by the Globe Accident Insurance Com pany and the National Medical Aid Company and several industrial assurance companies

5. Burglary and Housebreaking—The com-panies which take risks against these felonies are the National Burglary Insurance Cor-poration, the Goldsmiths and General Burglary poration, the Goldsminis and General Durking Insurance Association, the National Cycle and Motor-Car Insurance Company, the Norwich and London Accident Insurance Association, the National Accident Insurance Company, the Security Company, the Ocean Accident and Guarantee Corporation, the Law Accident Insurance Society, the General Accident Assurance Corporation, the Fine Art and General Insurance Company, the Empress Assurance Association, and the Credit Assurance and Guarantee Corporation Some of these companies also insure against larceny or theft in houses. The risk of muider by burglars or housebreakers is now covered by the Goldsmiths and General Burglary Insurance Asso-ciation by payment of a small additional premium to that of the burglary and housebreaking risk

6. Transit Risks - The Northern Accident Insurance Company, the Fine Art and General Insurance Company, and the Law Accident Insurance Society, insure against loss of pro-

perty in transit
7. Horses and Cattle and Insurance against Death by Acoident and Disease is undertaken by the Horse, Carriage, and General Insurance Company, the Imperial Live Stock Insurance Corporation, the Vehicular Insurance Company, and the Lancashire and Yorkshire Accident

Insurance Company

8. Third Party Risks are taken by the Vehicular Insurance Company, the Noithern Accident Insurance Company, the Ocean Accident and Guarantee Corporation, the Horse and Carriage and General Insurance Company, the Law Accident Insurance Society, the Sickness and Accident Assurance Association (outside London), the Lancashire and Yorkshire Accident Insurance Company, the General Accident Assurance Corporation, the Globe Accident Insurance Company, the Norwich and London Accident Insurance Association,

and the National Boiler and General Insurance

Company.

9. Vehicular Risks are taken by nearly all the last-named companies, as well as the General Accident Insurance Corporation, and the Scottish Employers' Liability and General Insurance Company.

10. Hailstorm Insurance is transacted by the Norwich and London Accident Insurance Association, and the Nurserymen's, Market Gardeners', and General Hailstorm Insurance

Company.
11. Machinery Insurance was originated some years ago During '35 the Machinery Insurance Company was formed, to insure against all risks and accidents to machinery, except those risks and accidents to machinery, except those resulting from fire or boiler explosion. The regular inspection and general maintenance of the machinery insured forms part of the Company's business. The Company also issues policies which cover loss of profits by fire on goods and merchandise of all kinds. The contract of fire insurance is one of indemnity only; when, therefore, the fire insurance company has repaired the damage done by fire or reinstated the buildings destroyed, the responsibility of that Company ceases. In the meantime, however, very serious losses are incurred by the insured on account of the partial or total suspension of the profits which but for the fire damage would have been earned It is to safeguard the insured against such losses that the new profit policy has been introduced

12. Steam Boiler insurance began by the establishment of the "Manchester Steam Users Association" in '54, and is transacted by nine companies The Boiler Insurance and Steam Power Company, Ld, now called the National Boiler and General Insui ance Company, Ld, was the first to combine insurance with inspection, a system which has now been very generally adopted. This business includes the insurance of boilers against explosion and against damage thereby to the surrounding property, and of the employers' liability 11sk under the recent statute for all accidents to the boilers covered by the conditions in the policies The premiums vary from £1 per boiler for £100, to £5 or £6 for £1000. The Company also insure engines, both steam and gas

13. Plate-glass insurance was first commenced in '52 by the Plate-glass Insurance Company. Many companies transact this business. method generally followed in place-gined all surance is to undertake to make good all breakages, the companies being entitled, by way of salvage, to the broken glass. The insurance is often undertaken by contract in

private dwellings

14. Mortgages, Debentures, and other Securi-tes The insurance of the holders of these valuables against loss of principal and interest, and other business of a kindred character, is effected, by the Law Guarantee and Trust Society, the Liverpool Mortgage Insurance Company, the Ocean Accident and Guarantee Corporation the Trustees, Executors, and Securities Insurance Corporation, the Law Accident Insurance Society, and the Credit

Accident insurance Society, and the Credit Assurance and Guarantee Corporation.

15. Trusteeship and Executorship In consideration of certain premiums, the Law Guarantee and Trust Society, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corpora-

tion, and the Liverpool Mortgage Insurance Company, arrange to act as trustees or executors. Trusteeship by insurance companies has recently made considerable progress, not only under wills and marriage settlements, but for debenture holders.

16. Protures and other Valuable Objects of Art. The owners of these are indemnified against loss from damage or destruction of such, by the Fine Art and General Insurance Company.

the Fine Art and General Insurance Company.

17 Lioence Insurance. The Licences Insurance Corporation and the Law Guarantee and Trust Society insure licence holders and other interested persons against loss or deprivation in the value of property incurred by the forfeiture or non-renewal of licences

18. Loss or Damage of Passengers' and Mariners' Luggage at Sea The Marine and General Mutual Life Assurance Society, the General Accident Assurance Corporation, and the Lancashire and Yorkshire Accident Insurance Company undertake these risks

19. Sinking Funds or Capital Redemption in connection with Learehold Property Several life offices and the Ocean Accident and Guarantee Corporation issue policies for this purpose

20. Special Indemnities or Contingency Policies are issued in almost any cases, when they are required, by several life offices, as well as by the Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the Law Accident Insurance Society, and the Fine Arts and General Insurance Company Most ordinary life assurance companies insure against issue of marriages, and on the other hand against a person dying without issue, when those events are improbable. Insurances are sometimes effected with ordinary life offices against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, etc. The Law Guarantee and Trust Society, beyond granting policies for these objects, have done so with regard to defects in title to landed or other property lost documents, missing benchicaries, avoidance of voluntary settlement, and payment of annuities Some of these risks are also insured by the Ocean Accident and Guarantee Corporation

21 Performance of Contracts. The London Guarantee and Accident Company, the Fine Art and General Insurance Company, and the Credit Assurance and Guarantee Corporation insure the performance of contracts.

insure the performance of contracts.

22 Cycle Insurance of different kinds is undertaken by several companies, etc.

undertaken by several companies, etc.

23. Oredit Insurance. The Credit Assurance and Guarantee Corporation issue pilicies (a) to secure the fullest credit for solvent and responsible traders of good character, and likely to be successful in their business, (b) to enable business men to obtain additional capital through their bankers or otherwise; (c) to guarantee trade bills and other ordinary commercial transactions between traders and others.

24. Excess Bad Debt Insurance. Policies are issued by the Ocean Accident and Guarantee Corporation for covering merchants and others

against bad debts of short duration.

25. Motor-Gar Indemnity and Horseless Carriage
Insurance is carried on by the National Cycle
and Motor-Car Insurance Company, the General
Accident Assurance Corporation, and other
companies.

26. Chemists and Druggists' Indemnity Insurance is undertaken by the Northern Accident

Insurance Company, the Scottish Employers' Liability and General Insurance Company, and the General Accident Assurance Corporation, for risks connected with the dispensing and sale of drugs by chemists and druggists in their business

27. Lifts, Hoists, and Cranes. Several of the leading accident companies assure the owners or tenants of passenger and other lifts against liability for damages for personal injuries to individuals from accidents by or in connection with such lifts

28. Landlords' and Factors' Indemnity Insurance. Policies are issued for these risks by the Northern Accident Insurance Company to indemnify such persons for compensation which they may be compelled to pay in respect of those personal accidents the policy covers.

29. Steam Pipes Accidents from these pipes are insured by the National Boiler and General Insurance Company

Insurance Law. See Law, '98

International Arbitration League, formerly known as the Workmen's Peace Association, was originally established during the Franco-German war of 1870 to promote a policy of peace and international arbitration. For many years the League has carried on an active peace propaganda, both in Great Britain, on the Continent, and in America. It initiated the memorial from 224 members of the British House of Commons to the President and Congress of the United States in favour of a permanent treaty of arbitration between the two mations, organised the deputation of M.P.s to Washington, also initiated and organised the inter-parliaments in favour of international arbitration which have been held during the last six years at Paris, London, Rome, Berne, The Hague, Brussels, and Budapest. It has not members of various Parliaments as Vice-Presidents. President, Thomas Burt, M.P.; Chairman of Council, Howard Evans; Secretary, W. Randal Cremer, ex-M.P. Offices, 17, Lincoln's Inn Fields, London Occasional Organ, The Arbitrator, 1d. See also Place Society.

INTERNATIONAL COPYRIGHT.

Artists and authors have long desired to obtain an international law of copyright, by which works of literature and art might be protected, not only in the countries where they were first published, but in all civilised countries. A conference upon international copyright was held at Berne in Sept. 1885, and attended by representatives of the following states. Germany, Spain, France, Great Britain, Hayti, Honduras, Italy, the Netherlands, Sweden and Norway, Switzerland, and Tunis At this conference there was settled the draft of a convention for securing to the authors of literary or artistic works published in any one of the countries represented copyright in all the others. This convention was signed on Sept. oth, '86. Such copyright is not to be more than the author enjoys in his own state, nor more than the state granting it secures to its own subjects. The provisions of the convention extend to dramatic and dramatico-musical works. They extend to all works which at the date of the convention have not become public property. They forbid the publication of a translation not sanctioned by the author of the original work. But if within a certain

time there appears no authorised translation. an unauthorised one may be published. Articles which have appeared in newspapers or periodicals may be reproduced, unless such reproductions have been expressly forbidden by the original authors or publishers, and no pro-hibition by them can have effect in the case of articles discussing politics, current topics or news of the day. A work is not to be indirectly appropriated by a reproduction which, in spite of auperficial changes, is essentially the same as its original. The convention establishes an Office of the International Union for the Protection of Literary and Artistic Works, which is to be under the surveillance of the Swiss Government, and is to be supported by contributions from all the contracting parties. Any State, not a party, which is willing to adopt the provisions of the convention, may give in its adherence, whilst any State which is a party to the convention, and wishes to withdraw, must give a year's notice of its intention. The convention is to take effect within three months from the adoption of the diaft. Conferences for its revision are to be held successively in each of the countries by which it has been adopted. It does not annul or preclude any conventions already existing or hereafter to be made between any two or more of the con-tracting parties, provided that such special conventions secure at least as ample a protection to authors as it does, and do not otherwise tion to authors as it does, and do not otherwise conflict with its provisions. In this country Acts of Parliament have been passed in '44, '52, 75 and '86, with the object of sccuring copy right to authors and artists who are subjects of foreign states which secure copyright to British artists and authors. These Acts empower Her Majesty by Order in Council to grant copyright to the artists and authors of such countries, and Her Majesty has a large discretion in fixing the conditions with which they must comply. The existence of the copyright of the foreign author in his own country may be proved by a certificate under the official may be proved by a certificate under the official seal of a Minister of State in that country or of a British diplomatic or consular officer acting there. Copies of works made in any foreign country other than that in which the protected work was first published and made without the consent of the proprietor of the copyright may not be imported into this country. An Order in Council issued under these Acts applies to works produced before the date of the Order, but not so as to prejudice any person who has lawfully produced any work in the United Kingdom. It shall be taken to apply to every British possession, saving only those which are expressly excepted. The Act of '86 contains several modifications of previous statutes in-tended to harmonise with the provisions of the convention of Berne above noticed. Conventions for the mutual protection of copyright have been made between the United Kingdom

and several foreign States.

In the United States of America, after much amendment, a bill was passed in March '91, to take effect from July, giving to foreign authors a copyright in their works under certain conditions. Most of these are simple, consisting of the payment of small fees in certain places, but one is the famous "chromo-amendment," which in free-traders' ideas detracted largely from the merits of the Act. Under this clause

the Librarian of Congress, firstly, a printed copy of the title of his book or musical composition, or a printed description of his painting, statue, lithograph, etc.; and secondly, two copies of such book, or a reproduction of such work of art from type set or from negatives or drawings on stone made within the United States. Musical compositions are exempted from the second condition. The well-known British author largely benefits by the Act in spite of the amendment, but the fact that every number of a magazine is to be considered a separate book, and copyrighted accordingly, is awkward for those authors who produce their work serially The Act is of chief benefit to American authors themselves. for it has freed them from competition with pirated reprints of popular English novelists, and its passage reflects the highest credit upon Mr. R. Underwood Johnson and the American

Copyright League.

Copyright League.

In Canada the copyright question has caused trouble for over fifty years. Canada, with the other British colonies, came under the provisions of the Beine Convention and the International Copyright Act of '86, and was thus prevented from reproducing copyright. works of Great Britain and other countries in the Union without the authority of the author. The United States, on the contrary, was able to flood the market, not only in America but also in Canada, with cheap reprints of English publications. Thereupon Canada passed a publications. Thereupon Canada passed a Copyright Act in '89, one provision of which was that, if an author had not obtained copyright in Canada, his book might be published under a licence or licenses, he receiving a 10per cent royalty as the price of each licence. This would have compelled Canada to withdraw from the Copyright Union, which she was quite willing to do, but the Act never received the sanction of the Imperial Government. Mr. Hall Caine visited Canada in the autumn of '95, and it was reported that he had obtained important concessions from the Government as the result of his representations on behalf of the Society of Authors. He spoke strongly in favour of a system of licensed publishing under authors control, and drew up an amended Act, to which he obtained the signatures of the publishing and printing and other interested classes in Canada, and the Canadian Copyright Association This Act, known in official circles as the "H. C. Compromise," was made the basis of certain recommendations offered by the Colonial Office to the Canadian Government as a possible means of settling the dispute between Canada and the mother country, and it is understood that a new Act will be introduced into the Canadian Parliament embodying as many as may be of the new clauses agreed

upon in the Compromise

International Law, Institute of. This
Institution was founded in 73, Di. Lieber, a distinguished American, M. Moynier of Geneva, and M. Rolin-Jacquemyns, the well-known Belgian advocate, being its chief promoters. The first meeting was at Geneva in '74, and since then the Institute has assembled annually at various places on the Continent and in England. The idea of the founders was that since the rules which govern the intercourse of states are established out of respect for the public opinion of the civilised world, and since this public opinion in turn is mainly derived the foreign copyright-owner can have his this public opinion in turn is mainly derived rights in the United States, if he deposit with from the leading international jurists of Europe,

the incorporation of those jurists into a society whose resolutions should form a corpus juris gentium, could not but facilitate the development of the reign of law and justice among nations. The maximum number of its members is 60, and of its associates 60, and no nation can possess more than a fifth of the whole number. The English members are Professors Westlake, Holland, Leech, and Dicey, Sir Robert Hart, Lord Reay, Mr. T. Barclay, and Sir D. Mackenzie Wallace; and the English associates are Mr. E J Lawrence, Sir Sherston Baker, Sir John Scott, Mr. J. A. Foote, and Professor Goudy. Secretary, M. Lehr.

TRELAND.

The head of the executive in Ireland is the Viceroy or Lord-Lieutenant, who is assisted by a Chief Secretary, the Lord Chancellor of Ireland, the Attorney-General for Ireland, the permanent officials, and a Privy Council (which is a separate and distinct body from the Privy Council of Great Britain); but the government of the country is in all essential points carried on under the direction of or in concert with the Ministry of the day in London. The Lord-Ministry of the day in London. Inc Lord-Lieutenant is charged with the manitenance of peace and order; the Irish Constabulary are under his control, and he may, if he think it to be necessary, direct the Commander of the Forces to send troops to their aid He has power to commute sentences and pardon criminals. There are, however, more agreeable and less anxious functions attaching to the office, for, as representing Her Majesty, the Viceroy, assisted by his wife, holds courts, drawing-rooms, levées, and maintains in Dublin an establishment of a semi-regal character. On occasions he confers the honour of civil knighthood. During his absence the duties of chief governorship are performed by three or more Lords Justices, those who act in this capacity being usually the Lord Chancellor of Ireland, the Commander of the Forces, and some of the judges The Chief Secretary to the Lord-Lieutenant, or Chief Secretary for Ireland as he is usually called, has been described as prime minister to the Viceroy; and although he is in theory subordinate to the Home Office, he has his own establishment at the Irish Office in London, as well as in Dublin, and is directly responsible to the House of Commons for the acts of the Irish administration. He is assisted by a Permanent Under-Secretary, salary £2000, and other officials. There is a separate Local Government Board for Ireland; a Board of Works, which is the great financial agent of the Government in Ireland; a Board of National Education, by which the grant made by Parliament for public education is administered; the inspection of Irish fisheries is kept separate from the supervision of those of England or Scotland; and there is a veterinary department in Dublin for dealing with cattle diseases, etc.

A Commission was appointed in May '94 to report upon the Financial Relations between Great Britain and Ireland. The members were the Right Hon. Hugh C. E. Childers, Lord Farrer, Lord Welby, the Right Hon. O'Conor Don, Sir Robert G. C. Hamilton, Sir Thomas Sutherland, K.C.M.G., M.P., Sir David Barbour, K.C.S.I., the Hon. Edward Blake, M.P., Messrs, Bertram W. Currie, W. A. Hunter, M.P., C. E.

Martin, J. E. Redmond, M.P., and Thomas Sexton, M.P., with Mr. Holland as secretary. The following Commissioners were appointed by further Royal warrant, June 22nd, 94: Messrs Henry F. Slattery and G. W. Wolff, M.P. The report of the Commission was issued in Sept. 96. The terms of reference vere recapitulated as follows: "To inquire into the financial relations between Great Britain and Irelated. Ireland, and their relative taxable capacity, and to report—(1) Upon what principles of com-parison, and by the application of what specific standards, the relative capacity of Great Britain and Ireland to bear taxation may be most equitably determined. (2) What, so far as can be ascertained, is the true proportion, under the principles and specific standards so determined, between the taxable capacity of Great Britain and Ireland (3) The history of the financial relations between Great Britain and Ireland at and after the Legislative Union, the charge for Irish purposes on the Imperial Exchequer during that period, and the amount of Irish taxation remaining available for contribution to Imperial expenditure; also the Imperial expenditure to which it is considered equitable that Ireland should contribute.' report then proceeded "In carrying out the inquiry we have ascertained that there are certain questions upon which we are practically unanimous, and we think it expedient to set them out in this joint report. Our conclusions on these questions are as follows (1) That Great Britain and Ireland must, for the purpose of this inquiry, be considered as separate entities. (2) That the Act of Union imposed upon Ireland a burden which, as events showed, she was unable to bear (3) That the increase of taxation laid upon Iteland between '53 and '60 was not justified by the then existing circumstances. (4) That identity of rates of taxation does not necessarily involve equality of burden. (5) That, whilst the actual tax revenue of Ireland is about 1-11th of that of Great Butain, the relative taxable capacity of Ireland is very much smaller, and is not estimated by any of us as exceeding 1-20th. All the members but two concurred in this report. These two members, Sii Thomas Sutherland and Sir David Barbour, each presented a separate report, and three other supplementary reports report, and three other supplementary reports were signed by various groups of the members. The O Conor Don and Messrs. J. E. Redmond, M.P., C. E. Mattin, W. A. Hunter, M.P., and G. W. Wolff, M.P., were of opinion that the best principle to adopt for comparing the taxable capacities of the two countries was to ascertain their relative annual wealth. ratio of the taxable capacity of Ireland to Great Fartian they put at 1 to 20 at the outside. Lord Farrer, Lord Welby, and Mr. B. W Currie condemned the existing system as pressing hardly and inequitably upon Ireland. They said that one sure method of redressing the inequality would be to put upon the Irish people the duty of levying their own taxes and providing for their own expenditure, leaving to the wisdom of Parliament to decide the question of contribution out of Irish taxes to the Imperial Exchequer. This report brought Imperial Exchequer. This report brought about a remarkable movement towards unity amongst almost all sections of Irish representatives, and urgent demands were made that the Government should introduce legislation to carry its conclusions into effect. Government, however, appointed another Com-

mission "to inquire into and report (1) how much of the total expenditure for which the State provides may properly be considered to be expenditure common to England, Scotland, and Ireland, and what share of such ommon expenditure each country is contri-buting, after the amount expended on local services has been deducted from its true revenue. (2) How the expenditure on Irish local services, for which the State wholly or in part provides, compares with the corresponding expenditure in England and in Scotland, and whether such Irish expenditure may with advantage be readjusted or reduced (3) Whether, when regard is had to the nature of the taxes now in force, to existing exemptions, and to the amount of expenditure by the State on local services, the provision in the Act of Union between Great Britain and Ireland, with regard to 'particular exemptions or abatements,' calls for any modification in the financial system of the United Kingdom' See

SESSION, Sect. 18. An Irish Land Commission was appointed July rath, '97, "to inquire into and report upon the procedure and practice, and the methods and valuation followed by the Land Commission and the Civil Bill Courts in Ireland, under the Land Law Acts (a) in fixing fair rents, (b) in ascertaining the true value to be paid for a tenant's interest in a holding by a landlord exercising the rights of presumption, also to inquile into and report upon the piocedule and practice, and the me hods and valuation followed by the Land Commission and the Land followed by the Land Commission and the Land Judges Court respectively, in carrying out the provisions of the Land Purchase Acts." The Commissioners were Sir Edward Fry, ex-Lord Justice of Appeal (chairman), George Fottell, Esq., George Gordon, Esq., Anthony Itaill, Esq., D. L., Robert Vigers, Esq., Secretary, Richard R. Cherry, Esq. The Commissioners reported early in '98, after having held 34 sittings and examined 138 witnesses. Ihey recommended that the Jurisduction of the Civil Bill Courts in respect of the Land Acts Civil Bill Cou ts in respect of the Land Acts should be abolished As to Assistant Com-missioners and Court valuers, they should be permanent officials, paid on a sufficiently liberal scale to enable them to devote the whole of their time to the work of the Land Commission. The Sub-Commissioners should have power, and should in certain cases be required to state cases for the Land Com-missioners. Two lay Commissioners should be present with the Legal Assistant Commissioner at every hearing and every inspection of land The Commissioners reported on the question of "fair rent," thus: "In our view, assuming the law to be, as at present decided, that occupation interest is not to be taken into account in fixing the fair rent of the holding, the annual sum referred to in paragraph A of section 1 of the Act of '96 (which we may call the gross fair rent) is the annual sum at which, after all the circumstances of the case, holding and district have been taken into consideration, the holding in the landlord's hands might reasonably be expected to let from year to year to a solvent and prudent tenant who desired to derive a benefit from the occupation of the tenement and not from its sale; and the fair rent of the hold-ing (or the net fair rent) is the gross fair rent less a reasonable annual allowance in respect of the sum which would represent the present

to the Acts, a deduction is to be made from the rent." With regard to true value, the Commissioners laid down as the two elements to be considered in ascertaining it—(i) the value of the improvements when these are the property of the tenant: (2) a reasonable compensation for the disturbance of the tenant in consequence of the notice of pre-emption. As to advances for purchase, in every case in which landlord and tenant have agreed upon a price, and the landlord is willing that the whole amount should remain as a guarantee fund, the advance should be made as a matter of course

the sum which would represent the present value of the improvements, for which, according John Heary Brodribb, but assumed his present

name by royal patent. He was born at Keinton Glastonbury, 1838, and was educated at Dr. Pinches' school in George Yard, Lombard Street, London. His first appearance on the stage was at the Sunderland theatre in 56, and he afterwards played at Edinburgh, London, Glasgow, Manchester, Liverpool, and elsewhere. His first great success was made in the spring of '70 as Digby Grant in the comedy "Two Roses." In '71 he first appeared at the Lyceum in "The Bells," and then after a series of successes in "Charles I.," "Eugene Aram," and "Richeleu," came that famous representation of "Hamlet" in '74, which created such a sensation, and finally gave him his pre-eminent position on the stage. "Macbeth," "Othello," Tennyson's "Queen Mary," "Richard III.," and "The Lyons Mail, "followed in '75, '76 and '77; and then, in December '78, he took over the sole management of the Lyceum, and opened with "Hamlet" again. In "Othello" afterwards he alternated the characters of Othello and Iago with the late Mr Edwin Booth, and he afterwards played at Edinburgh, London, waids he alternated the characters of Othello and Iago with the late Mr Edwin Booth, and produced and in conjunction with Miss Ellen Terry played in "The Merchant of Venne," "Much Ado about Nothing," "The Cup," "Twelfth Night," "Faust," "The Dead Heart" (89), "Ravenswood" (90), "The Corsican Brothers" (91), "Henry VIII." (92), Tennyson's "Becket" (93), "King Arthur" (93), "Cymbeline" (96), "Madaine Sans-Genc" (97), and "Peter the Great" (98). The interest in the last play was greatly increased by the fact the last play was greatly increased by the fact that the author was Mr. Lawrence Irving, the great actor's son. In '83 he first visited America, aid the experiment answered so well that the visit was repeated in '84, '88, '93, and '95. In '95 Sir Henry was knighted.

Isle of Man. Lies in the Irish Channel, equidistant from England, Scotland, and Ireland. Area, 220 sq. m, pop. 55,608. Divisions are 6 sheadings and 17 parishes. The principal towns are Douglas, Castletown, Ramsey, and Peel. Castletown is the ancient capital, but Peel. Usatietown is the ancient capital, but Douglas (pop 15,719) is the chief town and the seat of government. Physical aspect mountainous, well watered, and exhibiting lovely scenery. There are peculiar breeds of ponies, cattle, cats, etc Government is "home rule" under a Lieutenant-Governor, who, with Coundary Lieutenant-Governor, who, with Countain and Lieutenant-Governor, who were contained to the countain and the counta cil and House of Keys of 24 members, makes up the Tynwald Court. Acts, after assent of the Crown, must be proclaimed on Tynwald Hill. Industries are farming, fishing, mining of lead, copper, iron, zinc, and reception of tourists. The land is in a high state of cultivation. Railways exist between the various towns. The Manx people are a distinct Celtic nationality. Their language and old customs are rapidly disappearing

Italian Dependencies. See Colonies, etc., of European Powers, Erythrea, and Mas-

SOWAH.

ITALY.

Italy is governed by Humbert I., the second constitutional king, who succeeded King Victor Emmanuel in 1878. The legislative authority is exercised by the King in conjunction with a

of 508 Deputies, elected by conditional universal suffrage for a period of five years. Citizens over 21 who pay direct taxes to the amount of about 20 lire, professors, soldiers who have served under arms for 2 years, and others are all qualified to vote. Senators and deputies are unpaid, but trayel free. For the purposes of local government the country is divided into 60 provinces administered by provincial councils, and subdivided into 826x communes. Each commune is presided over by a syndic (who in the larger communes is elected, in the smaller appointed by the King), and has besides a communal council and a municipal council. Agriculture is the occupation of about one-third of the population, wheat, maize and other grains being laigely produced. Wine, silk, and oil, are among the other products. The Roman Catholic is the nominal State religion, and the religion of the vast majority of the people; but after the Pope was deprived of the temporal power the Government passed many acts to finded as to make the civil government supreme, and to secure complete treedom for all creeds. The officials of the Church are appointed by the Pope, but the royal assent is necessary in the case either of a bishop or an archbishop. (See separate articles Pope and Roman Catholic Church) Elementary education is compulsory between the ages of six and nine in most parts of the country, but the law is not rigorously enforced. country, but the law is not ligorousity enforced. There are about 50,000 public primary schools, with scholars numbering in all about 2,550,000.—Area, 110,623 sq. m; pop 31,102,833. Revenue, '07-8, £67,980,364; expenditure, £69,689,374; public debt, '97, £518,141,619; imports, '96, £51,347,066; exports, £46,887,680 See COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN AUMIES EFOREIGN NAVIES and LABQUE MOVERS. ARMIES, FOREIGN NAVIES, and LABOUR MOVE-MENT.

Political Parties. The peculiarity of Italian political parties at the present time is that there cannot be said to be any definite and permanent parties. There are various and permanent parties. groups which are continually changing; but they have no fixed principles. Formerly there they have no fixed principles. Formerly there was a Right and a Left, the former being the party of Cavour, the monarchical and Conservative party, and the latter consisting of the followers of Mazzini, the Liberal and democratic if not Republican party. These two parties, however, have since split up into many parties, however, have since split up into many different combinations. Signor Giolitti in '92 succeeded the Marquis of Rudim, who took office when Signor Crispi, after a long tenure of power, resigned in '91 In '94 Signor Giolitti was defeated, and the disastrous state of the country's finances led to the recall of Signor Crispi by the unanimous wish of the nation. In spite of fierce attacks upon his policy and private life, he remained in office during the year, and at the general election in '95 his supporters numbered 349, while the Opposition of all shades, Conservatives, Radicals, and Socialists, could not muster more than 159 members. The disasters which overtook the Italian forces in Erythrea (q v.), in the early part of '96, however, brought about his downfall. He was succeeded by the Marquis di Rudini, who Senate of about 375 members (composed of the Princes of the royal house who are of age, and of members nominated by the King, who have rendered eminent services to the country, are upwards of forty years of age, and pay taxes to an annual amount of £120); and a Chamber James of Hereford, Lord. See under PEERS.

James, Rev. Dr. H. A., Head Master of Rugby, was b. at Kirkdale in Lancashire. He was educated at Abergavenny and Lincoln College, Oxtord, taking a first-class in Classical Mods. '65, his B.A. with a first-class in Litteræ Humaniores '67, his M.A, St. John's College, 70, the degree of B.D. in 74, and of D.D. in 65. He was President of the Oxford Union in '95. He was President of the Oxford Union Society in '70. He was ordained deacon '70, and oriest '72. He obtained a Fellow ship at St. John's College, Oxford, which he held '90-87 (being elected Honorary Fellow in '93), was tutor '71:2, as. 1start master at Mariborough College '72:5, head master of Rossall School '75:86, and '7110cpal of Cheltenham College '80-95. In March '60 he was appointed to succeed the March 95 he was appointed to succeed Dr Percival as head master of Rugby. From 86 to 89 he was Dean of 5t Asaph, and then was appointed chaplain to the Pishop of St. Asaph

Jameson, Leander Starr, the leader of the famous Raid on the Fransvall in '95, was b in Edinburgh, 1853 H (18 a son of the late Mi. R. W. Jameson, Writer to the Signet, and was educated at London University He took his digree as M B and B Sc. in 75, and M D in 77 Having become associated with Mr Rhodes in the development of South Africa, he was appointed Administrator of Rhodesia in '91, and held the position with distinction till the Raid on the Transvaal, in Dec 95, when he was defeated at Kiugersdorp. He was afterwards given up to the Imperial authorities, and in May 96 tried and sentenged to ten months, imprisonment. After seven months, however, he was released owing to ill-health. In 97 he returned to Rhodesia, and assisted in the development of the country, though not in an official capacity. He was made a C.B. in '94.

JAPAN.

'91), "The Lesson of the Master" ('92), "The Keal Thing" ('93), "Terminations" ('95), "Embarrassments," "The Other House" ('96), "The Spoils of Poynton," "What Maisie Knew" ('97), and "The Turn of the Screw" ('98), have all been successful. in the various districts who pay the highest taxes. In the House of Representatives there are 300 members, elected for 4 years by male citizens over 25 paying national taxes of 15 yen per annum who have resided in their districts for one year at least. Each member is paid about 800 yen (£150) for each session. For local administration the country is divided into 46 districts, each with a governor and an elected assembly. The districts are subdivided into cities and counties. In religious matters absolute freedom is allowed, subject to the preservation of peace and order. The chief forms of religion, however, are Shintoism and Buddhism. Elementary education is compulsory There are about 27,000 elementary schools, and 3,700,000 pupils, while high schools and technical schools are rapidly increasing of workable coal in the empire, one-half of which was found in Yesso, which island also contains large deposits of sulphur. The land is largely held by peasant proprietors, and the chief products are rice and cereals, tea, sugar, and silk, while manufacturers are improving and increasing An important treaty was concluded with Great Britain in Aug. '94. The right of the Japanese to frame their own Customs policy was acknowledged, though pro-visional arrangements were made for a period of twelve , ears It was also agreed that English jurisdiction in the treaty ports should be abolished at the end of five years, when it was estimated that the new Japanese Codes would be completed, and their new judicial tribinals organised. In return Japan agreed to throw all the country open to British traders, instead of only the treaty ports, so soon as the foreign jurisdiction was abolished β. 24,050,600; expenditure, £24,050,600; imports, 97, £21,930,100, exports, £16,313,5 0; debt. 97, £72,855,000. For Ministry see DIPLOMATIC, for Army and Navy see Foreign Armies and

June he was defeated and the House was dissolved. At this juncture the Liberals and Progressives at last joined their forces, and the Marquis Ito at once resigned, and advised the Emperor to accept the principle of party government and to summon Counts Okuma and Itagaki to form a Ministry. This he did. and Itagaki to form a Ministry. This he did, and the new Ministry was accordingly formed with Count Okuma as Premier. The Liberals and Progressives combined command about 200 votes in the House, out of 300. The experiment, however, failed, as will be seen from the History '98 below.

History '98.—The Premier, Count Matsugata, and the Minister of Marine, Admiral Saigo, resigned office (Dec 27th), finding themselves almost without support in the House

selves almost without support in the House of Representatives. The rest of the Ministry followed suit, and the Diet was then dissolved After an attempt at a coalition between Count Okuma and the Marquis Ito had failed, the latter constructed a Ministry independent of party divisions, with Baron Nishi as Foreign Minister (Jan. 12th) It was reported from Yokohama that an agreement had been concluded with Russia (April 28th), Russia pledging herself not to impede Japanese industry or commerce in Korea, and both countries agreeing not to send their subjects to Korea except by mutual consent. The Japanese Minister in by mutual consent. The japanese minister in London received the final payment in connection with the Chinese war indemnity, a sum of over £11,000,000, at the Bank of England (May 8th) Wei-hai-wei was shortly after handed over to the British forces. Government Bills providing for increased taxation, levied chiefly on land and alcohol, and for extending the franchise so as to increase the electorate from 40,000 to 2,000,000 were introduced. Proof of the revival of Japanese influence in Korca was afforded by the Government's decision to advance the money to enable a Japanese syndicate to acquire and complete the railway from Seoul to Chemulpo (June 31d) The Marquis Ito resigned office (20th) and, in view of a chalition between the Liberals and Progressives, who thus commanded a large majority in the House, advised the Emperor to frankly accept the principle of party govern-ment. His advice was taken, and Count Okuma became Premier (28th) The Government note fied the Powers that the new Commercial and Civil Codes were put into operation as from July 1st and 16th (July 19th) A split in the Cabinet occurred in Ootober over the appointment of a successor to the Minister of Educament of a successor to the minister of Educa-tion, and as it proved impossible to compose the dispute all the Ministers resigned (31st) This was the ignominious end of the first attempt at party government. A new Cabinet, independent of parties, was then formed by the

Independent of parties, was then formed by the Marquis Yamagata (Nov 6th)

Japan, Emperor of. See Mursu Hiro.

Java. An island of the Asiatic Archipelago, the chief seat of Dutch power in the East Indies. Capital, Batavia, 500,000. Other chief towns, Samarang and Sourabaya. Experts: coffee, sugar, tea, rice, indigo, pepper, tobacco, etc. Divided, with the adjacent island of Madura, into 22 Residencies, each administered by a Resident and his subordinates under the Governor-General of Dutch East India. Land is government property, except in the west, and is let on hereditary lease. Most of the coffee plantations are directly

cultivating coffee instead of paying taxes. The authorities take the whole of the pro-The authorities take the whole of the produce at the fixed price of 15 florins (£1 58.) for every picul (133½ lb.). This system still obtains in part, but a poll tax of one florin is also imposed on the natives. Area of Java and Madura 50,554 sq. m.; pop. about 25,500,000. See East India, Duich, and Diplomatic.

Jebb, Professor M.P. See under Commons. Jenner, Sir. Wm, Bart., G.C.B., M.D., F.R.S., was b. at Chatham 1815. Ed. at Univ. Coll., M. D. Lond. '44. Has held successively the appointments of Professor of Pathological Anatomy in Univ. Coll.; Physician to the Hos-pital for Sick Children, Physician to Univ. Coll. Ho-pital, Professor of Clinical Medicine, and Professor of the Principles and Practice of Medicine in Univ. Coll, and is Physician in Ordinary to the Queen and the Prince of Wales. whom he attended with Sir William Gull in the serious attack of typhoid fever which prostrated H.R.H. in '71. Sir William Jenner also attended the Prince Consort in his last illness. His eminence as a physician dates from the time of his discovery of the symptoms which differentiate typhus from typhoid fever. President of the Royal College of Physicians '81-88. Address Greenwood, Durley, Bishop's Waltham, Hants.

Jersey. One of the Channel Islands (q.v.). Jeune, Sir Francis Henry, K.C.B., is the eldest son of a former Bishop of Peterborough, and was b. in 1843 Ed. at Balliol Coll , Oxford, where he obtained 1st Class in Classical Mods. where he obtained ist class in Classical Mods. 63, and 1st class in Lit. Hum two years later. He also was successful in obtaining the Stanhope prize in 63, and the Arnold prize in 67. He was called to the bar of the inner Temple 68, and took silk in '88. In connection with the civil action of the Tichborne claimant he acted as junior counsel. In ecclesiastical law he long enjoyed a considerable reputation, and appeared in the Lincoln case in '90. Succeeded Lord Hannen, in Jan. '91, as Judge of the Probate, Divorce, and Admiralty Division. Was knighted on his accession to the judicial bench On the decease of Sir C P. Butt, in '92, Sir Francis succeeded him as President of the Probate Division, and was made a Privy Coun-Advocate-General, and was made a rivy councillor. He was afterwards appointed Judge-Advocate-General, and was made K C.B in 97 for services in that office. Lady Jeune has long been an energetic philanthropist, and, with Sir Francis, has occupied a noteworthy position in the social life of London. She published "Lesser Questions," a volume of essays, in '94. Address Arlington Manor, Newbury.

Jews. The numbers of jews in the various countries of Europe, according to the "Jewish rYear Book" are as follows: Russia, 4,50,000;

rtear Book are as follows: Russia, 4,500,000; Austria-Hungary, 1,360,000; Germany, 567,000; Roumania, 300,000; Turkey, (about) 120,000; Holland, 97,000; France, 72,000; England, 101,000; Italy, 50,000; Switzerland, 6059; Servia, 4652; Greece, 5792. Total in Europe, 7,701,266. Outside Europe no satisfactory enumeration is possible, but it is probable that Asia contains 300,000; Africa, 350,000; the Americas, 700,000; and Australia, 15,000. There are probably about eleven millions of Jews in existence at the present date, and of late years the number living in Palestine has noticeably increased. The Jewish colonies in the Holy Land What Covernment management, the matter to the land of their sucretors as tillers of the soil. A movement for founding a Jewish State in Palestine has been started by Dr. Theodor Herzl, of Vienna, and a conference on the question was held at Basle in August '98. The number of Jews in London is estimated at 65,000, and in other parts of Great Britain and Ireland at 35,000. Until very recently Jews were restricted in their rights throughout the world; and those of eastern Europe, Africa, and the East still labour under many disabilities, which it is the object of the "Alliance Israelite" of Paris, and of similar societies in Germany, Austria, and England (Anglo-Jewish Association, 85, London Wall, E.C.), to remove. The persecution of the Jews in Russia has become less acute, but the overcrowding within the pale of Jewish estileovercrowding within the pale of Jewish settlement (owing to expulsions from other parts of Russia) causes a high rate of mortality, beyond all previous modern experience among Jews. In England, full emancipation was granted to the lews in '58 They possess a special Jewish Board of Guardians (Middlesex Street Street, Bishopsgate), which provides for indigent Jews, and expended £45,573 in relief during 97 to 4366 applicants, a large orphan asylum at West Norwood, in addition to many other charities, and there are Jewish to many other charities, and there are jewish wards in several hospitals. There are six large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields, the largest and one of the most successful elementary schools in the world. Similar schools and charities are connected with the principal provincial con gregations. The most important are those of Liverpool, Manchester, Birmingham, Leeds, Glasgow, Newcastle, Hull, and Sheffield The spiritual wants of Jews are provided for in the Last-End by a number of hebras or minor congregations, which have been united (Fede ration of Synagogues); while fourteen of the ration of Synagogues); while fourteen of the larger synagogues are organised by the United Synagogue (2, Charlotte Street, Portland Place, W.). Ministers for these are trained at the Jews' College (Favistock House, Tavistock Square), which has a very extensive library of works dealing with Jewish subjects. Another library specially noteworthy for Hebrew MSS. is situated at the Beth Hamidrash (St. James' Place, E.C.), where the sittings of the Beth Din, or seclesives that tribunal are held at which points ecclessastical tribunal, are held, at which points of Jewish law are decided. Ecclesiastical of Jewish law are decided. Ecclesiastical matters are under the control of the Chief Rabbi, Dr. Hermann Adler (q v.). The mandates of the Chief Rabbi are only binding on the so-called Orthodox Jews, while there are "Beform" congregations at Upper Berkeley Street, London, Manchester and Bradford. There has been a marked rapprochement of recent years between these two bodies. There are beautes some one Sprangh and Portuguese. are, besides, some 3000 Spanish and Portuguese Jews (Sephardim) in London, who are under the spiritual charge of the Rev.Dr.Gaster and whose spiritual charge of the Rev. Dr. Oaster and whose ritual slightly differs from that of the more numerous German and Polish Jews (Ashrenazim). As a religious term "jew" has nowadays the very vaguest connotation, ranging from the superstition of the Chassidim of Russia and Calvia of the advanced agreement of the Solicia to the advanced agnosticism of the Society of Ethical Culture in New York. Jews have some special enactments connected with registration of their marriages, modifications of the Factory Acts to suit their Sabbath, etc mutual. These, and other matters likely to affect them, are looked after by the Jewish Board of £309,533,947.

Deputies (36, Finsbury Circus). There are two Jewish weeklies, of which the most important is The Jewish Chronicle (2, Finsbury Square, E.C. - Publisher, Asher I. Myers).

Jibutil. See French Somaliland.

Joachim, Joseph, the distinguished violinist, was born near Presburg, in Hungary, in 1831. Already famous as a youthful prodigy, he went to Leipzig in '43, to the Conservatoire previously founded by Mendelssohn, who saw his genus and encouraged him. He first saw his genius and encouraged him. He first came to London in '44, and has since annually visited us. He has been principal violinist of the Monday and Saturday Popular Concerts from their very commencement. In '69 he became the head of the newly developed Academy of Music at Berlin. He has written Academy of Music at Berlin. He has written several works for his instrument and the orchestra, the chief being the Hungarian Concerto. The University of Cambridge conferred on him the degree of Mus. Doc. in '77. and he was afterwards given the Hon. D.C.L. of Oxford. In celebration of the fiftieth anniversary of his first appearance in public, Herr Joachim was, on March 17th, '89, presented with a magnificent violin purchased by sub-scribers to a fund of which the Duke of Edinburgh was President.

JOINT STOCK COMPANIES.

A Parliamentary return is annually issued giving full particulars as to all joint stock companies. It denotes whether the comcompanies panies are limited or unlimited, and also the number of shareholders in each of the said companies at the date of the last return, and whether stil in operation or being wound up; the total number having their registered offices in the city of London, or within five miles of the General Post Office, and the total number and the paid-up capital of all registered com-panies which are believed to be carrying on business at the present time. This return can business at the present line. I his return does not be obtained from Messrs Eyre & Spottiswoode, East Harding Street, E.C., and 22, Abingdon Street, Westminster (price 1s 6d.). The following table shows the recent **progress** of the joint stock company movement .-

			i	7	TOTAL.

1896			.	23,728	1,285,042,021

During the year ending Dec. 31st, '96, there were registered in England 4291 companies, 136 in Ireland and 308 in Scotland, or a total of 4735, of which 4658 were new companies with limited liability, 2 new unlimited companies, 6 were old limited companies, 2 old unlimited, 59 were limited by guarantee, and 8 were mutual. The nominal capital of the 4735 companies registered during the year was

Jones, Henry Arthur, the dramatist, was b. Sept. 20th, 1851, at Grandborough, Bucks. His early dramatic attempts included "Only Round the Corner," "A Clerical Error," "His Wife," and "A Bed of Roses." In Nov. 32 Mr. Wilson Barrett produced "The Bilver King" at the Princess's Theatre, and this greatly increased Mr. Jones's reputation. "Breaking a Butterfly" and "Chatterton" (84), "Saints and Sinners," "Hoodman Blind," "The Lord Harry," The Noble Vagabond," "Hard Hit," and "Heart of Hearts," which followed, testify to the energy with which he prosecuted his dramatic labours "Wealth," at the Haymarket in April '89, was followed by "The Middleman" (Aug '89). A play of daring originality, called "Judah" (90), and "The Daneing Girl" (91), added greatly to the estimation in which he washeld. In Nov. '92 "The Crusaders," was produced at the Avenue Theatre; "The Tempter," Mr. Jones's first essay in blank verse, at the Haymarket in '93, "The Masqueraders" at the St. James's, and "The Case of Rebellious Susan" at the Criterion in '94, "The Inumph of the Philistines" at the St James's in '05, "Michael and his Lost Angel' at the Lyceum, and "The Rogue's Comedy" at the Carrick in 96, "The President and "Ihe Rogue's Comedy" at the Larrs" at the Criterion in '97 A book on "The Renascence of the Drama" was published by him during '05 Addiess Townshend House, North Gate, Regent's Lark.

North Gate, Regent's Fark.

Journalists, The Institute of, was established on March 9th, 1889, by conversion of the National Association of Journalists, a professional society founded in '84, and incorporated by royal charter in March '90. The Charter, by which journalism is formally constituted one of the professions, directs and declares that the members of the Institute 'gold for ever hereafter he by where of these "shall for ever hereafter be, by virtue of these presents, one body politic and corporate " objects of the listitute include the devising of examination or other practical tests for candidates for membership, "the promotion of whatever may tend to the elevation of the status and the improvement of the qualifications of all members of the journal-istic profession," ascertainment, and where necessary amendment, of the law and practice affecting the discharge by journalists of their professional duties, and the promotion by all reasonable means of the interests of journalists and journalism. Care has been exercised in drawing up the constitution of the Institute to guard against the possibility of its operating at any future time in such a way as to exclude from the work of the newspaper press any honest and capable service, from whatsoever source it may come; and the decentialisation of authority which attends the system of organisation by branches (called "Districts") and "Sub-districts") is regarded as an efficient safeguard against that possibility. Although the central office and committee rooms are in London, there is no fixed or localised centre of authority; the council meetings and the annual conference both being movable, and held from time to time in the chief towns throughout the country At the date of conver-sion into the Institute there were about 1200 members, since increased to over 3300, organised in 54 districts and sub-districts, and including nearly all the well-known journalists of London and the provinces (including Scotland and Ireland), and all the most distinguished

foreign correspondents. The Charter, moreover, confers upon the Institute power to affiliate branches in India and the colonies and in foreign countries. The annual conference in '98 was held in the University College, Nottingham. Sir Wemyss Reid was elected President for '98-9. The Vice-Presidents are: Mr A. W. à Becket, F.J.I., London; Mr. Thomas Arden, Lincoln; Mr. W. S. Camperon, F.J.I., Leeds, Mr. Sam S. Campion, J.P., F.I.I., Northsmpton; Mr. F. W. Dunkleby, F.J.I., Richmond; Mr. Samuel J. Fisher, London; Mr. L. Gilbertson, F.J.I., Bathgate; Capt G. F. Gratwicke, F.J.I., Exeter; The Right Hon James Henderson, M.A., Lord Mayor of Belfast; Mr. Richard Ivens, Nottingham; Mr. P. Linakei, Leamington, Mr. H. Mate, F.J.I., Bournemouth; Mr. Alexander Paul, F.J.I., London; Mr. W. Ritchie Enniskillen; Mr. A. Steven, Berwick-upon-Iweed. Hon, Treasurer, Mr. Frank Lloyd. Legal Advisers, Mr. J. R. Fisher, B.A., Counsel; and Sir Albeit K. Rollit, M.P., Solicitor Auditors, Mr. Arthur J. Cook and Mr. J. H. Warden Hon Secretares, Mr. A. W. a Beckett and Mr. G. H. Kynasion Sincetary of the Institute, Herbert Cornish. Scientific Contral Office, 78, F1-et St., London, E.C.

Smith, Sir J. Rigby, Sir J. W. Chitty, Sir R. II. Collins, and Sir R. Vaughan Williams (Chancery Division: Lord Chancellor, Sir F. North, Sir J. Stirling, Sir A Kekewich, Sir R. Romer, and Sir E. W. Byrne. Queen's Bench Division: Lord Russell, Sir H. Hawkins, Sir J. C. Mathew, Sir J. C. Day, Sir A. Wills, Sir W. Giautham, Sir J. C. Lawrance, Sir K. S. W. Giautham, Sir J. C. Lawrance, Sir K. S. E. Ridley, Sir J. C. Bigham, Sir C. J. Darling, Sir A M. Channell, and Sir W. G. Phillimore, Bart. Probate, Divorce and Admiralty Division: Sir F. H. Jeune (President), and Sir J. G. Barnes. Court of Arches: Lord Penzance. Consistory Court: Mr. T. H. Tristram, D.C.L. Bankruptoy Court: Sir R. S. Wright Railway and Canal Commission: Mr. Justice Wurght, Lord Trayner, Mr. Justice Murphy, Sir F. Peel, and Viscount Cobham

Judicial Separation. The law and practice of indicial separation is founded on that of the oil et clesiastical courts. It was in their power to determine all matrimonial causes, to grant a divorce a mensa et thoro; releasing the husband and wife from the duty of cohabitation, but preventing them both from marrying again. By the "Matrimonial Causes Act, 1857, it was provided that such divorces should no more be granted, but that in every case in which a decree might have been made for a divorce a mensa et thoro; a decree might thenceforwards be made for a judicial separation. A decree for judicial separation may be obtained either by the husband or by the wife on the ground of adultery or cruelty, or desertion without cause for two years or upwards, or non-compliance with an order for the restitution of conjugal rights. The court has power to order such

alimony for the wife, and to make such provision for the custody, maintenance, and education of the children of the marriage, as it may think proper; and can give the custody to the guilty party if for the benefit of the children. The separation may be ended at any moment by the deliberate consent of the parties separated to a renewal of cohabitation What is equivalent to a judicial separation can now be granted to a wife only by magistrates in petty sessions in frany cases, by virtue of the Summary Juri-diction Act, 65, but alimony under this Act is restricted to £2 a week. The relief may be granted to any married woman whose husband shall have been arties separated to a renewal of cohabitation convicted summarily of an aggravated assault upon her, or whose husband shall have been convicted of an assault upon her and sentenced to pay a fine of more than five pounds or to a term of imprisonment exceeding two months, or whose husband shall have deserted her, or having been guilty of persistent cruelty to her, or wilful neglect to provide reasonable main-tenance for her or her infant children, shall by such crueity or neglect have caused her to leave and live separately and apart from him The court that can grant the separation is a court of summary jurisdiction acting within the district in which any such conviction has taken place, or in which the cause of complaint shall have arisen, or in case of conviction on indictment the convicting court. The court, besides granting what is in effect a judicial separation, may make provision that the legal custody of any children of the marriage, while under the age of sixteen years, be committed to the wife, and that the husband shall pay

to the applicant personally, or for her use to any officer of the court or third person on her behalt, such weekly sum not exceeding two pounds as the court shall, having regard to the means both of the husband and wife, consider reasonable. The court may also provide for payment by the applicant or the husband, or both of them, of the costs of the court and such reasonable costs of either of the parties as the court may think fit. No orders can be made under this Act on the application of a married woman if it is proved that such married woman has committed an act of adultery unless the husband has condoned, or connived at, or by his wilful neglect or misconduct conduced to such act of adultery. The order may be varied from time to time on the application of the husband or wife and the allowance increased or diminished, and the order shall be discharged if the woman upon whose application it was made voluntarily resumes cohabitation with her husband, of commits an act of adultery. The payment of any sum of money directed to be paid by an order under the Act may be enforced in the same manner as the payment of money is enforced under an order of affiliation-that is. by warrant issued for the arrest of the husband by the magistrates of the district in which the woman resides. The magistrates may refuse to deal with any case that they think would be more fittingly dealt with by the Divorce Court, and there is an appeal to the Divorce Court. Kew Observatory, Old Deer Park, Richmond, Suriey Superintendent, C Chree, Sc D, F R.S. Was built by George III, in preparation for the transit of Venus in 1769, to serve as a substitute for an older observatory connected with Kew Palace −associated historically with the discovery of aberration and nutation—which had fallen into disrepair. In 1843, the Government having determined to discontinue its maintenance, the building was handed over to the British Association for the Advancement of Science, under the title of the Kew Observatory. The connection between the British Association and the Kew Observatory lasted until '71. Mi J. P. Gassiot, chairman of the Kew committee, then made the munificent offer to give an endowment of £10,000 if the Royal Society would nominate a committee who should have entire control over the nanagement of the observatory, subject to the condition that magnetic and meteorological observations should be continued in perpetuity. This offer was accepted, and the use of the Kew Observatory is now granted by Her Majesty at a nominal rent te the Royal Society. It possesses a valuable collection of verifying apparatus and standard instruments, many of which have been purchased by grants made by the Royal Society and the British Association. In addition to its observational work in magnetism, electricity and meteorology.

the observatory has attained a high reputation at home and abroad for the trustworthiness of its verifications and for its many services to experimenters. It is subsidised as the central station of the Meteorological Office for their system of self-recording observations; it serves as a place where new instruments intended for other observatories can be tested beforehand, as a school where intending observers can be practically trained, and as an experimental laboratory where the efficiency of new designs of meteorological instruments may be thoroughly tried. A large number of thermometers, barometers, magnetic instruments, aextants, watches, chronometers, telescopes, and a variety of other forms of apparatus, are tested annually, suitable fees being charged to defray the cost of the examination. In '92 the study of photographic lenses was undertaken, the method of examination being largely due to Major Darwin, R.E., who likewise devised the testing apparatus. In '95 a small laboratory was built, from the designs of Mr. W. N. Shaw, F.R.S., and Mr. E. If Griffiths, F.R.S., for an investigation into the capabilities of platinum resistance thermometers.

of platinum resistance thermometers.

Eniva. A state in Central Asia lying to the south of the Sea of Aral, and bounded on the east by the Oxus and on the south and west by Transcaspia. It has been subject to Russia for about two hundred years, but in '72 it became definitely a Russian vassal state. The reigning Khan is Seyd Mahomed Rahim, who succeeded in '65. The inhabitants are Mahomedan Sunnis.

Area, 22,320 Sq. m.; pop. 700,000 The chief products are silk and cotton. See Turkestan Kiao Chau, Germany's new possession in the province of Shantung, was occupied by her

Kiao Chau, Germany's new possession in the province of Shantung, was occupied by her in Nov '97, and formally ceded to her on a 99 years' lease by China in Jan '98 The territory conceded with the town stretches about 160 miles along the coast, and extends inland to an average distance of 20 miles. A dock is being built, and the place is to be made a fortified coaling station, though for commercial purposes the port has been declared free Railways are being constructed inland to Tsi-nan-tu and Ichow See China (map)

Kimberley. The name of the capital town of the province of Griqualand West, in Cape Colony, which town is the centre of the diamond diggings; also the name of the chief gold district of Western Australia. See GOLD FIELDS AND PRODUCTION.

King of Arms. See Garter King of Arms. King of Arms. Seing's College, London. Established by royal charter Aug 14th, 1829, opened 31; charter annulled by Act of Parliament May 19th, '82, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity, as the same are inculcated by the Church of England." The visitor is the Archbishop of Canterbury, and among the perpetual governors are the Lord Chancellor, the Home Secretary, the Lord Mayor of London, and the Lord Chief Justice of England. The Council also comprises twenty-four elected members. There are eight faoulties and departments in the College—viz., theology, literature, science, engineering, medicine, ladies', civil service, and the school. To students who have acquired a certain degree of proficiency it grants, under suthority of its Act of Parliament, the diploma of "Associate of King's Cellege." to which

is attached the privilege of free admission to all the classes in the department from which they have been elected, as also the use of the college libraries and museums. Under the conscience clause, adopted by the Council m '96, students in all faculties, except theology, may claim, on conscientious grounds, exemption from attendance at chapel and at religious instruction, nor does such exemption debar them from any associateship, scholarship, prize, or other privilege of the College. The associates of the theological department in Holy Orders wear a distinctive hoodviz., black poplin, edged on the outside with a quarter of an inch, and on the inside with one inch, of mauve silk. The ladies' department is conducted in Kensington Square; certificates of proficiency are granted on passing the examinations, after a regular attendance of three or more terms. The students of the evening or more terms. The students of the evening classes, which are held in each faculty, from October to March and from April to June, receive certificates The civil service department prepares for the excise, customs, Post Office, the navy, and other examinations; women are also prepared. The whole college is under the supervision of the Principal, Rev Dr Archibald Robertson. Students are either matriculated or non-matriculated. The former are required to attend the full prescribed course in each faculty, and are eligible for the Associateship; the latter attend only such classes as they may select. In the term preceding the annual report issued in May '98, there were 92 students in theology (62 matriculated), 189 in arts and laws (58 matriculated), 577 in science and engineering (70 matriculated), 154 in medicine (132 matriculated), also 429 ladies In addition to the above 1441 students, 1000 attended the lectures on Banking, 1536 were in the Civil Service classes, 200 boys attended the school, now removed to Wimbledon Common total under education, 4177.

Kipling, Rudyard, was b. in Bombay 1865, and is the son of Mr G Lockwood Kipling, C.I.E. He was educated in England, and in 84 he went out to India and joined the staff of the Civil and Military Gazetle, Lahore, for which paper his earlier tales were written. He has depicted Anglo-Indian and military life in "Soldiers Three," "Black and White," "Plain Tales from the Hills," "Story of the Gadsbys," "Life's Handicap," etc. "The Naulakha," published in '91, and written in collaboration with Wolcott Balestier, is not of such high merit as the work that is all his own "Many Inventions," a collection of stories, appeared during '93, and a good deal of verse in various magazines. In '94" The Jungle Book "was published, followed in '95 by "The Second Jungle Book." His first book of verse, "Barrack Room Ballads," appeared in '92, and in '96 another volume, "The Seven Seas." In '97 he published "Captains Courageous," and in '98, "The Day's Work."
